130793778	Mental Health - Psychiatry Note	Patient's Report of Current Functioning	As I approach her cell, I see she is walking around naked. not currently screaming. I greet her and she tells me "you lied to me. you have ativan here. a nurse told me." I advise her again that ativan is not on the psychiatric formulary. I ask her what she was thinking about before she started getting worked up this morning and she tells me "my court case". This afternoon the nurse calls to say that this patient is digging her fingernails into her skin so have ordered stat abilify 15 mg x1.	Cuka, M.D., M.B.A., Gabriel	01-29-2021 1:36 pm

130793778	Mental Health - Rounds / Follow -up Note	Encounter Summary	Client was seen on SPI in cell 13B 09. She was seen through the cell door. She was naked and at the cell door. She appeared frail and underweight. She was seen by medical and referred to mental health. She is a 65 year old white female that appeared her stated age. She presented as a disinterested historian and informant. Stated her charge is domestic violence. Presenting mental health symptoms at time of interview included pacing and anxiety. She reported her primary mental health complaint as anxiety. Currently the patient is taking Prozac, Melatonin, Remeron, and Zyprexa in the OK County Jail. The MAR indicated she is medication compliant although she refused her medications yesterday. She denied any side effects from the medications. Stated the medications are now effective on symptoms. She appeared restless. She was resting but did briefly wake to complete interview. Stated she is drinking her Boost. She was minimally cooperative with interview. Awake and alert and she was awakened from her sleep. The officer stated the patient has been just sleeping. Kinetics normal. No distress. She denied suicidal thoughts or intent to harm self. No erratic or impulsive behavior. Line of reasoning was logical. Minimal verbalization. Oriented to person, place, time and situation. No overt signs of psychosis. No perceptual disturbances. Memory was not formally evaluated. Expressive and receptive language normal. Did not appear to be completing activities of daily living. Security stated she will refuse showers. Mildly anxious but stable. Sleep and appetite was poor. Eye contact poor. Client presented as low risk for self harm at time of interview.	Hanes, MAT, ATR-BC, LPC, Michael	03-21-2021 9:42 am
