- Class I products receive a 3% preference.
- Class II products receive a 5% preference.
- Class III products receive a 7% preference.

When the bids are evaluated, the preference percentage will be deducted from the product price. If a bidder fails to specify the brand being offered, no preference will be given. SEC. 4.11 EXTENSION OF PRICES

In case of error in the extension of prices in the bid, the unit prices will govern; in a lot bid, the lot prices will govern.

SEC. 4.12 METHOD OF AWARD

Award will be made **by lot** to the lowest responsive and responsible bidder. There are **twenty-one (21)** lots. In order to be considered responsive for a lot, all items within the lot must be bid, to include the **Staffing** and **Equipment** tables. Bidders may bid on one or multiple Lots. If awarded more than one Lot **The Contractor must be capable of responding to all Lots awarded to them simultaneously.**

SEC. 4.13 CONTRACTOR SELECTION PROCESS

Once the contracts are established this selection process will be used. When the state needs to order the product or service, the lowest priced contractor for that location will be contacted first. If, for any reason, the lowest contractor is not available to perform the needed service, the state will contact the next lowest priced contractor for that location. This process will continue until a contractor who can perform the service is located. The location of the contractor initially contacted will be determined by the starting location of the call-out. For example, if there was a need to transport a person from Anchorage to Fairbanks and then guard the person for two days in Fairbanks, the agency would contact Anchorage contractors, even though a substantial portion of the actual service would be performed in Fairbanks.

SEC. 4.14 NOTICE OF INTENT TO AWARD

After the responses to this ITB have been opened and evaluated, a tabulation of the bids will be prepared. This tabulation, called a Notice of Intent to Award, serves two purposes. It lists the name of each company or person that offered a bid and the price they bid. It also provides notice of the state's intent to award a contract(s) to the bidder(s) indicated. A copy of the Notice of Intent will be sent to each company or person who responded to the ITB. Bidders identified as the apparent low responsive bidders are instructed not to proceed until a Purchase Order, Contract Award, Lease, or some other form of written notice is given by the procurement officer. A company or person who proceeds prior to receiving a Purchase Order, Contract Award, Lease, or some other form of written notice from the procurement officer does so without a contract and at their own risk.

Failure to provide such specifications and descriptive literature may be cause for rejection of the offer.

SEC. 5.07 BRAND SPECIFIC

Certain items may be designated brand specific. When an item is designated no substitutions for the brand and model specified will be allowed.

All other bid information will be held in confidence during the evaluation process and prior to the time a Notice of Intent to Award is issued. Thereafter, bids will become public information.

The Office of Procurement and Property Management (OPPM), or their designee recognizes that some information a bidder submits might be confidential under the United States or the State of Alaska Constitution, a federal statute or regulation, or a State of Alaska statute: i.e., might be confidential business information (CBI). *See, e.g.*, article 1, section 1 of the Alaska Constitution; AS 45.50.910 – 45.50.945 (the Alaska Uniform Trade Secrets Act); *DNR v. A contract resulting from this ITB is governed by the laws of the State of Alaska. To the extent not otherwise governed by Section 5.15 of this ITB, any claim concerning the contract shall be brought only in the Superior Court of the State of Alaska and not elsewhere.

A copy of the decision will be furnished to the protester by certified mail, fax or another method that provides evidence of receipt.

All bidders will be notified of any protest. The review of protests, decisions of the procurement officer, appeals, and hearings, will be conducted in accordance with the State Procurement Code (AS 36.30), Article 8 "Legal and Contractual Remedies."

Priority Level ROADS

- Target conditions within 24 hours of call-out to proceed on route cycle (Performance Target **B/C**; see attached Table) should prevail.
- The primary goal will be to remove excess snow and snowpack from the all lanes of travel, including turn pockets, and shoulders. Plow roads to pavement edge.

Priority Level SIDEWALKS

- Clear Paths/Sidewalks to acceptable limits within 24 hours of call-out to proceed on route cycle.
- The primary goal will be to remove excess snow and snowpack from the Paths/Sidewalks. Clear Paths/Sidewalks to edge of the Paths/Sidewalks.

Performance Target	Performance Target Description	Illustration
<p>A (Good Winter Driving Conditions)</p>	<p>Bare pavement is the primary goal. Good winter driving conditions exist when snow and ice have been removed from the driving lanes and excessive loose snow has been removed from the shoulders and centerline of the highway. Short sections of ice and packed snow are acceptable and can be expected within the driving lanes between the wheel paths, as well as on centerline. Bare pavement may not be possible in the Northern and Central Region’s during periods of extreme cold weather. Generally loose snow has been cleared and traction is good for most vehicles properly equipped for winter driving. If required for traction, 100% of roadway has sand present.</p>	
<p>B (Fair to Good Winter Driving Conditions)</p>	<p>Roads are passable with varying conditions. Drivers may encounter some standing water, packed snow, and icy patches covering the surface. Generally loose snow has been cleared from the travelway and traction is adequate for most vehicles properly equipped for winter driving. If required for traction, sand is applied to hills, curves, intersections, and bridge decks. Performance target B represents a fair to good level of service, which ranges from targets of bare pavement as much as possible on higher-standard or highly traveled highways to snow-pack or icy conditions on northern region roads as well as on lower-standard or low-volume roads. Traffic moves at reduced speed, with isolated slowdowns or delays.</p>	
<p>C (Fair to Poor Winter Driving Conditions)</p>	<p>Roads are generally passable with varying conditions. Drivers may encounter some standing water, loose snow, snow drifts, packed snow, and icy patches covering the surface. Patches of snow or ice exist even on the highest-standard roads, and these conditions may degenerate to predominately snow-packed or icy conditions throughout, with accompanying slowdowns or delays. On lower-standard or low-volume roads the surface is snow-covered (up to 2”) with substantial traffic delays.</p>	
<p>D (Poor Winter Driving Conditions)</p>	<p>Travel is challenging for most vehicles properly equipped for winter driving. Moderate snow accumulation on roads may be up to 4”. Performance target D represents a marginal level of service where traffic moves slowly with substantial delays. Traction is marginal even for vehicles properly equipped for winter driving.</p>	
<p>E (Hazardous Winter Driving Conditions)</p>	<p>Travel is not advised. Considerable snow accumulation on roads may be 4” or more. Drivers may encounter snow drifts, berms, freezing rain, and glare ice. Traction is extremely poor even for vehicles properly equipped for winter driving.</p>
