

OVERVIEW

The study was conducted for CNN by SSRS with representative samples of registered voters in Nebraska's 2nd Congressional District (n=749), and North Carolina (n=931). SSRS is an independent research company. Surveys were obtained online and by telephone from **September 20-September 25, 2024**. More information about SSRS can be obtained by visiting www.ssrs.com.

Unless otherwise noted, results are reported below for likely voters. Results for each state have the following margins of sampling error at the 95% confidence level and design effects:

	Registered Voters		Likely Voters	
	Error Margin	Design Effect	Error Margin	Design Effect
Nebraska 2 nd CD	+/- 4.0 pts.	1.25	+/- 4.0 pts.	1.23
North Carolina	+/- 3.9 pts.	1.48	+/- 3.9 pts.	1.47

EMBARGOED FOR RELEASE:

Friday, September 27 at 12:00 p.m.

NOTE ABOUT RESULTS

Question text noted in parentheses was rotated or randomized. Values less than 0.5 percent are indicated by an asterisk (*).

NOTE ABOUT CROSSTABS

Surveys were conducted among a representative sample of registered voters in each state. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "SN" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

V9. How motivated, if at all, would you say you are to vote in this year’s election for president? [RESPONSES ROTATED IN ORDER FOR HALF/IN REVERSE ORDER FOR HALF]

Registered voters	Extremely motivated	Very motivated	Somewhat motivated	Not too motivated	Not at all motivated	No opinion
Nebraska 2 nd CD	70%	14%	10%	3%	2%	*
North Carolina	70%	14%	10%	4%	2%	*

P4. Suppose that the presidential election were being held today and you had to choose between Kamala Harris and Tim Walz as the Democratic Party's candidates, Donald Trump and JD Vance as the Republican Party's candidates, Cornel West and Melina Abdullah, as independent candidates, Jill Stein and Butch Mare, the Green Party's candidates and Chase Oliver and Mike ter Maat, the Libertarian candidates. Who would you be most likely to vote for?

P4a. If the presidential election were being held today and you had to choose between Kamala Harris and Tim Walz as the Democratic Party's candidates, Donald Trump and JD Vance as the Republican Party's candidates, Cornel West and Melina Abdullah, as independent candidates, Jill Stein and Butch Ware, the Green Party's candidates and Chase Oliver and Mike ter Maat, the Libertarian candidates, as of today, do you lean most toward: [ITEMS ASKED IN RANDOM ORDER; CANDIDATES LISTED AS NA BELOW WERE NOT ASKED IN THE INDICATED STATE]

P4/P4a COMBO TABLE: LIKELY VOTERS

	Kamala Harris and Tim Walz	Donald Trump and JD Vance	Cornel West and Melina Abdullah	Jill Stein and Butch Ware	Chase Oliver and Mike ter Maat	Other	Do not plan to vote	No opinion

A1. Do you approve or disapprove of the way Joe Biden is handling his job as president?

	Approve	Disapprove	Not sure	No opinion
Nebraska 2 nd CD	44%	56%	*	*
North Carolina	41%	58%	*	*

(Nebraska 2nd CD likely voters)

Q13. As you may know, Nebraska awards two of its five electoral college votes for president to the statewide winner, with the other three awarded separately to the winner of each of the state’s congressional districts. In some years, this means that the state’s electoral votes are split between multiple candidates for president. Do you think that Nebraska should keep its current system for awarding electoral votes or switch to a system where the statewide winner receives all of the electoral votes? **[ITEMS ASKED IN RANDOM ORDER]**

LIKELY VOTERS

	Keep its current system for awarding electoral votes	Switch to a system where the statewide winner receives all of its electoral votes	No opinion
Nebraska 2 nd CD	60%	40%	*

(North Carolina likely voters)

FV1. We’d like to get your overall opinion of some people and groups in the news. For each, please indicate if you have a favorable or unfavorable opinion of these people or groups – or if you have never heard of them.

LIKELY VOTERS

Mark Robinson	Favorable opinion	Unfavorable opinion	Never Heard of	No opinion
North Carolina	27%	53%	7%	14%

Josh Stein	Favorable opinion	Unfavorable opinion	Never Heard of	No opinion
North Carolina	40%	23%	12%	24%

MORE ON METHODOLOGY

A total of n=1,680 registered voters in North Carolina and the 2nd congressional district of Nebraska were surveyed online and by telephone from a registration-based sample purchased by SSRS from L2. The North Carolina sample included an oversample of voters modeled as likely African American on the voter file. Oversampled groups were weighted to their correct share of the registered voter population.

Sampled voters were invited to participate in the study through multiple contact methods, including a mailed postcard, SMS (text-message) invitation in collaboration with Survey160 to sample who had a cell phone number on file, email invitations to those with an email address on file, and multiple telephone call attempts to voters with a telephone number on file. Upon receipt of the postcard, sampled voters could complete the survey online (including by scanning a QR code on mobile devices) or by calling a toll-free number. All respondents were screened for age, voter registration status, and state of voter registration prior to administering the survey. Respondents who said they were under 18, not registered to vote, or not registered to vote in the state on file were excluded from the survey. Those who did not confirm they were the named person on the voter file were also excluded from analysis. Surveys were conducted in English.

All respondents were asked questions concerning basic demographics. The North Carolina sample was weighted to reflect Census figures for the state's registered voters for education and race/ethnicity. Both states' samples were also weighed to parameters from the L2 voter file for gender, age, party registration, 2020 general election turnout by mode of voting, 2022 general election turnout, and primary vote history. The North Carolina sample was also weighted to parameters from the L2 voter file National Election Pool (NEP) region and for the cross of race (African American, all others) by age, gender, and party. The 2nd congressional district of Nebraska sample was also weighted to parameters from the L2 voter file for county, education, and race and ethnicity.

Results for likely voters include all registered voters interviewed for the poll weighted by their predicted probability of voting in the 2024 general election. This likely voter weight was created for each state by multiplying the registered voter weight by the modeled probability of voting in the 2024 general election. For voters ages 29 or below, the probability of voting was calculated as 0.25 times a voter file score plus 0.75 times a self-report score. For voters ages 30 or older, the probability of voting was calculated as 0.75 times a voter file score plus 0.25 times a self-report score. The voter file score was assigned using a model built on the L2 voter file that included past turnout history and demographic variables as predictors. The self-report score was assigned using a model built on prior CNN-SSRS polls that included the self-reported likelihood of voting and motivation to vote as predictors.

Surveys were conducted among a representative sample of the adult registered voters, age 18 or older, in Nebraska 2nd CD, and North Carolina. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "SN" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

MORE ON METHODOLOGY (CONTINUED)

Nebraska 2nd Congressional District

Results for the Nebraska 2nd congressional district sample have a margin of sampling error of **+/- 4.0** percentage points. Results for likely Nebraska 2nd congressional district voters have a margin of sampling error of **+/- 4.0** percentage points. Among the Nebraska 2nd congressional district sample, **30%** described themselves as Democrats, **35%** described themselves as Republicans, and **34%** described themselves as independents or members of another party.

North Carolina

Results for the North Carolina sample have a margin of sampling error of **+/- 3.9** percentage points. Results for likely North Carolina voters have a margin of sampling error of **+/- 3.9** percentage points. Among the North Carolina sample, **31%** described themselves as Democrats, **34%** described themselves as Republicans, and **35%** described themselves as independents or members of another party.

TABLE 040

Question Q13

Q13. As you may know, Nebraska awards two of its five electoral college votes for president to the statewide winner, with the other three awarded separately to the winner of each of the state's congressional districts. In some years, this means that the state's electoral votes are split between multiple candidates for president. Do you think that Nebraska should (keep its current system for awarding electoral votes) or (switch to a system where the statewide winner receives all of the electoral votes)?
