

The Honorable Kathryn D. Sullivan, Ph.D.  
Undersecretary of Commerce for Oceans and Atmosphere  
Administrator, National Oceanic and Atmospheric Administration  
1401 Constitution Ave NW, Room 5128  
Washington, D.C. 20230

December 7, 2015

Dear Dr. Sullivan:

As scientists and technical experts, we thank you for standing up for scientific integrity and independent research by refusing to disclose National Oceanic and Atmospheric Administration (NOAA) scientists' internal deliberations to House Science Committee Chairman Lamar Smith.

We know Chairman Smith's subpoena for the correspondence of NOAA scientists involved with a peer-reviewed paper in *Science* is not about data access or seeking to learn more about the study. We are aware that NOAA scientists already met several times with committee staff to provide all data and methodology related to this work and answer numerous questions about the research.

As you know, these actions can create a chilling effect on both federal scientists and any other scientist with whom they collaborate or correspond. We urge you to continue to stand firm against these bullying tactics in order to protect NOAA scientists' ability to pursue research and publish data and results regardless of how contentious the issue may be.

Please continue to resist this dangerous abuse of congressional oversight power.

Sincerely,  
The undersigned (587 signatories)

Guy Almes  
Ph.D., Computer Science  
College Sta, TX 77845-1939

Our political leaders don't always appreciate the great attention to unbiased peer review etc. that NOAA, NSF, DoE, and the other research agencies exhibit. Hang in there.

This denialism of strong scientific evidence for global climate change and its human causes is unacceptable and morally reprehensible.

Jo Ellen Brandmeyer  
Ph.D., Engineering  
Chapel Hill, NC 27516-7767

I understand that the journal articles your scientists and engineers publish go through rigorous, candid, and thoughtful review both within your Agency and via the peer review process. Keep the politics out of the scientific publication process.

Harry Cleaver  
Ph.D., Economics  
Austin, TX 78704-1530

It takes courage to stand against repression.

John Cooper  
Ph.D., Chemistry  
Lewisburg, PA 17837-1436

Science is about the quest for truth, a quest that demagogues and power-junkies seek to suppress and malign. Help keep the practice open and above board, free from the influences of those who would prevent or pervert it.

John Crusius  
Ph.D., Earth Sciences  
Seattle, WA 98115-7034

Be strong-- we support you 100%.

When politics trumps science we all lose.

James Harris
