**Sent:** Tuesday, August 11, 2015 8:12 PM  
**To:** Lane, Brandon R., Sheriff; Hancock, Jennifer R., Sheriff  
**Subject:** CorvusEye at Dunsmuir Reservoir

Jennifer and Brandon,

Just wanted to thank you for your team's flexibility the past couple days. I know it took a lot of effort on your part so thank you so much for working with East Bay MUD and Harris—it was much appreciated! The crew on the plane definitely got good footage. I have the hard drives from the plane with me and will drop them off to the engineers when I get back into the office tomorrow AM. Once they pull the footage and send it to me, I'll send it your way.

Again, your efforts and flexibility were much appreciated. I'm looking forward to Urban Shield and getting to meet both of you in person then.

Regards,

**Adrian Luh**

**Flag Status:** Flagged

Sheriff's Technician Hancock and Deputy Sheriff Lane,

We're still targeting next Monday for the flight but we were wondering whether there was any flexibility in the 9 AM time. Based on a flight planning website we use, cloud cover won't reach 5,000 feet on that day until ~ 2-5 pm on that day (as well as Tuesday and Wednesday). Would it be possible to check with your contacts at East Bay Mud whether we can fly in the afternoon?

Thanks,

**Adrian Luh**

**Cc:** Baker, Jason - Harris; Waver, Dawn - Harris  
**Subject:** CorvusEye at Urban Shield

Folks,

Our CorvusEye team is set to fly and capture footage with CorvusEye for the Dunsmuir Reservoir and Hayward Airport Urban Shield scenarios on Monday afternoon. We wanted to extend an invitation for you to come see the sensor on the airport on Monday AM if you have time. Please let us know if you'd like to stop by. We'll be at the Hayward Airport at:

APP JetCenter  
19990 skywest drive  
Hayward, CA 94541

**Sheriff's Technician Hancock and Deputy Sheriff Lane** – We'll be in the air and ready to collect footage by 2:10 or so. The crew in the plane will contact Sheriff's Technician Hancock by Sat. Phone when CorvusEye is in location and ready to collect footage—Sheriff's Deputy Lane will be the back-up. Unfortunately, there is no specific number for the Satellite phone (and it cannot receive calls—only make them) so please answer when we call ☺. We plan on flying at an altitude of 5,000 feet for 15-20 minutes to ensure we get quality footage of the “terrorists” at the reservoir.

**Sgt. Chevez and Sgt. Cotcher** -- After we fly Dunsmuir Reservoir, we'll fly south to Hayward Airport to collect for that scenario. Our anticipated start time is 3PM. I'll be travelling with you guys on your route so the crew on the plane will contact me. We will enact that scenario twice to ensure we capture quality footage and should be done by 4 PM. I'll meet up with you before the scenario at your hangar.

We are very excited to support Urban Shield and are looking forward to next week. Please let me know if you have any questions—and again, if you have some time early Monday, we would love to give you a demo of Corvuseye. Just let me know by email or call me on my cell at 585-298-1221.

Thanks!

**From:** Luh, Adrian C - Exelis <Adrian.Luh@exelisinc.com>  
**Sent:** Thursday, July 23, 2015 9:24 AM  
**To:** Hancock, Jennifer R., Sheriff; Lane, Brandon R., Sheriff  
**Cc:** Waver, Dawn M - Exelis; Baker, Jason - Exelis  
**Subject:** CorvusEye Scenario at Dunsmuir Reservoir

Sheriff's Technician Hancock and Deputy Sheriff Lane,

Wanted to provide a quick update.

We've narrowed down the dates for the CorvusEye flight:

- **Target date:** Tuesday August 4
- **Back-up / rain date:** Friday August 7

These were the 2 dates that worked for your team as well as the team with the scenario at Hayward Airport.

I understand that East Bay Mud has provided your team access to the site around 9 AM on those two dates, so we will be up in the air and ready to fly around the reservoir at that time.

Unfortunately, I will be out of the office the next couple of weeks but will be available by cell. Either Jason Baker (Product Manager of CorvusEye, 585-259-7852) or my manager Dawn Waver (585-362-2942) will be in the area when we fly and can do any last minute coordination with you.

The crew in the plane will contact Sheriff's Technician Hancock by Sat. Phone when CorvusEye is in location and ready to collect footage—Sheriff's Deputy Lane will be the back-up. Unfortunately, there is no specific number for the Satellite phone (and it cannot receive calls—only make them) so please answer when we call ☺. We plan on flying at an altitude of 5,000 feet for 15-20 minutes to ensure we get quality footage of the “terrorists” at the reservoir. I will provide the Harris team with your contact information as well.

Here is the overview of the scenario I've provided the CorvusEye team. I'll also send them the scenario brief you just sent me—please let me know if there are any updates.

**Scenario Overview:** Terrorists have broken into the Dunsmuir Reservoir to try to poison the water source for Californians. CorvusEye is providing a “live” view of the Reservoir for the tactical teams

**Deliverable to site captains: MP4 video with below storyboard**

- 1 minute overview of entire region
- Zoom into 1 min of high-res Region of Interest footage of the reservoir which will show of terrorist pick-up truck, a couple 55 gallon drums and terrorist(s) walking around at the reservoir

Please let me know if you have any questions / concerns—I'll be out of the office but be available by cell.

Thanks!

**Subject:** CorvusEye talking points for mission briefs

Jennifer and Brandon,

I wanted to provide you with some CorvusEye 1500 talking points for the mission pre-briefs in case you needed them.

- Harris CorvusEye 1500 is a Wide Area Motion Imagery sensor that can capture up to 7 square kilometers. It augments traditional HD video cameras by covering a much larger area at 2 frames per second.
- Its wide area coverage combined with high-resolution footage enables powerful forensics not available with traditional cameras.
- We've put a CorvusEye sensor into the sky to monitor the entire region around the reservoir. This way, if additional terrorists come, have a heads up and can also figure out where they came from.
- Here is a live view of the reservoir showing 5 terrorists moving around on the reservoir now.

Please let me know if you have any questions.

Thanks!

**From:** Jackson, Lani M., Sheriff  
**Sent:** Friday, May 22, 2015 9:43 AM  
**To:** McComas, Justin, Sheriff; Lenthe, Carrie, Sheriff; Molloy, Michael T., Sheriff; Larosa, James V., Sheriff; Deitschman, Jason D., Sheriff  
**Subject:** Walkthroughs

OK... So this is what I have from this week's walk throughs:

### **AMTRACK**

- Set up a spot for Original Swat
- Find them airsoft (possibly Extreme Air)

### **KAISER**

- Contact PHOKUS for tourniquets. Elsie's goal is to get a reusable tourniquet for each team member and make PHOKUS one of the mandatory booths to visit.
- Possible location for SB Tactical

### HAYWARD AIRPORT

- EXELIS CorvusEye

### COYOTE HILLS

- Sig Sauer
- Work on making Sig Sauer a mandatory booth to familiarize themselves with the equipment that will be used at this site.
- Breaching devise (possibly Jeff Boadway)

### GROVE @ FOOTHILL

- Force Halo Drop to get a COA
- 1 tourniquet per team (PHOKUS)
- Motion detector (that thing that reads through the walls) from Camaro/Mallory
- MATT mannequin from Trauma FX/KGS

### CHILDREN'S HOSPITAL (Contact MD. Heckie (510)928-915)

- They need SIMMS helmets. Is there a vendor we can try to use for that?
- Wants laser weapons
- Telepath Technology. The company that gets the different radios to communicate together. OJO Technologies
- Video feed for VIPs (possible Verizon or Panasonic .

### DUNSMUIR

- EXELIS CorvusEye
- Needs an electric sniper rifle (IR) that can shoot 200 yards w/o flash. (I'll email the guy Deno said was working on it.)

### FAIRMINONT/OLD ANIMAL CONTROL

- -Grizzly
- Electronic flashbangs (possibly RAP4 or Mallory)
- EXELIS GPS jammer

### SAN QUENTIN RANGE

- I thought I heard him say he wanted to fit each team member with a holster. Is there a company we can reach out to to do that and maybe let them set up a table there?
- Armored vehicle. They were planning on using Marin County's CATT and their driver. (Good place for IAG)
- Wants a robot. (NOT WALL-E... that's taken) I think he even said he wanted two robots???
- SIMMS masks (so we have a vendor for that?)

### MARITIME

- FIRST SPEAR flotation vests (or they will use OPD's Mustang/Safariland)

### Airport OMC

- Status on robot? I'm assuming they're pulling it.
- Vests (with the powder. Sylume???)
- Halo Drop???
- Video streaming (Motorola or Panasonic)

### WAREHOUSE by CP-52

- Armored mobility plates

### LIVERMORE/SKIDS

- A different K-9 camera than the one that was used last year.
- Durbin suggested him flying a UAV there. I'm not sure if he was being serious or sarcastic.

### LOS POSITAS

- Video streaming (Panasonic, Motorola or Tactical Electronics)

Daisy Roa asked for a TV for the Lobby. Panasonic???

**Sent:** Thursday, July 23, 2015 10:32 AM  
**To:** Madigan, Tom, Sheriff  
**Subject:** CorvusEye Flight around Levi's Stadium

Hi Captain Madigan,

I have a question and was directed to you by Lt. McComas, whom I have been working with for the upcoming 2015 Urban Shield event.

Harris (formerly Exelis) has an airborne wide area sensor product called CorvusEye 1500 that will be part of the Urban Shield scenarios at the Hayward Airport and Dunsmuir Reservoir. We are working with the Site Captains and will be flying above those 2 locations on August 4 (with a back-up rain date of Aug. 7<sup>th</sup>) that will be used in the Tactical Team briefings. While we were in the Bay area, we were also hoping to also capture some footage of Levi's Stadium and the surrounding area. We know that the 2016 Super Bowl will be occurring there and would love to have CorvusEye help provide security for the Super Bowl, so we were hoping to collect footage that we would be able to share with Santa Clara County later on to demonstrate CorvusEye's capabilities.

I'm aware that the area around the stadium is FAA restricted airspace. Do you know whether it is possible for us to collect footage while we're in the area? Is there anyone we could potentially talk to in order to get permission to fly around the stadium for 20-30 minutes 1<sup>st</sup> week of August?

Thanks,

**Subject:** RE: Urban Shield-Exelis planning

Good morning Adrian,

I apologize for not getting back to you sooner, and thank you for reaching out. I did speak to this year's incident commander, Captain Shawn Sexton. He is very interested in having you present at the April 16<sup>th</sup> meeting. If you have any power point presentations or other digital media you are planning to use at the meeting, you can coordinate with our IT guy, Michael Barnes, who will be running the video and other electronics during the meeting. I have CC'd him in this response so he is aware, and you can begin communications.

Please let me know if there are any questions, and I'm looking forward to talking with you at the CSSA meeting next month. Take care.

JM

**Subject:** RE: Urban Shield-Exelis planning

Lieutenant McComas,

I wanted to follow up on our call a few weeks ago where I had briefly presented CorvusEye 1500, Exelis' Wide Area Surveillance solution. During the call, you had put us down to present a 15-20 minute CorvusEye overview at the April 16<sup>th</sup> Urban Shield Planning meeting to give the site coordinators a good look at how the product might fit in their scenarios—the timing was also perfect since a couple of us would already be in town for the CSSA conference. I wanted to confirm this was still the plan as we are planning on attending the 4/16 Urban Shield meeting.

Thanks!

**Subject:** CorvusEye at Urban Shield

Folks,

Our CorvusEye team is set to fly and capture footage with CorvusEye for the Dunsmuir Reservoir and Hayward Airport Urban Shield scenarios on Monday afternoon. We wanted to extend an invitation for you to come see the sensor on the airport on Monday AM if you have time. Please let us know if you'd like to stop by. We'll be at the Hayward Airport at:

APP JetCenter  
19990 skywest drive  
Hayward, CA 94541

**Sheriff's Technician Hancock and Deputy Sheriff Lane** – We'll be in the air and ready to collect footage by 2:10 or so. The crew in the plane will contact Sheriff's Technician Hancock by Sat. Phone when CorvusEye is in location and ready to collect footage—Sheriff's Deputy Lane will be the back-up. Unfortunately, there is no specific number for the Satellite phone (and it cannot receive calls—only make them) so please answer when we call ☺. We plan on flying at an altitude of 5,000 feet for 15-20 minutes to ensure we get quality footage of the “terrorists” at the reservoir.

**Sgt. Chevez and Sgt. Cotcher** -- After we fly Dunsmuir Reservoir, we'll fly south to Hayward Airport to collect for that scenario. Our anticipated start time is 3PM. I'll be travelling with you guys on your route so the crew on the plane will contact me. We will enact that scenario twice to ensure we capture quality footage and should be done by 4 PM. I'll meet up with you before the scenario at your hangar.

We are very excited to support Urban Shield and are looking forward to next week. Please let me know if you have any questions—and again, if you have some time early Monday, we would love to give you a demo of CorvusEye. Just let me know by email or call me on my cell at 585-298-1221.

Thanks!

Lieutenant McComas,

Thanks for getting back to me...I just wanted to minimize confusion and make sure Sgt. Chevez's scenario was one of the ones you were considering for CorvusEye (and that site captains weren't just reaching out to us on their own) before setting up some time with him.

Appreciate the clarification on the video as well. We are interested in it—I just misunderstood and thought it required us to fly out to CA. If the videographer could be in Rochester, would make it easier for us.

In the I'll schedule some time with Sgt. Chevez for next week and will wait for the operations plans for the sites.

Have a great Memorial Day!

**To:** Luh, Adrian C - Exelis  
**Subject:** RE: Urban Shield/CorvusEye

Hi Adrian,

Yes, Sgt. Chevez is the point of contact for the Hayward airport scenario. I believe the second site wanting to use CorvusEye was the Dunsmuir water storage facility. The area commander that is in charge of that site is Lieutenant Mike Denobriga, 510-363-6634. I'm working on getting digital copies of the operation plans for the sites that want to use your technology, including Signal Sentry.

If you want to wait until you come out to fly the scenarios, that would work just fine. I was suggesting we send a small crew out to you guys to capture interviews and do a write up on your amazing operation out there in New York. You mentioned at the last meeting where you presented that Dawn had expressed an interest in increasing your sponsorship since your technology is going to be used in multiple scenarios, and I wanted to make sure we took care of you guys any way that we can. One of my thoughts was to send a crew out to interview you and do an expose' on your company. As I

said, you guys are an absolute pleasure to work with so just let me know what works best for you. Thanks again, and have a great Memorial Day!

Lieutenant McComas,

I received the below email from Sgt. Chevez from East Bay Regional Park District. Is this one of the scenarios that you are thinking of for CorvusEye?

Also, I talked with Dawn about the Exelis video interview for the Urban Shield website. We'd be interested in doing that, but at this point, can't send anyone out to CA to do this. Would we be able to wait until we fly the Urban Shield scenarios with CorvusEye and do it then with the folks we have there?

Thanks,

Good morning,

I was present at the Urban Shield meeting when the CorvusEye was presented. We were very impressed with the product and would like to use it for our scenario. I would like to know if we could schedule a date and time for a representative to meet with my partner and I. We would like for the CorvusEye to record a sequence of events that will be used for the Scenario Briefing that each team will view prior to beginning our scenario. I look forward to working with you.

Best Regards,

Sgt. Giorgio Chevez

Sgt. Chevez, Sgt. Cotcher, Sheriff's Technician Hancock and Deputy Sheriff Lane,

We were planning on flying your scenarios at Dunsmuir Reservoir and Hayward airport on August 4<sup>th</sup>, with a back-up rain date of August 7<sup>th</sup>. Unfortunately, we ran into some technical issues with our system this week in Utah that we need to take a look at and get resolved. Would it be at all possible to push out our date to week of August 10<sup>th</sup>?

If you could provide us with your teams' availability during week of August 10<sup>th</sup>, it'd be greatly appreciated. Sheriff's Technician Hancock and Deputy Sheriff Lane—I know that you also need to go to get access from East Bay MUD—would you be able to see which dates would work for them?

Apologies for the short notice and inconvenience.

Thank you for this overview. I just thought of one concern. If we are not gaining access until 0900, we will still need to get everything in place. If you will be up in the air by 0900 is that going to create an issue? Just want to make sure we won't be causing a problem by having to set up while your in the air.

Jen

On Jul 23, 2015, at 9:23 AM, Luh, Adrian C - Exelis <[Adrian.Luh@exelisinc.com](mailto:Adrian.Luh@exelisinc.com)<<mailto:Adrian.Luh@exelisinc.com>>> wrote:

Sheriff's Technician Hancock and Deputy Sheriff Lane,

Wanted to provide a quick update.

We've narrowed down the dates for the CorvusEye flight:

- Target date: Tuesday August 4
- Back-up / rain date: Friday August 7

These were the 2 dates that worked for your team as well as the team with the scenario at Hayward Airport.

I understand that East Bay Mud has provided your team access to the site around 9 AM on those two dates, so we will be up in the air and ready to fly around the reservoir at that time.

Unfortunately, I will be out of the office the next couple of weeks but will be available by cell. Either Jason Baker (Product Manager of CorvusEye, 585-259-7852) or my manager Dawn Waver (585-362-2942) will be in the area when we fly and can do any last minute coordination with you.

The crew in the plane will contact Sheriff's Technician Hancock by Sat. Phone when CorvusEye is in location and ready to collect footage—Sheriff's Deputy Lane will be the back-up. Unfortunately, there is no specific number for the Satellite phone (and it cannot receive calls—only make them) so please answer when we call ☺. We plan on flying at an altitude of 5,000 feet for 15-20 minutes to ensure we get quality footage of the “terrorists” at the reservoir. I will provide the Harris team with your contact information as well.

Here is the overview of the scenario I've provided the CorvusEye team. I'll also send them the scenario brief you just sent me—please let me know if there are any updates.

Scenario Overview: Terrorists have broken into the Dunsmuir Reservoir to try to poison the water source for Californians. CorvusEye is providing a “live” view of the Reservoir for the tactical teams

Deliverable to site captains: MP4 video with below storyboard

- 1 minute overview of entire region
- Zoom into 1 min of high-res Region of Interest footage of the reservoir which will show of terrorist pick-up truck, a couple 55

gallon drums and terrorist(s) walking around at the reservoir

Please let me know if you have any questions / concerns—I'll be out of the office but be available by cell.

Thanks!

**Subject:** Levi's Stadium

Lt. McComas,

Hope all is well. Planning is going well for the 2 scenarios with CorvusEye—we're currently coordinating the flight with the Site Captains at Hayward Airport and Dunsmuir Reservoir and are planning to fly those locations either next week or the following week.

While we were in the area, we were also hoping to also capture some footage of Levi's Stadium and the surrounding area. We know that the 2016 Super Bowl will be occurring there and would love to have CorvusEye help provide security for the Super Bowl, so we were hoping to collect footage that we would be able to share with Santa Clara County later on to demonstrate CorvusEye's capabilities. I do know that the area around the stadium is FAA restricted airspace. Do you know whether it is possible for us to collect footage while we're in the area? Is there anyone we could potentially talk to in order to get permission to fly around the stadium for 20-30 minutes?

Thanks,

**Adrian Luh**

I will do whatever I can to get you guys into the presentation on the Super Bowl. The folks from Santa Clara and Levi stadium will be at the VIP dinner Friday night. I will be there as well. Although I have not met these folks myself, let's team up and track them down for a conversation! I have your back!

Lt. McComas,

I was looking at the agenda for Urban Shield and noticed the Santa Clara PD Captain Phil Cooke will be presenting on Super Bowl 50 Planning. A couple questions:

- Will our team be able to attend that session?
- Obviously, our team is interested in having CorvusEye help out with Super Bowl security. We'd love to sit down with him and his team to demo the footage we captured last month...is there any way you can make an introduction for us and perhaps set up quick 10-15 minute meeting to introduce him to CorvusEye?

Thanks,

All,

This is a reminder that the next Urban Shield Planning Meeting is Thursday April 16, 2015, 1330 hours at the OHSES facility located at 4985 Broder Blvd, in Dublin. You have been identified as a recipient of this email because of your involvement in the planning meeting as outlined in the attached meeting agenda. Please plan on attending and being prepared to report out on the updates and ongoing planning processes of your respective Branches or Area Commands. If you cannot attend, please make sure you have a representative present in your place. Your report should be brief and concise and include any anticipated issues or requests needed.

If you are giving a presentation on a particular topic, please be prepared to keep your presentation between 15 to 20 minutes. As well, if you have any media needs for your presentation such as video or PowerPoint, please reach out to us to make sure we have it prior to the meeting to facilitate a smooth process. If you have any questions in regards to your report, you may contact the Deputy Incident Commander, Captain Don Mattison or myself.

Thank you,

Good morning Adrian,

I apologize for not getting back to you sooner, and thank you for reaching out. I did speak to this year's incident commander, Captain Shawn Sexton. He is very interested in having you present at the April 16<sup>th</sup> meeting. If you have any power point presentations or other digital media you are planning to use at the meeting, you can coordinate with our IT guy, Michael Barnes, who will be running the video and other electronics during the meeting. I have CC'd him in this response so he is aware, and you can begin communications.

Please let me know if there are any questions, and I'm looking forward to talking with you at the CSSA meeting next month. Take care.

**Subject:** RE: Urban Shield-Exelis planning

Lieutenant McComas,

I wanted to follow up on our call a few weeks ago where I had briefly presented CorvusEye 1500, Exelis' Wide Area Surveillance solution. During the call, you had put us down to present a 15-20 minute CorvusEye overview at the April 16<sup>th</sup> Urban Shield Planning meeting to give the site coordinators a good look at how the product might fit in their scenarios—the timing was also perfect since a couple of us would already be in town for the CSSA conference. I wanted to confirm this was still the plan as we are planning on attending the 4/16 Urban Shield meeting.

Thanks!

Adrian,

Captain Sexton is putting together the agenda for the upcoming Urban Shield Meeting. He needs to know, what the presentation is about (just a title), who will be presenting and the presenters title. Thanks.

Lieutenant McComas,

Thanks—I will reach out to Michael when our presentation is ready. If you could forward me the agenda for the meeting whenever it is ready, I'd appreciate it.

Thanks!

Good morning Adrian,

I apologize for not getting back to you sooner, and thank you for reaching out. I did speak to this year's incident commander, Captain Shawn Sexton. He is very interested in having you present at the April 16<sup>th</sup> meeting. If you have any power point presentations or other digital media you are planning to use at the meeting, you can coordinate with our IT guy, Michael Barnes, who will be running the video and other electronics during the meeting. I have CC'd him in this response so he is aware, and you can begin communications.

Please let me know if there are any questions, and I'm looking forward to talking with you at the CSSA meeting next month. Take care.

JM

Lieutenant McComas,

I wanted to follow up on our call a few weeks ago where I had briefly presented CorvusEye 1500, Exelis' Wide Area Surveillance solution. During the call, you had put us down to present a 15-20 minute CorvusEye overview at the April 16<sup>th</sup> Urban Shield Planning meeting to give the site coordinators a good look at how the product might fit in their scenarios—the timing was also perfect since a couple of us would already be in town for the CSSA conference. I wanted to confirm this was still the plan as we are planning on attending the 4/16 Urban Shield meeting.

Thanks!

**To:** Denobriga, Michael, Sheriff  
**Subject:** Urban Shield CorvusEye scenario

Lt. Denobriga,

Thanks for your time last week. I'm currently coordinating the flight with the CorvusEye team. Could you double check to make sure I've got the correct location where the scenario will be taking place? Based on Google Earth, it's saying a lat-long of 37.741880, -122.141125.

Thanks!

All,

This is a reminder that the next Urban Shield Planning Meeting is Thursday April 16, 2015, 1330 hours at the OHSES facility located at 4985 Broder Blvd, in Dublin. You have been identified as a recipient of this email because of your involvement in the planning meeting as outlined in the attached meeting agenda. Please plan on attending and being prepared to report out on the updates and ongoing planning processes of your respective Branches or Area Commands. If you cannot attend, please make sure you have a representative present in your place. Your report should be brief and concise and include any anticipated issues or requests needed.

If you are giving a presentation on a particular topic, please be prepared to keep your presentation between 15 to 20 minutes. As well, if you have any media needs for your presentation such as video or PowerPoint, please reach out to us to make sure we have it prior to the meeting to facilitate a smooth process. If you have any questions in regards to your report, you may contact the Deputy Incident Commander, Captain Don Mattison or myself.

Thank you,

**Shawn T. Sexton, Captain**
