Subject: RE: second request for comment on Shotspotter installation by SDPD

Thank you for contacting our office regarding this matter. During 2016 in addition to talking with me about Shotspotter, it is my understanding that the Police Chief and some of her officers spoke to various community members, community leaders, and community advisory board members about shotspotter and it being used as one of several tools to assist them with responding more quickly to shots being fired and ultimately saving lives if people's lives were put in danger.

Public safety, reducing response times by our first responders in the 4th District and this city such as Fire Rescue Dept. and the Police Dept. is a top priority for the Council President.

Thank you

Jimmie
