DAPL SITREP 034

October 16, 2016

INFORMATION CONTAINED IN THIS REPORT IS PROPRIETARY AND SENSITIVE.

DO NOT RELEASE OUTSIDE OF AUTHORIZED AND APPROVED RECIPIENTS.

The Highlights

North Dakota

3 Large convoys consisting of 225 protestor vehicles attempted to access work sites using three separate routes. Convoys were stopped by law enforcement.

Iowa

2 of the previously-departed leaders ([REDACTED]) of the Mississippi Stand movement have returned to camp. | Protestor bail in Lee County has increased to \$2,000, which will hopefully impede protestors from risking arrest due to the increased cost. | 4 pieces of DAPL construction equipment (3 bulldozers and 1 trackhoe) were burned in Jasper County. Initial reports indicate that this arson was very similar to the last attack in early August. | BATs obstructed work at 5 work sites, resulting in 3 arrests: [REDACTED], and an unidentified third person. | Calhoun, Boone and Webster county law enforcement are not supportive of DAPL Security's mission. Their reluctance to arrest or cite trespassing individuals has signaled to protestors that their actions will result in few—if any—consequences.

The Details

1. REGIONAL UPDATES

A. North Dakota

i. Intel Update

a. NSTR

ii. Past 24 Hours

a. Protestor attached himself to equipment at AR125.

b. 3 Large convoys consisting of 225 protestor vehicles attempted to access work sites using three separate routes.

1. Convoys were stopped by law enforcement
2. Workers evacuated when law enforcement said they may not be able to hold
3. Protestors began activities very early in the morning.
4. Protestors walked in cross country to get to work site.
5. Land owner and son patrolling their land near access road 125 armed with M4 style rifles.

c. Law Enforcement continues to have static checkpoints in place

1. Law enforcement able to set up roadblocks to block all convoys
2. 14 Arrests made by law enforcement
3. Workers returned to sites as soon as possible

iii. Next 24 Hours

a. Continue to support at worksites along ROW and static DAPL sites off the ROW.

- b. Continue planning with law enforcement for survey crews to survey from 80 to HDD by Wednesday 19 October 16.

B. Iowa

i. Intel Update

- a. ██████████ back at Mississippi River Work Site
 - 1. ██████████ are reportedly back at the Mississippi Stand camp site. Significant because the leaders of the Mississippi Stand movement have returned to the camp and will likely start planning more direct actions. ██████████ was also seen photographing the barbed wire around the HDD site most like surveilling for future direct actions.
- b. Protestor's wish list includes security hats and vests.
 - 1. Protestors may be attempting to obtain security guard uniform components to pose as security guards and gain access to sites.
- c. Bail money in Lee County has increased to \$2,000
 - 1. Significant because this may impede protestors from risking arrest due to the high cost to be released from bail. On their legal funding page, the movement does not have nearly enough money to pay for multiple \$2,000 bails.
- d. Bold Iowa people of interest: ██████████. Both documented the Bold Iowa Bold Action Teams throughout the day heavily on social media, specifically twitter.
 - 1. We can now follow these individuals' social media pages for information about upcoming events.
- e. ██████████ is helping construct lock boxes or sleeping dragons for Mississippi Stand and states he urinating in fuel tanks.
 - 1. This ties Bold Iowa with Mississippi Stand. In addition, ██████████ may be willing to do future equipment sabotage like putting sugar/sand in fuel tanks.

ii. Past 24 Hours

- a. DAPL Construction Equipment burned in Jasper County, vicinity Reasnor
 - 1. WHO – Unknown at this time although a white sedan described as appearing to be a Ford Focus (unknown plates) was sighted near a nearby welding shack (approximately ½ mile from the site of the fire) which was guarded by Leighton Security.
 - 2. WHAT – Four pieces of equipment total have been burned, 3 bulldozers and 1 trackhoe Initial reports indicate that this arson was very similar to the last attack in early August in that the equipment fuel filters were used to start the fires. So far, reporting indicates that this is the exact same MO (Method of Operation) as the early August attack.
 - 3. WHEN – Initial reports received at IA Security Fusion cell at approximately midnight on 15 October 2016.

INFORMATION CONTAINED IN THIS REPORT IS PROPRIETARY AND SENSITIVE
DO NOT RELEASE OUTSIDE OF AUTHORIZED AND APPROVED RECIPIENTS

4. WHERE – Initial reports place it approximately ½ mile from a welding shack on spread 2 near Reasnor.
 5. WHY – We will continue to update as information becomes available.
 6. Currently the scene is locked down by the Jasper County Sheriff and will likely remain so until the fire marshal examines the site. We will have two personnel travel to the site early in the morning (departing Des Moines area ~0600 16 OCT 16) to attempt exploitation of the site when given access.
- b. Keokuk Stands with Mississippi Stand Rally**
1. Appeared to be about 40 people at event but was used to gain motivation and spread word of movement.
 - i. 1119 Vehicle stopped by security and looked as though he was going to get out to confront. One middle aged man in a blue truck with IA license plate. This is most likely a landowner.
 - ii. 1415 [REDACTED] seen taking pictures of pumps at Mississippi HDD work site.
 - iii. 1600 One driver taking pictures of pipelines at 260th and 520th Ave. He was told to leave and then complied.
 - iv. Approx. 1700- Bold Iowa Bold Action Teams (BATs) in Calhoun, Boone, and Webster Counties.
- b. BATs obstructed work at 5 work sites total, after a main protest on Red Oak Ave in Calhoun County. Three arrested: [REDACTED], and unidentified third person. Story Board to Follow. Work Sites obstructed:**
1. 280th and Xenia
 2. 320th and Dakota Ave
 3. Norridge Ave
 4. 290th and York Ave
 5. 390th and 169th
 - i. 1726- Middle aged couple in silver SUV seen observing and pointing at construction site in Boone County. IA license plates.
 - ii. 1743-Mississippi Stand HDD site had an attempted stop and hook up of a truck. It was stopped before protestor could hook up due to an effective escort team.
 - iii. 1753- Protestors detained at Mississippi Stand for attempting hook up, including [REDACTED], [REDACTED], and one additional unidentified female- passed off to Lee County Sheriffs.
- c. Bold Iowa's BAT tactic was unfortunately successful today. Work was stopped at several sites and used up a lot of our resources. LE was not supportive of our mission for the most part and did not want to arrest or cite those who were trespassing. Calhoun County LE finally arrested individuals when they laid down in front of the pipe truck. The issue here is that protestors are learning there is little LE will do to impede them. We need to work closer with Calhoun, Boone, and Webster county LE to ensure future protestors will at least be fined, if not**

arrested. Alternatively, we could request Lee County LE speak to other counties about tactics that are working in Lee County such as threatening to tow all vehicles and/or increasing bail for protestor directions to \$2,000. If the lock down tactics of Mississippi Stand and the BAT tactics of Bold Iowa were to join forces, it would severely impact our mission

iii. Next 24 Hours

- a. Protestors do not have a scheduled event for the next 24 hours. However, Mississippi Stand may attempt a direct action tonight 15 Oct or early tomorrow morning 16 Oct.

C. Illinois

i. Intel Update

- a. A search of social media sites revealed nothing of new intelligence value related directly to the project in Illinois.
- b. There was not enough localized support to hold any protest activity in the Carlinville, IL area.

ii. Past 24 Hours

- a. Went to the Carlinville, IL, no protest activity was observed as earlier discussed on a social media site. The Hancock County Sheriff's request is being addressed by ETP management. Leighton Security, will be procuring a UTV for use around the Kaskaskia HDD locations for access to remote trails that access the location.

iii. Next 24 Hours

- a. Monitoring news sources and social media sites for protest related events and activity will be conducted daily.

D. South Dakota

i. Intel Update

- a. The schedule for Pheasant shooting hours are noon to sunset for the first week, and 10:00am to sunset thereafter. Significant because this provides 5 hours of daylight before each day's hunt begins--allowing the roving patrols freedom of maneuver for a longer period than expected. Safety briefs have continued with the Silverton Security Element so as to mitigate the associated risks.
- b. Positive interaction with the Silverton Guard Force after they have been in sector for a number of days. Local patterns have been observed and are starting to be understood as "normal activities" which makes it significantly easier to identify abnormal activities. The main hindrance is the presence of hunters who don't fit either bill.

ii. Past 24 Hours

- a. Travel from the new Hotels to the Spreads is enhanced from the new hotel locations. The close proximity of the hotels allowed Roving Patrols more time in sector and therefore better coverage of the facilities.

INFORMATION CONTAINED IN THIS REPORT IS PROPRIETARY AND SENSITIVE
DO NOT RELEASE OUTSIDE OF AUTHORIZED AND APPROVED RECIPIENTS

- b. [REDACTED], the Silverton PM, delivered funds for gasoline purchases to the team in Aberdeen and the team in De Smet. He will deliver the funds to the team in Sioux Falls either tomorrow or Monday.
- c. SD PM conducted personal inspections of static guard positions and 1 roving guard patrol in the northern sector of the pipeline, Vic the Launch and Recovery site in Roscoe, SD.
- d. Silverton Security Team conducted roving patrol operations across all three Spreads within the South Dakota sector; personnel security operations on sites with electricians, the Sioux Falls DAPL office and the Redfield Pump Station.
- e. Talked to [REDACTED], this morning as to the status of fencing operations on valve positions. He stated that none were ready, the scatter report stated that 65, 70, 74, 76 are ready for fencing. I discussed with him and [REDACTED] the QRT teams that are going to be installing 1-PH Activators from SD10 to SD 110. This is a part that needs to be replaced for some deficiency. It is occurring sporadically along the line and it takes about an hour on site to accomplish. It is my estimate currently, that they do not need dedicated full time guards.

iii. Next 24 Hours

- a. SD PM will conduct the move to MPL 156 to coordinate Roving Patrols and the ¼ Turn Company working on the valve sites. [REDACTED] reported that although [REDACTED] employees do not work on Sundays, these teams will be out doing their specialty work. This is important for the sake of ensuring that our Roving Patrols do not suspect them to be saboteurs. The Silverton leadership has been directed to inform everyone in the security element that the ¼ Turn Company will be in sector. Their engagement of these workers is important so as to maintain positive personal relations and the prevention of escalation of force unnecessarily.

E. Houston DSOC

- i. Continued support of Fusion centers and intel requests
- ii. Updated Pattern Analysis to maintain awareness of protestor trends across all states
