Hello Patrick,

That should be no problem. When your labs do relocate to the 5th floor area of the mol sci building, I can get with together with you. Please keep me posted as to when your lab relocates and settles in.

Thanks,
Michael

Michael, thank you. Is it possible to wait until we get settled on the 5th floor? That would make for a better meeting - our labs on 4 are overcrowded and disorganized. I wasn't planning to be in temporary space for this long. We should be moving soon.
Patrick Harran

Subject: Laboratory safety inspection report

Hello Patrick,

I have attached the laboratory safety inspection report for the safety walkthrough of your labs on October 30. , assisted me with the inspection and was able to correct some deficiencies on the spot.

I would like to schedule a time within the next few days so I can go over the report with you and Robert. This will help clarify and elucidate the items noted on the report.

Regards,

Michael Wheatley
