FINSPY LICENSES

Outline

The FinSpy solution contains 3 types of product licenses:

A. Update License

The Update License controls whether **FinSpy** is able to retrieve new updates from the Gamma Update server. It is combined with the **FinFisher™ After Sales Support** module.After expiry, the **FinSpy** system will still be **fully functional** but no longer able to retrieve the newest versions and bug-fixes from the FinSpy Update server.

B. Agent License

The Agent License controls how many **FinSpy Agents** can login to the **FinSpy Master** in parallel.

Example:
· **5 Agent Licenses** are purchased.
· **FinSpy Agent** licenses can be installed on an unlimited number of systems, however
· Only 5 **FinSpy Agent** systems can login to the **FinSpy Master** and work with the **data at the same time**
C. Target License

The Target License controls how many **FinSpy Targets** can be **active** in parallel.

Active refers to **activated FinSpy Target** installations no matter whether the Target System is online or offline.

When **FinSpy Target** is deployed on a Target System and no Target Licenses are available, the **FinSpy Target** gets temporary deactivated and no recording and live access will be possible. As soon as a new License is available (e.g. by upgrading the existing License or de-infecting one of the active **FinSpy Targets**), the Target will be assigned the free license and it will be activated and begin recording and providing live access.
