Rockland County District Attorney's Office
New City, NY 10956

Stephen J. Cole-Hatchard
Director
Rockland County ILPPC
New City, NY 10956

Intelligence-Led Policing & Prosecution Center

SNUG REPORT

Date of Report: December 11, 2015

Month Overview: November, 2015

SUMMARY OF REPORT:

Through the use of a social media monitoring platform and other investigatory tactics, the ILPPC is able to search, monitor and analyze real time social media content from any chosen location around the country. With the aim to interrupt violence, the ILPPC's mission is to:

- Prevent individuals from causing harm to themselves and others;
- Set up geofences to monitor social media in high risk areas of Rockland; and
- Monitor social media accounts of individuals who may be associated with acts of violence.

Findings will all be supported by both tactical and strategic intelligence, with assistance from and constant communication with the Youth Bureau and Community Advocates (Interrupters).

ATTACHMENTS INCLUDED IN THIS REPORT:

- Spreadsheet of geofence recordings set up each month by the ILPPC, using its social media monitoring capabilities;
- Spreadsheet of the ILPPC Violence Interruption case files for the month; and
- Data charts depicting actions taken for the month in relation to violence interruption efforts.

Below is a guide to explain the monthly spreadsheets:

LOCATION: The geofence that has been placed over an area. Often the radius around an area does not exceed 15km, allowing us to receive full coverage of all network activity.

ALERT NAME: The ILPPC can receive alerts in relation to specific incidents, suspicious activity and any monitoring of events. The alert name reflects the type of activity about which we are being notified.

USER TRACK: The ILPPC can monitor specific individuals (users) upon request, or upon knowledge of 'at risk' activity of a particular person.

NOTES: Any additional information that may be important or useful.

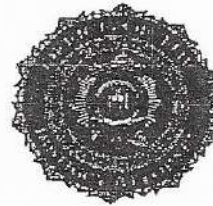

The attached *data charts** have been created to display the:

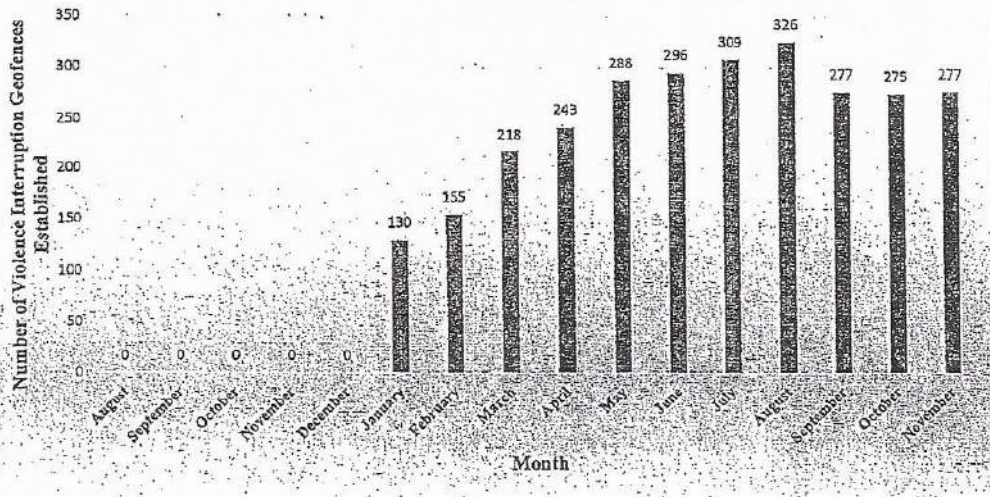

- Number of Violence Interruption recordings established for the month;
- Number of Violence Interruption alerts received and reviewed for the month;
- Number of person(s) tracked in reference to the protection of themselves and/or the public; and
- Number of Violence Interruption case files for the month;

**The raw data for each chart is displayed on the subsequent page, respectively.*
