Issue	CPP Consent - Degree checkout statuses & Program/Plan Changes
Description	<p>Au Update:</p> <p>The completion team with Charles' approval has approved the customization to remove degree checkout status anytime a program has changed for AA, AGS, AS, AFA and plan change for CERTY, CERTN, and AAS.</p> <p>Original Request:</p> <p>In fall 2015, advisors were told to never touch the Degree Checkout status within the CPP -- even when changing PRGC, PLNC, DATA, etc.</p> <p>Later, advisors were told to back out of confirmation when changing programs, and specific plans. This info was sent via email, and despite the importance and opposing concepts, no training was offered.</p> <p>As a result, we have a situation at Wright where an advisor from another campus PRGC'd and carried over confirmation -- without notes regarding confirmation. In fact, the only notes we do have reflect the fact that the student does not want the newly reflected degree. The ID is 001135011 (Denny Tapia.) Denny is now at conditional approval. How do we move forward?</p>
Primary Contact	Who can we call or email to discuss this issue? If not you, please change. Lizz Gardner
