Subject: inquiry from KING 5 regarding dumping liquids

Hi there,

I've come upon information that within the last three weeks, WRPS employees have dumped potentially contaminated liquid (greater than 60 gallons) from an ERDF roll off box straight into the soil. At least one of the events allegedly took place west of the A Complex.

What can you tell me about this alleged practice? I am working under a deadline and hope to hear back today by 2:00.

Thank you.

Susannah
