Assessment

- **What we know:**
 - Protestors began expanding convoys and protest activities to Bismarck
 - Due to a lack of LE presence at the Memorial Bridge and Main Street, Bismarck, LE was unable to make arrests for illegal protest activities.
 - Movement is well organized and control measures are in place
 - There are divisions within the camps (i.e., Natives vs Whites and inter-tribal conflicts)
 - There are outsiders deliberately moving the rioters toward violent action
 - The rioters do possess weapons
 - Red Warrior Camp is the plans and operations for the rioters and is run by Cody Hall
 - That the use of spotters and runners is widely used during riot operations
 - Uniformed rioter security are giving orders to rioters during direct action
 - Manipulate peaceful protesters through misinformation
- **What we do not know:**
 - Number and type of weapons in camp
 - Who is providing military training
 - When and where the next event will occur and how many rioters will attend
 - Have not confirmed Command and Control at events (suspect Cody Hall)
- **What we think:**
 - The Standing Rock Sioux will continue to riot and attempt to force DAPL security and law enforcement to respond with violence
- **Importance:**
 - The use of force or death of a protester or rioter will result in the immediate halt to DAPL operations, which will likely permanently halt the entire project

Priority Intelligence Requirements

- **1.** Any compositional info on aggressive protest groups. It is important to weed out non-aggressive groups as they will drain our resources in the wrong direction with no effect to our client.
- **2.** Planned moves or activities of these groups as they intersect with our client specifically.
- **3.** Other non-direct actions that intersect with our client's operations to produce indirect effects (for example: Social Media postings from remote sites) should be included in collection.
- **4.** Political backing of the protest groups, such as the Green Party candidate.
- **5.** Corporate backing of the protest groups.
- **6.** Local sympathizers providing support, logistics, and potentially shelter for those committing criminal acts.
- **7.** Cyber-activists: Name (real or alias), location, IP addy, IMEI numbers.
- **8.** Any movement of the client leadership to TS sites.
