Re: Review of well conditions and safety.	)	Docket Number: OTH-17-036
	)	Other Order 128
	)	October 30, 2017

**CORRECTED EMERGENCY ORDER**

Review of a well failure and uncontrolled release of fluids at Prudhoe Bay Unit DS02-03B revealed the root cause of the incident to be a combination of the well construction geometry – outer casing shoe set in the permafrost – and thawing permafrost and subsidence. As a result, AOGCC is undertaking a review of all wells on the North Slope. No later than December 31, 2017, Armstrong Energy, LLC shall shut in all North Slope wells it operates which have similar construction geometry and provide to AOGCC a list of those wells. Failure to comply with this order will result in AOGCC taking action pursuant to AS 31.05.150.
