Key Findings:

1. With about 7 months remaining before the 2018 elections Democratic candidates are in strong positions across an array of races within Pennsylvania.

2. Incumbent Governor Tom Wolf (D) has solid leads over an array of potential Republican nominees in his bid to win a second term as the Commonwealth’s chief executive.

3. In the United States Senate race in Pennsylvania Democrat incumbent Bob Casey Jr. holds substantial leads against two potential Republican challengers: Congressman Lou Barletta and State Representative Jim Christiana.

4. In a generic ballot in the midterm congressional elections in Pennsylvania the state’s voters are leaning towards Democrats over Republican candidates with 47% of voters preferring the Democrat in their district compared with 38% supporting a Republican.

5. A majority (55%) of Pennsylvania voters disapprove of President Donald Trump’s job performance with just under 4 in 10 (39%) supporting Trump’s performance as the nation’s chief executive.

6. In regard to Special Counsel Robert Mueller’s investigation of Russian interference in the 2016 Election, 7 out of 10 voters in the Keystone State believe Mueller should be able to finish the investigation.

Methodological Statement

The following report contains the results of a telephone survey of 414 voters in the Commonwealth of Pennsylvania between April 4 and 12, 2018. Respondents were interviewed in English on both landlines (189) and cell phones (225). With a randomly selected sample of respondents the margin of error for the surveys is +/- 5.5% at a 95% level of confidence. Margins of error for questions with smaller sample size will be larger. In addition to sampling error, one should consider that question wording and other fielding issues can introduce error or bias into survey results. The data has been weighted to gender and region to reflect voter population parameters in Pennsylvania. The calculation of sampling error takes into account design effects due to the weighting identified above. In order to reach a representative sample of likely voters both land lines and cell phones were called up to 3 times. The response rate for this survey as calculated using the American Association of Public Opinion Research (AAPOR) RRII formula is approximately 9%. The sampling frame for the study is from the registered voters files of the
Commonwealth of Pennsylvania. Due to rounding the totals provided in the frequency report may not total 100%. The survey instrument (presented in its entirety below) was designed by Dr. Christopher P. Borick of the MCIPO in conjunction with the staff of the *Morning Call*. The survey was funded exclusively by the *Morning Call* and the MCIPO. For more detailed information on the methods employed please contact the MCIPO at 484-664-3444 or email Dr. Borick at cborick@muhlenberg.edu.
