Erik,

CODE 3(C) told me if you could review this.

Mudrock is claiming that DHS did created this. I think I was not supposed to release this but it was public.

Can you help me what can I tell my Public Disclosure coordinator?

Sorry for the inconvenience

Subject: CIA NSA SURVEILLANCE

SURVEILLANCE TECHNOLOGY

Keywords: Remote Neural Monitoring and Brain/Body Manipulation, Artificial intelligence Systems, Game theory and systems for behavioral/social control, Electronic Surveillance & Harassment, Organized stalking (Please see attached files for description)

For years the federal government has sought to remotely control human behavior. Starting with the CIA projects MKULTRA and MKSEARCH in the 1950s, the American public has been unwitting guinea pigs in a multitude of non-consensually performed experiments that have continued into the 21st century. The recent revelations regarding the extent of NSA eavesdropping is only the tip of the iceberg. We are currently in an information war and a mind war, where our privacy and autonomy as human beings are at stake.

The surveillance and manipulation technologies mentioned in this NSA whistleblower lawsuit (see below, links and attached files) are currently being deployed over a global satellite and cell phone tower network in a much more advanced version with enhanced capabilities, tactics, socio-political uses, financing etc.

It gives the surveillance agencies hands, eyes and ears virtually everywhere on the planet ... behind all closed doors walls inside buildings etc. The technology and spectrum was used for submarine communications and hence can reach any location on the surface of earth. People can be targeted and put under constant surveillance during flights/train rides/driving etc and have their behavior/mental stated and choices manipulated using EEG transmitted to their brains from remote covert locations.

Key points and capabilities

This technology platform uses the entire electromagnetic spectrum to map, extract, store and manipulate private information from ambient EM fields such as those emanating from human brain, body and all electronic devices.

It can extract sounds and images from nearby speakers/cameras even with the devices turned off and battery removed. That might be why Mr. Edward Snowden had people leave their phones in a refrigerator during his recent NSA disclosure meetings ... to block Electromagnetic waves used for surveillance).

All information physical, physiological, mental and online/telecom can be decoded with suitable signal processing performed over advanced supercomputers. At the surveillance centers a local model of the targets and their immediate environment can be recreated in great detail using spectral decoding and any changes made to the local model are then retransmitted to manipulate the target and her devices/environment. As mentioned in the whistleblower lawsuit this technology can invade and manipulate virtually all kinds of private information over the entire EM spectrum

If the technology seems more advanced than the mainstream neurosciences it is because while scientist to their great credit follow rigorous ethical standards while the intelligence agencies have acquired and developed their technology and system through illegal nonconsensual human experimentation.

Some links for more information on the technology:

by **John St Clair Akwei**
From an article in Nexus Magazine April/May 96
from [MindControlForums](#) Website

A lawsuit filed against the U.S. National Security Agency reveals a frightening array of technologies and programs designed to keep tabs on individuals.

John St Clair Akwei
vs
National Security Agency
Ft George G. Meade, MD, USA
(Civil Action 92-0449)

The following document comprises evidence for a lawsuit filed at the U.S. Courthouse in Washington, DC, by John St Clair Akwei against the National Security Agency, Ft George G. Meade, Maryland (Civil Action 92-0449), constitutes his knowledge of the NSA's structure, national security activities proprietary technologies and covert operations to monitor individual citizens Ed.

1. THE NSA'S MISSION AND DOMESTIC INTELLIGENCE OPERATION

- Communications Intelligence (COMINT)

Blanket coverage of all electronic communications in the US and the world to ensure national security. The NSA at Ft Meade, Maryland has had the most advanced computers in the world since the early 1960s.

NSA technology is developed and implemented in secret from private corporations, academia and the general public.

- Signals Intelligence (SICINT)

The Signals Intelligence mission of the **NSA** has evolved into a program of decoding EMF waves in the environment for wirelessly tapping into computers and track persons with the electrical currents in their bodies. Signals Intelligence is based on fact that everything in the environment with an electric current in it has a magnetic flux around it which gives off EMF waves.

The **NSA/DoD** [Department of Defense] developed proprietary advanced digital equipment which can remotely analyze all objects whether manmade or organic, that have electrical activity.

- Domestic Intelligence (DOMINT)

The **NSA** has records on all US citizens. The NSA gathers information on US citizen who might be of interest to any of the over 50,000 NSA agents (HUMINT). These agents are authorized by executive order to spy on anyone. The NSA has a permanent national security anti-terrorist surveillance network in place. This surveillance network is completely disguised and hidden from the public.

Tracking individuals in the US is easily and cost-effectively implemented with NSA's electronic surveillance network. This network (DOMINT) covers the entire US, involves tens of thousands of NSA personnel, and tracks millions of persons simultaneously. Cost-effective implementation of operations is assured by NSA computer technology designed to minimize operations costs. NSA personnel serve in quasi-public positions in their communities and run cover businesses and legitimate businesses that can inform the intelligence community of persons they would want to track.

NSA personnel in the community usually have cover identities such as social workers, lawyers and business owners.

- Individual Citizens Occasionally Targeted for Surveillance by Independently Operating NSA Personnel

NSA personnel can control the lives of hundreds of thousands of individuals in the US by using the NSA's domestic intelligence network and cover businesses.

The operations independently run by them can sometimes go beyond the bounds of law. Long-term control and sabotage of tens of thousands of unwitting citizens by NSA operatives is likely to happen.

NSA DOMINT has the ability to assassinate US citizens covertly or run covert psychological control operations to cause subjects to be diagnosed with ill mental health.

**The above symptoms highlight a fraction of the vast array of
Neuro-Electromagnetic Frequency Assaults perpetuated by the Police and
Military Intelligence Agencies toward
Remote Mind Control Experiments, Behavioral Manipulation and Murder.**

2. NSA'S DOMESTIC ELECTRONIC SURVEILLANCE NETWORK

As of the early 1960s, the most advanced computers in the world were at the **NSA**, Ft Meade. Research breakthroughs with these computers were kept for the NSA.

At the present time the NSA has nanotechnology computers that are 15 years ahead of present computer technology. The NSA obtains blanket coverage of information in the US by using advanced computers that use artificial intelligence to screen all communications, regardless of medium, for key words that should be brought to the attention of NSA agents/cryptologists.

These computers monitor all communications at the transmitting and receiving ends.

This blanket coverage of the US is a result of the *NSA's Signals Intelligence (SIGINT)* mission. The NSA's electronic surveillance network is based on a cellular arrangement of devices that can monitor the entire EMF (electromagnetic frequency) spectrum.

This equipment was developed, implemented and kept secret in the same manner as other electronic warfare programs.

- Signals Intelligence Remote Computer Tampering

The NSA keeps track of all PCs and other computers sold in the US.

This is an integral part of the Domestic Intelligence network. The NSA's EMF equipment can tune in **RF** (remote frequency) emissions from personal computer circuit boards (while filtering out emissions from monitors and power supplies).

The RF emission from PC circuit boards contains digital information in the PC. Coded RF waves from the NSA's equipment can resonate PC circuits and change data in the PCs. Thus the NSA can gain wireless modem-style entry into any computer in the country for surveillance or anti-terrorist electronic warfare.

- Detecting EMF Fields in Humans for Surveillance

A subject's bioelectric field can be remotely detected, so subjects can be monitored anywhere they are.

With special **EMF** equipment [NSA cryptologists](#) can remotely read evoked potentials (from EEGs). These can be decoded into a person's brain-states and thoughts. The subject is then perfectly monitored from a distance. NSA personnel can dial up any individual in the country on the Signals Intelligence EMF scanning network and the NSA's computers will then pinpoint and track that person 24 hours a day.

The **NSA** can pick out and track anyone in the US.

3. NSA SIGNALS INTELLIGENCE USE OF EMF BRAIN STIMULATION

NSA Signals Intelligence uses EMF Brain Stimulation for Remote Neural Monitoring (RNM) and Electronic Brain Link (EBL).

EMF Brain Stimulation has been in development since the [MKULTRA program](#) of the early 1950s, which included neurological research into radiation (non-ionizing EMF) and bioelectric research and development.

The resulting secret technology is categorized at the National Security Archives as "*Radiation Intelligence*", defined as,

"information from unintentionally emanated electromagnetic waves in the environment, not including radioactivity or nuclear detonation".

[Signals Intelligence](#) implemented and kept this technology secret in the same manner as other electronic warfare programs of the US Government.

The NSA monitors available information about this technology and withholds scientific research from the public. There are also international intelligence agreements to keep this technology

secret.

The NSA has proprietary electronic equipment that analyze electrical activity in humans from a distance. NSA computer generated brain mapping can continuously monitor all of the electrical activity in the brain continuously. The NSA records and decode individual brain maps (of hundreds of thousands of persons) for national security purposes. EMF Brain Stimulation is also secretly used by the military for brain-to-computer link (in military fighter aircraft, for example).

For electronic surveillance purposes, electrical activity in the speech center of the brain can be translated into the subject's verbal thoughts. RNM can send encoded signals to the brain's auditory cortex, thus allowing audio communications direct to the brain (bypassing the ears). NSA operatives can use this covertly to debilitate subjects by simulating auditory hallucinations characteristic of paranoid schizophrenia.

Without any contact with the subject, Remote Neural Monitoring can map out electrical activity from the visual cortex of a subject's brain and show images from the subject's brain on a video monitor. NSA operatives see what the surveillance subject's eyes are seeing. Visual memory can also be seen. RNM can send images direct to the visual cortex, bypassing the eyes and optic nerves.

NSA operatives can use this surreptitiously to put images into a surveillance subject's brain while they are in REM sleep for brain-programming purposes.

1. Capabilities of NSA Operatives Using RNM

There has been a Signals Intelligence network in the US since the 1940s.

The NSA, Ft Meade has in place a vast two-way wireless RNM system which is used to track subjects and non-invasively monitor audio-visual information in their brains. This is all done with no physical contact with the subject. RNM is the ultimate method of surveillance and domestic intelligence. Speech, 3D sound and subliminal audio can be sent to the auditory cortex of the subject's brain (bypassing the ears), and images can be sent into the visual cortex. RNM can alter a subject's perceptions, moods and motor control.

Speech cortex/auditory cortex link has become the ultimate communications system for the intelligence community. RNM allows for a complete audio-visual brain-to-brain link or brain-to-computer link.

The above is a simple flowchart of Nuero-Electromagnetic Frequency Assaults

showing methods that can be perpetuated by the Police and Military Intelligence Agencies

toward Remote Mind Control Experiments, Behavioural Manipulation and Murder.

4. NATIONAL SECURITY AGENCY SIGNALS INTELLIGENCE ELECTRONIC BRAIN LINK TECHNOLOGY

NSA SIGINT can remotely detect, identify and monitor a person's bioelectric fields.

The NSA's Signals Intelligence has the proprietary ability to monitor remotely and non-invasively information in the human brain by digitally decoding the evoked potentials in the 30-50 Hz, 5 milliwatt electromagnetic emissions from the brain.

Neuronal activity in the brain creates a shifting electrical pattern that has a shifting magnetic flux. This magnetic flux puts out a constant 30-50 Hz, 5 milliwatt electromagnetic (EMF) wave.

Contained in the electromagnetic emission from the brain are spikes and patterns called "evoked potentials". Every thought, reaction, motor command, auditory event and visual image in the brain has a corresponding "evoked potential" or set of "evoked potentials". The EMF emission from the brain can be decoded into the current thoughts, images and sounds in the subject's brain.

NSA SIGINT uses EMF-transmitted Brain Stimulation as a communications system to transmit information (as well as nervous system messages) to intelligence agents and also to transmit to the brains of covert operations subjects (on a non-perceptible level).

EMF Brain Stimulation works by sending a complexly coded and pulsed electromagnetic signal to trigger evoked potentials (events) in the brain, thereby forming sound and visual images in the brain's neural circuits. EMF Brain Stimulation can also change a person's brain-states and affect motor control.

Two-way electronic Brain Link is done by remotely monitoring neural audio-visual information while transmitting sound to the auditory cortex (bypassing the ears) and transmitting faint images to the visual cortex (bypassing the optic nerves and eyes). The images appear as floating 2D screens in the brain.

Two-way electronic Brain Link has become the ultimate communications system for CIA/NSA personnel. Remote neural monitoring (**RNM**, remotely monitoring bioelectric information in the human brain) has become the ultimate surveillance system.

It is used by a limited number of agents in the US Intelligence Community.

The above is a simple flowchart of Neuro-Electromagnetic Frequency Assaults

showing methods that can be perpetuated by the Police and Military Intelligence Agencies toward Remote Mind Control Experiments, Behavioral Manipulation and Murder.

5. [NO HEADING IN ORIGINAL DOCUMENT]

RNM requires decoding the resonance frequency of each specific brain area.

That frequency is then modulated in order to impose information in that specific brain area. The frequency to which the various brain areas respond varies from 3 Hz to 50 Hz. Only NSA Signals Intelligence modulates signals in this frequency band. (See *Table 1* below)

This modulated information can be put into the brain at varying intensities from subliminal to perceptible. Each person's brain has a unique set of bioelectric resonance/entrainment frequencies. Sending audio information to a person's brain at the frequency of another person's auditory cortex would result in that audio information not being perceived.

The Plaintiff learned of RNM by being in two-way RNM contact with the Kinnecome group at the NSA, Ft Meade.

They used RNM 3D sound direct to the brain to harass the Plaintiff from October 1990 to May 1991.

As of 5/91 they have had two-way RNM communications with the Plaintiff and have used RNM to attempt to incapacitate the Plaintiff and hinder the Plaintiff from going to the authorities about their activities against the Plaintiff in the last 12 years. The Kinnecome group has about 100 persons working 24 hours a day at Ft Meade.

They have also brain-tapped persons the Plaintiff is in contact with to keep the Plaintiff isolated.

This is the first time ever that a private citizen has been harassed with RNM and has been able to bring a lawsuit against NSA personnel misusing this intelligence operations method.

[click above image](#)

6. NSA TECHNIQUES AND RESOURCES

Remote monitoring/tracking of individuals in any location, inside any building, continuously, anywhere in the country.

A system for inexpensive implementation of these operations allows for thousands of persons in every community to be spied on constantly by the NSA.

- Remote RNM Devices

NSA's RNM equipment remotely reads the evoked potentials (**EEGs**) of the human brain for tracking individuals, and can send messages through the nervous systems to affect their performance. RNM can electronically identify individuals and track them anywhere in the US.

This equipment is on a network and is used for domestic intelligence operations, government security and military base security, and in case of bioelectric warfare.

- Spotters and Walk-Bys in Metropolitan Areas

Tens of thousands of persons in each area working as spotters and neighbourhood/business place spies (sometimes unwittingly) following and checking on subjects who have been identified for covert control by NSA personnel.

Agents working out of offices can be in constant communication with spotters who are keeping track of the NSA's thousands of subjects in public. NSA agents in remote offices can instantly identify (using~ RNM) any individual spotted in public who is in contact with surveillance subject.

- Chemicals and Drugs into Residential Buildings with Hidden NSA Installed and Maintained Plastic Plumbing lines.

The NSA has kits for running lines into residential tap water and air ducts of subjects for the delivery of drugs (such as sleeping gas or brainwashing-aiding drugs).

This is an outgrowth of CIA pharmapsychology (psychopharmacology).

- Brief Overview of Proprietary US Intelligence/Anti-Terrorist Equipment Mentioned

Fixed network of special EMF equipment that can read EEGs in human brains and identify/track individuals by using digital computers. **ESB** (*Electrical Stimulation to the Brain*) via EMF signal from the NSA Signals Intelligence is used to control subjects.

EMF equipment that gathers information from PC circuit boards by deciphering RF emissions, thereby gaining wireless modem-style entry into any personal computer in the country. All equipment hidden, all technology secret, all scientific research unreported (as in electronic warfare research).

Not known to the public at all, yet complete and thorough implementation of this method of domestic intelligence has been in place since the early 1980s.

Editor's Note:

I tried ringing Mr Akwei to find out what was the out-come, if any, of his court case. He firmly but kindly told me that he could not speak about anything to do with the case over the phone and hung up. A subsequent conversation of similar length resulted in the information that he did not wish his address or phone number published with this article.

So, if we hear of any developments, we'll let you know.

Its totally obvious from the above article that the **US National Security Agency** is none other than a covertly run terrorist organization.

Their highly sophisticated technology that is used to monitor and manipulate the minds of millions of innocent people daily, is a blatant expression of the dominating and authoritarian mentality that exists behind the facade of our so called democratic society.

George Orwell's "*THOUGHT POLICE*" is an absolute reality in today's world.

Whether we realize it or not, every individual within our society is negatively effected by this dictatorship attitude.

It has to change - It will change - It starts with you!

George Farquhar
[Project Freedom](#)

An example of EMF Brain Stimulation

Table 1

Brain Area	Bioelectric Resonance Frequency	Information Induced Through Modulation
Motor Control Cortex	10 Hz	Motor Impulse co-ordination
Auditory Cortex	15 Hz	Sound which bypasses the ears
Visual Cortex	25 Hz	Images in the brain bypassing the eyes
Somatosensory	9 Hz	Phantom touch sense
Thought Center	20 Hz	Imposed subconscious thoughts

The Signals Intelligence mission of the **NSA** has evolved into a program of decoding EMF waves in the environment for wirelessly tapping into computers and track persons with the electrical currents in their bodies. Signals Intelligence is based on fact that everything in the environment with an electric current in it has a magnetic flux around it which gives off EMF waves.

The **NSA/DoD** [Department of Defense] developed proprietary advanced digital equipment which can remotely analyze all objects whether manmade or organic, that have electrical activity.

- Domestic Intelligence (DOMINT)

The **NSA** has records on all US citizens. The NSA gathers information on US citizen who might be of interest to any of the over 50,000 NSA agents (HUMINT). These agents are authorized by executive order to spy on anyone. The NSA has a permanent national security anti-terrorist surveillance network in place. This surveillance network is completely disguised and hidden from the public.

Tracking individuals in the US is easily and cost-effectively implemented with NSA's electronic surveillance network. This network (DOMINT) covers the entire US, involves tens of thousands of NSA personnel, and tracks millions of persons simultaneously. Cost-effective implementation of operations is assured by NSA computer technology designed to minimize operations costs. NSA personnel serve in quasi-public positions in their communities and run cover businesses and legitimate businesses that can inform the intelligence community of persons they would want to track.

NSA personnel in the community usually have cover identities such as social workers, lawyers and business owners.

- Individual Citizens Occasionally Targeted for Surveillance by Independently Operating NSA Personnel

NSA personnel can control the lives of hundreds of thousands of individuals in the US by using the NSA's domestic intelligence network and cover businesses.

The operations independently run by them can sometimes go beyond the bounds of law. Long-term control and sabotage of tens of thousands of unwitting citizens by NSA operatives is likely to happen.

NSA DOMINT has the ability to assassinate US citizens covertly or run covert psychological control operations to cause subjects to be diagnosed with ill mental health.

**The above symptoms highlight a fraction of the vast array of
Neuro-Electromagnetic Frequency Assaults perpetuated by the Police and
Military Intelligence Agencies toward
Remote Mind Control Experiments, Behavioral Manipulation and Murder.**

2. NSA'S DOMESTIC ELECTRONIC SURVEILLANCE NETWORK

As of the early 1960s, the most advanced computers in the world were at the **NSA**, Ft Meade. Research breakthroughs with these computers were kept for the NSA.

At the present time the NSA has nanotechnology computers that are 15 years ahead of present computer technology. The NSA obtains blanket coverage of information in the US by using advanced computers that use artificial intelligence to screen all communications, regardless of medium, for key words that should be brought to the attention of NSA agents/cryptologists.

These computers monitor all communications at the transmitting and receiving ends.

This blanket coverage of the US is a result of the *NSA's Signals Intelligence (SIGINT)* mission. The NSA's electronic surveillance network is based on a cellular arrangement of devices that can

monitor the entire EMF (electromagnetic frequency) spectrum.

This equipment was developed, implemented and kept secret in the same manner as other electronic warfare programs.

- Signals Intelligence Remote Computer Tampering

The NSA keeps track of all PCs and other computers sold in the US.

This is an integral part of the Domestic Intelligence network. The NSA's EMF equipment can tune in **RF** (remote frequency) emissions from personal computer circuit boards (while filtering out emissions from monitors and power supplies).

The RF emission from PC circuit boards contains digital information in the PC. Coded RF waves from the NSA's equipment can resonate PC circuits and change data in the PCs. Thus the NSA can gain wireless modem-style entry into any computer in the country for surveillance or anti-terrorist electronic warfare.

- Detecting EMF Fields in Humans for Surveillance

A subject's bioelectric field can be remotely detected, so subjects can be monitored anywhere they are.

With special **EMF** equipment NSA cryptologists can remotely read evoked potentials (from EEGs). These can be decoded into a person's brain-states and thoughts. The subject is then perfectly monitored from a distance. NSA personnel can dial up any individual in the country on the Signals Intelligence EMF scanning network and the NSA's computers will then pinpoint and track that person 24 hours a day.

The **NSA** can pick out and track anyone in the US.

3. NSA SIGNALS INTELLIGENCE USE OF EMF BRAIN STIMULATION

NSA Signals Intelligence uses *EMF Brain Stimulation* for *Remote Neural Monitoring (RNM)* and *Electronic Brain Link (EBL)*.

EMF Brain Stimulation has been in development since the [MKULTRA program](#) of the early 1950s, which included neurological research into radiation (non-ionizing EMF) and bioelectric research and development.

The resulting secret technology is categorized at the National Security Archives as "*Radiation Intelligence*", defined as,

"information from unintentionally emanated electromagnetic waves in the environment, not including radioactivity or nuclear detonation".

Signals Intelligence implemented and kept this technology secret in the same manner as other electronic warfare programs of the US Government.

The NSA monitors available information about this technology and withholds scientific research from the public. There are also international intelligence agreements to keep this technology secret.

The NSA has proprietary electronic equipment that analyze electrical activity in humans from a distance. NSA computer generated brain mapping can continuously monitor all of the electrical activity in the brain continuously. The NSA records and decode individual brain maps (of hundreds of thousands of persons) for national security purposes. EMF Brain Stimulation is also secretly used by the military for brain-to-computer link (in military fighter aircraft, for example).

For electronic surveillance purposes, electrical activity in the speech center of the brain can be translated into the subject's verbal thoughts. RNM can send encoded signals to the brain's auditory cortex, thus allowing audio communications direct to the brain (bypassing the ears). NSA operatives can use this covertly to debilitate subjects by simulating auditory hallucinations characteristic of paranoid schizophrenia.

Without any contact with the subject, Remote Neural Monitoring can map out electrical activity from the visual cortex of a subject's brain and show images from the subject's brain on a video monitor. NSA operatives see what the surveillance subject's eyes are seeing. Visual memory can also be seen. RNM can send images direct to the visual cortex, bypassing the eyes and optic nerves.

NSA operatives can use this surreptitiously to put images into a surveillance subject's brain while they are in REM sleep for brain-programming purposes.

1. Capabilities of NSA Operatives Using RNM

There has been a Signals Intelligence network in the US since the 1940s.

The NSA, Ft Meade has in place a vast two-way wireless RNM system which is used to track subjects and non-invasively monitor audio-visual information in their brains. This is all done with no physical contact with the subject. RNM is the ultimate method of surveillance and domestic intelligence. Speech, 3D sound and subliminal audio can be sent to the auditory cortex of the subject's brain (bypassing the ears), and images can be sent into the visual cortex. RNM can alter a subject's perceptions, moods and motor control.

Speech cortex/auditory cortex link has become the ultimate communications system for the intelligence community. RNM allows for a complete audio-visual brain-to-brain link or brain-to-computer link.

The above is a simple flowchart of Nuero-Electromagnetic Frequency Assaults

showing methods that can be perpetuated by the Police and Military Intelligence Agencies

toward Remote Mind Control Experiments, Behavioural Manipulation and Murder.

4. NATIONAL SECURITY AGENCY SIGNALS INTELLIGENCE ELECTRONIC BRAIN LINK TECHNOLOGY

NSA SIGINT can remotely detect, identify and monitor a person's bioelectric fields.

The NSA's Signals Intelligence has the proprietary ability to monitor remotely and non-invasively information in the human brain by digitally decoding the evoked potentials in the 30-50 Hz, 5 milliwatt electromagnetic emissions from the brain.

Neuronal activity in the brain creates a shifting electrical pattern that has a shifting magnetic flux. This magnetic flux puts out a constant 30-50 Hz, 5 milliwatt electromagnetic (EMF) wave.

Contained in the electromagnetic emission from the brain are spikes and patterns called "evoked potentials". Every thought, reaction, motor command, auditory event and visual image in the brain has a corresponding "evoked potential" or set of "evoked potentials". The EMF emission from the brain can be decoded into the current thoughts, images and sounds in the subject's brain.

NSA SIGINT uses EMF-transmitted Brain Stimulation as a communications system to transmit information (as well as nervous system messages) to intelligence agents and also to transmit to the brains of covert operations subjects (on a non-perceptible level).

EMF Brain Stimulation works by sending a complexly coded and pulsed electromagnetic signal to trigger evoked potentials (events) in the brain, thereby forming sound and visual images in the brain's neural circuits. EMF Brain Stimulation can also change a person's brain-states and affect motor control.

Two-way electronic Brain Link is done by remotely monitoring neural audio-visual information while transmitting sound to the auditory cortex (bypassing the ears) and transmitting faint images to the visual cortex (bypassing the optic nerves and eyes). The images appear as floating 2D screens in the brain.

Two-way electronic Brain Link has become the ultimate communications system for CIA/NSA personnel. Remote neural monitoring (**RNM**, remotely monitoring bioelectric information in the human brain) has become the ultimate surveillance system.

It is used by a limited number of agents in the US Intelligence Community.

The above is a simple flowchart of Neuro-Electromagnetic Frequency Assaults

showing methods that can be perpetuated by the Police and Military Intelligence Agencies toward Remote Mind Control Experiments, Behavioral Manipulation and Murder.

5. [NO HEADING IN ORIGINAL DOCUMENT]

RNM requires decoding the resonance frequency of each specific brain area.

That frequency is then modulated in order to impose information in that specific brain area. The frequency to which the various brain areas respond varies from 3 Hz to 50 Hz. Only NSA Signals Intelligence modulates signals in this frequency band. (See *Table 1* below)

This modulated information can be put into the brain at varying intensities from subliminal to perceptible. Each person's brain has a unique set of bioelectric resonance/entrainment frequencies. Sending audio information to a person's brain at the frequency of another person's auditory cortex would result in that audio information not being perceived.

The Plaintiff learned of RNM by being in two-way RNM contact with the Kinnecome group at the NSA, Ft Meade.

They used RNM 3D sound direct to the brain to harass the Plaintiff from October 1990 to May 1991.

As of 5/91 they have had two-way RNM communications with the Plaintiff and have used RNM to attempt to incapacitate the Plaintiff and hinder the Plaintiff from going to the authorities about their activities against the Plaintiff in the last 12 years. The Kinnecome group has about 100 persons working 24 hours a day at Ft Meade.

They have also brain-tapped persons the Plaintiff is in contact with to keep the Plaintiff isolated.

This is the first time ever that a private citizen has been harassed with RNM and has been able to bring a lawsuit against NSA personnel misusing this intelligence operations method.

[click above image](#)

6. NSA TECHNIQUES AND RESOURCES

Remote monitoring/tracking of individuals in any location, inside any building, continuously, anywhere in the country.

A system for inexpensive implementation of these operations allows for thousands of persons in every community to be spied on constantly by the NSA.

- Remote RNM Devices

NSA's RNM equipment remotely reads the evoked potentials (**EEGs**) of the human brain for tracking individuals, and can send messages through the nervous systems to affect their performance. RNM can electronically identify individuals and track them anywhere in the US.

This equipment is on a network and is used for domestic intelligence operations, government security and military base security, and in case of bioelectric warfare.

- Spotters and Walk-Bys in Metropolitan Areas

Tens of thousands of persons in each area working as spotters and neighbourhood/business place spies (sometimes unwittingly) following and checking on subjects who have been identified for covert control by NSA personnel.

Agents working out of offices can be in constant communication with spotters who are keeping track of the NSA's thousands of subjects in public. NSA agents in remote offices can instantly identify (using~ RNM) any individual spotted in public who is in contact with surveillance subject.

- Chemicals and Drugs into Residential Buildings with Hidden NSA Installed and Maintained Plastic Plumbing lines.

The NSA has kits for running lines into residential tap water and air ducts of subjects for the delivery of drugs (such as sleeping gas or brainwashing-aiding drugs).

This is an outgrowth of CIA pharmapsychology (psychopharmacology).

- Brief Overview of Proprietary US Intelligence/Anti-Terrorist Equipment Mentioned

Fixed network of special EMF equipment that can read EEGs in human brains and identify/track individuals by using digital computers. **ESB** (*Electrical Stimulation to the Brain*) via EMF signal from the NSA Signals Intelligence is used to control subjects.

EMF equipment that gathers information from PC circuit boards by deciphering RF emissions, thereby gaining wireless modem-style entry into any personal computer in the country. All equipment hidden, all technology secret, all scientific research unreported (as in electronic warfare research).

Not known to the public at all, yet complete and thorough implementation of this method of domestic intelligence has been in place since the early 1980s.

Editor's Note:

I tried ringing Mr Akwei to find out what was the out-come, if any, of his court case. He firmly but kindly told me that he could not speak about anything to do with the case over the phone and hung up. A subsequent conversation of similar length resulted in the information that he did not wish his address or phone number published with this article.

So, if we hear of any developments, we'll let you know.

Its totally obvious from the above article that the **US National Security Agency** is none other than a covertly run terrorist organization.

Their highly sophisticated technology that is used to monitor and manipulate the minds of millions of innocent people daily, is a blatant expression of the dominating and authoritarian mentality that exists behind the facade of our so called democratic society.

George Orwell's "*THOUGHT POLICE*" is an absolute reality in today's world.

Whether we realize it or not, every individual within our society is negatively effected by this dictatorship attitude.

It has to change - It will change - It starts with you!

George Farquhar
[Project Freedom](#)

An example of EMF Brain Stimulation

Table 1

Brain Area	Bioelectric Resonance Frequency	Information Induced Through Modulation
Motor Control Cortex	10 Hz	Motor Impulse co-ordination
Auditory Cortex	15 Hz	Sound which bypasses the ears
Visual Cortex	25 Hz	Images in the brain bypassing the eyes
Somatosensory	9 Hz	Phantom touch sense
Thought Center	20 Hz	Imposed subconscious thoughts

Email: jackbrewerblog@yahoo.com

April 19, 2018

To Whom It May Concern:

Pursuant to the Washington Public Records Act, I hereby request the following records:

Any and all records that refer or relate to "EM," "psychotronic," "mind control," "brain mapping," "EMF," "electromagnetic frequency," "ELF," "electromagnetic low frequency," "voice to skull" technology, and/or "remote viewing."

A fee waiver is requested on the grounds I am a freelance writer, the requested information will be published in ways that are not primarily commercial, and the requested information stands to assist the public in better understanding government operations. If fees are deemed applicable, please notify me before processing if costs are estimated to exceed \$30.

I prefer the requested files be delivered electronically by email attachment or by CD-ROM if not, but agree to other delivery means if considered more practical or efficient.

Thank you for your attention to my request.

Sincerely,

Jack Brewer

April 19, 2018

To Whom It May Concern:

Pursuant to the Washington Public Records Act, I hereby request the following records:

- Any and all records that refer or relate to "EM," "psychotronic," "mind control," "brain mapping," and/or "remote viewing." The date range for this request is Jan. 1, 2017, to the date your office processes this request .

I am a full-time reporter at ThinkProgress, a nonprofit news site based in Washington, D.C. My work has also appeared in The Washington Post, The Boston Globe, The Christian Science Monitor, Al Jazeera America, The Intercept, PRI's The World, and Teen Vogue. The requested documents will be made available to the general public, and this request is not being made for commercial purposes.

In the event that there are fees, I would be grateful if you would inform me of the total charges in advance of fulfilling my request. I would prefer the request filled electronically, by email attachment if available or CD-ROM if not.

Thank you in advance for your anticipated cooperation in this matter. I look forward to receiving your response to this request within 5 business days, as the statute requires.

Sincerely,
Joshua Eaton
