The attached may be helpful. This is a memo that we created for Enrique earlier this year - and it includes information on the ACS citizenship question and imputation rates. In general, we do not find troubling data quality issues with the citizenship question within the ACS.

Subject: Citizenship on the ACS

I was curious about response rates to this on the ACS. The attached is all I could find easily. Appears that it's in line with other questions. Are any particular QC concerns about this question?
