

RCI Mobile consists of sophisticated, discreet & proven Mobile Phone Applications compatible with most of today's modern smart phone devices. **RCI Mobile** is capable of obtaining nearly every mobile phone activity and reporting it silently & remotely to a secure & easy to use remote web panel.

Universal Web Panel | Our user friendly web panel can be installed on nearly any LAMP server in a matter of minutes. Installation can be performed by our team, or the panel can be packed for self-install by your IT Team. Key Features Include:

- ✓ User Friendly Dashboard View for quick device/user insights
- ✓ Keyword search feature - search for any keywords in your web panel account data and view the results nicely organized and structured. Keyword search can be performed across users and multiple data types including call logs, images, chats, sms, contacts, emails & more.
- ✓ 100% secure & private with 99.99% uptime
- ✓ View live GPS Details (when app is configured to do so) on a map, including past GPS history.
- ✓ Geo Tagged Data points
- ✓ Cell ID & Network/WiFi Location capable (when GPS is not available, plugs into the most popular Cell ID DB's)
- ✓ Sortable Data
- ✓ Bulk Download Options
- ✓ Remotely Configure Application Settings directly from your Panel Account
- ✓ Set custom avatars for each user/device in the system
- ✓ Set a GPS Leash/Fence for the target device and receive an SMS or Email alert when the device enters or leaves the area
- ✓ Panel connectivity has been optimized to prevent flooding
- ✓ Media files are compressed when possible before uploading
- ✓ Full Remote License & Settings Management
- ✓ Optional Fall Back Server Configuration Available
- ✓ Offline Data Access
- ✓ Support for multiple admins with flexible permissions levels
- ✓ Schedule Application Settings

RCI Mobile Technical Functional Overview – August 2016

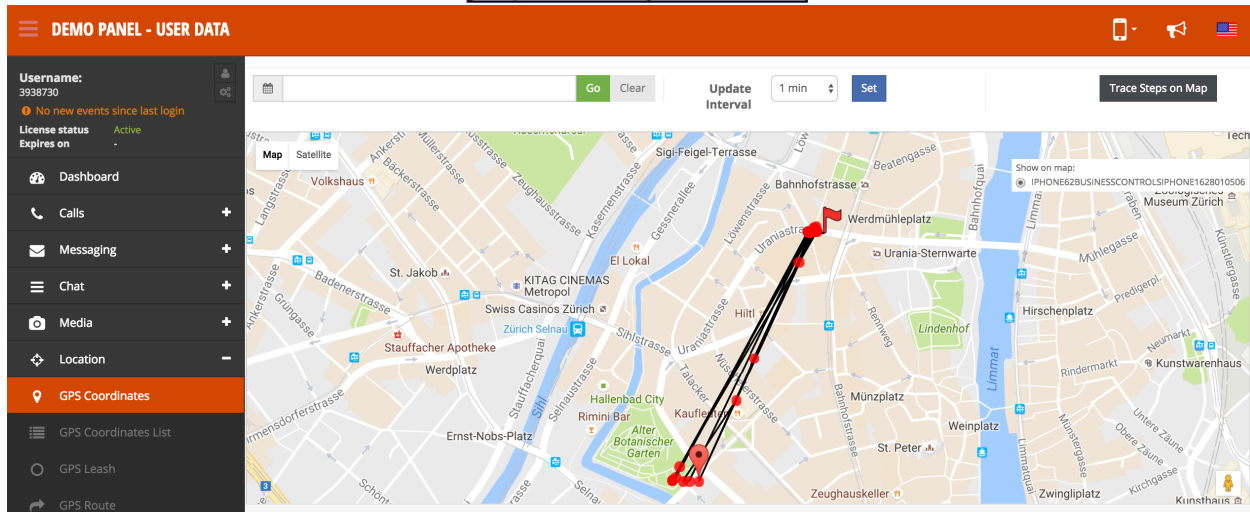

Figure 1 Application GPS Report Map View

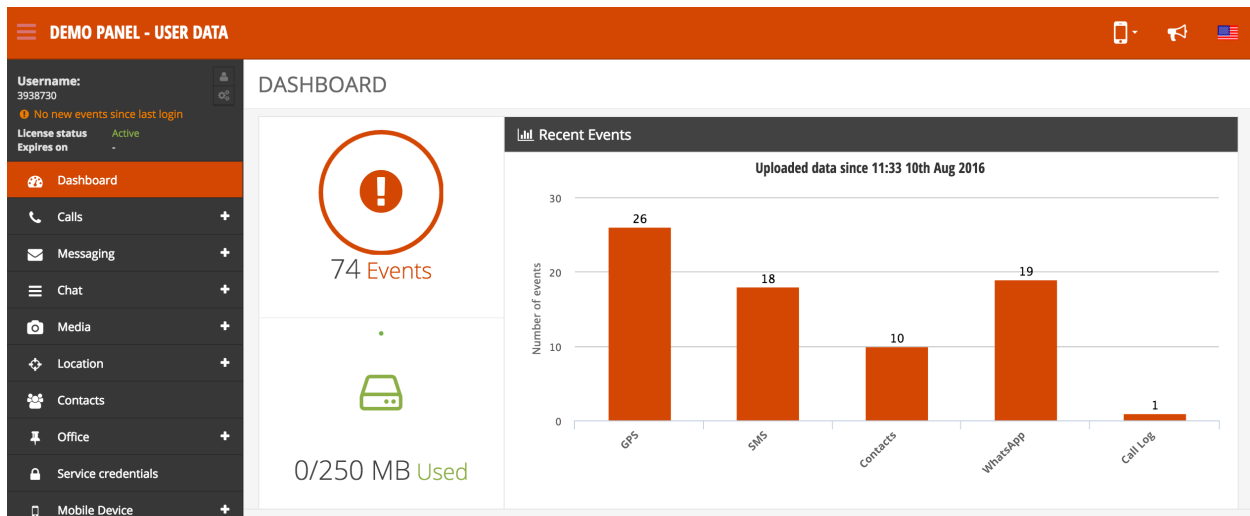

Figure 2 Dashboard view

The screenshot shows the 'DEMO PANEL - BACKOFFICE' interface. On the left is a navigation menu with options like Dashboard, Global keyword search, Location history, License approval, Expiring licenses, Manage users, Users list, Manage administrators, Translations, Frontend, Backoffice, and System Settings. The main area displays a table of user accounts with columns for Account Identifier, Devices, Created, Last login, and Status. Below the table are actions like 'View data', 'Edit user', and 'Delete account' for each user.

Account Identifier	Devices	Created	Last login	Status
4410238		Sep 20th 2016, 16:39:59	-	Active
9578589	865276021102538 License expires on 2017-09-06	Sep 20th 2016, 16:39:59	-	Active
5498194	353627075018286 License expires on 2017-08-17	Sep 20th 2016, 11:30:18	Sep 20th 2016, 14:38:05	Active

Figure 3 Master Panel Admin

The screenshot shows the 'DEMO PANEL - USER DATA' interface. The left sidebar contains options like Dashboard, Calls, Messaging, Chat, Media, Location, Contacts, Office, Service credentials, and Mobile Device. The main area is titled 'REMOTE COMMANDS' and includes a 'Remote commands queue' section with a table showing no commands. Below that is a 'Send a command' section with a dropdown menu for 'Choose Command' and a 'Command Format' field.

Choose Command

- (choose command)
- Upload current GPS to Web
- Get SMS GPS Locations
- Enable TRa
- Disable TRa
- Retrieve Settings
- Start Recording
- Stop Recording
- Enable Auto settings download
- Disable Auto settings download
- Remote Uninstall

Figure 4 Remote Commands View

RCI Mobile runs on the majority of Today’s Smart Phone Devices. Deployment literally takes seconds. Simply browse to our automatic device detecting URL which will automatically prompt you to install, accept the default device installation prompts and you’re done. Alternatively send the target device a simple link via Email or SMS (which can be masked using various social engineering methods). **RCI Mobile** comes pre-configured with your desired settings and from there can be controlled & configured 100% remotely. **Available Features vary based on the device & OS and are listed below.**

 **ANDROID** | ANDROID OS 2.3 & above
(Installation via automatic device detecting URL).
Installation file can mimic customers preferred application.
Install Trojan by Single URL –Exploits or Silent SMS

FEATURE OVERVIEW

- ✓ Record Live Calls (On many Android Models & OS versions root typically not required)
- ✓ Discreet Running Application that is virtually undetectable even by tech savvy mobile users
- ✓ Automatically runs on device reboot
- ✓ Auto On GPS - Tracks GPS even if it's turned off in the Device Settings
- ✓ Uninstall Prevention (New! No Root Required!)
- ✓ Responds to silent Remote Commands allowing you to remotely trigger audio, photos & video recording
- ✓ Live, On Demand Audio Monitoring that's 100% undetectable. Live Audio can be optionally recorded and will merge in any call making it the best audio monitoring feature available.
- ✓ Optional Automatic deletion of uploaded media
- ✓ Automatically restarts itself even when shut down by the OS
- ✓ Report Incoming & Outgoing Call Logs (Caller Number/Contact Name, Time & Date)
- ✓ Report Sent & Received SMS / TXT Message Logs (Sender Number/Contact Name, Time & Date)
- ✓ Report New Contacts
- ✓ Report GPS Location or Cell ID Details (when GPS is not available) that can be viewed on a map or sent as a Google Maps formatted URL via SMS. GPS can be reported at it's own set interval independent of the reporting interval
- ✓ Upload Newly Taken Photos
- ✓ Upload Newly Taken Videos
- ✓ Record VoIP Calls
- ✓ Report Whatsapp Chats
- ✓ Report Whatsapp Audio Notes/Chats
- ✓ Report BBM Messages
- ✓ Report Telegram Messages
- ✓ Report Facebook Activity
- ✓ Report Facebook Photos
- ✓ Report Snapchats (Chats, Video, Photos including Self Destructing – requires root)
