Subject: CT Strategy Meeting

The Communications and Public Affairs team met today to discuss the outreach strategy for the CT project. Please review the attached spreadsheet for the action items and deadlines for those on this email. We have a followup meeting scheduled for next Monday. Is there someone from Regulatory we should include on this team and in future meetings?

There are some key deliverables with very tight/short deadlines that we will need your help to achieve. In addition to the action items on the attached plan, we are open for other suggestions and are in the process of putting details around all action items.

Please let us know if:

You need speakers/letter writers, etc. from Entergy supporters at the IRP public hearing;

We have a budget for the community meetings and if yes – how much;

Other than Reg. and Legal – do you want any others from Entergy attending next week's **public hearing**?

Thanks. We look forward to your input/feedback. Please let us know if you have any questions.

Toni

On behalf of the CT Strategy Team

Yolanda / Toni:

Attached are two additional statements (a single mother and Sassafras Restaurant).

I have confirmed that Corey Duckworth – the owner of Sassafras is available for the 11 AM Hearing. Please review and edit his statement before I send it to him and introduce him to Toni.

We do owe you one more statement. Please give me a sense of the profile of the person for the final one.

Thanks.

Bill

Yolanda / Toni:

Attached are 6 of the 9 talk points we have produced so far. Please review and give me any feedback on the direction we are pursuing with these.

I have spoken to the owner of Sassafras Restaurant, Corey Duckworth. He is willing to appear at the hearing tomorrow in support of the new plant. I do need to know the time of the hearing to get him there for the presentation. Please advise.

Thus far, we have completed messages for Signs Now, Metro Disposal, a homeowner in N. O. East, a local resident speaking to affordability, a local resident concerned with the environment, and a local resident concerned with protection during storms.

We will have the rest by 2 PM today.

Let me know if this is what you need.

Thanks.

Team,

Please move forward with drafting of remarks emphasizing Reliability, Cost and Environment:

Toni will have the following stakeholders in attendance to deliver max. 2-minute remarks:

Owners/Representatives from three (3) businesses – Signs Now, DMM Associates and Metro Disposal

Five (5) Residents of New Orleans East (also current or former members or ENONAC)

One customer for environmental position

Hope this gives you some general direction for the various stakeholder scripts and messengers to get drafts underway. Toni will assign and provide the scripts to the appropriate messengers.

Please let us know any questions.

Thanks,
Yolanda

All,

We've talked about the possibility over recent days and meetings, but the **New Orleans Power Station is an agenda item for Thursday's utility committee meeting**. Toni Green-Brown is working to finalize the key stakeholders list of those attending and supporting Entergy New Orleans and the proposed plant. As Toni shares the names of those stakeholders with this team, she'll need 2-minute remarks by Wednesday for each, matching the appropriate message to the messenger (business, consumer advocate, etc.). Thanks for your flexibility and patience as meeting plans and stakeholders have evolved.

**Entergy – New Orleans Power Station
New Orleans Resident Concerned About Protection Against Storms**

I am a local resident who was displaced after Hurricane Katrina. Even though my home was not flooded, my family and I were forced to live in Baton Rouge and then Houston because our city's services were out of commission for several months. We hope that we will never see a situation like that again, but in case we do wouldn't it be a good idea that we invest now in a power station that will have the ability to get us back on line much sooner. I am supporting this proposed station because it makes sense.

No one likes to pay more for services, but a power station like this one is a good investment for all of us.

Key Messages:

As I said, the New Orleans Power Station will help the city during emergency situations – from preparation through recovery

It will allow the city to function should extreme weather conditions or a major storm strike our area. The facility can aid in the restoration process following a hurricane by providing a local source of generation. The units start quickly, and are important for short-term situations to meet temporary energy needs, they are also capable of operating for extended periods.

In 2008, Hurricane Gustav knocked out all but one of the major transmission lines serving the New Orleans metropolitan area, creating a situation where the city essentially became an island and no longer was connected to the rest of the electrical grid. We can't afford for that to happen again. I want the ability to get back to the city faster and I know there are others out there who share my thoughts.

The New Orleans Power Station will be good for economic development and jobs.

It is designed to provide power to all of us in the city. During construction and when it's operating, it will be good for economic development by providing revenue and jobs. It will also help get us back to work sooner if and when we have to return from a storm or hurricane.

I hope the City Council approves this project because it is vital that we have affordable power when we need it the most.

I understand that this is the first time in more than 30 years that Entergy New Orleans has requested approval to construct a local generating unit. Many local citizens are concerned about clean energy and affordable power. This project will give us both. It will help minimize environmental impacts and ensure affordable rates in the future.

Thank you for allowing me to give my opinion about this important project.

**Entergy – New Orleans Power Station
Customer from an Environmental Position**

I am an avid supporter of the environment. I believe that our nation should be turning to renewable sources of energy, and I support alternatives to fossil fuels whenever possible. Having said that, I am here to support the request of Entergy to build the New Orleans Power Station.

There are some very good reasons for this power station to be built.

First, this is the only type of energy-producing facility that could be produced inside the city limits, especially on the East Bank. There is no way a solar facility could be located here and I don't think anyone believes that wind power would work in a feasible way.

Secondly, this plant will increase the generation available to handle Entergy New Orleans' projected load.

In order to keep pace with the city's growth, we need a modern, technologically-reliable, efficient and affordable power source. The deactivations of two old units means nearly 800 megawatts of less generating capacity, especially for peaking and reserve resources. This power station makes sense from both consumer and company investment standpoints.

Thirdly, the power station will be more efficient with minimal environmental impact.

It will supply power during peak demand periods when electricity use is high. It will also increase the generation needed to handle Entergy New Orleans' projected load, delivering more power to businesses and residences. It will use newer, more efficient technology, meaning it will produce lower emission levels than the recently deactivated units. It will also result in a decrease in the capacity for groundwater usage – a 99 percent reduction compared to the past.

Finally, Entergy is a leader in renewable energy generation. They are committed in renewable energy is a major priority for the future.

Entergy has been one of the leading utility companies in the world in developing renewable energy technology. Entergy New Orleans is operating one of only five pilot projects for solar power generation in the United States and is committed to a clean energy future for New Orleans. The New Orleans Power Station is the most feasible and affordable transition to a renewable energy future.

Energy – New Orleans Power Station
Signs Now – Michelle Gobert

My name is Michelle Gobert. I am the owner of Signs Now, a ___ year old business in the City of New Orleans. I am also the President of the New Orleans Black Chamber.

Key Messages:

The city needs the New Orleans Power Station.

We need this facility for three or four very important reasons:
It will provide affordable energy for our citizens. This is a project that will provide for a power station on land away from highly populated areas. It was used for a bigger facility until recently and it has all the proper zoning. We need affordable and clean energy, and this natural gas plant will be a solution for many years to come. And, it gives us the ability to quickly provide energy generation at the local level in times of crisis.

The New Orleans Power Station will benefit the entire city.

It is designed to provide power to all of us in the city. During construction and when it's operating, it will be good for economic development by providing revenue and jobs. It will also help get us back to work sooner if and when we have to return from a storm or hurricane.

This project deserves the support from the City Council because it is vital that we have affordable power when we need it the most.

This is the first time in more than 30 years that Energy New Orleans has requested approval to construct a local generating unit. Your vote in favor of the power station will show local citizens and business leaders that this is a wise investment that will maximize economic benefits, minimize environmental impacts and ensure affordable rates in the future.

In Orleans Parish, construction of the New Orleans Power Station is expected to generate nearly \$206 million in new business sales, more than \$28 million in new household earnings for parish residents, an average of 92 jobs per year and pump nearly \$983,000 in new sales taxes into the parish treasury.

Thank you for allowing me to express my support for this important project.

**Entergy – New Orleans Power Station
East New Orleans Homeowner**

I am _____ (address), I'm a homeowner and life-long resident of New Orleans

Key Messages:

Affordable and Reliable Power

I am here today to support the building of the new Power Plant in East New Orleans. From everything I have heard, this new plant will give us a local source of power when we need it most. Like when Katrina devastated us down and Gustav knocked out the power in our region. I have heard about solar and wind power, but it doesn't appear that they are very reliable and they cost way too much!

Entergy puts the consumer first

I want to be able to have the access to power at a reasonable and affordable cost. With the energy efficient programs Entergy and City Council have developed, I can see the effort to keep utility costs down and make living in New Orleans less expensive. In considering new energy sources for our City, I urge the Council to be mindful of citizen needs and to make decisions that continue to moderate costs while insuring our power needs.

Hope for a clean energy future.

I want to be perfectly clear about my own belief that we need clean energy for the benefit of our children and future generations. I am pleased to know that Entergy has committed to developing the new, clean energy sources. The plant being proposed is a big step in the right direction and it gives us the power we need now as the new energy sources are brought on-line.

I urge the Council's support for this important project

Thanks John. I'm copying Yolanda Pollard on this email. She's running the campaign for Entergy New Orleans, and she would be best for the in depth briefing you will need. Her number is 504 670 3656.

I'm out of pocket on Monday and Tuesday, but Yolanda should be available. Yolanda, please let John know if you're not available.

Thanks

I had a very good visit with our team, who are excited about trying to help you and we've all been following the post-flood developments with a strong feeling it positions the situation perfectly for the kind of third-party grassroots/GrassTops effort you suggested. The challenge is how – with whom and with what “cut-outs” – we create this. We've got a couple ideas about how we might proceed that we need to discuss with you . . . and, if you think they are promising (or have better suggestions), then we need to get the truly “deep in the weeds” briefing so we can get you a plan/timeline/budget and get this started.

I'm in Venice (Italy, not California or Florida, tho' it's hotter than both and swampier than Louisiana) til Wednesday or Thursday night but will try to call you tomorrow, Monday, and explore what we're thinking about with you.

Hi Suzanne,

I look forward to connecting with you again. Yes, we worked together on the New Orleans solar project communications which actually has become a key point of reference as we talk with key stakeholders about the proposed power station. We'll discuss those details this week.

Best,
Yolanda

Yolanda –

Unhelpfully, I am seven time zones away – in Venice, Italy – until Thursday (tho' I'll try to join any call that happens in the times/locations where I have what I am learning is VERY limited cell service here).

Let me ask our President, Suzanne Hammelman (who claims to know you!) and our Vice Chair, Larry Walsh, to get in direct touch with you and schedule what works for you and them Monday (when I know Larry and our senior counselor, Bryant Kinney, are in Tampa at TECO) or Tuesday. They will also arrange to have our senior associate Henry Rubin and/or our research director Jefferson Freeman on the call, too. And, as I said, I'll join if I can.

We just need to be a lot more knowledgeable about the details: what's proposed, who the opposition is and what they're doing, how the political situation is playing out post-floods and pre-election, what the needs are, what the opportunities are, who logical local "leaders" might be, how they're best recruited, etc. Any and all you can tell us will be valuable and we try to refine our thinking and planning to present proposed strategy, tactics and operations to you.

Thanks for giving us this opportunity.

John

Yes, I'm available 10:30-2:30 CDT on Monday for a briefing. John, please let me know if some point during this timeframe works for you. Looking forward to it.

On Aug 13, 2017, at 11:23 AM, LAGARDE, CHANEL <CLAGAR1@entergy.com> wrote:

Thanks John. I'm copying Yolanda Pollard on this email. She's running the campaign for Entergy New Orleans, and she would be best for the in depth briefing you will need. Her number is 504 670 3656.

I'm out of pocket on Monday and Tuesday, but Yolanda should be available. Yolanda, please let John know if you're not available.

Thanks

I had a very good visit with our team, who are excited about trying to help you and we've all been following the post-flood developments with a strong feeling it positions the situation perfectly for the kind of third-party grassroots/GrassTops effort you suggested. The challenge is how – with whom and with what “cut-outs” – we create this. We've got a couple ideas about how we might proceed that we need to discuss with you . . . and, if you think they are promising (or have better suggestions), then we need to get the truly “deep in the weeds” briefing so we can get you a plan/timeline/budget and get this started.

I'm in Venice (Italy, not California or Florida, tho' it's hotter than both and swamplier than Louisiana) til Wednesday or Thursday night but will try to call you tomorrow, Monday, and explore what we're thinking about with you.

MEMORANDUM

TO: YOLANDA POLLARD

FROM: SUZANNE HAMMELMAN, ELLEN SCOTT-BELLI

RE: FOLLOW UP PROPOSAL

Thank you for taking the time to talk with us earlier today. The following is a summarized and slightly revised version of the proposal and plan that John outlined for you and Charles the other day. Our goal is to build an independent organization that can support – starting immediately upon your program and budget authorization – to provide high level “GrassTops” and real, organic grassroots support for projects designed to (quoting you!) “make New Orleans whole.”

The big idea is to build a sustainable independent organization that will start by promoting the need to build the New Orleans Power Station (ideally the 226 MW option). If built for the long-term, this organization can advocate for any number of projects within its mission that are also supported by Entergy New Orleans.

The organization will be designed to be a credible advocacy group that provides third party, expert and citizen support. It will be created initially by a few respected New Orleans civic, labor, religious, minority and community leaders. Some groups that you have already recruited to support the project – Black Chamber, AFL-CIO, Port of New Orleans, Coalitions of Ministers – might wish to join the organization, but we will also aggressively seek new and unexpected advocates.

The organization and its members will quickly become visible on several levels.

First, we believe that **starting the group as a Facebook community** (albeit, with a recognizable, credible name/s behind it) will create quite a buzz online, particularly given the current environment. There is no doubt that with the appropriate resources, an active Facebook community discussion can drown out the “noise” of the currently loud, but likely relatively few opponents. Building a group of Facebook friends in the thousands will very quickly provide immediate visibility and credibility and give us the

ability to move seamlessly into the post-Labor Day political conversation.

As we use social media to push out interesting, factual and useful information, the organization will also become the “**go-to**” **source for news** story ideas and information, even as the “real world” organization (the GrassTops leadership, campaign manager, media relations person) is being built.

We would begin the conversation on Facebook, while simultaneously building the GrassTops organization, recruiting and organizing business and community leaders to demonstrate their support for the New Orleans Power Station by testifying, asking their members (if head of an organization) to help, submitting OpEds, make personal contacts (if appropriate) with Commissioners, etc.

Some recognizable names that we might consider for GrassTops membership (and/or leadership) could include suggestions made by Charles, such as **Gary LaGrange**, President of the Port Authority Association and **Noah Lewis**, 100 Black Men of Metro New Orleans, as well as leaders such as **Ruthie Fierson**, Founder and Chair Emeritus of Citizens for 1 Greater New Orleans; **Senator JP Morrell**, who passed the original sewage and water board reforms; **Tiger Hammond**, AFL-CIO, Greater New Orleans President; **Andy Kopplin**, Greater New Orleans Foundation (and former chief of staff for the Mayor); **Joe Jaeger**, a retired developer; Cheryl Teamer, community leader, board member of many organizations. There may also be a **retired Entergy employee(s)** who has remained active in the community, etc. These are just a few suggestions. We have not reached out to any of these people yet, so we not know of their willingness to serve and have also not delved deep into their backgrounds to ascertain suitability.

This top-level support would be bolstered by organized advocacy (both organic and assisted) from the community of grassroots supporters who will be encouraged to participate in hearings (both testifying and demonstrating); demonstrations; calling and writing Commissioners, the Mayor (if needed) and candidates; and submitting Letters-to-the-Editor. These efforts can be – if needed – targeted to specific incumbents/candidates.

In short, the GrassTops organization provides quality and credibility to an organically-grown advocacy organization that will add volume and increase the noise level of support.

Time is short as we need to organize a strong show of support for the October 16 public hearing, and particularly as we prepare for the post-Labor Day political barrage of ads and news coverage where it is highly likely the need for the project and the project itself will become an issue (fossil fuels versus renewables). The following lays out an aggressive timeline, with the set up and organizational activity and initial recruitment in September.

The activity/budget phases outlined below are designed – based on our understanding of the process – to fit with the events and decision making points through February, 2018.

September, 2017

\$139,200-\$205,200*

**Higher budget number includes focus groups, in addition to poll; building an online membership of 5,000 members who take an action to join the organization as well as contact a Public Service Commissioner, or other public official.*

- Identify and recruit one or more GrassTops champions who will “create” the organization and be – at least initially – the public face.
- Settle on an organization name:
 - Make New Orleans Work Again (although this MAY bring up visions of the Trump motto in a city where he received little support)
 - Building a Stronger New Orleans
 - New Orleans Forward
 - Prepare NOLA
- Incorporate as a non-profit, 501(c)(4) organization (likely incorporate in Delaware and register to do business in Louisiana); set up bank account, etc.
- Do the research (polling for messaging and targeting, as well as possible distribution – if appropriate – to policymakers; focus groups, if needed; issue and opposition research to build the case book on which all campaign messaging will be built)
- Develop the time-lined campaign plan to use as a roadmap that includes tactics and metrics
- Set up and populate an advocacy website and Facebook page.
- Recruit 3,000-5,000 members online – to also take an action beyond “joining”
- Hire a campaign manager, political field operations director, and media relations person/firm

- Identify, recruit and build out the GrassTops or Leadership organization – create the lists, prepare the materials, personal outreach
- As needed, meet with your team to review strategy, priorities, activities and to provide assistance with internal employee/retiree and existing outreach on the project (advertising, etc.)

October-November, 2017 **\$124,500 - \$219,000***

**Higher budget number reflects paying two co-chairs, rather than just one; volume of direct mail; volume of phone calls from voters to decision makers; the option to hire a local government relations professional*

- Continue recruitment and activation of GrassTops and grassroots supporters
- Turn out supporters in volume for hearings
- Organize contacts with Council members, as appropriate
- Phone calls, letters and emails to Council members and candidates
- Active paid and earned media to raise the level of the conversation, educate reporters/editors, and promote OpEds and Letters-to-the-Editor.

December, 2017 – February, 2018 **\$153,500 - \$239,000***

**Higher budget number reflects paying two co-chairs, rather than just one; volume of direct mail; volume of phone calls from voters to decision makers; the option to hire a local government relations professional*

- This phase will likely include most of the same tactics above, but we will likely prioritize some efforts over others to reflect the political and policy environment at the time.

We hope this provides you with the information you need. Thank you once again for the opportunity. We're available at any point – including over the week end/Labor Day – to discuss, answer questions, and revise this, as needed.

Subject: Hawthorn's follow-up proposal
Attachments: Hawthorn Follow up proposal 08_29_17.pdf

Charles and Chanel,

I'm passing this along for your initial review before our 11 a.m. call. Not sure how much we will cover in detail at that time. The Hawthorn Group developed this proposal based on last week's meeting and a follow-up conversation with their team.

Yolanda

ENO-NOPS000007

Building, Engaging and Mobilizing GrassTops & Grassroots Support

Hawthorn Group
REVISED August 31, 2017

Hawthorn
Group

ENO-NOPFS000013

Long- and Short-Term Goals

1. Demonstrate that a well-thought-out process, designed and implemented by experts with experience, is the only cost-effective and sustainable solution to New Orleans' infrastructure problems and is in the best interest of ALL of New Orleans' citizens
2. Gain approval by the New Orleans City Council of the New Orleans Power Station by February 2018
(ideally 226 MW option)
3. Continue to enhance ETR's and ENO's reputation and brand among stakeholders

Milestones

- **August 30, 2017:** City Council Utility Committee meeting will set the stage for a series of public meetings through December, 2017
- **Monthly:** City Council and Council Utility Committee meetings (*may not be issue at all meetings*)
- **September 6, 2017:** ENO public meeting (7th of series of community meetings started in July)
- **September 7, 2017:** ENO public meeting
- **September 13, 2017:** Council Utility Committee
- **September 27, 2017:** ENO public meeting (*additional meeting to be held in New Orleans East*)
- **October 14, 2017:** City Council and Mayoral primaries
- **October 19, 2017:** Council Utility Committee
- **November 18, 2017:** General Election (*incumbents hold their positions until May, 2018*)
- **December 4, 2017:** final public meeting
- **December 13, 2017:** Council Utility Committee (*Jan. 2018 meet not on calendar yet*)
- **February, 2018:** Earliest approval

Strategy/Tactics

- Create an **independent business/consumer alliance** that demonstrates strong and very visible support from local business and community leaders (quality) and voters/customers (quantity) – e.g., ***Building a Stronger New Orleans, New***

Orleans Forward

- Select a “face(s)” to start the organization who will have instant credibility and recognition: e.g., **Sally Forman, Calvin**

Mackie, PhD

Strategy /Tactics (cont.)

- **Announce the formation of the group and the leadership** through social media and traditional media (press conference) ... to instantly change the focus and direction of conversation
- Recruit grassroots support initially through **social media** to build volume and noise quickly
- Immediately begin outreach to **recruit community, business, minority, and civic leaders** to take an active role

Strategy /Tactics (cont.)

- If needed, **engage additional political grassroots organizers** to build crowds for early (September) events.
- Support and enhance (if needed) current **corporate advocacy activities** (employee, retiree and allies) – particularly recruiting and activating retirees

Phases and Budgets

Phase I – September, 2017

Set up and research; initial support for community meetings and turnout for Council Utility Committee meetings; corporate communications support, as needed

Line Item	Budget
Chair/Co-Chairs	\$5,000-\$10,000
Review corporate materials and plans - provide input, as needed (employee, retiree, allies)	\$0 (included in fees)
Issue research and materials development to support organization	\$0 (included in fees)
Organization structure, registrations, legal and accounting	\$9,000
Corporate director	\$2,500
Plan development	\$0 (included in fees)
Set up and populate an advocacy website (includes database and email capability, 12-mo license)	\$15,000 (one time)
Organization chair/co-chairs	\$5,000-\$10,000
Create business/community/political Leadership List (estimated 3,000 leaders)	\$6,200 (one time)
Build online membership (estimated 5,000) who will join <i>and</i> contact Council member at same time	\$0-\$35,000 (one time)

Phases and Budgets

Phase I – September, 2017 (cont.)

Set up; initial support for community meetings and turnout for Council Utility Committee meetings; corporate communications support, as needed

Line Item	Budget
Local PR firm	\$2,000
Campaign field director	\$6,000
Crowd building for initial hearing	\$10,000
In-state management (identify and train chairs and spokespersons; recruit and manage grassroots organizers; develop advertising; manage media and political/field operations; recruit and manage local government relations professional (if needed for organization)	\$10,000
In-state expenses	\$5,000
Hawthorn strategy, planning and oversight	\$35,000 (Aug-Sept)
Hawthorn expenses	\$7,500 (Aug-Sept)
Total September, 2017	\$118,000- \$163,200

Phases and Budgets

Phase II – October-November, 2017

Proactively manage the political conversation; turn out support for hearings; generate GrassTops and grassroots communication and intercepts with Council members; earned and paid media (traditional and social); corporate communications support, as needed

Line Item	Budget
Accounting, bank fees and other organization expenses	\$3,000
Corporate director	\$5,000
Organization chair/co-chairs	\$10,000-\$20,000
Events	\$5,000
Direct mail (leadership list)	\$7,500 - \$15,000
Direct mail (targeted voter list – 50,000 x 2)	\$0 - \$45,000
Phone calls from voters to Council members (if needed – 200 calls per Council member)	\$5,000 - \$21,000
Social media video production	\$6,000
PR Firm	\$4,000

Phases and Budgets

Phase II – October-November, 2017 (cont.)

Proactively manage the political conversation; turn out support for hearings; generate GrassTops and grassroots communication and intercepts with Council members; earned and paid media (traditional and social); corporate communications support, as needed

Line Item	Budget
Campaign field director	\$12,000
Council government relations professional (if needed)	\$0 - \$12,000
In-state management (identify and train chairs and spokespersons; recruit and manage grassroots organizers; develop advertising; manage media relations and create content; manage political/field operations; recruit and manage local government relations professional (if needed for organization)	\$20,000
In-state expenses (hearing recruitment, social media costs, grassroots organizer expenses)	\$8,000 - \$12,000
Hawthorn strategy, planning and oversight	\$30,000
Hawthorn expenses	\$9,000
Total October-November, 2017	\$124,500 - \$219,000

Phases and Budgets

Phase III – December 2017 – February 2018

Turn out support for hearings; generate GrassTops and grassroots communication and intercepts with Council members; earned and paid media (traditional and social); corporate communications support, as needed

Subject: Hawthorn's latest proposal
Attachments: Hawthorn NOLA Grassroots Revised 090517.pptx

This latest proposal just came in from Hawthorn. Suzanne says they've adjusted the immediate goal and revised the September budget up a bit.

From: Suzanne Hammelman [mailto:shammelman@hawthorngroup.com]
Sent: Tuesday, September 05, 2017 12:49 PM
To: POLLARD, YOLANDA Y
Subject: Yolanda

EXTERNAL SENDER. DO NOT click links, or open attachments, if sender is unknown, or the message seems suspicious in any way. DO NOT provide your user ID or password.

I've revised the attached slightly to respond to what we heard Charles say last week. So our immediate goal has changed a bit, and the urgency for crowd building and response is reflected. The September budget has been revised up bit to reflect trying to do a LOT of stuff immediately.

Let me know if you have any questions. Otherwise, we look forward to hearing from you later this week.

Best,

Suzanne

To: Suzanne Hammelman
Subject: Re: Oct. hearing

Hi Suzanne,

I've reviewed this approach with Charles. We'd like to move forward with the plan. Other tactics will be placed and running in the background so you will have the benefit of general local awareness of Oct. 16 hearing.

We're both away from the office this week. Please let me know if you can get any of these items underway now in the interest of time.

Thanks,
Yolanda

Yolanda –

Thanks for calling and the answer is “YES” we can help turn people out for the **Monday, October 16 hearing**. We have a very good grassroots organizer on the ground in the New Orleans area who can work on this for us and we are confident we can turn out NOLA citizens (18 and older) who support the issue (and will tell people why if asked). These citizens would complement the company’s efforts to recruit GrassTops or leadership types (business and community leaders). The people we would turn out would care about jobs/economic development, reliable and affordable power AND would be highly focused on preventing the kinds of issues the city just went through.

I would caution you that we **generally do not recommend this type of stand-alone effort** and certainly would not suggest doing it more than once. Questions will be asked – who are these people and WHY did they turn out? Who got them here? So for future efforts, you most certainly should have

an organization behind it, with a “face(s),” a website where people can go for information and to join, and an active social media conversation.

For the October hearing, if the company can promote the event (local newspapers ads, some social media promotion) just letting people know about the hearing and encouraging them to weigh in, that would be helpful and would answer for the short-term the question, “why did these people turn out?” We CAN get people there without that, but it would be better to have it.

Below is a pricing menu, including turning supporters out; getting a few of them to sign in to speak and have them deliver a message; adding some branded t-shirts **so it will be obvious how many supporters are there** (e.g., “Local Energy. Reliable Energy.”); and perhaps adding a petition that could be given to the Council members. It is important to note that this **price is based on having three-and-a-half weeks** to complete the recruiting process.

- Hawthorn management fee: \$7,500
- Hawthorn expenses: minimal – I don’t think there would be any expenses here except for the gross receipts tax we’re required to charge which is $0.0035 \times$ total invoice we send you
- Supporters for the hearing (50-100): \$8,500-\$14,000
- *Optional* - Supporters to sign in and speak (10): \$6,500
- *Optional* – T-shirts (50-100): \$1,000-\$1,500
- *Optional* – Petition signatures (1,000-1,500): \$19,000-\$26,000

Let me know if this is sufficient for your purposes. Call me anytime with questions or revisions.

Thanks! And we’ll be thinking about your Dad.

Best,

Suzanne

Subject: Re: Entergy New Orleans information

I understand. Not complicated. Let's move forward. Charles commits to making sure you're paid. Thanks.

On Sep 20, 2017, at 8:13 AM, Suzanne Hammelman <shammelman@hawthorngroup.com> wrote:

EXTERNAL SENDER. DO NOT click links, or open attachments, if sender is unknown, or the message seems suspicious in any way. DO NOT provide your user ID or password.

Hawthorn has to pay our ground team upfront:

\$8,500 (50 supporters)
\$6,500 (10 speakers)
\$1,000 (shirts)

Total upfront: \$16,000 out of pocket expenses

The point about the "upfront" tho is that Hawthorn will pay that so you don't have to worry about it this week. I just want to make sure that if we pay it we don't have to sit on it for 60 days or something.

Call me if you want. Sorry to make this confusing and complicated.

We'd like the 10 people to speak. What's that total upfront?

On Sep 20, 2017, at 8:02 AM, Suzanne Hammelman <shammelman@hawthorngroup.com> wrote:

EXTERNAL SENDER. DO NOT click links, or open attachments, if sender is unknown, or the message seems

suspicious in any way. **DO NOT** provide your user ID or password.

OK – and you will **PASS** on the 10 people who will sign up to speak – so **ONLY** the 50 + shirts?

\$8,500 = 50 supporters at hearing in T-shirts (and with handmade signs if we want them to do that) able to respond to questions if asked
\$1,000 = shirts for the supporters (we'll need to determine what we want them to say – but we don't have to do that right now)

PLUS the \$7,500 management fee. We can bill you for just the \$9,500 that we need quickly **OR the entire \$17,000** in one invoice. Your choice.

Subject: Re: Entergy New Orleans information

Just talked with Charles. We'll pass on the petition option on this one. We'd like to recruit **50** people and go with the t-shirts. Is that now 7,000 plus 6,500 you need up front? Pls let me know that estimate so I can share with Charles.

On Sep 20, 2017, at 7:43 AM, Suzanne Hammelman <shammelman@hawthorngroup.com> wrote:

EXTERNAL SENDER. **DO NOT** click links, or open attachments, if sender is unknown, or the message seems suspicious in any way. **DO NOT** provide your user ID or password.

Thanks. Let me know as soon as you can if you want the petition and the T-shirts. The petition takes a while to accomplish so we need to get started.

I'm going to go ahead (unless you tell me **NOT** to) to start recruiting the:

100 supporters at the hearing (who won't sign up to speak, but know why they are there and can respond to questions): \$14,000
10 supporters who sign up to speak and have a "prepared" statement about why they support the power plant: \$ 6,500

These two items (and the petitions and T-shirts once we get sign off) are things that I need to pay to the ground team up-front to get things moving so I'll be sending you an invoice fairly quickly.

Yolanda - for preparing the team, is there any updated information about the Power Station that we should have? I've attached what you sent me in mid-August, but I thought there might be some additional "stuff."

Don't worry about anything that is already findable on the website. We'll go grab that - so I'm just looking for anything that might not be posted.

Thanks.

Yolanda –

Per our conversation this morning, following is an amended proposal to add 25 additional recruits (and t-shirts) for the hearing on Monday, October 16. Please know that this *replaces* (rather than in addition to) the proposal sent to you on September 25.

Hawthorn will assign a local grassroots organization in New Orleans to recruit and manage participants and speakers for the hearing. We will turn out New Orleans citizens (age 18 and older) who support building the New Orleans Power Station for their own reasons (jobs, local energy, reliability, economic development, community investment, etc.). These will be real supporters whom we have identified, recruited and educated about the benefits of the power station and why it is the most desirable solution at this time and for future energy needs.

We will turn out **75 supporters for the hearing** and an **additional 10 people who will sign up to provide two-to-three minute testimony**. We will have all people there ahead of the hearing, and the speakers will be there at least two hours in advance to ensure they get in the room (please let us know if that is not enough time). Supporters and speakers will prepare their own hand made signs and we will provide them with **branded t-shirts** so that the Council members and media will be able to visualize the volume of support. You have previously reviewed the t-shirt design/message.

Following are the charges for the services outlined above, including our management fee and gross receipts tax on the total that we're required by Virginia state law to include.

Hawthorn management fee	\$7,500
75 supporters (with hand-made signs) plus 10 speakers for testimony; branded t-shirts for all	\$12,750
10 supporters to provide testimony	\$6,500
Branded t-shirts for supporters and speakers	\$1,830
Gross receipts tax (\$0.0035)	\$100
TOTAL:	\$28,680

Thank you and we look forward to working with you for a successful event.

Best,

Suzanne

I actually think it would be good if we can get others to wear shirts. That will lessen the questions about "who are these people?"

I MAY be able to still change the color – we haven't printed yet (but I'm not sure if we've ordered the actual shirts

We may want to order shirts in bulk – maybe get 250 of them that can be used now and at the next event (right now we're using 85 of them – so up that to 125 for this hearing and leave 125 that you can provide to union members, employees and others for the next hearing). The shirts right now are just under \$22 I believe. Ordering a larger quantity might bring the per unit cost down. If you're interested, I'll check. Just give me a ball park number (100, 200, 250, 500)

Subject: NOPS SUPPORT AT OCTOBER 16TH PUBLIC HEARING ON NOPS

Team:

We need your help recruiting our community partners to speak on our behalf at the NOPS public hearing on October 16. I will be sending an Excel spreadsheet under separate cover with the assignments. When you get the spreadsheet, please send the letter below to your assigned community partner(s) along with a copy of the attached NOPS FAQ document.

I'm sending the spreadsheet under separate cover so that we don't accidentally send it to the community partners. If you have any questions, please contact me.

Thanks.

Kim G. Mitchell

Community Development Program Representative

Entergy New Orleans, Inc.

504.670.3643

Dear Community Partner,

As a company that's been here for the community for many years and contributed millions of dollars to hundreds of nonprofits to support their programs, we find ourselves in need of your assistance.

We need your support on Oct. 16, 2017 at 5:30 pm in the New Orleans City Council's chambers. There will be a public hearing on a natural gas powered generating station that we're proposing to build in east New Orleans. This new unit is needed to help us meet our grid reliability needs.

If approved, this new station will be located on the same site where we safely operated a now decommissioned power station for more than 50 years. We've done our due diligence as a company to ensure that we've selected the most affordable, safest, and best option for our customers. See attached document for more information.

I hope we can count on your support on Oct. 16th where you'll have an opportunity to speak for 2 minutes or less about why you support us in this effort.

We value community partnerships and we appreciate what you do and continue to do for our great city!

Thanks for all your help. We should be all set for tonight. Please know that the AFL-CIO will also attend tonight and may try to secure center area seats as they did last time. I think there's room for both groups to sit in that center section, maybe with some overflow (a good thing).

I don't even remember saying that it was a hit piece and he is clearly on the other team

Charles L Rice Jr.

On Oct 20, 2017, at 1:19 PM, Cavell, Charlotte <ccavell@entergy.com> wrote:

Hey Charles – The Lens NOLA just published a story on Monday night's hearing. Will circulate it in clips, but here is the link in case you want to read it now: <http://thelensnola.org/2017/10/20/pumping-problems-hurricane-scares-play-into-debate-over-new-entergy-power-plant/>

I didn't see the freelancer there that evening. I'm not sure if you talked to him or if he just overheard you per this quote:
"I think we've got them outnumbered," chuckled Charles Rice Jr., president and CEO of Entergy New Orleans, before the hearing started.

It's toward the middle of the article that speaks about our supporters.

Thanks,

Charlotte

Hi Suzanne,

Hope you guys are staying warm. We’ve been out of pocket most of this week due to icy roads and also focused on some regional power issues. Back in the office today. Thanks for your patience.

I discussed with Charles. Let’s go with **30 supporters and 10 speakers** for the Feb. 21 utility committee meeting. Note the location has changed due to council chamber renovations. It is currently set for 10 a.m. in the Pan American Building, 601 Poydras ST, 11th floor Auditorium, New Orleans, LA.

Please send me the outline for us to develop the contract on this end.

Thanks,
Yolanda

Yolanda –

Hope your Dad is getting better. Thinking of you and your family.

Following are some options for you for Feb. 21:

Hawthorn fee:	\$5,000 plus recruiting expenses for
• 15 supporters at hearings with hand-made signs:	\$6,125
• 30 supporters at hearing with hand-made signs:	\$7,725
• 5 speakers	\$4,600
• 10 speakers	\$6,700

Let me know as soon as you can if there is interest. More time generally = better quality.

Suzanne

No action needed at this point. Just wanted you to be aware. Not everyone wore the shirts, only a handful of folks. And I did recognize a few faces from last time, so that may explain some of it.

Hmmm – I wasn't aware they were going to do that and IF we need to do anything further on this I'll make sure that doesn't happen again. I expect it was an individual decision – based on the fact that we wanted to make sure some of the same people showed up because that is what would happen organically.

Thanks for checking in. Everything went fine and the proposal was passed by the utilities committee 4-1 for consideration by the full council on March 8. I was a little surprised that *some* folks wore the orange shirts again. An opponent wore a marked-up orange shirt and commented about paid supporters.

It's become increasingly clear that Scott Pruitt is doing irreversible damage to the EPA, our environment, and our communities. The good news is, as Mother Jones notes, organizations like NRDC are fighting back every step of the way. And we're winning.

Join us in our effort to restore integrity to the EPA:

Just a heads up. We have not done interviews related to NOPS since last week meeting ended, and we're not planning any additional interviews through next week's vote. We've covered points the over past year and a half, and we did interviews with all TV stations and newspapers last week. Media outlets also had the benefit remarks and comments over eight hours during last week's committee meeting. Our corporate leadership is also on board with this approach. Talk shortly at 10 a.m.

Subject: request for key points
To: Suzanne Hammelman <shammelman@hawthorngroup.com>

Hi Suzanne,

This statement below is circulating in an e-mail distributed by some opponents of New Orleans Power Station. We're finally heading into the full City Council vote on Thursday morning, March 8. Could you share with me by Wednesday some key points that our leadership could have on hand for this issue? The response points would be used to address questions from city council members or others only if asked. For background, one of the opponents wore a marked-up orange shirt to the Feb. 21 utility committee vote. He also referenced signed non-disclosure agreements and a meeting at Dave & Busters to pay people (I think \$60) as part of his comments.

Thanks,
Yolanda

Entergy pays \$120 to people to come to City Council meetings and say that they support Entergy's request for rate increases and plant approvals. We have proof of this that will be presented at the City Council meeting March 8 if community people are allowed to speak.

See if this helps – you should also call me in the morning and I can provide a bit more background on a couple of these points. You are welcome to call me before your 9AM meeting.

Question	Response	For your background
We have heard that Entergy pays supporters \$120 to come to City Council meetings and say they support Entergy's request for rate increases and plant approvals.	Entergy provides employees and other stakeholders – like union members – with information about some hearings and encourages them to participate if they support the company on the issue. They are provided with talking points and we have also provided colored t-shirts in some instances so Council members can recognize supporters in the audience. We also inform our customers through social media about hearings and ask them to participate if they support us. We recruit support the same way other	Some groups DO pay for “volunteer” supporters to do things. For instance – see this link: http://www.washingtonexaminer.com/craigslisad-offers-protesters-15-to-crash-trump-rally/article/2587047 Entergy did not pay anyone for their support.

	<p>organizations do. For instance, the Green Army recruits hearing supporters actively on social media and blast emails, providing them with talking points.</p> <p>Back in October we heard one gentleman -- who I would describe as an "avid activist" - Tweeted that we paid \$60 for support, and it seems the latest rumor is \$120. This is, perhaps, one man's way of stirring up controversy and create an illusion that we have to pay for support. That's simply not true. There is strong support for the plant in the community as I think we have demonstrated. There is also the expected opposition.</p>	
<p>People met up at Dave n' Busters after a hearing in October to get paid.</p>	<p>I don't know anything about a meeting at Dave n' Busters.</p>	<p>There was no meeting at Dave n' Busters. It is possible that some people gathered after the hearing but there was certainly no meeting. =</p>
<p>People were asked to sign non-disclosure agreements.</p>	<p>I don't know anything about this. Entergy did not ask anyone to sign a non-disclosure agreement for any reason related to any of these hearings.</p>	
<p>A man with one of your orange t-shirts is saying he knows about non-disclosure agreements and payments.</p>	<p>Supporters at one of the hearings, including employees and union members, were provided with orange t-shirts so Council members would recognize supporters in the crowd. These were also passed out to other supporters who showed up. We had about 500 (?)</p>	

t-shirts and, frankly, they were very popular. People wanted them and our team passed them out. So I don't know who may have gotten their hands on a t-shirt and I sure don't know what happens to the t-shirts after the hearings. People keep them and wear them. Some people give them to Goodwill. Lots of people may have those orange t-shirts by now. They weren't hard to come by.

And, yes, of course will get you talking points before Wed.

The Dave & Busters and disclosure statements are from previous hearings, remember. I'll dig up my response on those.

CONTRACT CHANGE ORDER
Pursuant to
CONTRACT NO. 10529184

CONTRACT CHANGE ORDER NO.: 10529184-001

This Contract Change Order is effective 4/27/2018, and is issued to modify the Contract referenced above, and, to the extent applicable, the Contract Change Orders that have been executed to date, between Entergy New Orleans, LLC, ("User") and THE HAWTHORN GROUP LC, ("Contractor").

1. The Contract is modified as follows:

- A. Modify the Scope of Work, Description and Schedule of Work, to provide all material, labor, and equipment to provide the following:
 - New Orleans City Council Utility Committee meeting to be held at **601 Poydras St,**
 - 30 supporters**
 - An additional 10 people who will sign up to provide testimony.**
 - The individuals will carry hand-made signs.
 - Have people there ahead of the hearing, and the speakers will be there at least two hours in advance to ensure they get into the room (please let us know if that is not enough time).
 - Supporters and speakers will be recruited for their support of the building the New Orleans Power Station and their ability to effectively communicate that support.
 - Talking points and testimony will be vetted. The signs are useful to help identify supporters for the Council members.

- B. Modify the compensation, for the additional work as described in item 1A above. For such additional work, Contractor shall be compensated the sum of **(\$22,478.40)**. The revised sum of the Contract referenced above that includes this Contract Change Order is **(\$57,478.40)**

- C. This Contract Change Order shall also modify the End Date of the Contract referenced above to be extended to 4/30/18.

1.2 In addition to the terms and conditions contained herein, the following shall apply only to the performance of the services set forth in the Contract Order referenced above:

- 1) **Contractor and Subcontractors shall abide by the requirements of 41 CFR 60-1.4(a), 60-300.5(a) and 60-741.5(a). These regulations prohibit discrimination against qualified individuals based on their status as protected veterans or individuals with disabilities, and prohibit discrimination against all individuals based on their race, color, religion, sex, sexual orientation, gender identity, or national origin. Moreover, these regulations require that covered prime contractors and subcontractors take affirmative action to employ and advance in employment individuals without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, protected veteran status or disability. To the extent applicable, the employee notice requirement set forth in 29 C.F.R. Part 471, Appendix A to Subpart A, are hereby incorporated by reference into this contract.**

- 2) Contractor warrants and represents that it will not use any retiree of Company, Affiliates, or Users to perform any portion of the Work, as an employee, Subcontractor (including as a 1099 worker) or in any other capacity, if the

individual has not been retired from Company, Affiliates, or Users for at least six consecutive months prior to performing services for Contractor.

2. Contractor shall direct any project or technical questions to Charles L Rice at 504-670-3620, and any commercial questions concerning this Change Order to Tanner A Guidroz at 504-576-3845.

3. The completion date, all major intermediate milestones, the project schedule, the contract price and all other items, covenants and conditions of the above referenced Contract, except as duly modified by this and previous Contract Change Orders, (if any), remain in full force and effect.

Executed by the parties hereto effective as of the day and year first above mentioned.

1.2 In addition to the terms and conditions contained herein, the following shall apply only to the performance of the services set forth in the Contract Order referenced above:

- 1) **Contractor and Subcontractors shall abide by the requirements of 41 CFR 60-1.4(a), 60-300.5(a) and 60-741.5(a). These regulations prohibit discrimination against qualified individuals based on their status as protected veterans or individuals with disabilities, and prohibit discrimination against all individuals based on their race, color, religion, sex, sexual orientation, gender identity, or national origin. Moreover, these regulations require that covered prime contractors and subcontractors take affirmative action to employ and advance in employment individuals without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, protected veteran status or disability. To the extent applicable, the employee notice requirement set forth in 29 C.F.R. Part 471, Appendix A to Subpart A, are hereby incorporated by reference into this contract.**
- 2) Contractor warrants and represents that it will not use any retiree of Company, Affiliates, or Users to perform any portion of the Work, as an employee, Subcontractor (including as a 1099 worker) or in any other capacity, if the

individual has not been retired from Company, Affiliates, or Users for at least six consecutive months prior to performing services for Contractor.

2. Contractor shall direct any project or technical questions to Charles L Rice at 504-670-3620, and any commercial questions concerning this Change Order to Tanner A Guidroz at 504-576-3845.

3. The completion date, all major intermediate milestones, the project schedule, the contract price and all other items, covenants and conditions of the above referenced Contract, except as duly modified by this and previous Contract Change Orders, (if any), remain in full force and effect.

Executed by the parties hereto effective as of the day and year first above mentioned.

We will turn out **75 supporters for the hearing** and an **additional 10 people who will sign up to provide two-to-three minute testimony**. We will have all people there ahead of the hearing, and the speakers will be there at least two hours in advance to ensure they get in the room. Supporters and speakers will prepare their own hand made signs and we will provide them with **branded t-shirts** so that the Council members and media will be able to visualize the volume of support. You have previously reviewed the t-shirt design/message.

Following are the charges for the services outlined above, including our management fee and gross receipts tax on the total that we're required by Virginia state law to include.

Hawthorn management fee	\$7,500
75 supporters (with hand-made signs) plus 10 speakers for testimony; branded t-shirts for all	\$12,750
10 supporters to provide testimony	\$6,500
Branded t-shirts for supporters and speakers	\$5,130
Gross receipts tax; estimated shipping charges	\$262
TOTAL:	\$32,142

All,

Please see email below from The Lens reporter Michael Isaac Stein requesting comment for his story about people allegedly being paid to attend Utility Committee meetings. He has not replied with his deadline at this point, but I wanted to make you aware and send the most recent version of our statement below on the matter as of April 19. Please also note the reporter does not provide much

ENO-NOPS005763

context around exactly what our comment is intended to address.

Thanks,
Yolanda

CURRENT STATEMENT:

The Council and Council Utility meetings process for the proposed New Orleans Power Station has been open, transparent, and fair to all parties and stakeholders. As we have stated previously, Entergy New Orleans did not pay anyone to attend these meetings. We support the Council's decision in approving the New Orleans Power Station and believe that the plant will bring multiple benefits to our customers and the city.

Hi Yolanda,

I few more details about the story: We have 3 people who spoke to us saying they were paid to show support for and make speeches in favor of Entergy's gas plant in New Orleans East. They say two men, Garrett Wilkerson and Daniel Taylor hired them. We have screenshots of facebook messages confirming much of what these people told us.

We're these men hired or involved with Entergy in any way?

Best,

Michael Stein

Entergy New Orleans
Statement in Response to Lens post of Friday, May 4, 2018

The following is a statement from Charles Rice, President and CEO of Entergy New Orleans LLC:

"Let's be clear. The New Orleans Power Station was approved by the City Council of New Orleans after one of the most extended periods of public meetings and debates in the recent history of our city. Prior to the final Council vote, more than 22 community meetings were held for citizens and ratepayers. All facets of the project were discussed thoroughly in these meetings where citizen concerns were addressed directly.

In preparation for the public meetings and City Council vote, Entergy New Orleans called upon scores of organizations who had indicated their support for the Power Station and lauded our

ENO-NOPS005923

company for its investment in programs that benefit our citizens. More than 00 business and civic organizations and media outlets supported the Power Station.

Entergy New Orleans had no knowledge of individuals or organizers of an effort to seed an audience. Instead, we worked tirelessly to encourage our supporters to take time from their busy workday schedules to testify on behalf of this project. That more than 00 did so in multiple settings is a testament to a tremendous level of support."

Entergy New Orleans
Statement in Response to Lens post of Friday, May 4, 2018

The following is a statement from Charles Rice, President and CEO of Entergy New Orleans LLC:

"Let's be clear. The New Orleans Power Station was approved by the City Council of New Orleans after one of the most extended periods of public meetings and debates in the recent history of our city. Prior to the final Council vote, more than 22 community meetings were held for citizens and ratepayers. All facets of the project were discussed thoroughly in these meetings where citizen concerns were addressed directly.

In preparation for the public meetings and City Council vote, Entergy New Orleans called upon scores of organizations who had indicated their support for the Power Station and lauded our company for its investment in programs that benefit our citizens. More than 00 business and civic organizations and media outlets supported the Power Station.

ENO-NOPS005737

Entergy New Orleans had no knowledge of individuals or organizers of an effort to seed an audience. Instead, we worked tirelessly to encourage our supporters to take time from their busy workday schedules to testify on behalf of this project. That more than 00 did so in multiple settings is a testament to a tremendous level of support.”

REVISED

**Entergy New Orleans
Statement in Response to Lens post of Friday, May 4, 2018**

The following is a statement from Charles Rice, President and CEO of Entergy New Orleans LLC:

“Let’s be clear. The New Orleans Power Station was approved by the City Council of New Orleans after one of the most extended periods of public meetings and debate in the recent history of our city. Prior to the final Council vote, more than 22 meetings were held for citizens and ratepayers. All facets of the project were discussed thoroughly in these meetings where citizen concerns were addressed directly.

In preparation for the public meetings and City Council vote, Entergy New Orleans called upon numerous organizations who indicated their support for the Power Station and lauded our company for its investment in our community and a reliable electric grid to benefit our citizens. Supporters included employees, retirees, family members, friends, customers, and representatives of local churches, workers’ unions, businesses and non-profit organizations.

As we have stated previously, Entergy New Orleans did not pay anyone to attend the Council meetings or direct anyone to attend public meetings. Instead, we worked tirelessly to encourage our supporters to take time from their busy workday schedules to testify on behalf of this project. That scores of them did so in multiple settings is a testament to a tremendous level of support.”

Clean Energy.
Good Jobs.

NO GAS PLANT
HAVE BETTER TONS

Power Station Public Hearing

The image shows a video player interface. The main content is a photograph of a woman with glasses and an orange t-shirt speaking at a podium. The t-shirt has the text 'Clean Energy. Good Jobs.' on it. Behind her, several people are holding signs. One sign on the left says 'NO GAS PLANT' with a silhouette of a power plant. Another sign on the right says 'HAVE BETTER TONS'. The video player has a progress bar at the bottom with a play button, a volume icon, and a full-screen icon. The video title 'Power Station Public Hearing' is displayed at the bottom of the player.
