Subject: RE: Enrollment Stats -- and Report to the Chancellor's Office

Hi John --

You're right. The enrollment statistics report does not come up with an unduplicated count.

I conferred with Matthew this afternoon and pulled the Spring 2005 enrollment and FTES figures off of the Chancellor's Office website.

We suggest the following numbers be sent to Channing Yong ...

Unduplicated Headcount

Spring 2005
9,271

Spring 2006
9,230

FTES (as of first census date)

Spring 2005
3,125

Spring 2006
3,156

To use a well-worn cliché, these educated guesstimates are "good enough for government work."
