## Available Materials

The following materials are available to you through the GCC Press Office. Please indicate which items you would like to receive, fill out the information on the back and return it to our press office. There are no charges for members of the media.

### BACKGROUNDERS

- The Global Climate Coalition: An Overview** - Provides a brief overview of the Coalition, what it does, its position on climate change, etc.
- Biographical Profile: John B. Shlaes** - A biography of the Executive Director of the Coalition
- National Energy Policy Act of 1992: Summary of Provisions Relating to Global Climate Change** - A synopsis of the National Energy Policy Act as it relates to global climate change. Includes information on the requirements of the DOE as determined by the various sections of the Act.
- Science and Global Climate Change: What Do We Know? What Are The Uncertainties?** - Examines the climate change debate, noting what is known and pointing out many of the uncertainties involved. Includes a look at the causes of temperature change, an overview of computer modeling, etc.
- Understanding Carbon Dioxide (CO<sub>2</sub>): Future Trends in Emissions and Emissions Control** - A brief overview of the role of carbon dioxide in the climate change debate. Includes a historical overview and future trends of emissions as well as related policy efforts to control emissions.
- Technology Cooperation: Sustaining Economic Growth and Environmental Improvement.** - Looks at the issues involved in technology cooperation; what it is, why it is important, how it best functions, and other related subjects.
- Climate Models: Shortcomings and Limitations** - Looks at the current climate models being used, their limitations, implications, and possible improvements.

### REPORTS

- Position Statement and Recommendations on the U.S. National Action Plan For Global Climate Change - March 1993** - States the Global Climate Coalition's position towards the Action Plan as well as critiquing the various issues involved; mitigation, adaptation, etc.
- Leadership In Energy Efficiency: A Comparison Of The U.S. Versus The Other Major Industrialized Countries. - March 1993** *Prepared By The EOP Group, Inc.* - Provides a comparison of the energy efficiency status of the United States with seven other industrialized countries; Canada, France, Germany (Western Sector), Italy, Japan, and the United Kingdom. Shows that where adequate data is available to permit a more detailed and consistent comparison of unit energy efficient levels, the U.S. is in face a leader or among the leaders in energy efficiency.
- The United States versus European Community - Environmental Performance - August 13, 1993 - Prepared By The EOP Group, Inc.** Examines and compares the environmental programs of the U.S. and the member countries of the European Community. It discusses the differences in environmental policies and standards, as well as the actual environmental impacts resulting from the implementation of these programs.
- Energy Efficiency in U.S. Industry: Accomplishments and Outlook October, 1993 - Prepared By The EOP Group, Inc.** - This report examines past and current energy performance and the effect on carbon dioxide emissions in nine selected industries: petroleum refining, iron and steel, aluminum, paper, chemicals, cement, automobile manufacturing, electric utilities and railroads.
- What the Experts Say About Global Climate Change**  
A compilation of scientific statements regarding a number of climate change issues, including: global cooling, climate modeling, greenhouse gas emissions and prudent actions.

### TESTIMONY

- Testimony of the Global Climate Coalition before the Subcommittee on Health and the Environment, House Committee on Energy and Commerce - March 19, 1992** - Provides comments on the costs to U.S. industry of various strategies to stabilize or reduce greenhouse gas emissions.
- Testimony of the Global Climate Coalition before the Subcommittee On Energy and Power, House Committee on Energy and Commerce - November 16, 1993** - Expresses the GCC's position relating to the National Action Plan.
- Written Statement of the Global Climate Coalition before the Subcommittee on Economic Policy, Trade and Environment, House Committee on Foreign Affairs - March 5, 1993** - Provides the GCC's views on a number of issues concerning the National Action Plan.
- Testimony of the Global Climate Coalition before the Committee on Energy and Natural Resources, - May 10, 1994** - Presents the GCC's comments on the National Action Plan as well as offering the GCC's recommendations for action at the next INC meeting in August 1994.

## BACK ISSUES OF THE CLIMATE WATCH NEWSLETTER

- December 1992**  
A report on the National Energy Policy Act of 1992 • A review of developments six months after the Rio Summit
- January 1993**  
A story on the December meeting of the INC. • A report on a Brookings Institution study on the overshadowing costs of a Carbon Tax
- February 1993**  
An overview of the Energy Policy Act of 1992's requirements • A look at the attempts to reconstruct past climates • A report on the cooling which occurred during 1992 • A profile of EPA's voluntary "Green" programs
- March 1993**  
GCC comments on the U.S. National Action Plan • A story on EPA recognition programs • A look at the heavy costs of industrialization for China • A report on carbon taxes in the European Community.
- April 1993**  
The establishment of the U.N. Commission on Sustainable Development • A story on the testimony of the GCC before the INC • The release of a new study showing the damaging effects of a carbon tax
- May 1993**  
An overview of the various international organizations and bodies related to governance of the Rio treaty: IPCC, INC, CSD, GEF, UNEP, other international players and non-governmental organizations.
- June 1993**  
An update on the support gained by the Heidelberg appeal • A report on satellite readings which show a cool trend • An industry initiative report on the effects of improvements made at National Airport.
- July/August 1993**  
A report on the approval of "Green" technologies by a House committee • The rejection of an energy tax by the EC • A report on the increase in technology transfer • A story on the IEA's findings on CO<sub>2</sub> mitigation • An update on the cooling trend shown in satellite readings • The DOE's role in technology transfer
- September 1993**  
The restructuring of the GEF • A story on recent articles by The Washington Post re-evaluating the climate change debate • An overview of two studies published by the OECD.
- October 1993**  
A story on an EOP Group study highlighting the U.S.'s environmental record • A report on the EPA examining the economics of climate change • The release of the Climate Change Action Plan.
- November 1993**  
An examination of the Clinton Action Plan • An examination of the failure of computer models to make accurate predictions • New government-industry partnerships formed as part of the Action Plan • A round-up of industry responses on the Action Plan.
- December 1993/January 1994**  
A review of various domestic and international initiatives related to climate change • A Swedish study which finds climate models inadequate • A report on possible benefits to trees of CO<sub>2</sub> • An industry initiative report on new refrigerator technology.
- February 1994**  
A look at the work of Dr. Sallie Baliunas, studying the effects of solar activity on climate change • A report on the growing carbon emissions of China • An update on ice-core studies, finding the Earth's climate remarkably stable.
- March 1994**  
A look at attempts by the State Department to modify the U.N. Framework Convention • A review of a "Nightline" program investigating various players in the climate change field • A study which shows warming forecasts have been inaccurate.
- April 1994 -- Special Earth Day Issue**  
An article on a report released by GCC on "Potential Global Climate Change: Issues and Options" • A story on newly declassified data being used to study climate change in the Arctic • A look at events connected with Earth Day 1994.
