<sup>1</sup> U.S. International Air Travel Statistics Report is based on the Advance Passenger Information System (APIS) obtained from the Department of Homeland Security, U.S. Customs & Border Protection. Replaced the legacy paper based I-92.

Reports present the following:

- Non-stop passenger (including crew and non-revs) air traffic between U.S. and foreign ports/gateways
- Arrivals and departures by country and ports of embarkation and debarkation
- U.S. citizens and non-U.S. citizens; U.S. and foreign flag totals; Scheduled and chartered traffic
- Includes all international (overseas, Mexico and Canada)

Note: Non-stop air traffic is segment data and does not necessarily reflect total 'visitation' between the U.S. and a foreign country.

For visitation estimates please see Survey of International Air Travelers [here](#).
