Subject: FOIA Request for ATF Records
Date: Thursday, May 23, 2019 9:26:00 AM
Attachments: [2019.05.23 ATF FOIA Request RPark.pdf](#)

Please find attached a Freedom of Information Act request for the following information regarding the ATF's investigation of the mass shooting that occurred in Las Vegas, Nevada on October 1, 2017 by Stephen Paddock:

1. The records identifying the seller(s) of the rifle to Stephen Paddock for the 14 rifles he used in committing a mass shooting on October 1, 2017 in Las Vegas, Nevada.

Based on the description of the ATF's System of Records beginning at 68 Fed. Reg. 3551, we believe that the requested records are likely to be found in ATF-003, Criminal Investigation Report System; ATF-008, Regulatory Enforcement Record System; and/or ATF-009, Technical and Scientific Services Record System.

Re: FOIA Request for ATF Records

On August 3, 2018, the Las Vegas Metropolitan Police Department (“LVMPD”) released its Final Criminal Investigative Report relating to the October 1, 2017 mass shooting in Las Vegas, Nevada. The report identifies 14 rifles that were used by Stephen Paddock as part of the mass shooting.

In the report at page 76, the LVMPD noted:

Investigators with the Firearms and Narcotics Group worked in conjunction with the ATF. Investigators drafted and served court orders pertaining to the investigation and compiled the data learned through those orders. Investigators traced ownership history of the firearms recovered during the investigation. All firearms were traced directly to Paddock, and he was the original purchaser on 48 of the firearms. Of the firearms where Paddock was not the original purchaser, investigators were able to trace the sale of the firearms to Paddock.

We are submitting a Freedom of Information Act request for the following information:

1. The records identifying the seller(s) of the rifle to Paddock for those 14 rifles that he used on October 1, 2017.

To assist you in complying with our request, we have attached pages 76, 106, and 107 from the LVMPD’s report. Pages 106 and 107 identify the 14 rifles that were used by Paddock. Based on the description of the ATF’s System of Records beginning at 68 Fed. Reg. 3551, we believe that the requested records are likely to be found in ATF-003, Criminal Investigation Report System; ATF-008, Regulatory Enforcement Record System; and/or ATF-009, Technical and Scientific Services Record System.

This information is not being sought for commercial purposes. We represent victims of the October 1, 2017 shooting who intend to file a lawsuit against the manufacturers of the guns Paddock used to commit this heinous act. To do so, we need to know the seller(s) of the 14 rifles Paddock used to commit the shooting. The suit is intended not only to remedy the harm suffered by these victims, but also

Ronald J. Park
Page 2
5/23/2019

to hold the manufacturers accountable for any legal violations on their part that led to the shooting and may be continuing to endanger the public to more of the same. Accordingly, because the requested information is in the public interest and will contribute significantly to the public's understanding of the October 1, 2017 shooting, we request a waiver of all fees. If the waiver is denied, and there are any fees for searching or copying these records, please inform us if the cost will exceed \$1,000.00.

If access to the records requested will take longer than the twenty (20) days prescribed at 5 U.S.C. § 552(a)(6)(A), please contact us with information about when we might expect copies or the ability to inspect the requested records.

If you deny any or all of this request, please cite each specific exemption you feel justifies the refusal to release the information and notify me of the appeal procedures available under the law.

Sincerely,

A handwritten signature in black ink, appearing to read 'R. Park', written in a cursive style.

Firearms and Narcotics Group (FANG)

Investigators with the Firearms and Narcotics Group worked in conjunction with the ATF. Investigators drafted and served court orders pertaining to the investigation and compiled the data learned through those orders. Investigators traced ownership history of the firearms recovered during the investigation. All firearms were traced directly to Paddock, and he was the original purchaser on 48 of the firearms. Of the firearms where Paddock was not the original purchaser, investigators were able to trace the sale of the firearms to Paddock.

Counter Terrorism Analysis Group (CTAG) and Central Intelligence Unit (CIU)

Investigators and analysts with the Counter Terrorism Analysis Group and the Central Intelligence Unit were tasked with research and analysis of information pertaining to the incident and subsequent investigation. The information compiled was used for briefings.

Las Vegas Village

Responsibility for documenting the venue scene was transferred from the LVMPD Homicide Section to the FBI Evidence Recovery Team on October 2, at approximately 1445 hours. The following scene description of the Las Vegas Village venue was authored by the LVMPD Homicide Section.

The Route 91 Harvest music festival was an open-air music event held at the Las Vegas Village. The festival was dimly lit with street lights, variable stage lighting and lights from temporary light stands on the perimeter. There was a chain link fence with dark netting surrounding the entire venue. On the west perimeter of the venue, there was a decorative concrete block wall between Las Vegas Boulevard South and the chain link fence. This wall ran nearly the entire length of the west side of the venue from E. Mandalay Bay Road to E. Reno Avenue.

The surface of the venue consisted of black asphalt with defined seating areas covered with artificial grass on both the northwest and south ends of the venue with vendor areas throughout. The northwest artificial grass area was used for lawn chair seating. The large artificial grass areas on the southern end was surrounded by seating, food vendors, and portable bathrooms. A large seating area with elevated bleachers and a covered VIP area was oriented near the southwest corner of the venue. Four pedestrian gates ran along the west side of the venue.

The Coca-Cola suites, additional seating areas, vendors, medical tent, and three pedestrian gates were located on the east side of the venue. The event's command post, a television broadcast tent, and one pedestrian gate were oriented on the north end of the venue.

The main stage was oriented on the south side of the venue. The main stage was covered by green roofing, and the sides were covered with black mesh. The main stage viewing area was located in the southern portion of the venue, north of the main stage, and was divided into two seating areas by metal pedestrian fencing. The fencing ran from a production tent, located in the center of the viewing area, and eventually encompassed the main stage. In addition to the fence separating the east and west side grass areas, the production tent and vendors helped to define

Bullets and bullet fragments.

Ammunition

Several types of ammunition were located within rooms 32-135 and 32-134 loaded into rifle magazines for AR-15 and AR-10 style rifles. The AR-15 .223/5.56 rifle magazines were loaded with hollow point and polymer tipped hollow point ammunition. The AR-10 .308/7.62 rifle magazines and the bolt action rifle were loaded with Tracer, Frangible Incendiary Armor Piercing and Armor Piercing Incendiary ammunition.³¹

Firearms Forensic Analysis

Recovered in rooms 32-135 and 32-134 were 1057 shell casings. Forensic analysis was completed on all of the shell casings that were recovered. Of the rifles recovered from inside rooms 32-135 and 32-134, 14 were found to have been fired. The following table indicates which guns were fired and how many times:

Make	Serial Number	Number of Rounds Fired
Daniel Defense	DDM4078072	100
POF	PE1600179	95
FNH	FNB024293	153

³¹ Information on the ammunition was summarized from the analysis report produced by the FBI.

Christiansen Arms	CA04625	21
LMT	LMT81745	100
Colt	LE451984	100
POF	03E-1603178	100
FNH	FNCR000383	144
LWRC	5P03902	12
Ruger	56213026	6
LMT	LMS18300	2

Forensic analysis was also completed on the Smith and Wesson revolver recovered in Room 32-135. Scientists were able to determine the round recovered from Paddock's head was fired from the revolver recovered in Room 32-135. It was determined the spent shell casing recovered in the cylinder of the revolver was fired from the revolver.³²

Lock Interrogations

The key cards for hotel rooms in Mandalay Bay are programmed by computer when checking into the hotel. Each card is automated to open the room door associated to that guest. As a result, each time a card is used to gain access to a guest room, the information is electronically stored. Lock interrogations were requested on both rooms 32-135 and 32-134.

On October 1, the door and lock to Room 32-135 was manipulated several times. The door was opened and closed and the dead bolt was thrown and released several times. At 2320 hours, the door to Room 32-135 showed "opened from the inside." This is the time the door was breached by officers. The only key card used to open the door from the outside was issued to Paddock.

On October 1, the door and lock to Room 32-134 was manipulated several times. The door was opened and closed, and the dead bolt was thrown and released several times. The only key card used to open the door from the outside was issued to Paddock.

Prior to October 1, key cards issued to other guests were used in an attempt to make access into rooms 32-135 and 32-134 but access was denied.³³

DNA

Several items of evidentiary value were collected for DNA analysis from rooms 32-135 and 32-134 of the Mandalay Bay. These items included the 24 firearms recovered in the rooms, along with personal items, and were compared to known samples for Paddock and Danley.

³² Information was summarized from the analysis report completed by the FBI.

³³ Lock interrogation reports for rooms 32-135 and 32-134. Lock interrogations are attached as Appendix A and Appendix B, respectively.
