

# NANOGIRLS

## GREAT SCIENCE ADVENTURES

Make Nanogirl's animal puzzle

### INGREDIENTS

8 Ice block sticks  
Colouring pens or pencils  
Sellotape

### METHOD

Sellotape your popsicle sticks together along the long side. You should have a squarish platform for your puzzle.

Flip it over and draw a picture on the other side. Colour it in.

Now, when you remove the sellotape the popsicle sticks will fall apart. Mix them up and then see how long it takes you to make your picture again.

Set a timer and race your siblings or friends.
