Subject: Request for Conference Call RE: Flu Vaccine

Good afternoon Ms. Bandell and Mr. Ambrose,

Dr. Robert Redfield would like to schedule a 30 minute conference call with you to discuss Flu vaccine.

Would you be available on Friday, July 6th from 1:00-1:30 p.m.?

If you are not available at this time, could you offer some times when you would be available?

Thank you for your consideration.

Kind Regards,

Teresa Williams

Subject: scheduling call between Dr. Redfield and Dr. Staley

Hello Teresa,

Dr. Staley, U.S. Global Malaria Coordinator, has asked me to schedule a call with Dr. Redfield regarding his recent trip to Africa. It looks like the two have already emailed about it but have not set a date and time.

It would be for 30 minutes on Thursday (8/2) and Friday (8/2). Could you please let me know what Dr. Redfield's availability is for those days? I think Dr. Staley's preference would be for Thursday between 9:30 and 11, or Friday before 10:30 or after 3pm.

I hear you are the best person to start with, but if there is someone else I should speak with about Dr. Redfield's schedule, please let me know.

With gratitude,
Bridget

Thank you, Teresa.

What number should I have Dr. Staley call on Friday? I will send a calendar invite accordingly.

Good morning Dr. Dybul,

Would you be available to speak with Dr. Redfield on Monday, August 6th from 10-10:30 a.m. ET?

If this time is not acceptable, could you offer some times when you would be available?

Also, is there someone in your office you would like me to work with to schedule the call?

Best,
Teresa

Hi, again,

Dr. Redfield said he'd love if you could come to CDC to give a lecture and join him for a few small group meetings with center directors and/or other senior leaders. He suggested beginning with a quick call between the two of you, to further design the topic. If you're amenable, Tracie Strength and Teresa Williams will work with you to find a convenient time.

Talk soon,

Ashley

Thanks much

I would come down specifically for the visit, to give a talk, engage with team, etc as bob suggested. So perhaps you could confirm he would still like to do this and then we can find a date. I can cover travel, etc through my university funding.

Thanks much
Mark

Hey Bob

Congrats on the appointment to Dec. Know it was a bumpy road with price but God's ways are not our ways. Ladd asked me to provide a supportive quote which of course I was happy to do. You will be a great director.

Of course at gu we are all disappointed we have lost the opportunity to try to bring you over and work closely with you. But if there is ever anything I or anyone at gu can ever do to support you please let us know. Of course if you ever need a venue to convene or serve as a platform, gu is here for you.

All the best
Mark

Joe,

We need to make a change to this particular reservation (#20206). Dr. Redfield will now come back to ATL from Amsterdam (international Terminal) on 29 July at 1:56PM. He will be flying in on Delta 73.

Thanks, and let me know if you need more information.

Thanks,
Brad

I will check with the Braves, but normally pregame opportunities involve serving as honorary captain and handing off the line-up cards to the umpires along with taking a photo with the team managers or assistant coaches for both teams and the umpires. Opportunities are also based upon the game selected. Once we determine which game works best for Dr. R3's schedule then we can begin discussing pregame opportunities.

I forgot to mention each of the games have a 7:35 p.m. start time.

Thanks,

Llelwyn

Subject: CDC Night at SunTrust Park

It is that time of the year again. OADC is starting plans for the annual “CDC Night at SunTrust Park.” I mentioned this event to Dr. Redfield during his *CDC Connects*’ leadership profile interview in April. He seemed very interested and excited about attending, if his schedule permits.

Below are some game and date options for “CDC Night at SunTrust Park”:

- Thursday, July 26 – Braves vs. Dodgers
- Friday, August 17 – Braves vs. Rockies
- Friday, August 31 – Braves vs. Pirates
- Friday, September 14 – Braves vs. Nationals

We are hoping that one of these proposed games and dates work well with Dr. Redfield’s schedule. Let me know if you require additional information.

Thanks much,

Llelwyn F. Grant

"Protecting America's health, safety, and security."

CDC Director Robert R. Redfield
CDC Night at Sun Trust Park
Friday, September 14, 2018

Event information

Date – Friday, September 14, 2016

Time – Game starts at 7:35 p.m.

Location – Sun Trust Park, 2565 Circle 75 Parkway SE, Atlanta, GA, 30339

Parking – Red Deck Park. Note: Please bring parking pass that was ordered with the game tickets.

Logistics/Directions

Traveling South toward Atlanta

Take I-85 South and then take I-75 North towards Marietta/Chattanooga for 8 miles. Take Exit 259 B onto I-285 West toward Birmingham/Montgomery to US-41/ for Cobb Parkway to SunTrust Park.

Secondary Travel Option

Take I-85 North to I-285 West and take to I-75. Merge onto I-75. Stay in left lane heading toward I-75S/US-41Cobb Parkway. Then keep right to US-41 for Cobb Parkway. When exiting onto Cobb Parkway keep right to Sun Trust Park, and merge onto Circle 75 Parkway.

Please note: Traffic is expected to be heavy.

Parking Direction

Once on Circle 75 Parkway make next left turn onto Heritage Court. The Red Deck Parking will be located on the right. There is no reserved parking. It is recommended that Dr. Redfield arrive around 6:00 p.m. for parking. The earlier Dr. Redfield arrives, he will be able to secure parking.

Seating

Exit Red Deck Parking on level 3 to enter stadium. Make immediate right and take to Chop House Gate to enter into stadium (see photo image of stadium's primary gate).

GATE .pdf

CDC seating is located at Home Run Porch in sections 147, 148, 149 and recently added section 150. Approximately, 700 tickets have been purchased for the CDC section. OD and OADC seats have been reserved in section 148 as reflected on the Director's purchased tickets. Joining Dr. and Mrs. Redfield are Chief of Staff Kyle McGowan and DPA Director Michelle Bonds and her guest. (Stadium seating chart provided as an attachment).

SunTrustParkSeatingChart.2.pdf

Activities

- CDC Director will engage with CDC staff between a few innings to chat and take photos with staff and their families/guests, which will be published in *CDC Connect*, used for social media, and sent to staff photographed with the director.
- Fireworks are scheduled Friday night after the game.

FYI only – Director not requested to stay for firework event.

Other information

- Staff have been encouraged to wear their CDC paraphernalia, i.e., CDC hat or shirt.

Subject: Invitation for Dr. Redfield - CSIS Polio Eradication Dinner, Monday 7/9

Dear all,

On behalf of the CSIS Global Health Policy Center, we would like to invite Dr. Redfield to an informal dinner discussion at CSIS in advance of the [July 10th conference](#) focused on the U.S. role in achieving and sustaining polio eradication. The dinner will be held on **Monday July 9, 2018 from 5:30pm to 7:30pm at CSIS.**

The dinner will begin with brief comments from several participants, followed by a moderated conversation around the role the U.S. has played in polio eradication and its involvement over the next decade in ensuring a polio-free world. We would greatly appreciate Dr. Redfield's input during this off-the-record discussion.

We very much hope that he can join us on July 9th. Please contact Isra Hussain, program coordinator and research assistant at the CSIS Global Health Policy Center, at ihussain@csis.org or (202) 775-3229 to confirm Dr. Redfield's participation.

Thank you and we look forward to hearing from you.

Best,

When: Wednesday, August 1, 2018 6:00 PM-8:00 PM (UTC-05:00) Eastern Time (US & Canada).
Where: The General Muir, Emory Point (across the street from CDC Headquarters)

Please join us!

We have reserved a semi-private area for dinner (Dutch treat) on August 1st at [The General Muir, Emory Point](#), just adjacent to the Emory Conference Center and across from CDC where all the STLT Subcommittee meetings will take place. Dinner is always a great time to more informally interact with each other and CDC leadership.

We look forward to seeing you in a few weeks!

Judy

CSIS has agreed to the 21st at 3:30 pm so let's proceed with that. I'll get a studio or booth number from broadcast so you can update the invite, but I'll plan to escort Dr. Redfield downstairs since it's after our comms meeting.

Thanks Tracie!

I can squeeze you in on the 20th at 10:00am or the 21st at 3:30pm. Will either of these work?

Respectfully,
Tracie

Subject: rescheduling Dr. Redfield's CSIS podcast on polio, opioids

Hi,

We've been asked by CSIS to reschedule the podcast recording (originally slated for July 10 in DC) with Dr. Redfield sometime over the next few weeks. R3 agreed last week but his calendar is looking pretty packed. Can you send me one or two date/time options later this month or in early October that I can float to CSIS for consideration?

We'd only need about 30 minutes, and can do it from here by phone. However, we'd want to record it from the studios downstairs for better sound/files.

Appreciate any help you can provide.

Thanks!
Kate

Subject: RE: CSIS Podcast

Secretary's meetings typically do not run over. Suspect he will need 15 minutes to get to CDC-W from 6th floor, so would schedule for 4:15, but he would definitely be able to stay until 4:45 if that's the case.

CDC Staffer Accompanying Dr. Redfield: TBD

CDC Program Contact (if applicable): TBD

CDC Media Contact (if applicable): TBD

2. Event Information:

Event Host: OPHPR

Purpose of Event: The Johns Hopkins Center for Health Security hosted the Clade X pandemic tabletop exercise on 5/15/18, in Washington DC. The purpose of the exercise was to illustrate high-level strategic decisions and policies that the US and the world will need to pursue in order to prevent a pandemic or diminish its consequences should prevention fail. Clade X is a day-long pandemic tabletop exercise that simulated a series of National Security Council–convened meetings of 10 US government leaders, played by individuals prominent in the fields of national security or epidemic response. Drawing from actual events, Clade X identified important policy issues and preparedness challenges that could be solved with sufficient political will and attention. These issues were designed in a narrative to engage and educate the participants and the audience. Lessons learned were distilled and shared broadly following the exercise.

Agenda (if applicable): TBD

Number of Attendees and Composition: 200 public health and preparedness professionals, primarily from NCEH, NCIRD, OPHPR, and NCEZID, but open to the larger CDC audience.

Key Participants (if applicable): TBD

Bios: Dr. Inglesby is the Dir. of the Center for Health Security of the Johns Hopkins Bloomberg School of Public Health. The Center for Health Security is dedicated to protecting people's health from the consequences of epidemics and disasters. Dr. Inglesby is also Professor in the Dept. of Environmental Health and Engineering in the Johns Hopkins Bloomberg SoPH with a Joint Appointment in the Johns Hopkins School of Medicine.

Source Invitation: Yes on the 8/6/18 DL

3. Dr. Redfield's Speech Information or Talking Points (TPs):

Dr. Redfield's Remarks/Presentation/TPs: TBD

Proposed Role and Topic: Present opening remarks during the marquee presentation of OPHPR's National Preparedness Month activities, which would include a chance for audience Q & A.

Length of Presentation: TBD

Press: TBD

Teleprompter: TBD

4. Supporting/Logistics Materials:

Subject: Redfield invitation to provide opening remarks

The Office of Public Health Preparedness and Response (OPHPR) has invited Dr. Tom Inglesby, Director of the Center for Health Security in the Johns Hopkins Bloomberg School of Public Health to give a presentation on *Clade X – A Pandemic Exercise*, on Monday, September 17, 2018, building 19, Auditorium B3, at 11 am. This hour-long event is for the entire CDC community, as the marquee presentation during OPHPR's National Preparedness Month activities. We are inviting Dr. Redfield to provide opening remarks for this session.

Clade X was a day-long pandemic tabletop exercise held on May 15, at Johns Hopkins University, that simulated a series of National Security Council–convened meetings of 10 US government leaders, played by individuals prominent in the fields of national security or epidemic response. Drawing from actual events, the Clade X exercise illustrated high-level strategic decisions and policies needed to prevent a severe pandemic or diminish its consequences should prevention fail. Dr. Inglesby is also Chair of the OPHPR Board of Scientific Counselors.

Dr. Inglesby's presentation will include observations, video vignettes of the exercise, and a chance for audience Q/A. For more information on the Clade X exercise, please see: <http://www.centerforhealthsecurity.org/our->

[work/events/2018_clade_x_exercise/index.html](https://www.cdc.gov/work/events/2018_clade_x_exercise/index.html) . If you have questions about this event, please contact OPHPR Director Dr. Steve Redd or John Anderton in the OPHPR Communications office.

Clade X – A Pandemic Exercise

September 17, 2018

11:00am-12:00pm

11:00am Welcome RADM Stephen Redd, OPHPR Director

11:05am Opening Remarks & Introduction of Dr. Inglesby Dr. Redfield, CDC Director

11:15am Clade X – A Pandemic Exercise Tom Inglesby, Center for Health Security, Johns Hopkins Bloomberg School of Public Health

11:50am Q&A

12:00pm Closing RADM Stephen Redd, OPHPR Director

Thomas Inglesby, MD, Chief Executive Officer and Director, Johns Hopkins Center for Health Security, Johns Hopkins Bloomberg School of Public Health Baltimore, MD

Dr. Inglesby is the Director of the Johns Hopkins Center for Health Security in the Johns Hopkins School of Public Health. The Center is dedicated to protecting people's health from the consequences of epidemics and disasters and to making communities more resilient to those challenges.

Dr. Inglesby's work is internationally recognized in the fields of public health preparedness, pandemic and emerging infectious disease, and prevention of and response to biological threats. He is Chair of the Board of Scientific Counselors, Office of Public Health Preparedness and Response, US Centers for Disease Control and Prevention (CDC). He is also Chair of the National Advisory Council of the Robert Wood Johnson Foundation's National Health Security Preparedness Index. He was a member of the External Laboratory Safety Workgroup appointed by the CDC Director that examined biosafety practices of the CDC, the National Institutes of Health (NIH), and the Food and Drug Administration (FDA). He was on the 2016 Working Group assessing US biosecurity on behalf of the President's Council of Advisors on Science and Technology (PCAST). He has served on committees of the Defense Science Board, the National Academies of Sciences, the Institute of Medicine, and in an advisory capacity to NIH, BARDA, DHS, and DARPA.

Dr. Inglesby has authored or co-authored more than 100 publications, including peer-reviewed research, original reports, and commentaries on issues related to health security and preparedness for epidemics, biological threats, and disasters. He is Editor-in-Chief of the peer-reviewed journal *Health Security*. He was a principal editor of the *JAMA* book *Bioterrorism: Guidelines for Medical and Public Health Management*. He is a member of the Board of Directors of PurThread, a company dedicated to developing antimicrobial textiles.

Dr. Inglesby completed his internal medicine and infectious diseases training at Johns Hopkins University School of Medicine, where he also served as Assistant Chief of Service in 1996-97. Dr. Inglesby received his MD from Columbia University College of Physicians and Surgeons and his BA from Georgetown University. He continues to see patients in a weekly infectious disease clinic.

Sent: 24 Jul 2018 13:51:31 -0400
To: Deussing, Eric (CDC/OPHPR/OD);Strength, Tracie (CDC/OD/OCS)
Subject: DoD follow up

Hi Tracie,

Dr. Redfield recently met with DOD during a trip to DC and as a follow up to that meeting, we are looking to arrange a call when he returns from Africa. The call will include folks from AFRICOM, so a morning call would be preferable. Eric will be the lead for this meeting. If you can find a morning in the first couple of weeks of August that work for Dr. Redfield, Eric, and the CDC participants listed below, that would be much appreciated. Then Eric can work to confirm a time with the DOD participants.

The participants will include:

CDC staff:

RADM Redd

Nicki Pesik

Joel Montgomery

DoD staff (To be confirmed):

RADM Chinn (Joint Staff Surgeon)

COL Weber (USAFRICOM Surgeon)

Chris Daniel (Global Health advisor for Mr. McCaffery)

COL Nelson Michael (WRAIR)

CDC Center for Global Health Leadership

ORGANIZATIONAL CHART

National Center for Emerging and Zoonotic Infections (NCEZID)

NCEZID: Protecting People from Infectious Disease

- Foodborne, waterborne, and fungal illnesses
Vector-borne diseases -- spread by mosquitoes, ticks, and fleas
Healthcare-associated infections
Antibiotic-resistant infections
Illnesses that affect immigrants, migrants, refugees, and travelers
Deadly diseases like anthrax and Ebola
Advanced Molecular Detection

NCEZID Expertise Supports Countries and Regions Through:

Outbreak response leadership and pathogen-specific expertise VHF, Zika, Yellow Fever, Monkeypox, Anthrax, Cholera, RFV & Dengue
Deployment and development of innovative technologies Zika diagnostics and reagents, Plague RDT, Dengue AMD test, Rapid Yellow Fever assay
Operating reference labs and laboratory technical support Ebola confirmatory testing, ePathology platform, helped to build Indonesia's first molecular lab to detect vector-borne diseases
Short and long-term technical engagements by focus area expertise AMR, IPC, Point of Entry, Border Surveillance and One Health Workforce development and trainings
Monkeypox diagnostic training in Cameroon, IPC training for 25 hospital and 14 districts in Sierra Leone

NCEZID Work on Emerging and Re-Emerging Threats (2000 to present)

Many of these diseases have emerged all over the world. This map shows individual examples of recent emergence/re-emergence.

HHS-CDC-19-0276-A-004384

Africa- Regional Support

Continue to build epidemiology, surveillance and laboratory capacity for priority pathogens with outbreak potential. Strengthen technical engagement on priority global initiatives. Region with high risk of emerging and zoonotic infectious diseases.

- Provide technical assistance and outbreak response leadership for pathogens such as VHF, monkeypox, yellow fever, cholera and plague
Strengthen surveillance, lab diagnostic and treatment capacity for pathogens such as VHF, monkeypox, yellow fever, cholera, and plague
Support country efforts to build infection control capacity and improve antibiotic use to prevent AMR & healthcare associated infections
Support critical global initiatives for YF, cholera, AMR, One Health and SDG#6 (WASH coverage)
Enhance progress to eliminate human deaths due to canine rabies
Improve detection (including use of RDTs) and surveillance of opportunistic fungal infections
Strengthen regional capacity to address IHR POE requirements and cross-border surveillance

National Center for Immunization and Respiratory Diseases (NCIRD)

NCIRD Expertise Supports Countries and Regions Through:

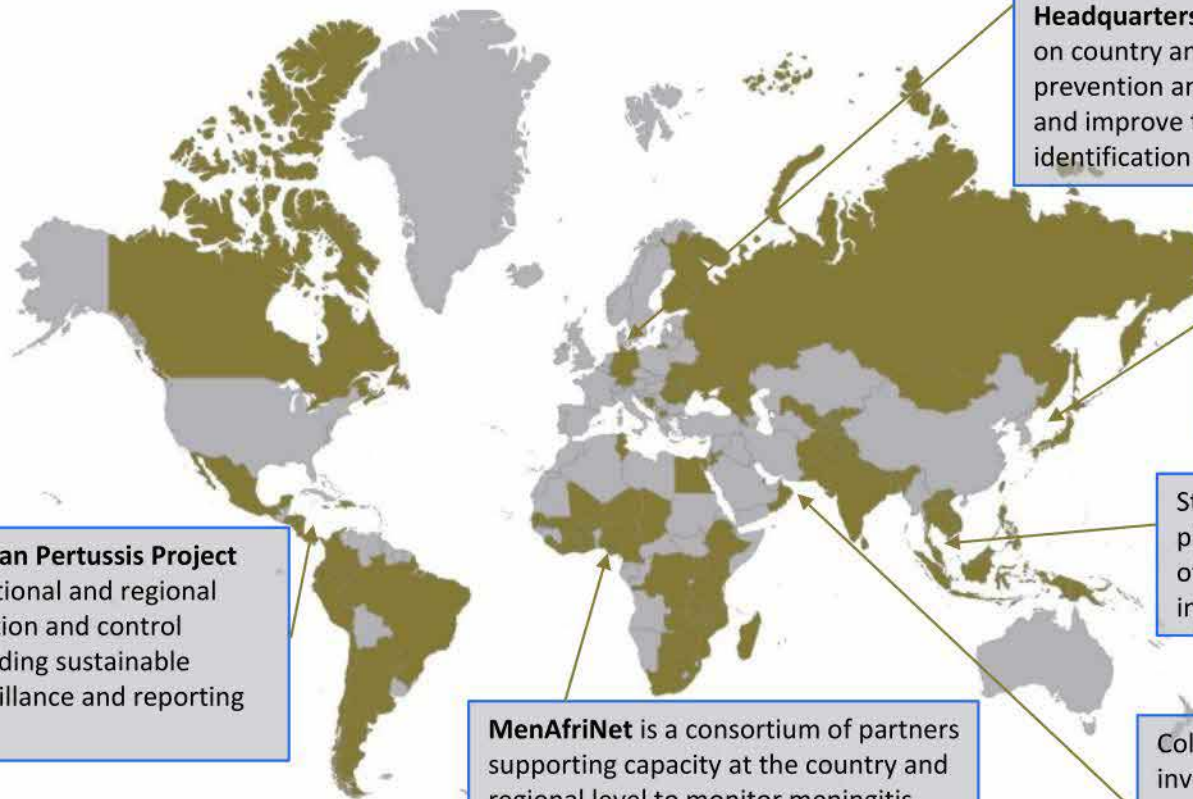

Outbreak response leadership and pathogen-specific expertise
MERS-COV, measles, influenza, meningococcal disease, polio
Deployment and Development of Innovative technologies
International Reagent Resource, TAQMAN Array Card
Operating reference labs and laboratory technical support
Global Polio Network, Global Influenza Surveillance and Response System, global reference laboratories, vaccine development and implementation
Short and long-term technical engagements by focus area expertise
International Influenza Program, RESPIRE, DARRE, MenAfriNet/MenAfriVac
Workforce development and trainings
Vietnam EOC, specimen shipping, lab management, MERS-CoV, rotavirus
Pandemic Preparedness and Response
Readiness, risk assessment, and response for emerging pathogens with pandemic potential: influenza, MERS-CoV, SARS

NCIRD Global Priorities:

- Promote Early Detection of diseases through improved surveillance and use of data to understand the epidemiology, prevalence and burden of respiratory and vaccine preventable diseases to improve outbreak response Improve Pandemic Preparedness by strengthening the network of national programs to detect, investigate and respond to both seasonal viruses and novel influenza viruses with pandemic potential and inform vaccine strain selection Control Vaccine Preventable Diseases by introducing new vaccines, monitoring effectiveness, and evaluating the immediate and long-term impact of vaccination Advance Scientific Knowledge to inform strategies to effectively prevent and control respiratory and vaccine preventable diseases globally and domestically

NCIRD: Where We Work (select programs)

NCIRD works closely with WHO Headquarters and all WHO Regional Offices on country and regional influenza prevention and control programs to enhance and improve the chance for early identification of a pandemic.

Through the **international influenza program**, improve global laboratory and epidemiologic capacity; in Asia, this includes collaboration related to avian influenza A (H7N9) virus

Strengthen **rotavirus** surveillance platforms to establish the burden of disease and support introduction of rotavirus vaccine

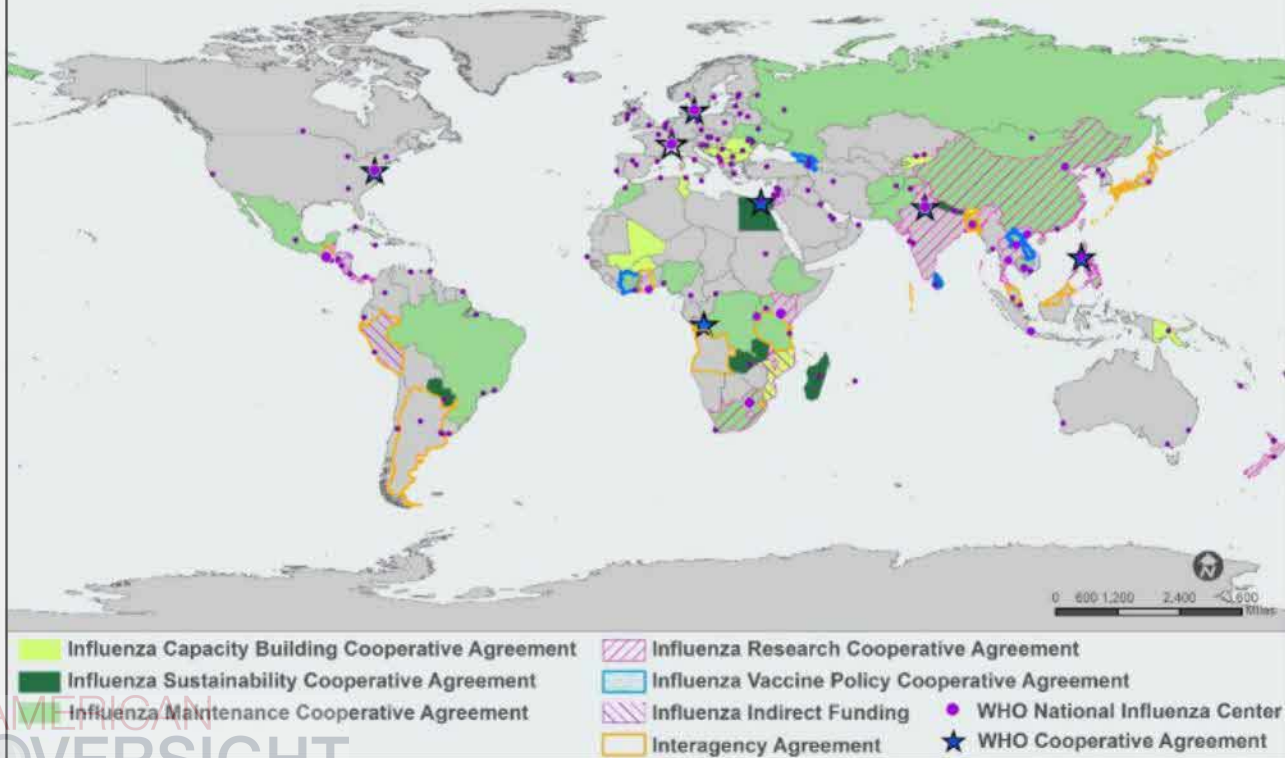

Collaborate on outbreak investigations, assess risk factors, and support diseases characterization for **MERS** in the middle east.

The **Latin American Pertussis Project (LAPP)** guides national and regional pertussis prevention and control strategies by building sustainable laboratory, surveillance and reporting capacity.

MenAfriNet is a consortium of partners supporting capacity at the country and regional level to monitor meningitis disease and evaluate the impact of meningococcal A conjugate vaccine in the meningitis belt.

Teresa,

Unfortunately, CoS isn't available at 11:00. He can however be available at 11:30-12:00. Will that work?

Regards,

Kim

Hi Kim,

Thank you for your response.

We just learned that Dr. Redfield's flight will not land until around 10:10 a.m.

Would it be possible to schedule the meeting from 11-11:30 am.?

If this time doesn't work, could you offer some times that would work for Dr. Steiger?

Thank you for your consideration.

Best,
Teresa

Subject: Re: Request for meeting with Dr. Bill Steiger, Chief of Staff, USAID

Tracie,

Just come a little earlier before the meeting to allow time to check into the building.

For your awareness, our address is:
US Agency for International Development
Ronald Reagan Building 6th Floor
[1300 Pennsylvania Ave, NW](#)
[Washington, DC 20523](#)

The best entrance to reach USAID is the 14th Street entrance across from the Commerce Building. Once you pass through Ronald Reagan building security, the USAID lobby will be on your left. In the USAID lobby, please alert the guards at the visitor desk that you have a meeting with the Chief of Staff Bill Steiger. You will need to present a valid photo ID (Government ID, Passport). We'll have someone come down to escort you from the USAID lobby to the meeting location. The telephone number to call with any issues is (b)(6)

Thank you let me know if you need anything else.
Morgan

Provider Frequently Asked Questions

What is [Program Name]?

[Program Name] gives patients access to their own and their family members' immunization records, and allows them to download and print official copies to satisfy the requirements of schools, camps, state agencies, employers and others who require proof of immunization.

What are the goals of [Program Name]?

[Program Name] aims to reduce the administrative burden of immunization records requests for you and your staff, improve immunization rates and empower patients to take greater control over their health.

How does [Program Name] work?

[Program Name] is a consumer portal that connects with [State Name]'s immunization information system. The program allows patients to view and print official copies of their immunization records.

Do [Program Name] provide official immunization records?

Immunization records provided by [Program Name] are official certificates that can be used to satisfy requirements by schools, camps, employers and others who require proof of immunization.

How much will it cost patients to use [Program Name]?

[Program Name] is free for your patients and providers.

What is your role in [Program Name]?

It is vital to the success of [Program Name]. Your role includes educating consumers and creating awareness about [Program Name], communicating the benefits of using [Program Name] to access immunization records and approving official account requests.

How do I register patients in [Program Name]?

Registering patients in [Program Name] is a simple, one-time process that generally takes less than two minutes. Your office approves the application during the visit, matches records from the state immunization information system and provides each patient with a program user guide.

How do I have patients pre-register for [Program Name]?

Patients can start the enrollment process online and your office can simply review and complete the application during the visit.

How long does it take to activate a patient's account?

[Program Name] account is a two-step process that takes just minutes for you and your patients. First, your office reviews and approves the application during the visit. If the patient has not enrolled in advance, your office provides a username, temporary password/FIN and a program user guide. Then the patient logs in at home or elsewhere and activates the account. The patient then has immediate access to family immunization records.

—OVER—

Rx
Inject more
CONTROL
into your patients'
immunization records.

Technical Support Hotline 000-000-0000

Getting started is as easy as 1-2-3. All you need to do is:

1. Register. Complete a [Program Name] enrollment form online or at your healthcare provider's office.
2. Request. Your healthcare provider approves your request and sets up the account while you're at their office.
3. Review. Log in as soon as possible and activate your account. You'll have immediate access to your family's immunization records to view, download or print as often as you need.

Now you can manage your family's immunization records online. When you sign up for [Program Name], you can use any trusted computer to view your up-to-date immunization records. You can also download or print an official copy. Why use [Program Name]?

It's easy.

Getting access to your immunization records is simple. Just complete a [Program Name] enrollment form online or at your healthcare provider's office. Your healthcare provider then creates your account and, if you have not already set up your password, provides you with a temporary password/FIN. Log in as soon as possible to activate your immunization records. Best of all, you only need one login ID and password to access immunization records for your entire family.

It's convenient.

You may not need your immunization records often, but when you do, [Program Name] makes you so efficiently download and print official copies as you need them. Whether you're registering kids for kindergarten or summer camps, saving them into a new school district, sending a support card to WIC, or just wanting more control over your family's health records, [Program Name] has you covered.

It's secure.

Accessing your immunization records through [Program Name] is just as private and secure as banking or paying bills online. What makes [Program Name] so secure? First, you create your own password. This means that only you and those you choose to share it with can access your family's immunization records. Second, no other personal information is available through the tool. Your information is protected.

Yes, [Program Name] is a [Program Name] program. Blue Button is a way to use your health records to achieve your health goals. For more information, visit [bluebutton.gov](#).

- What if I need help authenticating a patient account? You and your patients may access a technical support hotline by calling (800) 800-0000.
- Who should I contact if I have further questions on [Program Name]? Additional information on the program is available at [\[Program Name\]](#).

Sign up today... it's easy! Call or visit us online today for additional information:

Dear Dr Redfield,
Per the note I sent last night on DRC, Raimi Ewetola, our CDC Country Director in DRC, shared the information below.

We will use our established coordination structure between NCEZID and CGH to respond to outbreak and provide further updates.

best, Rebecca

From: "Ewetola, Raimi (CDC/CGH/DGHT)" <hcx6@cdc.gov>
Sent: Wednesday, August 1, 2018 3:06 AM

Dear All

I just received the information from MoH that the specimen is confirmed positive at INRB for Ebola virus. I'll keep you updated, and available to discuss CDC support to the outbreak response.

Thanks

Raimi Ewetola, MD, MPH, Dr. PH

Importance: High

Good morning Susan,

Unfortunately Dr. Redfield is no longer available on August 30th due to a congressional visit.

Would Dr. Petersen be available Friday, August 31st from 11-11:45 a.m.?

My apologizes for the inconvenience.

Best,
Teresa

Dear Susan and Rebecca,

Let's proceed with the briefing during ICEID week, Aug 26-29. In advance, please send the updated budget background. I believe there was something that was already made on this front and would just need to be updated. Can you also suggest the title and participants for the meeting as well?

Theresa, please hold 30min during ICEID week for a Division of Vector-Borne Diseases (DVBD) briefing lead by Lyle Peterson.

Thanks all,

Hugh

Subject: Upcoming DC Travel Changes
Attachments: FW_ HHS Senior Leadership One Day Retreat - Thursday, August 23, 2018.msg

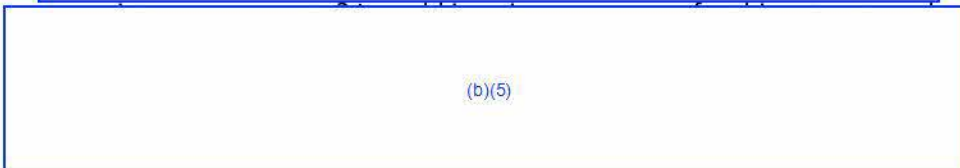

Hi all,

I met with Dr. Redfield this morning and there are a few changes we need to make to his upcoming DC travel due to meetings moving around:

1. Aug 20-24: Dr. Redfield will spend all of these days in DC

- a. Background: there is a new meeting that will come on his schedule for August 23— Secretary Azar is having an HHS Senior Leadership meeting that Dr. Redfield needs to attend in person on Aug 23 (see attached email). Invite should be forthcoming next week.
- b. For travel arrangements:

i.  (b)(5)

ii. **Jenn, Whitney and Lisa**  (b)(5)
 (b)(5)

c. For meetings:

- i. **TW:** Please put a hold on Thursday 8/23 for the Secretary's retreat, and please reschedule/cancel the other ATL meetings on 8/22, 8/23 and 8/24. (you can leave the Handel meeting sitting on his calendar for now—Kyle will handle that one per below)
- ii. **Kyle will handle communications with Rep Handel's office next week about the visit and present her with a few options—reschedule or proceed with the visit without R3. He'll let us know the answer.**
- iii. **Teresa and Jeremy:** can you build out other pending DC meetings—whether HHS, Congressional or other Administration meetings—for 8/22-8/24.

2. Sept 6-7: Dr. Redfield will spend both days in DC

- a. Background: His 9/6 DRTA meeting is likely moving to 9/7—**Jeremy** is handling that and will keep us posted.
- b. For other meetings: **TW and Jeremy**--please build out any other necessary DC meeting on 9/7
- c. For travel arrangements: **Jenn, Lisa and Whitney:** he would like to fly up the evening of Sept 5 after work. I need to seek clarity from him on whether he intends to stay in DC through Sept 12 since 10-12 are possible DC days. I will let you know so that we can make the appropriate return travel arrangements.

Thanks and let me know if you have any questions.

Good afternoon, everyone. Please see below a note from the Chief of Staff:

Dear Colleagues,

Please put a hold on your calendar for Thursday, August 23, 2018 for a senior leadership and strategy meeting with Secretary Azar. Our colleagues at the National Institutes of Health have offered to host our leadership retreat at their conference facility on the NIH campus. More information will follow regarding our guest speakers, pre-meeting reading, order of day and logistics.

Please confirm your attendance at this retreat with Zack Dareshori, in the Immediate Office at Zachary.Dareshori@hhs.gov <<mailto:Zachary.Dareshori@hhs.gov>> .

Thank you and I look forward to your participation in this event.

Categories: Important

1. Contacts:

Logistics Specialist: Mark Byers

Special Assistant: Hugh Green

Event Contact: Sandra (Sandy) Harwood, CMP, Vice President, Meetings & Education/IDWeek Meeting Secretariat, Infectious Diseases Society of America, w. (703) 299-0567, c. (703) 447-9921, sharwood@idsociety.org

CDC Staffer Accompanying Dr. Redfield: TBD

CDC Program Contact (if applicable): Sarah Wiley (OID), O: 404.639.4840, sed5@cdc.gov

CDC Media Contact (if applicable): Registered media will be expected at this event and they will have access to this session.

2. Event Information:

Event Host: IDSA

Purpose of Event: IDWeek is a joint international conference organized by the Infectious Diseases Society of America (IDSA), the HIV Medicine Association (HIVMA), the Society of Healthcare Epidemiology for America (SHEA), and the Pediatric Infectious Diseases Society (PIDS). It is the preeminent infectious diseases meeting in the US and attracts an international audience of over 9000 physicians and scientists. The physician scientists at CDC have considerable influence in the content presented and our relationship has proven invaluable in terms of sharing and amplifying the science that impacts public health.

These Societies have long enjoyed a robust partnership with CDC, collaborating on responses to public health emergencies and efforts to strengthen the public health workforce, advance antimicrobial stewardship, and promote immunizations.

Agenda: attached

Number of Attendees and Composition: 9,000 infectious disease specialists – primarily physicians in academia, clinical practice, or public health.

Key Participants (if applicable): Dr. Inger Damon (NCEZID) and Dr. Arjun Srinivasan (NCEZID) are also speaking at the conference.

Bios: TBD

Source Invitation: Yes on the 6/11/18 DL; An opportunity for the Director to meet with the boards of directors to discuss important public health priorities can also happen separately. R3's comments: Yes, but tie into other visits on West Coast; speak to ID Fellows & find out why EIS program only had 35 MDs apply (blip or new trend?); could go to Ft. Collins, Spokane (Sen. Murray), etc.

3. Dr. Redfield's Speech Information or Talking Points (TPs):

Dr. Redfield's Remarks/Presentation/TPs: TBD

Proposed Role and Topic: (b)(5)

(b)(5)

Length of Presentation: (b)(5)

Press: TBD

Teleprompter: TBD

4. Supporting/Logistics Materials:

5. OGC Review Materials:

May 31, 2018

Robert R. Redfield, MD
Director
Centers for Disease Control and Prevention
1600 Clifton Road
Atlanta, GA 30329

Dear Director Redfield,

We are very pleased to invite you to join us as a featured guest during a Special Society Event at **IDWeek 2018** to be held at the Moscone Convention Center in San Francisco, CA, October 3-7, 2018. **IDWeek** is a joint international conference organized by the Infectious Diseases Society of America (IDSA), the HIV Medicine Association (HIVMA), the Society of Healthcare Epidemiology for America (SHEA), and the Pediatric Infectious Diseases Society (PIDS). **IDWeek** attracts over 9,000 infectious disease specialists – primarily physicians in academia, clinical practice, or public health.

During this Special Society Event sponsored by IDSA and HIVMA scheduled for Friday, October 5, 2018 from 5-5:45 p.m., we would like for you to join us on stage for a discussion about current events in infectious diseases, our roles and how we can best work together to effect positive change. Potential key topics may include the infectious diseases impacts of the opioid epidemic, antimicrobial resistance, global health security, and how we can end the domestic HIV and STI epidemics. We would also like the opportunity for you to meet with our boards of directors to discuss important public health priorities separately.

Our Societies have long enjoyed a robust partnership with CDC, collaborating on responses to public health emergencies and efforts to strengthen the public health workforce, advance antimicrobial stewardship, and promote immunizations. We hope you will be able to join us for this special session, and your schedule permitting, other activities at **IDWeek**. Should you have any questions please email Sandy Harwood, **IDWeek** Meeting Secretariat at sharwood@idsociety.org.

On behalf of IDSA and HIVMA, we would be most honored if you would accept our invitation. We thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read 'Paul G. Auwaerter', written in a cursive style.

Paul G. Auwaerter, MD, MBA, FIDSA
President, IDSA

A handwritten signature in black ink, appearing to read 'Melanie Thompson', written in a cursive style.

Melanie Thompson, MD
Chair, HIVMA Board of Directors

This timeline is tentative and subject to change.

IDWeek 2018 Session Types - IDWeek 2018

 idweek.org/program/session-types/

IDWeek consists of the following session types:

Symposia Sessions

Duration is either 1.5 or 2 hours with usually three or four speakers depending on the length of the session. Each speaker gives a PowerPoint presentation consisting of 20 to 25 minutes of lecture, depending on the time slot and number of speakers, and 5 to 10 minutes of Q&A.

Meet-the-Professors Sessions

Duration is 1.25 hours. Meet-the-Professor sessions are clinically oriented sessions that focus on interaction between one or two faculty members and the audience.

Interactive Sessions

Duration is either 1.5 or 2 hours with four panelists. Interactive sessions generally consist of case presentations by the moderator(s), which are then discussed by the panelists. Moderators include case-based scenarios to allow for use with the audience response system allowing attendees to vote on diagnoses. The moderator will provide the answer to the case and the moderator and panelists will engage in a brief discussion of important points.

Poster Discussion Round Group Leader

Duration can last up to 1.5 hours consisting of one group leader and approximately 20 participants. Each group leader is provided with abstracts that detail new scientific and clinical findings within his/her field of expertise prior to the meeting. They are expected to summarize and present the research findings in context. During this session participants will listen to the group leader to provide his/her expert opinion on the selected research and will have the opportunity to ask questions of the group leader and the author.

Maxwell Finland Lecture

Dr. Finland served as the first president of IDSA and had a career that spanned over 50 years at Harvard University and Boston City Hospital. He was internationally recognized for his study of ID and antimicrobial agents in treatment. He is credited with influencing pioneering studies of antibiotic therapy and the treatment for pneumonia and respiratory injuries linked to exposure to noxious gases. He was also noted as establishing early identification of new infectious hazards and the emergence of dangerous new infections in hospitalized patients. This Finland lecturer is generally someone who has contributed in the areas of bacterial pathogenesis, antimicrobial agents, emerging infections, and hospital-acquired infections.

John F. Enders Lecture

Dr. Enders was the second president of IDSA and received a Nobel Laureate in Medicine in 1954 for the discovery of the ability of poliomyelitis viruses to grow in cultures of various types of tissue. This discovery led to the development of vaccines against polio, measles, rubella, and mumps, as well as other advances. His contributions also include major advances in the field of genetics, links between viruses and cancer, and insights into the pattern and process of tumor growth. The Enders lecture is intended to honor someone who has significant contributions in the field of medical virology.

Joseph E. Smadel Lecture

Dr. Smadel was a physician and investigator who created a bridge between basic laboratory science and the clinician, making significant contributions to the knowledge of psittacosis, vaccinia, variola, myxomatosis, and viral encephalitis. During World War II, Dr. Smadel led a study of control measures of typhus fever in Egypt and southern Italy. Dr. Smadel served at the Department of Virus and Rickettsial Diseases of the Army Medical School, Walter Reed Army Institute of Research, and National Institutes of Health (NIH). He held the position of chief of virology and rickettsiology in the Division of Biologic Standards at NIH until his death. The Smadel lecture is intended to honor someone who has made a significant impact in public health.

Edward H. Kass Lecture

Dr. Kass was one of the founding leaders of IDSA and served as the Society's seventh president in 1970 as well as the Society's secretary from 1964 to 1967. He was instrumental in securing IDSA's role in publishing the *Journal of Infectious Diseases*, and he developed the concept for *Reviews of Infectious Diseases* – now *Clinical Infectious Diseases*. Not only was he a pioneer in the study of infection, he was an advocate for social justice and passionate about addressing poverty, racism and discrimination. The Kass lecture was initially established as a "history of medicine" lecture and has traditionally been given by a recognized educator, thought leader, and someone with a broad understanding of societal influences in medicine.

SHEA Lectureship

The SHEA Lectureship award is given annually to recognize the career contributions of a senior investigator in healthcare epidemiology and infection prevention and control. The selected speaker is chosen based on his or her notable contributions to the science of healthcare epidemiology, demonstration of ongoing dedication to advancing the field of epidemiology, demonstration of mentorship, and dedication to SHEA and its mission to prevent healthcare-associated infections and advance the science of healthcare epidemiology.

Caroline B. Hall Lectureship

The lectureship is dedicated to and honors Dr. Caroline B. Hall, a world renowned pediatrician, teacher, researcher, and founding member of PIDS. Dr. Hall held the position of professor of pediatrics and medicine at the University of Rochester School of Medicine for over 40 years. She was a legend in pediatric infectious diseases for her groundbreaking and prolific research on respiratory syncytial virus, human herpesvirus 6, and other respiratory viral pathogens and authored over 500 peer-reviewed publications. Her contributions significantly enhanced our understanding of diverse respiratory viral infections and resulted in the development of diagnostic and management guidelines for infections that continue to be important clinical references. Dr. Hall served as the fifth president of PIDS and was the Society's historian. She was a member of the Institute of Medicine and the Royal College of Physicians and received numerous honors, including the Distinguished Physician and Distinguished Service awards from PIDS, the IDSA John F. Enders Lectureship, the Pan American Society for Virology Award, and the Robert M. Chanock Lifetime Achievement Award. The emphasis of the lectureship is to highlight innovative translational research focused on common infectious diseases, with special emphasis on clinical research and novel approaches to the epidemiology, diagnosis, management, prevention and treatment of these infections.

Plenaries

There will be two plenary sessions: a special plenary session in the afternoon on Wednesday and a closing plenary session on Sunday morning. Plenary sessions will feature leading experts in a variety of fields within the infectious diseases specialty. Experts will share lessons learned based on experience and stories in their respective fields.

Attachments: idweek.org-IDWeek 2018 At-a-Glance - IDWeek 2018.pdf

Here you go.

1. Information on CDC involvement

- IDSA and its affiliated organizations are key and long-standing CDC partners. Several CDC staff and leadership have multiple formal and informal interactions and roles with IDSA, including Dr. Rima Khabbaz's long-standing role as CDC liaison to its Public Health Committee.
- Dr. Frieden gave a talk on antimicrobial resistance at the opening plenary session in 2016, and perhaps at other conferences.

2. Details about the audience

- IDWeek is geared toward healthcare professionals in infectious diseases and healthcare epidemiology and prevention. Attendees include researchers, clinicians, quality and patient safety practitioners, epidemiologists, and public health officials.
- There were 7,314 attendees in 2017 and 7,027 in 2016. 75.2 % of attendees were from the US or Canada. 24.8% were international.
- Attendee primary professional activity

Patient Care	42.5%
Clinical Research	14.3%
Teaching / Education	4.5%
Basic Research	4.4%
Public Health	4.2%
Epidemiology and Infection Prevention	3.8%
Clinical Microbiology	3.1%
Administration	2.6%
Hospital Epidemiology	2.3%
Other	4.3%

3. Details about the agenda

- The attached document provides the agenda (pages 1-3) and additional details on the types of sessions (pages 4-6).
- Opening Plenary: Reaching for the Stars, Improving Science on Earth: Microbiome Research in Space. Speaker: Kathleen Rubins, Astronaut, NASA
- Closing Plenary: From Science Fiction to Clinical Trial: The Use of Phage to Treat Antibiotic Resistant Infections. Speakers:

- Steffanie Strathdee, Associate Dean of Global Health Sciences and Harold Simon Professor of Medicine, University of California, San Diego, San Diego, CA;
- Thomas Patterson, Professor of Psychiatry, University of California, San Diego, CA;
- Robert T. Schooley, Professor of Medicine, University of California, San Diego, CA;
- Vincent A. Fischetti, Professor and Head of the Laboratory of Bacterial Pathogenesis and Immunology, Rockefeller University, New York, NY.

IDWeek 2018 Session Types - IDWeek 2018

 idweek.org/program/session-types/

IDWeek consists of the following session types:

Symposia Sessions

Duration is either 1.5 or 2 hours with usually three or four speakers depending on the length of the session. Each speaker gives a PowerPoint presentation consisting of 20 to 25 minutes of lecture, depending on the time slot and number of speakers, and 5 to 10 minutes of Q&A.

Meet-the-Professors Sessions

Duration is 1.25 hours. Meet-the-Professor sessions are clinically oriented sessions that focus on interaction between one or two faculty members and the audience.

Interactive Sessions

Duration is either 1.5 or 2 hours with four panelists. Interactive sessions generally consist of case presentations by the moderator(s), which are then discussed by the panelists. Moderators include case-based scenarios to allow for use with the audience response system allowing attendees to vote on diagnoses. The moderator will provide the answer to the case and the moderator and panelists will engage in a brief discussion of important points.

Poster Discussion Round Group Leader

Duration can last up to 1.5 hours consisting of one group leader and approximately 20 participants. Each group leader is provided with abstracts that detail new scientific and clinical findings within his/her field of expertise prior to the meeting. They are expected to summarize and present the research findings in context. During this session participants will listen to the group leader to provide his/her expert opinion on the selected research and will have the opportunity to ask questions of the group leader and the author.

Maxwell Finland Lecture

Dr. Finland served as the first president of IDSA and had a career that spanned over 50 years at Harvard University and Boston City Hospital. He was internationally recognized for his study of ID and antimicrobial agents in treatment. He is credited with influencing pioneering studies of antibiotic therapy and the treatment for pneumonia and respiratory injuries linked to exposure to noxious gases. He was also noted as establishing early identification of new infectious hazards and the emergence of dangerous new infections in hospitalized patients. This Finland lecturer is generally someone who has contributed in the areas of bacterial pathogenesis, antimicrobial agents, emerging infections, and hospital-acquired infections.

John F. Enders Lecture

Dr. Enders was the second president of IDSA and received a Nobel Laureate in Medicine in 1954 for the discovery of the ability of poliomyelitis viruses to grow in cultures of various types of tissue. This discovery led to the development of vaccines against polio, measles, rubella, and mumps, as well as other advances. His contributions also include major advances in the field of genetics, links between viruses and cancer, and insights into the pattern and process of tumor growth. The Enders lecture is intended to honor someone who has significant contributions in the field of medical virology.

Joseph E. Smadel Lecture

Dr. Smadel was a physician and investigator who created a bridge between basic laboratory science and the clinician, making significant contributions to the knowledge of psittacosis, vaccinia, variola, myxomatosis, and viral encephalitis. During World War II, Dr. Smadel led a study of control measures of typhus fever in Egypt and southern Italy. Dr. Smadel served at the Department of Virus and Rickettsial Diseases of the Army Medical School, Walter Reed Army Institute of Research, and National Institutes of Health (NIH). He held the position of chief of virology and rickettsiology in the Division of Biologic Standards at NIH until his death. The Smadel lecture is intended to honor someone who has made a significant impact in public health.

Edward H. Kass Lecture

Dr. Kass was one of the founding leaders of IDSA and served as the Society's seventh president in 1970 as well as the Society's secretary from 1964 to 1967. He was instrumental in securing IDSA's role in publishing the *Journal of Infectious Diseases*, and he developed the concept for *Reviews of Infectious Diseases* – now *Clinical Infectious Diseases*. Not only was he a pioneer in the study of infection, he was an advocate for social justice and passionate about addressing poverty, racism and discrimination. The Kass lecture was initially established as a “history of medicine” lecture and has traditionally been given by a recognized educator, thought leader, and someone with a broad understanding of societal influences in medicine.

SHEA Lectureship

The SHEA Lectureship award is given annually to recognize the career contributions of a senior investigator in healthcare epidemiology and infection prevention and control. The selected speaker is chosen based on his or her notable contributions to the science of healthcare epidemiology, demonstration of ongoing dedication to advancing the field of epidemiology, demonstration of mentorship, and dedication to SHEA and its mission to prevent healthcare-associated infections and advance the science of healthcare epidemiology.

Caroline B. Hall Lectureship

The lectureship is dedicated to and honors Dr. Caroline B. Hall, a world renowned pediatrician, teacher, researcher, and founding member of PIDS. Dr. Hall held the position of professor of pediatrics and medicine at the University of Rochester School of Medicine for over 40 years. She was a legend in pediatric infectious diseases for her groundbreaking and prolific research on respiratory syncytial virus, human herpesvirus 6, and other respiratory viral pathogens and authored over 500 peer-reviewed publications. Her contributions significantly enhanced our understanding of diverse respiratory viral infections and resulted in the development of diagnostic and management guidelines for infections that continue to be important clinical references. Dr. Hall served as the fifth president of PIDS and was the Society's historian. She was a member of the Institute of Medicine and the Royal College of Physicians and received numerous honors, including the Distinguished Physician and Distinguished Service awards from PIDS, the IDSA John F. Enders Lectureship, the Pan American Society for Virology Award, and the Robert M. Chanock Lifetime Achievement Award. The emphasis of the lectureship is to highlight innovative translational research focused on common infectious diseases, with special emphasis on clinical research and novel approaches to the epidemiology, diagnosis, management, prevention and treatment of these infections.

Plenaries

There will be two plenary sessions: a special plenary session in the afternoon on Wednesday and a closing plenary session on Sunday morning. Plenary sessions will feature leading experts in a variety of fields within the infectious diseases specialty. Experts will share lessons learned based on experience and stories in their respective fields.

Dear Jeremy-

My apologies for not getting back to you sooner. After speaking with Dr. Paul Auwaerter, IDSA President, and looking at the IDWeek session schedule to see if anything could be moved, it appears that the only available time slot is the 5:00 -5:45 p.m. slot. Dr. Auwaerter said he was going to reach out directly to Director Redfield. I know that both the IDSA and HIVMA boards would like to meet with Dr. Redfield and I suspect we would try to find some time possibly earlier that day, but as far as a major unopposed session we would have to go with the early evening slot at 5pm.

Sandy,

Dr. Redfield is very interested in speaking at your event on 10/5/18, but before we commit, could you give us an idea about the time he's expected to speak that Friday? Is there any chance it could be toward the middle of the day? Thank you for all the help and once we figure the timing we can officially accept this. Have a good day!

Dear Jeremy,

The leadership would like Dr. Redfield if at all possible understanding that any emerging health crisis would take precedence. Just so you are aware, we have two high ranking CDC officials speaking in major sessions - Inger Damon, MD will help kick off the meeting serving as a moderator/interviewer in the Opening Plenary with astronaut Kate Rubins, PhD, on Wednesday, Oct. 3; and, Arjun Srinivasin, MD will be giving an honorific lecture on Thursday, Oct. 4 on antimicrobial resistance and stewardship. We also have a number of CDC speakers throughout our program and several will be at IDWeek as part of working committee meetings on specific issues. We can pull a list and forward if you are interested.

We hope Dr. Redfield's schedule can accommodate this event. Please let me know if you have any more questions.

Thank you and I look forward to hearing from you.

Best regards,

Sandy

Ms. Harwood,

We've received your invitation for Dr. Redfield to participate in your event this fall. In the event he cannot attend, would a delegate be acceptable to you? Once we hear back from

you we should be able to get a decision from the Director in a few days. Thank you and have a good day.

Dear Director Redfield,

I am reaching out to you with the attached letter of invitation from the Infectious Diseases Society of America (IDSA) President, Dr. Paul Auwaerter, and the HIV Medicine Association (HIVMA) Chair, Dr. Melanie Thompson, requesting that you join them on stage during a special session at **IDWeek** on Friday, Oct. 5th in San Francisco. **IDWeek** is the preeminent infectious diseases meeting in the United States and attracts an international audience of over 9000 physicians and scientists. The physician scientists at CDC have considerable influence in the content presented and our relationship has proven invaluable in terms of sharing and amplifying the science that impacts public health. We very much appreciate and value our long-standing partnership.

We would welcome the opportunity for you to address a large audience in a special session designed as a dialog and hope that you reply favorable with this request.

Thank you for your time and consideration.

Sincerely,

Sandra (Sandy) Harwood, CMP

Subject: IDSA Letter of Introduction and Meeting Request

Dear Director Redfield,

Congratulations on your appointment as the new Director for the Centers for Disease Control and Prevention (CDC) and Administrator of the Agency for Toxic Substances and Disease Registry (ATSDR). I am reaching out to you with the attached letter of introduction from the Infectious Diseases Society of America outlining the Society's areas of interest. We would greatly appreciate the opportunity to discuss with you in person potential points of collaboration to help promote a science-based approach to infectious diseases. IDSA President Dr. Paul Auwaerter and other members of IDSA leadership would love the chance to introduce themselves and offer their expertise should it ever be needed. Thank you for your time and consideration, and congratulations again on your appointment.

Sincerely,

Colin McGoodwin

IDSAs

Infectious Diseases Society of America

April 4, 2018

Robert Redfield, MD

Director

U.S. Centers for Disease Control and Prevention

1600 Clifton Road

Atlanta, GA 30329

Dear Dr. Redfield,

The Infectious Diseases Society of America (IDSAs) congratulates you on your appointment as the new Director for the Centers for Disease Control and Prevention (CDC) and Administrator of the Agency for Toxic Substances and Disease Registry (ATSDR). IDSAs has always valued a strong relationship with the CDC based on mutual interests for our patients and public health. We deeply appreciate the expertise you bring to this role, especially regarding domestic and global response to HIV/AIDS as well as addressing the infectious diseases consequences of the opioid epidemic. We look forward to working closely with you on these critical priorities, as well as pressing concerns such as antimicrobial resistance. **To that end, we request an opportunity to meet at your earliest convenience.**

As you likely know, IDSAs represents over 11,000 infectious diseases (ID) physicians and scientists devoted to patient care, prevention, public health, education, and research. Our members not only care for patients with serious infections but are also on the front lines of public health emergencies. ID clinicians are front and center in leading antimicrobial stewardship and infection prevention programs. With a view toward improving patient safety and leading cutting-edge research, IDSAs advocates for developing urgently needed new antimicrobial drugs, diagnostics, and vaccines.

As a national and international public health leader, CDC is looked to by many for making productive strides addressing a wide variety of infectious diseases threats. A brief introduction to some of the key concerns of our Society members follows on which we hope to collaborate with you.

Antimicrobial Resistance

Every year at least 23,000 people die of antibiotic resistant infections, at least two million infections are caused by resistant bacteria, and \$20 billion is spent on excess health care costs. Antimicrobial resistance (AMR) is jeopardizing many types of medical care that rely upon safe and effective antibiotics, including solid organ and bone marrow transplants, complex surgeries, cancer chemotherapy, and care of preterm infants.

AMERICAN
OVERSIGHT

HHS-CDC-19-0276-A-004509

The CDC has been an instrumental leader in the US and global response to AMR. We strongly encourage you to maintain this issue as a high priority. The CDC has been vital in catalyzing action by Congress, other federal agencies, and international bodies.

The CDC Antibiotic Resistance Solutions Initiative has partnered with states and territories to build capacity to prevent and detect emerging antibiotic resistance threats. The National Healthcare Safety Network (NHSN) tracks antibiotic use and resistance patterns, enabling evaluation of our efforts to reduce inappropriate antibiotic use and resistance. Unfortunately, health care facility participation in NHSN remains too low to provide comprehensive data. We look forward to working with you to increase reporting.

Infectious Diseases and the Opioid Epidemic

IDSA is increasingly concerned about how the opioid crisis is driving higher rates of infectious diseases including infective endocarditis, hepatitis C, hepatitis B, HIV, and skin and soft tissues infections. The HIV and hepatitis C outbreak in Scott County, Indiana in 2015 put a national spotlight on how infectious diseases arise from injection drug use, especially how rapidly these infections can spread. Following the Indiana outbreak, CDC identified 220 counties in 26 states that are at risk for similar HIV outbreaks. Based on reports from some of our members, they estimate that 25 to 50 percent of their inpatient hospital consultations are now for infections in patients who inject drugs. These areas appear to be experiencing outbreaks of infections such as endocarditis linked to injection drug use that are not currently reported to the CDC.

IDSA, the HIV Medicine Association (HIVMA), and the Pediatric Infectious Diseases Society (PIDS) have developed a [fact sheet](#) that details the infectious disease-related impacts of the opioid epidemic to help advance policy solutions. Our [policy brief](#) outlines a comprehensive set of recommendations regarding the prevention, surveillance, workforce capacity and access to treatment. National data is urgently needed to help us better understand the scope of infectious diseases related to opioid use. Such surveillance would help affected communities identify outbreaks earlier and lead to measuring the effectiveness of interventions to staunch outbreaks. Data for infective endocarditis is notably lacking. We would welcome the opportunity to work with you to consider appropriate surveillance strategies. We also support expanded access to evidence-based prevention services as well as increased screening and linkages to treatment for individuals with infectious diseases related to opioid use.

Global Health

As a leader in the global response to HIV, we are confident you appreciate the critical leadership of the CDC as a President's Emergency Plan for AIDS Relief (PEPFAR) implementing partner. We look forward to supporting continued progress in addressing global HIV/AIDS. We also want to call attention to global health security. IDSA strongly supports the Global Health Security Agenda (GHSA) and values CDC efforts in building capacity in lower resource countries to prevent, rapidly detect and respond to emerging infectious diseases threats before they reach our shores. Outbreaks of Ebola and Zika demonstrated the importance of such investments in protecting our country. We are concerned that funding for the GHSA is set to expire in 2019. If not extended, the CDC will be forced to halt efforts in numerous countries, leaving us unprepared for the next outbreak.

Public Health Workforce

From antimicrobial resistance to Zika, the success of public health interventions is dependent upon an expert workforce that can carry out day-to-day public health activities and rapidly respond to emergencies. Unfortunately, that workforce is diminishing, and we are eager to work with you to strengthen it.

As an example, consider the CDC Epidemic Intelligence Service (EIS), a two-year fellowship program in which participants receive on-the-job training to respond to infectious disease outbreaks and other public health emergencies. Typically, each EIS class includes 75-80 individuals. This year, the class includes only 62, reducing the EIS program capabilities to 1980's levels. Physician applicants to EIS have declined in part due to the significant medical student debt burden (\$200,000 on average) that pressures physicians to pursue more lucrative paths. Similarly, financial concerns are decreasing the number of physicians pursuing infectious diseases training and careers in all spheres whether patient care, research or public health. Loan repayment programs offered through the National Institutes of Health (NIH) and the HRSA National Health Service Corps are designed to help reduce medical student debt and encourage individuals to pursue careers as biomedical researchers and as physicians caring for underserved communities. However, nothing exists for individuals who want to work in public health. The CDC previously had loan repayment authority, but this expired in 2002, written initially as a three-year employment commitment for the EIS two-year program that meant this was never used due to this technical glitch. IDSA is currently encouraging Congress to reinstate the CDC loan repayment authority and align the employment requirements with EIS. We look forward to working with you on efforts to ensure a healthy pipeline of public health experts to protect our country now and in the future.

In addition to the issues discussed above, IDSA would sincerely appreciate the opportunity to work with you on the full breadth of infectious diseases threats facing our country and our world. Notable topics include expanding vaccination uptake, driving progress on tuberculosis, strengthening influenza preparedness, and promoting evidence-based solutions to vector-borne diseases. We hope you will consider IDSA your partner and look to us as a resource. Again, we would welcome the opportunity to meet at your earliest convenience. You may reach us through IDSA's Program Officer for Public Health, Colin McGoodwin at cmcgoodwin@idsociety.org or 703-299-0015.

Sincerely,

Paul G. Auwaerter, MD, MBA, FIDSA
President, IDSA

Thanks Robin! If you know of any confirmed media attending, can you please let Kate Grusich know?

Additionally, would it be possible to share any images taken of Drs. Redfield and/or Schuchat at the event?

Thanks again, and hope you're doing well.

Best,
Delaney

Subject: ICEID Advance/Logistics Questions

Hi Robin, hope you are well.

I will be assigned as Dr. Redfield's advance lead for ICEID on 26 August and will help coordinate his participation and introductory remarks for the keynote opening session. CC'd above is Delaney McGuire from his Communications Team and together we have a few questions that are listed below. We realize this is a bit early and that you may not have answers to all the questions. Thank you,

1. Can you provide the exact location at the Omni Hotel (what conference room)? We are finalizing the rooms now. We had to change our original room plans because we had more abstracts/posters than allotted floor space.
2. How long has Dr. Redfield been asked to speak for? Just brief introductory remarks, maybe 5-7 minutes.
3. Are there any particular topics you would like him to include in the intro remarks? I will send you some background info on the conference and speakers. I will also include a walk-through of how the speakers will be introduced (e.g., order, who will introduce them, etc.).
4. Is there an agenda that can be shared at this time? If not, can you please let us know who some of the other key speakers and attendees will be? We are editing the agenda for posting on the website next week. Keynote speakers include Jim Hughes, former NCID director (retired) and person responsible for starting the conference in 1998; Anne Schuchat, and Neil Ferguson. This might change, though, because the WHO Director General has expressed interest in attending. If so, Anne says she will not present and let him take her place and Jim Hughes has said he will only speak briefly.
5. Would you recommend Dr. Redfield use slides or talking points to back his remarks? Whatever he prefers, of course, but given the short time, I don't think it is necessary.
6. Are you planning to have a photographer, social media promotion or any media at the event? A photographer. The conference is open to the press, so they might be there but we don't know for sure.

Brad

Thank you Michael [*lademarco*].

I am pleased to be here this evening to welcome you to the 2018 International Conference on Emerging Infectious Diseases. As Dr. *lademarco* mentioned, ICEID 2018 marks the 10th occurrence of this outstanding conference, which has drawn scientists, clinicians, and public health workers from around the world since 1998.

With more than 1500 attendees from nearly 70 countries, ICEID 2018 truly represents the global breadth of expertise involved in infectious disease prevention and control. We hope that the conference will continue to serve as a venue for building and strengthening the essential national and global partnerships and collaborations required to meet the complexities of emerging infectious diseases.

The conference agenda offers an impressive group of speakers—well recognized as leaders in their fields—who will discuss the latest developments in infectious disease surveillance and diagnostics; national and global public health preparedness; foodborne, vector-borne and zoonotic diseases; disease elimination and eradication; healthcare-associated infection and antimicrobial resistance; and the microbiome. It also includes discussions on many of our frontline public health issues, such increased rates of sexually transmitted diseases and the impact of the opioid epidemic on emerging infections.

[I had heard that Dr. Redfield wanted to talk about HIV and the opioid epidemic, so thought that the above sentence could serve as a lead in to what he wants to mention].

Introduction of first keynote speaker – James (Jim) Hughes

For many of you, our first speaker this evening needs no introduction. In fact, at CDC his name is synonymous with the term “emerging infections.”

Dr. James Hughes will retire on Friday from his current position as Professor of Medicine and Public Health at Emory University—a position he accepted in 2005 after retiring from CDC.

Jim began his CDC public health career in 1973 as an EIS officer, spending several months in Bangladesh at the Cholera Research Lab (now ICDDR, B). He served in leadership positions in CDC’s enteric diseases and hospital infections programs before becoming deputy director and then director of CDC’s National Center for Infectious Diseases. He became director in 1992—the same year that the Institute of Medicine (IOM) published a new report called *Emerging Infections, Microbial Threats to Health in the United States*, with recommendations for rebuilding the nation’s public health infrastructure.

Jim took the recommendations and his leadership role in addressing them to heart. He spearheaded the development and implementation of CDC’s emerging infections efforts—creating new opportunities for improving preparedness and response capacities for infectious disease threats while bringing critical funding and global prominence to the Agency. Examples of programs started under his leadership include CDC’s highly regarded *Emerging Infectious Diseases* journal; the Epidemiologic and Laboratory

Capacity for Infectious Diseases cooperative agreement or ELC; the Emerging Infections Programs or EIP; several infectious disease laboratory fellowships; and, of course, this conference. All of which exemplify his call for strengthening linkages among in the clinical, public health, research, and veterinary communities worldwide.

Please join me in welcoming Dr. Hughes to ICEID 2018.

Subject: National Association of Boards of Pharmacy Meeting Invitation

Dear Dr. Catizone:

Thank you for your thoughtful letter congratulating Dr. Robert Redfield on his new position as the Director for the Centers for Disease Control and Prevention (CDC). He appreciates your encouragement and kind words.

Dr. Redfield would also like to thank you for your invitation to meet with you and other members of the National Association of Boards of Pharmacy. He is pleased to accept your invitation and hopes to schedule a meeting at some point in August. Teresa Williams, a member of Dr. Redfield's Advance Team, will contact you soon to schedule the details. You can reach her at TWilliams4@cdc.gov or at (404) 639-5998.

Thank you again for the invitation. Dr. Redfield looks forward to the meeting.

Sincerely,

Sandra Cashman, MS

Executive Secretary

Office of the Chief of Staff

Subject: RE: HOLD for Ga Delegation Discussion on 18th

Hi Tracie,

Yes, please confirm Dr. Redfield's time with staff from the GA delegation staff on the 18th after the EMAP reaccreditation ceremony.

I sent Seth some additional information last week about Dr. Redfield's time with the delegation. Happy to send additional details, if needed. We will have Dr. Redfield's briefing materials submitted by 12/13.
Dr. Redfield's time with the staff is slated from 2 – 2:20pm.

For reference, below is the current outline for the GA delegation staff time on Dec. 18th:

OPTION #1

1:00 – 2:00pm:	EMAP Reaccreditation ceremony
2:00 – 2:20pm:	Delegation staff time with Dr. Redfield (EOC, ECR)
2:20 – 2:40pm:	EOC Tour (with Dr. Redd)
2:40 – 2:50pm:	Transition time to Lab
2:50 – 3:20pm:	Lab visit
3:20 – 3:30pm:	Transition time
3:30pm :	Depart CDC

Event Contact: Tiffany Wilson (2018 Georgia Bio Innovation Summit Chair & CEO, Global Center for Medical Innovation), tiffany.wilson@devices.net and Russell Allen (Pres. & CEO, Georgia Bio), rallen@gabio.org, 404-920-2043.

CDC Staffer Accompanying Dr. Redfield: TBD

CDC Program Contact (if applicable): TBD

CDC Media Contact (if applicable): TBD

2. Event Information:

Event Host: GA Bio

Purpose of Event: CDC's Office of Technology Transfer has been engaged with GA Bio for over 15 years and been a regular participant at this annual conference. GA Bio is also a partner with the GA Global Health Alliance and the Global Health ATL campaign. These efforts are providing the opportunity to theme the Summit around innovations in public and global health. The Director's participation in the event presenting his vision for CDC and an overview of the organization's priorities, challenges, and successes would all be interesting topics to consider for a keynote address.

The day-long conference will feature more than 50 expert speakers in panel discussions exploring trends and issues in medical technology and devices; the changing landscape of the pharmaceutical industry; therapeutics, diagnostics and vaccines; and new and exciting science at GA's universities. Additionally, there will be an exhibit hall where GA companies and universities will display the latest bioscience-related research, technologies, products and services.

The GA Bio Innovation Summit has become a premier conference in the Southeast. It is the one-time each year when academia, industry and government come together to showcase GA's leadership in innovation, from basic research to manufacturing, for improving the health and well-being of people, animals and the environment. GA Bio, the state affiliate for BIO, is a non-profit association whose members include bioscience companies, universities, medical centers and other business groups.

www.georgiabiosummit.org

Agenda (if applicable): TBD

Number of Attendees and Composition: 600 CEOs, senior executives, university administrators, scientists, physicians, and public policy officials from GA and across the nation.

Key Participants (if applicable): Gary Reedy (CEO, American Cancer Society) is the other confirmed keynote speaker.

Bios: TBD

Source Invitation: Yes on the 8/6/18 DL

3. **Dr. Redfield's Speech Information or Talking Points (TPs):**

Dr. Redfield's Remarks/Presentation/TPs: TBD

Proposed Role and Topic: Present keynote remarks at the event during either the breakfast or luncheon plenary session.

Length of Presentation: TBD

Press: TBD

Teleprompter: TBD

4. **Supporting/Logistics Materials:**

5. **OGC Review Materials:**

GEORGIA BIO™
The Life Sciences Partnership

July 19, 2018

Robert R. Redfield, MD
Director
Centers for Disease Control and Prevention
1600 Clifton Road
Atlanta, GA 30329-4027

Director Redfield,

On behalf of Georgia Bio, we would like to invite you to speak at the **18th Annual Georgia Bio Innovation Summit on Tuesday, October 9, 2017**, at the Cobb Galleria Centre in Atlanta. We would be honored if you would accept our invitation to keynote our event during either our breakfast or luncheon plenary session.

The CDC Office of Technology Transfer has been engaged with Georgia Bio for over 15 years and been a regular participant at this annual conference. Georgia Bio is also a partner with the Georgia Global Health Alliance and the Global Health ATL campaign. These efforts are providing us the opportunity to theme the Summit around innovations in public and global health. Your participation in the event presenting your vision for CDC and an overview of the organization's priorities, challenges and successes would all be interesting topics to consider for a keynote address.

I had the pleasure of meeting you briefly at your welcome event in the Communications Center a few weeks ago and learned about the importance of efforts there in both communicable and non-communicable diseases. We would love to share this information with our audience. **Gary Reedy, CEO of American Cancer Society**, is our other confirmed keynote speaker.

We anticipate approximately 600 CEOs, senior executives, university administrators, scientists, physicians and public policy officials from Georgia and across the nation to attend the 2018 Summit. The day-long conference will feature more than 50 expert speakers in panel discussions exploring trends and issues in medical technology and devices; the changing landscape of the pharmaceutical industry; therapeutics, diagnostics and vaccines; and new and exciting science at Georgia's universities. In addition to the plenary and panel programs, we will have an exhibit hall where Georgia companies and universities will display the latest bioscience-related research, technologies, products and services.

The Georgia Bio Innovation Summit has become a premier conference in the Southeast. It is the one-time each year when academia, industry and government come together to showcase Georgia's leadership in innovation, from basic research to manufacturing, for improving the health and well-being of people, animals and the environment. Georgia Bio, the state affiliate for BIO, is a non-profit association whose members include bioscience companies, universities, medical centers and other business groups.

Please contact Georgia Bio President and CEO Russell Allen (rallen@gabio.org; 404-920-2043) with any questions. The Summit website can be found at www.georgiabiosummit.org.

We look forward to hearing from you.

Sincerely,

Tiffany Wilson

Subject: RE: GaBio Innovation Summit Logistics: Dr. Redfield, CDC

Hi Chloe. Jeremy is out today so I'm replying for him. Thanks for sharing the details below, and we can dialog directly with Maria as we get into Sept, but feel free to refer her to the cdc.gov link for R3's bio and photo (that's where we've been referring folks).

<https://www.cdc.gov/about/leadership/director.htm>

I'm also looping our speech/comms team so they are aware of the latest about this event and can connect with you for talk insights.

Hope that helps, and thanks again for helping broker this!

Scott

Jeremy...

Please see below from Maria Thacker with GA BIO regarding details for his keynote on Oct 9, 12:00 pm – 1:30 pm at the Sheraton Suites Galleria (formerly known as Cobb Galleria Center). There are mentions of other events below, that we do not feel strongly about regarding his participation; though certainly a courtesy GA BIO is extending.

You'll see below that they have immediate need for **Dr. R's bio and headshot**. I'm happy for you all to work directly with Maria and her team on this; don't want to hold anything up at all. Though, we would like to be helpful with talking points if there are CDC Foundation examples/info that Dr. R. may be able to reference in his speech.

Happy to follow your lead here, and make a direct connection for you via email...and again, sure appreciate all your help!

All best...

Chloe

Subject: GaBio Innovation Summit Logistics: Dr. Redfield, CDC

Chloe,

Thank you for assisting with any logistics related to Dr. Redfield's participating at our Summit on Oct. 9th. We look forward to having him speak during the luncheon keynote from 12:00-1:00pm. I wanted to share the following items. I have noted the most pressing being the request for a bio and headshot.

Tim Barrett with our conference secretariat Destination South is copied. Either of us can assist with logistics.

SCHEDULE

Monday, Oct 8th

If available, a VIP dinner/reception. Time, TBD, but typically ~6:00pm

Tuesday, Oct. 9th

8:00am - Breakfast Keynote Address: Gary Reedy, Chief Executive Officer, American Cancer Society

12:00-1:30pm - Luncheon Keynote: Dr. Robert Redfield, CDC; Dr. Rob Scott, Abbvie

Full conference agenda to be posted here in about 1-2 weeks:

<https://www.georgiabiosummit.org/agenda>

BIOGRAPHY & HEADSHOT (Immediate request.)

- Could you send me Dr. Redfield's biography and headshot (high resolution) so I can begin to prep an announcement about his participation.
- Could you also send me the CDC logo as I think it would be great to incorporate that into marketing for his talk.

HOTEL BLOCK

The Conference Center is adjacent to hotel.

Sheraton Suites Galleria-Atlanta

2844 Cobb Parkway SE. Atlanta, GA 30339, United States

Phone: (1)(770) 955-3900

Phone Reservations: 1-888-627-7047

[CLICK HERE TO RESERVE YOUR ROOM](#) | OR If you prefer just let us know and we can book this for you.

TRANSPORATION

If you need us to arrange any transportation please let us know and we can coordinate. As a note, Atlanta traffic is very heavy so please keep that in mind when booking flight. All activities will take place very close to the conference center. UBER is very easy to use in Atlanta.

PLANNING CALL WITH DR. REDFIELD

We will hold one call in advance of the Summit with Dr. Redfield and will arrange with his scheduler. Please advise as how to best schedule this within a few weeks of the Summit.

Please contact me anytime with questions.

Thank you,
Maria

Bcc: Roberts, Sukeshi (CDC/CGH/OD);Stanojevich, Joel G. (CDC/DDPHSIS/CGH)
Subject: Global Health Security Roundtable (w/ Dr. Mark Dybul)

Dr. Redfield will open the meeting with introductions, and thoughts on Dr. Dybul's remarks at the Forum. He will outline his overarching priorities for GHS at CDC, focusing on areas of overlap. He will then open the floor for discussion. While we aren't planning on any formal presentations from SL or others attending, it might be good to have an idea of what you'd like to highlight for this discussion, recognizing that the conversation will be largely informed by the preceding events w/ Dr. Dybul.

Thanks Teresa.

October 16 is best for Lea Ann Jean-Louis, an occupational nurse in OSSAM, who will be administering the flu shot. Can we please confirm that day?

I'm adding in Llelwyn and William for their awareness for Connects.

Should I set up the photographer? I'm happy to but just don't know how that usually works.

Thanks!
Megan

The clinic is happy to come to him to administer the flu shot. Can you send a date option or a couple options? I'll check on their end what will work.

They've also offered this if he's interested: If Dr. Redfield also wants his blood pressure and cholesterol screenings done at the same time, the WorkLife Wellness Office can make arrangements for that as well.

Thanks!

Hi Scott/Jeremy,

This probably needs to go on the decision list or some other way to ask him...OSSAM would like to invite Dr. Redfield to come to one of their Health Days (link below has upcoming dates) to get his flu shot, and we'd take a picture of it to use on Connects. I'm not sure if plans have already been made for him to get his shot this year somewhere.

Thanks,
Megan

To: Patterson, John (CDC/OCOO/OD) [<byi8@cdc.gov>](mailto:byi8@cdc.gov)
Subject: CDC Director - Health Days Flu Shot Picture and Email Draft

John—

Becky from the Worklife Wellness Office mentioned that for their Health Days promotion, they usually try to get a picture of the CDC Director receiving his flu shot, as well as an email sent out from him about the importance of getting the flu shot. I am attaching the email draft here, with some room if he or his people want to add a couple lines in as well.

If you have any information on getting a picture of the director receiving his flu shot, or if there's any way we can arrange that at one of the Health Days, let me know.

Thanks for your help!

Phone Number:
404-562-7888

Renee L. Ellmers was appointed by the White House as Regional Director of Region 4 of the U.S. Department of Health and Human Services (HHS) in May 2017. As a Presidential Appointee, Ms. Ellmers provides executive leadership as the primary representative for the Secretary of Health and Human Services. The office of the Regional Director is also tasked with intergovernmental and external affairs bringing together federal, state, local and tribal government organizations, along with other external partners. In her role, Ms. Ellmers is responsible for the eight southeastern states of Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina and Tennessee, as well as six federally recognized tribes; making Region 4 the largest of ten regions.

Renee Ellmers comes to us from the great state of North Carolina with a strong background in public service. She was elected to three terms in the House as the U.S. Representative for North Carolina's 2nd Congressional District. In Congress, she served on the Health Subcommittee of the Energy & Commerce Committee. As a congresswoman, Ms. Ellmers supported and called for funding of the 21st Century Cures Act. This Act will bring our health care innovation infrastructure into the 21st Century, delivering hope for patients and loved ones and providing necessary resources to researchers to continue their efforts to uncover the next generation of cures and treatments.

Ms. Ellmers was born and raised in Michigan. She graduated from Oakland University with a Bachelor of Science in Nursing in 1990 and began her career as a surgical intensive care nurse. She later became clinical director for Ellmers General Surgery and the Trinity Wound Care Center in Dunn, North Carolina. Ms. Ellmers was active in her community as a member of the Dunn, North Carolina Planning Board and the Chamber of Commerce.

She currently lives in Dunn, North Carolina with her husband of 23 years, Brent, who is a General Surgeon, and her son Ben, a student at North Carolina University.

Good morning Dr. Redfield,

We are working on your attendance for this meeting on Monday. Prior to the meeting on Monday, HHS needs to read you onto several topics. That will likely occur sometime today in the HHS SCIF between 1 and 3pm, during a gap in your other scheduled meetings today.

I will let you know when we have confirmation about the time of that read-on today. It should take about 30-45 minutes.

Seth

Subject: Invitation for Dr. Redfield to join a small group NSC meeting Mon, Nov 19

Good morning,

You may already be aware, but we've received notification this morning that NSC is hosting a small group meeting on Monday, Nov 19 1-2:30pm. This is a restricted meeting and Hillary Carter has requested Dr. Redfield attend. Dr. Redfield's attendance requires that HHS reads him onto several items before he can participate. I've notified HHS and will facilitate getting him read onto as needed.

Please keep me informed of Dr. Redfield's plans for attending this meeting, so I can work with HHS to ensure he's read into all necessary items prior to attendance. I am happy to provide additional context – feel free to call, but note that any detailed discussions will require a conversation in our spaces, due to the restrictions involved.

Thank you,
Neely Kilgore

Subject: Invitation for Dr. Redfield to join a small group NSC meeting Mon, Nov 19

Good morning,

You may already be aware, but we've received notification this morning that NSC is hosting a small group meeting on Monday, Nov 19 1-2:30pm. This is a restricted meeting and Hillary Carter has requested Dr. Redfield attend. Dr. Redfield's attendance requires that HHS reads him onto several items before he can participate. I've notified HHS and will facilitate getting him read onto as needed.

Please keep me informed of Dr. Redfield's plans for attending this meeting, so I can work with HHS to ensure he's read into all necessary items prior to attendance. I am happy to provide additional context – feel free to call, but note that any detailed discussions will require a conversation in our spaces, due to the restrictions involved.

Thank you,
Neely Kilgore

Given his calendar, Chamblee is only possible on the 19th, and he would also need to have lunch while there, otherwise he can do more time on that day at Roybal. Which is preferred for him... Chamblee or Roybal?

He's asked us not to schedule him before 9am for events, so I'd rather not go there.

Subject: Employment Engagement Activity - December 17 and 18

As you know, during today's Director Communication Meeting, Dr. Redfield agreed to participate in an employee engagement activity to pass out holiday cheer beverages (hot apple cider and/or cocoa) to staff at Roybal's cafeteria, located at bldg. 21, and Chamblee's cafeteria, bldg. 106. We plan to invite other OD leadership to take part in the event, too, i.e., Dr. Schuchat, the Chief of Staff, Katherine, and Sherri Berger. We are hoping to set up this event on December 17th at Roybal and December 18th at Chamblee Campus. I am reaching out to check on Dr. Redfield's preference. Is he available to participate at both locations or only at the Roybal Campus? In addition, is he open to doing this in the morning from 8:00 a.m. to 9:00 a.m. or is the lunch hour schedule more desirable.

Once we confirm time and desired location, I will inform the Worklife Wellness Office, so we can finalize plans.

Thanks much,

Llelwyn

Executive Briefing Memo

CDC/CDC Foundation Partner Meetings with Kaiser Family Foundation, CZI and CZ Biohub

October 5, 2018, 11:30 AM – 1:30 PM

PREPARED FOR CDC OFFICE OF THE DIRECTOR, DR. ROBERT REDFIELD

Friday, October 5, 2018:

Location: Henry J. Kaiser Family Foundation (Kaiser Family Foundation)
185 Berry St., Suite 2000, San Francisco, CA 94107
Phone: 650-854-9400
(Laura Angel cell phone (b)(6))

Participants: Dr. Robert Redfield, Director, Centers for Disease Control and Prevention
Dr. Michael Iademarco, Director, CSELS
Hugh Green, Special Assistant to the Director, CDC
Laura Angel, Vice President for Advancement, CDC Foundation
Dr. Drew Altman, President and CEO, Henry J. Kaiser Family Foundation
Matt James, Senior Counselor, GMMB and CDCF Board Member
Ed McCleskey, Science Program Officer, Chan Zuckerberg Initiative
Rebecca Egger, Product Manager, Chan Zuckerberg Initiative
Dr. Joseph DeRisi, Co-President, CZ Biohub
Dr. Cristina Tato, Associate Director, CZ Biohub

Agenda:

11:30 a.m.	Arrive Kaiser Family Foundation Meeting Introductions, Laura Angel, Brief discussion with Dr. Drew Altman, Kaiser Family Foundation and CDC Foundation Board member, Matt James
12:00 - 1:30 p.m.	CZI/CZ Biohub Meeting Introductions, Laura Angel Informal lunch discussion to explore shared interests
1:30 p.m.	Lunch concludes/Depart

Objectives:

Henry J. Kaiser Family Foundation Meeting:

- To express appreciation to the President and CEO of KFF for hosting and to provide a brief opportunity to meet the CDC Director personally and learn more about shared interests

Chan Zuckerberg Initiative/CZ Biohub Meeting:

- To further strengthen relationship with Chan Zuckerberg Initiative and CZ Biohub leadership through personal interaction and dialogue with the CDC Director
- To learn more about the CDC Director's priorities and potential alignment with the work of CZ Biohub and CZI
- Drawing upon his extensive research career in infectious diseases, allow the CDC Director to learn more about CZI's innovative approaches in solving pressing challenges using advanced technologies and an integrated model of driving collaboration across institutions
- To explore shared interests in forging a transformative collaboration between CZI, CZ Biohub and CDC through the CDC Foundation

Henry J. Kaiser Family Foundation Meeting

Duration (30 minutes)

Context/Suggested Topics: While the Kaiser Family Foundation was established in 1948, it is in a sense a relatively young organization. Under the leadership of CEO Drew Altman, Kaiser was completely remade from the ground up beginning in 1991, with the mission, staff expertise, programs, legal status and operating style it is known for today. The Kaiser Family Foundation is not a traditional grantmaking organization and has never provided funding support to the CDC Foundation.

Dr. Altman has indicated he would like a better understanding the CDC Director's priorities, particularly as related to HIV and the opioid epidemic in the U.S. Drew Altman is a close friend of CDC Foundation board member, Matt James. During a recent visit to Atlanta, the CDC Foundation facilitated a briefing and a tour of CDC's Emergency Operations Center where Dr. Altman met with several senior leaders across the agency.

Kaiser Family Foundation Background: A leader in health policy analysis, health journalism and communication, the Kaiser Family Foundation is dedicated to filling the need for trusted information on national health issues. Kaiser is a non-profit organization focusing on the major health care issues facing the U.S., as well as the U.S. role in global health policy. Unlike grant-making foundations, Kaiser develops and runs its own research, journalism and communications programs, sometimes in partnership with other non-profit research organizations or major media companies. The Kaiser Family Foundation is not associated with Kaiser Permanente or Kaiser Industries. They operate primarily with resources they earn from managing their own endowment, supplemented by funds they receive from foundations and other partners.

Biography: Dr. Drew Altman, PhD

Drew Altman is President and Chief Executive Officer of the Henry J. Kaiser Family Foundation. He is an innovator in the world of foundations and a leading expert on national health policy who publishes and speaks widely on health issues. Dr. Altman founded the current-day Kaiser Family Foundation in the early 1990's, directing a complete overhaul of the Foundation's mission, staff, and operating style. He is also founding publisher of KFF's Kaiser Health News, the largest health newsroom in the

U.S., distributing coverage of health issues through major news outlets across the country.

Prior to joining the Foundation, Dr. Altman was Commissioner of the Department of Human Services for the state of New Jersey under Governor Tom Kean. As Commissioner, he developed nationally recognized initiatives in welfare reform, school-based youth services, programs for the homeless, and Medicaid managed care. Dr. Altman was Director of the Health and Human Services at the Pew Charitable Trusts; Vice President of the Robert Wood Johnson Foundation, where he led the development of the Foundation's programs in HIV/AIDS, health services for the homeless, and health care financing; and he served in the Health Care Financing Administration in the Carter administration.

Dr. Altman received his BA from Brandeis University and his Masters in political science from Brown University. He earned his PhD in political science from the Massachusetts Institute of Technology, did his post-doctoral work at the Harvard School of Public Health, and taught public policy at MIT before moving on to public service. He holds an honorary doctorate from the Morehouse School of Medicine. Dr. Altman is a member of the Council on Foreign Relations and the Institute of Medicine and serves on numerous advisory committees.

CZI/CZ Biohub Meeting

Duration (1 ½ hours over lunch)

Context for lunch discussion: This meeting provides an informal opportunity for lead scientists and advisors within CZI and CZ Biohub to engage personally with the CDC Director over an informal lunch meeting. They are interested in learning more about Dr. Redfield's domestic and global health priorities and how they might align with their work.

CZ Biohub's tagline is "we don't believe in impossible". They believe that collaboration, risk taking, failing fast, and staying close to the scientific community are their best opportunities to accelerate progress in science. In addition to bringing together three of the world's leading biomedical research institutions, UC Berkeley, Stanford and UCSF, they seek to build momentum and cultivate new ideas in the global fight against disease with colleagues at other institutions and in the Silicon Valley tech community.

Earlier this year, the P3 team coordinated a two-day briefing at CDC for CZI and CZ Biohub representatives to meet with senior leaders from CDC and CDC Foundation. While convening Connected Communities: Harnessing Technology for Resilience in March 2018, CDC Foundation facilitated a tour of CZ Biohub's lab for Dr. Anne Schuchat, Dr. Judy Monroe and others. **During discussions, interest was expressed in potential collaborations between CZI, CZ Biohub and CDC through the CDC Foundation. This conversation provides an ideal setting to kick start partnership ideas and tackle the impossible together.**

Chan Zuckerberg Initiative Background: Mark Zuckerberg, founder and CEO of Facebook, and Priscilla Chan, a pediatrician and founder and CEO of The Primary School in East Palo Alto, signed the Giving Pledge in 2015, announcing that they would give away 99% of their wealth. They set up the Chan Zuckerberg Initiative (CZI) as one vehicle to accomplish this. CZI is a limited liability company, rather than a foundation, established with an investment of up to \$1 billion in Facebook shares in each for the three years following its creation in December 2015.

CZI is a new kind of philanthropic organization dedicated to advancing human potential and promoting equal opportunity through world-class engineering, grantmaking, impact investing, policy, and advocacy work. They look for bold ideas — regardless of structure and stage — and help them scale by pairing world-class engineers with subject matter experts to build tools that accelerate the pace of social progress. Initial areas of focus include supporting science through basic biomedical research and education through personalized learning. CZI is also exploring ways to build stronger, more equitable communities through affordable housing and criminal justice reform.

In addition to CZ Biohub, other investments include:

- **Chan Zuckerberg Meta:** “In February 2017, they acquired Meta, a platform that uses artificial intelligence to help scientists read, analyze, prioritize, and draw insights across millions of scientific papers. Meta identifies the most relevant and impactful studies in a scientific area and finds patterns in the literature on a scale that no human being could find alone. We are leveraging our engineering power to enhance and scale this tool and make it available to researchers at no cost.”
- **Knowledge Environments**

They believe they can accelerate the sharing and awareness of scientific knowledge by funding strong existing programs and building tools to advance the field. Here are some of their efforts in these areas:

 - **Computable Knowledge:** In January 2018, they announced a collaboration with Andrew McCallum and the Center for Data Science at the UMass Amherst to accelerate science and medicine. The goal of this project, called Computable Knowledge, is to create an intelligent and navigable map of scientific knowledge using a branch of artificial intelligence known as knowledge representation and reasoning. The Computable Knowledge project will facilitate new ways for scientists to explore, navigate, and discover potential connections between millions of new and historical scientific research articles. Once complete, the service will be accessible for free through Meta.
 - **bioRxiv:** They are providing support to Cold Spring Harbor Laboratory (CSHL) for their online platform, bioRxiv. This free service enables life science researchers to share drafts of their papers — known as preprints — before they appear in journals. With their support, CSHL will be able to hire additional staff to help scale up bioRxiv, and allow the conversion of author-submitted content files to machine-readable formats.
- **Neurodegenerative Challenge Network**

Neurodegenerative disorders, like Alzheimer’s, Parkinson’s, ALS and Huntington’s Disease, are a leading cause of death and disability worldwide. They are approaching neurodegeneration with a view that the path forward means taking a different approach. Their goal is to develop a new kind of collaborative network — one that brings new ideas and new people into the field, supports them with well validated tools and resources, and asks them to look at this problem from a cross-disease perspective.

Biography: Ed McCleskey, Science Officer

Dr. McCleskey is a science officer at the Chan Zuckerberg Initiative and key advisor for scientific grantmaking. From 2006 until taking the position with Chan Zuckerberg, Dr. McCleskey was science officer at the Howard Hughes Medical Institute in Chevy Chase, Maryland. Previously he served as senior scientist and professor at Vollum Institute of Advanced Biomedical Research, Oregon Health and Science University. He was director of the Neuroscience Graduate Program at Oregon Health and Science University from 1996 – 2002 and served a co-director of the neurobiology course at the Marine Biological Laboratory in Woods Hole, Massachusetts.

In 1983, Dr. McCleskey received his Ph.D. in physiology from the University of Washington. He did his postdoctoral training at the Yale University School of Medicine from 1984-1987. He was a faculty member at Washington University School of Medicine in St. Louis from 1987-1993, before joining the Vollum Institute.

Biography: Rebecca Egger, Product Manager

Rebecca Egger is Product Manager for Chan Zuckerberg Initiative. Previously, she served Palantir Technologies as Product Lead and Command IQ as Lead Product Designer. She earned a Bachelor's degree from University of North Carolina at Chapel Hill in computer science.

Chan Zuckerberg Biohub Background: “In September 2016, Mark Zuckerberg and Priscilla Chan committed \$600 million over 10 years to fund the Chan Zuckerberg Biohub (CZ Biohub), an independent nonprofit research center that brings together physicians, scientists, and engineers from the University of California, Berkeley, the University of California, San Francisco, and Stanford University to encourage collaborations between these universities. Although they are close partners, CZ Biohub and CZI are separate legal organizations that operate independently. CZ Biohub also funds an Investigator Program that supports the work of faculty at UCSF, Stanford, and UC Berkeley; these Investigators are selected by and associated with CZ Biohub, not the Chan Zuckerberg Initiative.”

The Biohub has two launch projects: the Cell Atlas and the Infectious Disease Project.

Human Cell Atlas: “The Cell Atlas is really a fundamental discovery-driven project. It aims to be able to define every cell type in the body, in all cell states and all cell transitions, and in a wide context of environments, including development, neurobiology, cancer, infectious disease, cardiovascular disease – you name it. It will leverage some of the newest genome-wide screening tools such as single-cell sequencing and genome-wide CRISPR tools.

Infectious Disease Project: The Infectious Disease Project will have direct clinical implications, but also requires substantial amounts of basic science and fundamental discovery. It has four goals: first, to detect and identify an infectious agent; second, to respond to new emerging biothreats, such as Zika; third, to develop treatments using techniques like small-molecule drug discovery; and fourth, to develop

vaccines and other methods for prevention.” (Source: UCSF News Center)

Biography: Joe DeRisi, PhD, Co-President

Dr. Dr. Joseph DeRisi is infusing biomedical research with an inventor’s flair. He led the development of a new diagnostic tool called the Virochip that contains DNA from every known virus that can quickly scan blood or spinal fluid for evidence of infection. A self-described “biologist who is also a serious computer nerd,” his lab at the University of California, San Francisco, is combining an innovative software tool with new genome sequencing technology to develop a prototype diagnostic test that could reveal any

infectious disease with near certainty.

Dr. DeRisi employs an interdisciplinary approach to his work, combining genomics, bioinformatics, biochemistry and bioengineering to study parasitic and viral infectious diseases in a wide range of organisms. He was one of the early pioneers of DNA microarray technology and whole genome expression profiling and is nationally recognized for his efforts to make this technology accessible and freely available. Today, he uses this approach to study the activity of the full range of malaria genes and has generated provocative insights in many emerging viral diseases.

Dr. DeRisi is a professor of Biochemistry and Biophysics at the University of California, San Francisco. In 2004, he was chosen for a MacArthur Fellowship. In addition to being a Searle Scholar and a Packard Fellow, Dr. DeRisi has received the Heinz Award in Technology, the Economy and Employment and was named an Eli Lilly and Company Research Award Laureate. He was elected to the American Academy of Arts and Sciences in 2015, and the National Academy of Sciences in 2016. He was also an Investigator of the Howard Hughes Medical Institute from 2005-2016. He received a B.A. in Biochemistry and Molecular Biology from the University of California, Santa Cruz in 1992, and a Ph.D. in Biochemistry from Stanford University in 1999.

Biography: Cristina Tato, Ph.D., MPH, Associate Director, Rapid Response Team, Infectious Initiative

Tato received a Ph.D. in Immunology from the University of Pennsylvania, where she studied transcription factor families and their downstream signaling pathways. As a post-doctoral fellow (NIH and Schering-Plough Biopharma) she continued using in vivo models of infection and autoimmune inflammation to gain insight into how these transcription factors mediate host resistance to infection, regulate the production of

inflammatory cytokines, and affect the development of innate and adaptive immunity. At Stanford's Institute for Immunity, Transplantation and Infection, Tato focused on the tactical application of systems immunology methods for studying human health and disease and for evaluating vaccine efficacy. She joined the Infectious Disease Initiative’s Rapid Response Team at CZ Biohub to plan and implement activities to strengthen global emergency response efforts to epidemics.

Biography: Matt James, Senior Counselor, GMMB and CDC Foundation Board Member

Matt James is currently a senior counselor with GMMB, one of the country's leading social cause communications firms, and a special projects advisor with Freedman Consulting. He has long been a non-profit and philanthropic leader, and is recognized as an innovator in communications initiatives for social good, both in the Bay Area and nationally. James's award-winning contributions extend to strategic communications and campaigns in health, climate change and early childhood development. He most recently was a visiting scholar at the David and Lucile Packard Foundation, where he worked to increase funding on health and climate change. He was co-founder and president of Next Generation and spent many years at the Kaiser Family Foundation, where he was a principal architect of Kaiser Health News and oversaw the Foundation's media and public education work. He began his career in politics, serving as a key aide to Congressman Mo Udall as well as Senators Daniel Patrick Moynihan and Dale Bumpers. Passionate about public health, James currently serves on the board of the CDC Foundation, as well as advisory committees for the National Wildlife Federation and the Lucile Packard Foundation for Children's Health.

Laura Angel joined the CDC Foundation in 2011 with over a 30-year combination of non-profit and private sector expertise in institutional advancement, management, and business development. As vice president for advancement, she is responsible for leading the advancement team in developing, building and implementing public-private partner strategies with national and international partners and philanthropy advocates. She helps guide the planning, coordination and implementation of all key partnership development, resource mobilization and stewardship activities for the CDC Foundation. As a tactical officer for advancement work, she collaborates with CDC leaders, scientists and external stakeholders to help CDC protect America and the world from threats to health and safety.

Angel was instrumental in launching the development of the first U.S.-based longitudinal data collection system for sickle cell disease to allow unprecedented insight into the burden of its effects on Americans. Angel also successfully led private sector resource mobilization efforts for the national HHS Million Hearts® Initiative to prevent one million heart attacks and strokes by 2017. During the Zika outbreak in 2016, she managed private sector resource mobilization efforts that resulted in over 40 powerful public-private partnerships and commitments of approximately \$75 million in resources to help protect those at greatest risk. Angel continued to lead fundraising and partnership development efforts during the 2017 hurricane response helping to stand up an island-wide vaccination campaign and restore critical public health laboratory operations in Puerto Rico and U.S. Virgin Islands.

Prior to joining the CDC Foundation, Angel served as director of development with The Children's Museum of Atlanta leading capital and programmatic advancement initiatives. Her career also includes development work as a major gifts officer with The Atlanta Botanical Garden and director of Alexis de Tocqueville Society and Ivan Allen Society of the United Way of Metropolitan Atlanta.

HHS requires all employees having **Significant Security Responsibilities (SSR)** complete **Information Security Role-Based Training (RBT)** annually to retain network access (*in addition to the annual security awareness training, which is in the Spring*).

We are currently conducting our Role Based Training campaign for all pertinent staff. Dr. Redfield as the Director of CDC is required to complete the course titled '**CDC Information Security for Executives**', as shown below. The training will take 10-15 min to complete.

Can you coordinate ensuring Dr. Redfield completes this training by **Jan 16, 2019**?

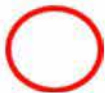

Upon finishing, he will receive an auto-generated notice of RBT course completion. Please let us know if you have questions, or he experiences any difficulty navigating through the course.

Thanks,
Cheri

Subject: FW: Dr. Redfield/Dr. Kadlec touch base Dec 19th
Importance: High

Hi Scott,

Please note the email below.

Dr. Kadlec will be visiting CDC on December 19th and would like to meet with Dr. Redfield between Noon and 2:30 p.m.

I've requested the topic for discussion from Dr. Kadlec's Assistant.

Please note the current schedule below.

11:00 a.m. – 12:00 p.m.	NCHHSTP D2R2
12:30-1:30 p.m.	Lunch & Mingle with Staff
2:00-2:45 p.m.	Maternal & Infant Mortality Brief
3:30-4:30 p.m.	HIV Atlanta – Call w/ Emory

If you agree with scheduling a 30 minute meeting, we could offer 12-12:30 p.m. and start the Lunch & Mingle at 12:45 p.m.

Please advise.

Thanks,

Teresa Williams

Teresa,

I am writing to virtually introduce myself. My name is Victoria Callahan and I work with Arwenthia Ford-Barnes in Dr. Robert Kadlec's office over at ASPR. I look forward to corresponding with you.

As I am sure you are aware, Dr. Kadlec will be visiting CDC Atlanta on December 19th to attend the SNS all hands. Dr. Kadlec would also like to sit down with Dr. Redfield if he is available at some point between 12 noon and 2:30p?

Please let me know!

Thank you,

Victoria Callahan

CDC Staffer Accompanying Dr. Redfield: TBD

CDC Program Contact (if applicable): TBD

CDC Media Contact (if applicable): TBD

2. **Event Information:**

Event Host: CGH

Purpose of Event: The Jeffrey P. Koplan Lecture on Global Leadership in Public Health was established in 2002 by CDC's Public Health Practice Program and the Office of Global Health. The lecture series honors Koplan's lifelong commitment to the development of public health leaders around the world. Koplan presented the first lecture, "Lessons in Leadership for Global Public Health," in October 2002 as part of the Joseph W. Mountin Lecture Series.

Agenda (if applicable): TBD

Number of Attendees and Composition: TBD

Key Participants (if applicable): Dr. Richard Besser

Bios: <https://www.rwjf.org/en/about-rwjf/leadership-staff/B/richard-e-besser.html>

Source Invitation: Yes on the 4/23/18 DL; Additionally, the Director is invited to a luncheon that will be held after the event. (R3 approval TBD)

3. Dr. Redfield's Speech Information or Talking Points (TPs):

Dr. Redfield's Remarks/Presentation/TPs: TBD

Proposed Role and Topic: Present opening remarks at the Jeffrey P. Koplan lecture introducing the speaker, Dr. Richard Besser, and provide some background on the Koplan Lecture.

Length of Presentation: TBD

Press: TBD, depending on Dr. Besser's topics media may be invited.

Teleprompter: TBD

Subject: FW: 2018 Jeffrey P. Koplan Lecture at CDC
Date: Monday, April 9, 2018 3:02:14 PM

Hi Jeremy,

I'm checking in with you to see if Dr. Redfield would be able to give opening remarks at the Jeffrey P. Koplan lecture on November 16. We had initially requested that Dr. Schuchat give remarks in her role as acting director, and she agreed. Now that Dr. Redfield has begun his role as director, we'd like him to introduce the speaker, Dr. Richard Besser, and provide a little background of the Koplan Lecture.

The event is Friday, November 16, 10:30-11:30 EST here at Roybal. In addition, Dr. Redfield is invited to a luncheon that will be held after the event.

Thank you for your consideration. We look forward to hearing from you.

Subject: 2018 Jeffrey P. Koplan Lecture at CDC

Dear Jeremy,

Dr. Richard Besser recently confirmed he will deliver the Jeffrey P. Koplan lecture November 16, 2018 at 10:30 am EST with a luncheon to follow. Please place this event on Dr. Schuchat's (or new CDC Director's) calendar. I will provide more information as we move forward with the planning and get closer to the date.

Thanks, and let me know if you have questions.

Hi Nikki,

I hope this message finds you well. I can update you that both the ICDC and our Consulate confirm **October 24-25** for the 2018 CDC-ICDC visit in Atlanta. We very much look forward to this exchange. Ambassador Shorer is also planning to host a private dinner at her home on Wednesday, October 25th in honor of the ICDC and CDC. As part of our overall planning, I look forward to working with you to select CDC officials who would be invited to this private dinner. I will also keep you updated on possible Emory meetings for the ICDC delegation outside of the CDC visit. On our introduction call with Dr. Martin, she mentioned the CDC Foundation. Should this be an additional outside meeting we should consider? If so, could please help assist us with making an email introduction?

Attached is additions/revisions to your initial program draft from our conference call last week. Dr. Shohat is copied on this email and so if you could please inform us if these addition/revision requests would work on your end. Thank you again for all of your help and continuing support. I look forward to speaking with you again soon.

Sincerely,

Harold Hershberg | Director of Political Affairs | Consulate General of Israel to the Southeast

Dear Group:

Thank you so much for the call this morning. We are sincerely appreciative for all of your help and support as we plan for the 2018 CDC-ICDC visit in October. Thank you for the draft agenda. As suggested, we will work to confirm with Nikki which dates exactly in the week of October 22nd the ICDC delegation will be in Atlanta. We also look forward to hearing your updates regarding the scheduling requests for the agenda. Until then, if I can be of any further assistance please let me know.

Thank you,

Hi Brad,

As discussed, please see the attached bios of the ICDC and Consulate guests to the CDC on Wednesday and Thursday. Please let me know if I can be of any further assistance at this point. Thank you so much, and look forward to meeting you Wednesday morning.

Best Regards,

Harold Hershberg | Director of Government & Political Affairs
Consulate General of Israel to the Southeast U.S.
1100 Spring Street, N.W. | Suite 440 | Atlanta, GA 30309

Ambassador Judith Varnai Shorer Consul General of Israel to the Southeast

Ambassador Judith Varnai Shorer is a nearly 40-year veteran of the Israeli diplomatic corps. She is a former ambassador to both Hungary and Bosnia-Herzegovina as well as a former minister of congressional affairs at the Israeli Embassy in Washington, DC. Prior to her posts in Europe, Ambassador Varnai Shorer served as first secretary and mission spokesperson for Israel's Mission to the UN in New York. From 2007 to 2010, Ambassador Varnai Shorer served as projects director, Euroasia Division for the Ministry of Foreign Affairs. Her most recent post was desk director at the Center for Policy Research.

Ambassador Varnai Shorer is a graduate of the Hebrew University in Jerusalem and the Hebrew University Graduate School of Communications. She was a Research Fellow at Johns Hopkins University, The SAIS Center for Strategic Studies, where she published a position paper titled "U.S.-Israel Relations vis-a-vis the Peace Talks." Most recently, Ambassador Varnai Shorer completed a program regarding Global Issues of Mass Destructions Weapons at the Near East South Asia Center for Strategic Studies (NESA), National Defense University in Washington, DC.

Ambassador Varnai Shorer has substantial experience in the U.S. and the Middle East. She speaks Hebrew, French, English and Hungarian and was born in Beer Sheva, Israel. Joining her in Atlanta is her husband, Oded and their daughter, Roni.

ICDC – Israel Center for Disease Control

Dr. Tamar Shohat
Director of the Israel CDC
Prof. Tel Aviv University

Dr. Tamy Shohat has been the Director of the Israel Center for Disease Control (ICDC) since January 2008. She served as the Head of the Epidemiology and Preventative Medicine Department at Tel Aviv University School of Public Health from 2011-2015. From 2004-2007, Prof. Shohat acted as the Tel Aviv District Health Officer in the Ministry of Health. Prior to that, she was Deputy of the Tel Aviv District Health Office and Deputy Director of the ICDC. Further, she was one of the founders of the ICDC in 1994. She held various positions in the Israel Defense Force (IDF), including the Head of the Epidemiology Unit (1989-1991) in the Army Health Branch. She completed a Fellowship in Medical Genetics (1986-1989) at Cedars-Sinai Medical Center (Los Angeles, California) where she later held a Visiting Scientist position (1991-1992). Prof. Shohat received her medical degree Cum Laude from Tel Aviv University, as well as a Masters of Public Health from the School of Public Health at Hebrew University. Prof. Shohat's work has included establishing data sets and registries for non-communicable diseases, trends in health behaviors, and survey methods for communicable diseases. Prof. Shohat was the Chair of the Health Behaviors Committee for Healthy Israel 2020 (HI2020) and is currently a member of Immunization Policy Committee

Dr. Lital Keinan-Boker
Deputy Director of the Israel CDC

Dr. Keinan-Boker has served as Deputy Director of the Israel Center for Disease Control (ICDC) since 2003. Within this capacity, she takes part in most of the activities directed in the ICDC, and especially in the periodical National Nutrition and Health surveys carried out by the Center and in the academic activity done in the Center. In addition, she is in charge of the National Cancer Registry in the Ministry of Health. Dr. Keinan-Boker joined the faculty in the School of Public Health at the University of Haifa. She is currently an associate professor of epidemiology and a member of the Doctorate Committee in the School. Previously (2008-2011), she also acted as the Head of the Epidemiology track in the School. Dr. Keinan-Boker is a member of the Israeli Public Health Physicians Committee and was (2007-2012) the Head of the Board Examinations for Public Health Officers. Dr. Keinan-Boker has also studied in Dublin, Ireland (sabbatical), was a PhD student in the Netherlands, and a general practitioner in medicine at Police Headquarters in Jerusalem, Israel.

Consulate General of Israel to the Southeast

Lucas Dear
Public Affairs Director
Consulate General of Israel to the Southeast

Lucas Dear currently serves as the Director of Public Affairs for the Consulate General of Israel to the Southeast U.S. where he is responsible for communicating the Consulates activity and message to the public, while maintaining relationships with communities, media outlets, and organizations in the region. In this position, Lucas has advised and implemented proactive and reactive digital outreach to advance public diplomacy initiatives, including transforming complex policy issues into compelling and accessible high profile campaigns. Other aspects of his job include leading Jewish & African-American outreach serving as a liaison between the communities. He holds a B.S. in Political Science from Georgia State University. Lucas's interests include being a mentor through the Big Brothers Big Sisters of Atlanta, and serves on the Young Adult Leadership Board.

Consulate General of Israel to the Southeast

Harold Hershberg
Government & Political Affairs Director
Consulate General of Israel to the Southeast

Harold Hershberg is Director of Government & Political Affairs to the Southeast United States for the Consulate General of Israel based in Atlanta. He oversees government political relations on behalf of the Israeli Consulate in Georgia, Tennessee, Kentucky, Missouri, North Carolina, South Carolina and West Virginia. Previously Harold served as the first Economic & Trade Affairs Director for the Consulate General of Israel responsible for developing and executing Israel's strategic vision for economic and commercial diplomacy in the Southeast region. Harold has worked overseas gaining valuable cross-cultural business experience at the international law firm of Heskia-Hacmun in Tel-Aviv, Israel. He is a Tikvah Zionist Thought and Statesmanship Jerusalem Fellow, a graduate of the Anti-Defamation League's Glass Leadership Institute, and a recipient of the American Zionist Movement's Helyn B. Reich Memorial Scholarship. Harold has an M.S. and B.S. from Kennesaw State University.

Thank you Ken,

We would like to keep it as a call for now. Dr. Redfield is returning from international travel that morning and more than likely will not come in the office on Thursday. If you could send the PowerPoint presentation beforehand that would be great. Please let me know if you have any objections.

Respectfully,
Tracie

Hi Tracie--4:30 PM with R3 is perfect.

Note:

1. I will be in Atlanta and can do the meeting in person
2. Rick Steketee, the PMI Deputy, will also join the meeting (cc'd above)
3. The purpose of the meeting is to discuss PMI in the context of the World Malaria Report
4. We will bring printed copies of a ppt document; we can send if it is ready sooner

Best,

Ken

Ken,

I will be more than happy to assist in scheduling a call with you and Dr. Redfield. I do have a few questions regarding the call:

- Will Thursday December 13th at 4:30pm ET be suitable for the call?
- Who else needs to attend the call?
- Who will lead the discussion?
- Please confirm the purpose of the call:
 - To discuss potential of Launch of the World Malaria Report along with other initiatives pursuing of USAID
- Is there any materials that need to be shared prior to the call?

Looking forward to hearing back from you.

Bob—I hope you are doing well.

I know you are scheduled for a VTC with Mark next week, and that PMI may be on the agenda.

Do you have a few minutes to chat over the weekend? I know there has been quite a bit of noise since the launch of the World Malaria

Report, and would like to discuss that along with some of what Rick and I are pursuing.

Best,

Ken

Rick and I have been chatting about how we see the current state of malaria control and elimination efforts.

The next time we are down in ATL we would like to sit down to talk to you about what we see.

I write this now because today's framing has a number of political dimensions that are a bit at odds with what we see.

Hi Scott,

Should we schedule Dr. Redfield to attend the training in DC on June 26th, maybe at 10 a.m.-12 p.m.?

Thanks,

Teresa

Yes. R3 should for certain and will need to travel since it is a mandatory classroom session. KM and AC may not need to attend if they were political appointees before joining CDC.

Importance: High

Dia,

Can you please tell us if Dr. Redfield, Kyle McGowan, and Amanda Campbell need to take this? Also, looks like this is "in person" only.

Thanks for your help.

Subject: New Employee EEO Orientation for Presidential Appointees, and Politically Appointed non-Career members of the SES, Commission Corps and Regional Directors/ GS-15 Employees Appointed Under Schedule C Hiring Authority

Course Title: New Employee EEO Orientation for Presidential Appointees, and Politically Appointed non-Career members of the SES,
Commission Corps and Regional Directors / GS-15 Employees Appointed Under "Schedule C" Hiring Authority

The mandatory new employee EEO orientation for Presidential Appointees, and Politically Appointed non-Career members of the SES,
Commission Corps and Regional Directors / GS-15 Employees Appointed Under "Schedule C" Hiring Authority is now available. This course will provide a practical understanding of employee's rights, responsibilities, and protections under the major Federal anti-discrimination laws that prohibit discrimination in the workplace based on race, ethnicity, color, religion, sex, national origin, age (40 years of age or over), disability (physical or mental), family medical history or genetic information, or in retaliation for EEO activity. It will also provide attendees an understanding of the Equal Employment Opportunity (EEO) law's impact on employment decisions. This course is mandatory and requires classroom attendance.

Subject: Scheduling Request - Media Interview in December

Hi all,

Dr. Redfield agreed during yesterday's comms meeting to do a phone-based flu interview with HealthDay sometime in December. I know his schedule is jam-packed, but is there a 15-20 minute block that we can hold the week of Dec. 16-21 for this interview? Ideally, we'd also find time earlier that day or week to have a quick prep meeting with him as well.

Please let me know if there are any options.

Thanks,
Kate

Kate Grusich

Hi Nancy,

We have a request from CBS News through HHS to interview and shadow Dr. Redfield, including filming him being briefed on a timely topic. Dr. Redfield has agreed to this proposal and has asked that the briefing topic be on **seasonal flu**; we'd suggest also touching on NCIRD's pandemic planning and preparation. We welcome you to personally lead the briefing, but if you're not available we defer to NCIRD for whoever is best (Dan, etc.).

Timing is proposed to be **late August/early September**, not too long after he returns from his trip, which could tie in to back-to-school health messaging for parts of the nation. He will also do a sit-down with CBS in our broadcast studio on a number of priority topics.

OADC will work with Erin and her team on the communication support and planning of the day, and the Advance team in Chief of Staff office will work with NCIRD staff on organizing the actual briefing, including scheduling and format.

Please let us know if you have any questions, and we thank you in advance for your support!

CBS NEWS INTERVIEW REQUEST

Spokesperson: Dr. Redfield

Media outlet:

CBS News (national)

On-Air Talent:

John Dickerson, co-host of CBS This Morning

Producer:

Cara Forte

Interview deadline:

TBD, late August following DRC trip

Request:

CBS News has asked to send John Dickerson to Atlanta to meet with and follow Dr. Redfield around for a day. Their camera crew would film some “typical” meetings with the CDC director and have time in the CDC studio for sit-down questions. Segment planned to be taped, edited and air sometime in early to mid-September. CBS is hoping to cover back-to-school/flu season and/or hurricane season; OADC recommends Ebola report-out from DRC trip. HHS aware.

Topics of interest:

- **Ebola**
- **Flu season**
- **Opioid epidemic** (b)(6)
- Disaster response readiness (hurricanes, fires, etc.)
- Antimicrobial resistance
- Foodborne outbreaks

Recommendation:

(b)(5)

DRAFT/DELIBERATIVE ONLY – FOR INTERNAL USE – MAY CONTAIN ERRORS

Subject: RE: Media & flu briefing request

Just wanted to confirm that we're moving forward with Oct. 26 as the interview date. CBS has agreed, and Dr. Redfield okayed it during our comms call with him earlier today. Please continue to hold all three hours and let me know if you anticipate any issues.

Thanks for all your help!

Hi Kate,

I am holding the following dates/times on Dr. Redfield's calendar.

Fri., Oct. 12th 11:00 a.m. – 12:00 p.m.
 1:00-3:00 p.m.

Fri., Oct. 26th 10:00 a.m. – 12:00 p.m.
 1:00-2:00 p.m.

Please let me know if they will work for CBS.

Thanks,
Teresa

Subject: RE: Media & flu briefing request

Hi all,

Slight update. John Dickerson (the anchor who will be conducting the interview) won't be able to arrive in Atlanta until around noon on Oct. 26. So instead of 10 am to noon and 1 to 2 pm, can we schedule the interview in one longer block from 1 to 3 pm? The producers said they shouldn't need more than two hours and that afternoon is currently open on Dr. Redfield's calendar.

Thanks!
Kate

Jessica,

Good morning, and hope you are doing well. I am reaching out to work with you on scheduling a meeting for Oct. 2nd per the below request. Dr. Redfield has a small window of availability while in DC on Oct. 2nd for a 30 min meeting from 11:30-12:00. Will this time work?

Respectfully,

Tracie Strength

Great, thank you! I'll keep you posted as I learn more.

Unrelated, the German Minister of Health, Jens Spahn, is likely going to be in DC September 30 – October 2 before heading to Argentina for the G20 Health Ministerial. He's interested in meeting with Dr. Redfield – any chance you know if he will be in DC during that time period?

Thanks!

Jess

Hi Ashley –

I hope you're well! We received the below email from the EU Mission in DC about a possible bilat between Commissioner Andriukaitis and Dr. Redfield. I am coordinating Secretary and Dep Sec bilats for OGA. Can you direct me to the best person to help coordinate this and other requests for CDC bilats we may receive?

Thanks, and have a nice long weekend!

Hi Peter, Jessica,

I hope that you had a good month of August. I enjoyed fully my first DC summer. I had a request from Commissioner Andriukaitis' cabinet about whether Dr Redfield will travel to New York in view of a possible bilateral with the Commissioner.

Would it be possible for you to find out please?

Thanks.

Best regards,

Lorenzo

Subject: Sen. Portman meeting with Dr. Redfield

Hello-

Would it be possible to get a few options/holds for a meeting between Dr. Redfield and Sen. Rob Portman (R-OH) for a 30-min meeting during the week of Nov 26? Nov 26 and 30 may be hard to schedule since they are fly-in/out days so we'd prefer Nov 28 & 29 if a something is available. Please let me know if you have questions.

Thanks in advance!
Aimee

Subject: ASM for Decision List
Date: Thursday, August 23, 2018 4:10:24 PM

Hi Jeremy,

Another one for the decision list. NCEZID supports this meeting.

Date: October 22 – anytime Dr. Redfield is available

Meeting with the American Society for Microbiology (ASM)

Leadership from the American Society for Microbiology will be visiting CDC on October 22. ASM's executive director, Dr. Stefano Bertuzzi, is interested in meeting with the CDC Director. Dr. Khabbaz is available on that date, and we will be arranging several other meetings with NCEZID programs in addition to an Advanced Molecular Detection lab tour.

Attendees would include:

Dr. Stefano Bertuzzi, Executive Director/CEO

Mr. Allen Segal, Director, Public Policy

[ASM](#) is the largest single life science society, composed of over 30,000 scientists and health professionals. ASM's mission is to promote and advance the microbial sciences.

Spencer, Laura (CDC/OCOO/OD)

Subject: Meeting w/ the Association of Schools and Programs of Public Health (ASPPH)
Location: CDC Robal Campus, Building 21, 12th Floor, Room 12302

Start: Mon 12/17/2018 1:00 PM
End: Mon 12/17/2018 1:45 PM

Recurrence: (none)

Meeting Status: Meeting organizer

Organizer: Redfield, Robert R. (CDC/OD)
Required Attendees: Byers, Mark E. (CDC/OD/OCS); Brad Allen Bartee (CDC/OD/OCS) (yxa0@cdc.gov); Williams, Teresa (CDC/OD/OCS); Seth Kroop (CDC/OD/OCS) (wpw7@cdc.gov); Ashley Knotts (CDC/OD/OCS) (vqf0@cdc.gov); Green, Hugh (CDC/OD/OCS); Simone, Patricia (Pattie) (CDC/DDPHSS/CSELS/DSEPD); McGowan, Robert (Kyle) (CDC) (omc2@cdc.gov)
Optional Attendees: Gold, Rebecca (CDC/DDPHSS/CSELS/DSEPD); Young, Kathaleen (CDC/DDPHSS/CSELS/DSEPD) (CTR)

Subject: FW: Meeting with Redfield => December 17?

Kyle

Also still hoping to tie this meeting down if you have a better handle on Dr. Redfield's schedule. Do you think the date works? If so, sometime around noon is optimal to allow some of the deans to fly in that morning.

Participants in Proposed Meeting with Dr. Redfield – December 17, 2018

Subject: FW: Meeting with Redfield => December 17?

Kyle

One of our clients, the Association of Schools and Programs of Public Health (ASPPH), would like to bring a delegation of deans to meet with Dr. Redfield. We can get max attendance on Dec 17th and around noon would be optimal. I know Dr. Redfield knows Jim Curran well from Emory, and we'd like to bring along several other deans from the top schools. Please let me know if that is something that you can help check out and see if we can get a meeting on the books. I assume an hour would be great, and discuss public health research, education and workforce training, along with other issues.

Attached is a list of deans that can attend on Dec 17th.

Thanks!

m

Subject: NCAMS - Laura Magaña Valladares

Please do not respond, this is an automated email.

Access by a non-U.S. citizen Visitor to the Centers for Disease Control and Prevention (CDC) requires approval **from both** the Office of Safety, Security, and Asset Management/Public Health Intelligence Office (OSSAM/PHIO) **and** Human Resources Office(HRO). **This notice only serves as an approval from OSSAM/PHIO.**

OSSAM/PHIO has approved facility access for Laura Magaña Valladares *School of Public Health Deans and ASPPH Staff Meeting with CDC Director* from 12/17/2018 to 12/17/2018 to the following:

- Roybal Building 21, Atlanta-Roybal, 12/17/2018 to 12/17/2018

Assigned CDC Escort(s) must accompany Visitor at all times and only to approved facilities listed.

Visitor must provide original travel documents submitted into the Non-U.S. Citizen Access Management System (NCAMS) upon arrival to the CDC (no photo copies, electronic copies, or substitutions allowed).

CDC access is contingent upon HRO approval. HRO will notify Visitor prior to start date if an I-94 (proof of legal entry into the U.S.) is required.

Thank you,

Centers for Disease Control and Prevention
Office of Safety, Security and Asset Management
Public Health Intelligence Office

Hi Tony, I hope this finds you well.

We were wondering if we could move the meeting time with ASPGH to 1:00 – 1:45 pm on 17 December.

Originally we were scheduled to meet at 12pm but we have a potential scheduling conflict.

Let us know if that will work for you all.

Thanks

Subject: Meeting with Dr. Redfield @ CDC Roybal Campus

Hi Tony,

I am a member of Dr. Redfield's Advance Team and I just wanted to touch base to work out the logistics for the meeting with Dr. Redfield and the participants below. I reserved a conference room on CDC Roybal Campus, Building 21, 12th floor for 12:00 – 1:00 pm on December 17th. All participants will have to be met and escorted from our visitors center (Bldg 45). We can discuss details in the coming weeks, but for now it is necessary for us to know if all participants are US Citizens.

Thanks and let me know if you have any questions for us.

Brad

2. Event Information:

Event Host: NCEH

Purpose of Event: Conduct an initial meet and greet with NEHA Leadership to understand how they can best support Dr. Redfield's priorities, especially as they relate to global health security and issues such as reducing vectorborne disease. NEHA works with a number of CIOs across CDC and is undertaking a large portion of the Supplemental Hurricane work in USVI and PR, which NEHA can discuss if interested.

NEHA currently serves 5,000 members to advance the environmental health and protection professional for the purpose of providing a healthful environment for all. Professionals who earn a Registered Environmental Health Specialist/Registered Sanitarian credential from NEHA are recognized as having achieved an established standard of excellence. These environmental health professionals master a body of knowledge (which is verified by

examination), and acquire sufficient experience to satisfactorily perform work responsibilities in the environmental health field.

In addition to maintaining high standards of practice and testing for its credentialing programs, NEHA provides training and resources for continuing education through online courses and an online bookstore; holds an annual conference; fosters networking and career growth; and publishes the widely-respected peer-reviewed Journal of Environmental Health. NEHA is governed by a 14-member board of directors and benefits from various committees and technical advisors who serve as subject matter experts. NEHA employs approximately 30 paid professionals dedicated to providing quality programs to the NEHA Membership.

Agenda (if applicable): TBD

Number of Attendees and Composition: TBD

Key Participants (if applicable): Dr. David Dyjack (NEHA Exec. Dir.) and possibly 2 additional attendees, Dr. Sandra Whitehead (Dir., Program & Partnership Development) and Joanne Zurcher (Dir. of Government Affairs).

Subject: Meeting with Dr. Lynfield - Chair, OID, Board of Scientific Counselors

- 1) 2:30-3:00pm: Meeting with Dr. Ruth Lynfield. Dr. Lynfield is the chair of CDC's Board of Scientific Counselors. Dr. Lynfield, State Epidemiologist and Medical Director at the Minnesota Department of Health, is a highly regarded, nationally recognized public health leader and expert in infectious disease medicine and epidemiology. She leads Minnesota's component of CDC's Emerging Infections Program Active Bacterial Core Surveillance System, influenza projects, and healthcare-associated infections projects. She is also Adjunct Professor of medicine at the University of Minnesota. Dr. Lynfield has served on many public health and infectious disease committees, including as a current member of the National Vaccine Advisory Committee, member of the Vaccines and Related Biological Products Advisory Committee of FDA, and co-chair of CDC's Emerging Infections Program Steering Committee. In addition, she is a fellow of the Infectious Diseases Society of America (IDSA); is a member of the Pediatric Infectious Diseases Society; and has served as chair of IDSA's National and Global Public Health Committee, and Antibiotic Resistance Working Group. Dr. Lynfield has served in multiple advisory capacities to the CDC Advanced Molecular Detection (AMD) program, including serving on the AMD Program review in 2016 and on the Infectious Disease Laboratory Working Group (IDLWG) which often advises on topics relevant to AMD. Dr. Lynfield also recently received the APHL Champion of the Public Health Laboratory Award. *Note on this meeting: Angela Oliver, policy lead for AMD, will be at the meeting and can find a location at the conference but likely won't be able to locate it until the conference starts. Angela will need the phone number of the SA traveling with R3 so she can communicate the location.

Subject: RE: Tuesday meeting times

Laura,

We have a conflict now for the 12:00 hold time for Dr. Kadlec. Dr. Redfield needs to attend a mandatory training at HHS from 12:30-1:00. I can hold 1:30-2:00 for a phone call if that will work. Please let me know how you would like to proceed.

Respectfully,
Tracie

Hi Tracie,

ASPR is trying to move a meeting around to make it work. They haven't confirmed yet. I'll check again.

Laura

Subject: Meeting with SHO, State, & Local Health providers & tour of State Public Health Lab

Spencer, Laura (CDC/OCOO/OD)

Subject: Meeting: Dr. Jeffrey Engel, Executive Director, CSTE
Location: Bldg. 21, DCR

Start: Thu 12/20/2018 11:00 AM
End: Thu 12/20/2018 11:30 AM

Recurrence: (none)

Meeting Status: Meeting organizer

Organizer: Redfield, Robert R. (CDC/OD)
Required Attendees: Berger, Sherri (CDC/OCOO/OD); Schuchat, Anne MD (CDC/OD); McGowan, Robert (Kyle) (CDC/OD/OCS); Richards, Chesley MD (CDC/DDPHSS/OD); Kroop, Seth (CDC/OD/OCS); Knotts, Ashley (CDC/OD/OCS)

Leading the discussion: Dr. Redfield will open by asking for introductions around the room. Dr. Redfield will spend no more than 10 minutes discussing his 5 core competency CDC priorities. Dr. Redfield will then turn the floor over to CSTE to listen to their priorities.

Purpose of call/discussion: Dr. Jeff Engel, Executive Director of the Council of State and Territorial Epidemiologists (CSTE) requested a meeting with you and CDC leadership to:

1. Meet and Greet
2. Discuss CDC Data Strategy and how CSTE's work supports the strategy
3. Discuss FY2020 activities related to the Strategy

Decision from call/discussion: Determine how CSTE can support CDC's Data Strategy

Special Assistant: Seth Kroop for prep; Ashley Knotts attending

Others Accompanying Dr. Redfield: CSTE requested the presence of other CDC leadership, so they could lend their expertise in the following areas to the discussion:

- Kyle McGowan: Government relations
- Sherri Berger: Budget and Operations
- Dr. Anne Schuchat: Epidemiologic policy and practice

CDC Staffer Accompanying Dr. Redfield: TBD

CDC Program Contact (if applicable): TBD

CDC Media Contact (if applicable): TBD

2. Event Information:

Event Host: The Milken Institute

Purpose of Event: The Future of Health Summit includes a mix of interactive panel discussions, networking opportunities, private sessions, and inspiring talks from top health innovators. The Future of Health Summit focuses on prioritizing health at all stages of life, creating a culture of health from prevention to cures. It spotlights the health initiatives of four of the Institute's seven centers, including FasterCures, the Lynda and Stewart Resnick Center for Public Health, the Center for the Future of Aging, and the Center for Strategic Philanthropy.

The Milken Institute Lynda and Stewart Resnick Center for Public Health believes improving health is the most effective strategy to empower people and spread prosperity worldwide. It focuses on prevention and wellness strategies and deliver sustainable solutions leading to

better health for individuals and communities. This is done by helping organizations, governments, and corporations deploy resources more efficiently and effectively to raise awareness of the need for effective health programs and policies, and by acting as a catalyst for increased private-sector and philanthropic support.

Agenda (if applicable):

- 8:00AM: Speakers in Speaker Ready Room
*Speakers mic'd in **SPEAKER READY ROOM***
Speakers take photo in front of step and repeat
- 8:20AM: Speakers are escorted to panel room from backstage
Speakers arrive to panel room and seated at holding table near stage
Play VOG: please take your seats
- 8:28AM: Start filming
Play VOG: introduce Rich Ditizio
- 8:30AM: Rich goes on stage and gives brief welcome remarks at lectern
- 8:35AM: Closes by introducing Dr. Robert Redfield and Rick Berke. *Play walk on music.*
Part 1 speakers come on stage. *Once seated, start countdown clock to end by 8:55AM (~20 mins)*
5 minute warning
1 minute remaining: give moderator wrap up note on DSM
- 8:55AM: Session ends. Screens hold on FHS logo look. Part 1 speakers exit stage
Stage crew to quickly add 3 chairs and refresh water
Play VOG: introduce Part 2 moderator and panel. Play walk on music
Next panel is seated on stage in order shown. *Once seated, start countdown clock to end by 9:45AM*
5 minute warning
1 minute remaining: give moderator wrap up note on DSM
- 9:43AM: Session ends. Screens hold on FHS logo slide. Speakers exit stage and are un-mic'd
Stop filming. Use logo slide as placeholder

Number of Attendees and Composition: 450 select leaders of global health organizations, deans of public health schools, government officials, philanthropists, corporate executives, physicians, and scientists to discuss the challenges that lie ahead and share ideas for meeting them.

Key Participants (if applicable): TBD

Bios: TBD

Source Invitation: Yes on the 7/2/18 DL; Yes to best date, but not both.

3. **Dr. Redfield's Speech Information or Talking Points (TPs):**

Dr. Redfield's Remarks/Presentation/TPs: TBD

Proposed Role and Topic: Present remarks that address the following: How can we advance scientific knowledge and speed the development of cures? What's the best way to elevate awareness of the importance of public health? How do we prepare for an aging population and promote healthy longevity? Is a sustained culture of health possible? How do we leverage philanthropic capital to test ideas and fuel health innovation?

Length of Presentation: 20-30 minutes 1:1 conversations with senior officials.

Press: Yes. Media invited. Dianna from Milken to send me Director of Media Relations contact information.

Teleprompter: TBD

June 2018

Dr. Robert R. Redfield, M.D.
Director
Centers for Disease Control and Prevention
Atlanta, GA 30333

Dear Dr. Redfield:

On behalf of the Milken Institute, I would like to cordially invite you to speak at the **2018 Future of Health Summit, October 23-24, at The Ritz-Carlton West End in Washington, D.C.**

The Milken Institute Future of Health Summit will convene thought leaders and decision makers to confront some of the world's most significant health challenges.

How can we advance scientific knowledge and speed the development of cures? What's the best way to elevate awareness of the importance of public health? How do we prepare for an aging population and promote healthy longevity? Is a sustained culture of health possible? How do we leverage philanthropic capital to test ideas and fuel health innovation?

Finding answers to these questions requires leadership and collaboration—across the government, private, academic, and nonprofit sectors. During this invitation-only event, a diverse group of luminaries will forge relationships and spark initiatives that can catalyze health solutions around the globe.

The Future of Health Summit includes a mix of interactive panel discussions, networking opportunities, private sessions, and inspiring talks from top health innovators. The Future of Health Summit focuses on prioritizing health at all stages of life, creating a culture of health from prevention to cures. It spotlights the health initiatives of four of the Institute's seven centers, including *FasterCures*, the Lynda and Stewart Resnick Center for Public Health, the Center for the Future of Aging, and the Center for Strategic Philanthropy.

We would greatly value your insight and contributions to these important discussions. It promises to be an extraordinary event. Please let me know if you can join us.

Sincerely,

Michael L. Klowden
Chief Executive Officer
Milken Institute

MILKEN INSTITUTE

FUTURE OF HEALTH SUMMIT

OCTOBER 23-24, 2018

The Ritz-Carlton West End, Washington, D.C.

The Milken Institute Future of Health Summit convenes thought leaders and decision makers to confront some of the world's most significant health challenges.

How can we advance scientific knowledge and speed the development of cures? What's the best way to elevate awareness of the importance of public health? How do we prepare for an aging population and promote healthy longevity? Is a sustained culture of health possible? How do we leverage philanthropic capital to test ideas and fuel health innovation?

Finding answers to these questions requires leadership and collaboration—across the government, private, academic, and nonprofit sectors. During this invitation-only event, a diverse group of luminaries will forge relationships and spark initiatives that can catalyze health solutions around the globe.

The Future of Health Summit includes a mix of interactive panel discussions, networking opportunities, private sessions, and inspiring talks from top health innovators. The Future of Health Summit focuses on prioritizing health at all stages of life, creating a culture of health from prevention to cures. It spotlights the health initiatives of four of the Institute's seven centers, including *FasterCures*, the Lynda and Stewart Resnick Center for Public Health, the Center for the Future of Aging, and the Center for Strategic Philanthropy.

MORE THAN

500 Participants

Thought Leaders and Decision Makers

Business executives. Government officials. Philanthropists. Patient advocates. Digital pioneers. Entrepreneurs. Journalists. Nobel laureates. Venture capitalists. Providers. Payers. Academics.

Partnering to Solve Complex Health Challenges

Dozens of speakers discuss current trends in: biomedical innovation, public health, aging and longevity, philanthropy, finance, patient engagement, food and nutrition, data science, and technology.

Global Reach

The reach extends beyond the stage through livestreamed sessions and coverage across leading social media networks and top news and media outlets.

Photos/Biographies

Senator Roy Blunt was elected to the United States Senate in 2010. Senator Blunt serves on the Appropriations Committee; the Commerce, Science and Transportation Committee; the Select Committee on Intelligence; and the Senate Rules Committee. He is the Chairman of the Rules Committee and Chairman of the Appropriations Subcommittee on Labor, Health and Human Services, and Education. He is also the Chairman of the Commerce Subcommittee on Aviation.

Before serving in Congress, he was a history teacher, a county official, and in 1984 became the first Republican elected as Missouri’s Secretary of State in more than 50 years. Senator Blunt also served four years as the president of Southwest Baptist University in Bolivar, Missouri.

Governor Michael Parson was elected in 2018, and previously served as Lt. Gov. He served in the Missouri Senate from 2011-2017 and in the Missouri House of Representatives from 2005-2011. He was the Sheriff of Polk County from 1993-2005 and served six years in the U.S. Army.

While in the MO Senate, Governor Parson chaired the Small Business, Insurance & Industry Committee. While in the MO House, he was chair of the House Rules Committee. He sponsored and co-sponsored several landmark pieces of legislation including Missouri’s Castle Doctrine, which strengthened 2nd Amendment rights, and the Missouri Farming Rights Amendment.

While Lt. Gov., he launched the “Buy Missouri” initiative, spearheaded an investigation at the St. Louis Veterans Home, and has been a strong advocate for agriculture, veterans, seniors, and tourism.

Dr Redfield

I hope you will consider coming to see how we collect measurement data in our Mobile Exam Centers for our NHANES surveys ... it really is something to see and I think such a visit will be helpful to you when discussions begin and decisions made on how to structure NHANES for the future! We will be in the following GA locations next year. It is a long way off but thought that would give us the best chance to get on your calendar.

Hi Christine,

My apologies for the delay.

Would Dr. Salama be available on 28 November from 8:30-9:00 a.m. ET?

Also, we need to reschedule the call on 11 December, Dr. Redfield will be traveling internationally.

Could we reschedule the call on 11 December for 18 December from 9-9:30 ET?

Thanks you for your consideration.

Best,
Teresa

Hi Llelwyn,

Dr. Redfield will be in DC on July 18th and we will need to move the Coffee with the Director to another day.

Would July 17th from 9-10 a.m. work?

Thanks,
Teresa

Hi Llewyn,

I've placed a hold on Thursday, December 6th from 9-10 a.m.

Let me know if this date would work.

Thanks,
Teresa

Thanks for the update. We will plan accordingly. For the dates identified in December, it may be challenging to invite participants so close to the holiday break. The dates identified are the Thursday and Friday just before the Christmas holiday. Folks start to take off a few days before Christmas. If possible, I would like to recommend that the Director's Coffee be moved to the first or second week in December.

Llewyn

Hi Llewlyn,

Unfortunately Dr. Redfield is no longer available on August 23rd.

We would like to replace this date with August 24th.

Please advise.

Thanks,
Teresa

Yes, we probably need to coordinate with the requests for the org charts with DCS – would like to know if any of the CIOs already have these face-name/org charts prepared – they can get a gold star and an early slot!

Subject: RE: Monthly "Coffee" with the Director beginning in July

Made a few edits, but same recommendations apply. Sorry for errors.

Llelwyn

We will start planning accordingly. I think the easiest approach is to build a planning calendar that will involve each of the CIOs, i.e., July - NCIPC, August - NCEZID, etc. I also suggest doing virtual meetings with CIO locations outside of Atlanta and/or to incorporate coffees when the Director is traveling to CDC locations outside Atlanta. Finally, I think this would be a good time to incorporate and invite employee organizations, e.g., Association for Professional Women at CDC/ATSDR, GLOBE, Disability Interest Group, BIG, Young Professional Network, etc., to interact with the Director. In addition, to using this opportunity for the Director to recognize key staff for outstanding achievements or contributions such as Honors Awards winner, Charles C. Sheppard

Award winners, responders involved in major CDC outbreak responses, etc.

Let me know if this works.

Subject: Monthly "Coffee" with the Director beginning in July

Hi Llewelyn. R3 asked us yesterday to move forward with beginning a new meeting series to interact with staff along the lines of what we've done before as the Breakfast with the Director, but on a smaller, more sustainable scale. After discussing it with Kyle, the new one-hour "Coffee with the Director" could begin in July, and in most cases, would be a monthly recurring event, if possible.

We'd like to leverage the proven systems that your branch previously used to solicit, select, and prepare staff to attend these events, and then for you to leverage for internal communications as before. We'll continue to handle the other logistics and to be sustainable, ideally we can keep the numbers of staff at 7 or 8, so that we can fit all participants at the round table in 12101.

Any thoughts or concerns before I have Jeremy and Teresa begin looking at dates and working with you to get the rest of this year identified as holds on the calendar?

Many thanks!

Scott

Importance: High

Good morning Llewelyn and William,

I am following up on the email below.

Please let me know if I can confirm these dates on the Director's calendar with the exception of the December date. We originally had the coffee set for December 6th. Is Dec. 7th the new available date for the Director's Coffee? If so, we will revise our calendar. Changing date is not a problem, we just want to make certain that we are accurate on our end.

Thanks so much.

Teresa

Subject: RE: HOLD: Monthly Coffee with the Director

Hi Llewelyn,

I've move the December coffee to December 6th from 9:30-10:30 a.m.

I will add William as the POC.

Thanks,
Teresa

Subject: RE: HOLD: Monthly Coffee with the Director

Actually the point of contact is William Jones moving forward with the Director's Coffee. Also, we requested an earlier date for the December coffee out of concern that many staff will start their holiday leave around December 21st, particularly with that date falling on a Friday. I thought we were given Dec. 6 as an option date. Please confirm if that date is no longer available?

Thanks,

Llelwyn

Subject: RE: HOLD: Monthly Coffee with the Director
Importance: High

Good morning Llelwyn and William,

I am following up on the email below.

Please let me know if I can confirm these dates on the Director's calendar with the exception of the December date. We originally had the coffee set for December 6th. Is Dec. 7th the new available date for the Director's Coffee? If so, we will revise our calendar. Changing date is not a problem, we just want to make certain that we are accurate on our end.

Thanks so much.

Teresa

Subject: coffee with Redfield on Friday.

William,

I have the list of names and accompanying bios for you. My sincere apologies for the delay in getting these to you. Please see below:

Name	Title	Description
Laura Brown, Ph.D.	Lead Behavioral Scientist-- Safe Food Team; Water, Food, and Environmental Health Services Branch; Division of Environmental Health Science and Practice; National Center for Environmental Health	Laura has been with the Safe Food Team for 12 years. She currently leads the team in its work to improve the understanding and prevention of restaurant-related foodborne outbreaks. The team provides support to state and local environmental health programs responsible for investigating restaurant-related foodborne outbreaks. The team also collects and analyzes data from the environmental health component of foodborne outbreaks. These data provide valuable information about the causes of outbreaks (for ex., inadequate cooking of raw meat).
Carla Cuthbert, Ph.D. FACMG	Chemist and Geneticist - Chief of the Newborn Screening and Molecular Biology Branch (NSMBB) in the Division of Laboratory Sciences,	She has held this position since December 2009. Dr. Cuthbert gives leadership and oversight to NSMBB, a branch that comprises several laboratories which support newborn screening programs by providing quality assurance materials, public health service and technical

	<p>National Center for Environmental Health</p>	<p>expertise, test development and translational research activities.</p> <p>Under Dr Cuthbert’s Leadership NSMBB’s budget has almost doubled in the last two years. She is currently leading the Branch and the global newborn screening community to create 21st century solutions to address current challenges. Dr Cuthbert’s goal is “Better detection of newborn disorders by implementing advanced technologies and capabilities that improve screening test performance, test result interpretation, quality assurance programs, training and technology transfer and by assisting state programs to expand screening to new conditions of high priority”.</p> <p>She is also the Ex-officio CDC representative on the Secretary’s Advisory Committee on Heritable Disorders in Newborns and Children whose mission is to “reduce the morbidity and mortality in newborns and children who have, or are at risk for, heritable disorders”. Dr. Cuthbert is also Co-Chair of the Interagency Coordinating Committee on Newborn and Child Screening which provides input to the Secretary of the Department of Health and Human Services on national newborn screening discussions.</p>
<p>Chase Gorishek</p>	<p>Public Health Advisor, Associate Director of Emergency Management Office, National Center for Environmental Health/Agency for Toxic Substances and Disease Registry</p>	<p>After finishing his Peace Corps service in Guyana, South America, Chase came on to CDC as a Hurricane Supplemental direct hire in April of this year. Through his role as lead project coordinator, he has helped get over \$30M of supplemental funding out the door to support local jurisdictions’ environmental health projects and hurricane recovery efforts. He comes from prior management roles in the private sector, but has been quick to learn his</p>

		new role and is committed to ensuring the Hurricane Supplemental projects are successful for all stakeholders involved.
Maria Mirabelli, PhD, MPH	Epidemiologist – Asthma Epidemiology Team, Asthma and Community Health Branch, Division of Environmental Health Science and Practice, National Center for Environmental Health	<p>Maria has been at CDC for 8 years - the first 2 years (1998–2000) were as a pre-doctoral fellow with the National Center for Environmental Health. Maria returned to CDC in 2012 and has been with the Asthma and Community Health Branch for the past 6 years.</p> <p>Maria currently coordinates wildfire-related activities for the Asthma and Community Health Branch. This includes collaborating with EPA and others to develop guidance documents for public health officials and the public about what to do during, before, and after a wildfire to reduce the health impact of wildfire smoke exposure.</p> <p>Before coordinating wildfire activities, Maria focused on air pollution and respiratory health epidemiology, mentored EIS officers and other trainees, and completed an 8 month detail with the Division’s Office of the Associate Director of Science.</p>
Amy Lavery	Epidemic Intelligence Service Officer – Assigned to: ATSDR/DTHHS/Geospatial Research, Analysis, and Services Program & NCEH/DEHSP/EMRCB/Emergency Management Section	<p>Amy is a second-year EIS officer working with the Geospatial Research, Analysis, and Service Program within ATSDR and the Emergency Management Section within the National Center for Environmental Health. During her first year as an EIS officer, she assisted in the EOC and was deployed twice to assist with the 2017 Hurricane Response. Amy is currently developing unique methods for investigating cruise ship outbreaks using GIS technology. Her primary research examines the impact of environmental burden on chronic disease and health risk factors, and she has led an initiative in GRASP to advocate for the collection of more place data within national survey systems.</p>
Zheng (Jane) Li,	Lead Environmental	Zheng has been working at CDC/ATSDR for 17

PhD, MPH	Health Scientist, Team Lead for the Research Activities Team, Environmental Epidemiology Branch, Division of Toxicology and Human Health Sciences, ATSDR	<p>years. She accepted a position at NCEH/Division of Laboratory Sciences (DLS) fresh out of school, and has stayed at CDC/ATSDR since then. She was a research chemist at NCEH/DLS for 13 years, developing methods measuring toxic chemicals in humans and conducting lab measurements for NHANES and many research studies.</p> <p>Four years ago, she changed to the current position at ATSDR/DTHHS/EEB, leading a multi-disciplinary team conducting health studies to investigate human exposure to environmental chemicals and potential adverse outcomes, particularly among susceptible populations. Currently, her main projects include</p> <ul style="list-style-type: none"> • Biomonitoring Exposure to Legacy and Emerging Contaminants in Susceptible Great Lakes Populations (in collaboration with state health departments) • Assessment of Metal Exposure in the Strong Heart Study Cohort and Association with Morbidity and Mortality in American Indian Communities (in collaboration with Columbia University) • Bioaccessibility Testing of Tire Crumb Rubber Materials Used in Synthetic Turf Playfield (in collaboration with NIOSH and EPA) <p>Zheng has a BS in chemistry from Wuhan University in China, MS in chemistry from Mississippi State University, PhD in environmental engineering from Georgia Institute of Technology with a minor in environmental health from Emory University, and a MPH from the University of South Florida.</p>
Louise Williams	Public Health Analyst – National Center for Environmental Health and Agency for Toxic Substances and Disease	Ms. Williams serves as the Center’s Liaison to CDC’s Government Accountability Office/Office of Inspector General (GAO/OIG), the Center’s Liaison to the CDC Foundation, and the Coordinator for the Center’s Environmental

	Registry, Office of Policy, Partnerships, and Planning	Health Portfolio Management (EHPM) System. In addition to these responsibilities, Ms. Williams serves as back up to the Center's Freedom of Information Act (FOIA) Coordinator and the Center's Controlled Correspondence Coordinator.
Hubert Vesper	Director of CDC's Clinical Standardization Programs and Chief of the Lipid Reference and Protein Biomarker Laboratories	He is leading the CDC Clinical Harmonization Programs to improve the accuracy and reliability of tests used in patient care and public health nationally and internationally. These programs include tests for high priority chronic disease biomarkers such as cholesterol, blood lipids, estradiol, testosterone, thyroid and parathyroid hormones, and vitamin D. Dr. Vesper helps to create and maintain other programs aimed at improving the quality of clinical laboratory testing for disease biomarkers as consultant and advisor. He provides technical assistance to national and international organizations such as the National Glycohemoglobin Standardization Program (NGSP), the American College of Pathologists (CAP), the International Federation for Clinical Chemistry and Laboratory Medicine (IFCC), and the American Association of Clinical Chemists (AACC). Dr. Vesper is an advisor and consultant to organizations developing laboratory standards such as the Clinical and Laboratory Standards Institute (CLSI) and the International Standards Organization (ISO). As co-founder of the Partnership for the Accurate Testing of Hormones (PATH), Dr. Vesper is leading efforts to improve patient testing through education of the clinical, public health, and medical communities. Dr. Vesper directs research in the areas of cardiovascular diseases, diabetes, cancer and bone diseases. He is using advanced technologies to measure biomarkers in humans for developing normal ranges, for facilitating the development of clinical and public health decision levels, and for investigating the impact of smoking and environmental chemicals on chronic disease biomarkers such as formaldehyde, acrylamide

		and trans fatty acids. Dr. Vesper authored and co-authored over 80 scientific papers, clinical and laboratory guidelines, standards and position papers.

Subject: RE: Monthly "Coffee" with the Director beginning in July

Hi Llelwyn,

Dr. Redfield will be in DC on July 18th and we will need to move the Coffee with the Director to another day.

Would July 17th from 9-10 a.m. work?

Thanks,
Teresa

Thanks for the update. We will plan accordingly. For the dates identified in December, it may be challenging to invite participants so close to the holiday break. The dates identified are the Thursday and Friday just before the Christmas holiday. Folks start to take off a few days before Christmas. If possible, I would like to recommend that the Director's Coffee be moved to the first or second week in December.

Llewyn

Yes, we probably need to coordinate with the requests for the org charts with DCS – would like to know if any of the CIOs already have these face-name/org charts prepared – they can get a gold star and an early slot!

Subject: RE: Monthly "Coffee" with the Director beginning in July

Made a few edits, but same recommendations apply. Sorry for errors.

Llelwyn

We will start planning accordingly. I think the easiest approach is to build a planning calendar that will involve each of the CIOs, i.e., July - NCIPC, August - NCEZID, etc. I also suggest doing virtual meetings with CIO locations outside of Atlanta and/or to incorporate coffees when the Director is traveling to CDC locations outside Atlanta. Finally, I think this would be a good time to incorporate and invite employee organizations, e.g., Association for Professional Women at CDC/ATSDR, GLOBE, Disability Interest Group, BIG, Young Professional Network, etc., to interact with the Director. In addition, to using this opportunity for the Director to recognize key staff for outstanding achievements or contributions such as Honors Awards winner, Charles C. Sheppard

Award winners, responders involved in major CDC outbreak responses, etc.

Let me know if this works.

Subject: Monthly "Coffee" with the Director beginning in July

Hi Llewelyn. R3 asked us yesterday to move forward with beginning a new meeting series to interact with staff along the lines of what we've done before as the Breakfast with the Director, but on a smaller, more sustainable scale. After discussing it with Kyle, the new one-hour "Coffee with the Director" could begin in July, and in most cases, would be a monthly recurring event, if possible.

We'd like to leverage the proven systems that your branch previously used to solicit, select, and prepare staff to attend these events, and then for you to leverage for internal communications as before. We'll continue to handle the other logistics and to be sustainable, ideally we can keep the numbers of staff at 7 or 8, so that we can fit all participants at the round table in 12101.

Any thoughts or concerns before I have Jeremy and Teresa begin looking at dates and working with you to get the rest of this year identified as holds on the calendar?

Many thanks!

Scott

Subject: RE: HOLD: Monthly Coffee with the Director
Importance: High

Good morning Llewelyn and William,

I am following up on the email below.

Please let me know if I can confirm these dates on the Director's calendar with the exception of the December date. We originally had the coffee set for December 6th. Is Dec. 7th the new available date for the Director's Coffee? If so, we will revise our calendar. Changing date is not a problem, we just want to make certain that we are accurate on our end.

Thanks so much.

Teresa

Hi Llewlyn,

I've move the December coffee to December 6th from 9:30-10:30 a.m.

I will add William as the POC.

Thanks,
Teresa

Subject: RE: HOLD: Monthly Coffee with the Director

Actually the point of contact is William Jones moving forward with the Director's Coffee. Also, we requested an earlier date for the December coffee out of concern that many staff will start their holiday leave around December 21st, particularly with that date falling on a Friday. I thought we were given Dec. 6 as an option date. Please confirm if that date is no longer available?

Thanks,

Llelwyn

Attendees for Coffee with the CDC Director

Center for Global Health (CGH)

October 25, 2018

Name	Title	Description
Elisabeth Krow-Lucal, PhD, MPH	Epidemiologist – Measles Elimination Team, Accelerated Disease Control and VPD Surveillance Branch, Global Immunization Division, Center for Global Health	<p>Liz Krow-Lucal has been at CDC 3.5 years – first as an EIS officer with the Arboviral Diseases Branch (working on the Zika outbreak), then with the Global Immunization Division (GID) in the Targeted Diseases Team of the Accelerated Disease Control and Surveillance Branch, and now with the Measles Elimination Team in the Branch.</p> <p>She is currently the measles team liaison with the Pan American Health Organization (PAHO), providing technical assistance to the region as needed for control of measles. Liz is working with Nigeria on their GAVI application and providing support for data analysis, cleaning, and recommendations for measles. Previously, she worked on maternal and neonatal tetanus elimination and tetanus research.</p>
Ronald L. Moolenaar MD, MPH CAPT USPHS	Associate Director for Science Division of Global Health Protection, CGH, CDC	<p>Ron Moolenaar, MD, MPH serves as the Associate Director for Science for the Division of Global Health Protection, CGH. In this role, he is responsible for helping to lead the Division’s scientific vision and strategy, scientific clearance, project determinations as either research or non-research, mentoring and supporting scientists, and building scientific collaborations across the agency and with partners. He has been at CDC for 26 years and has been serving in this role since September. Prior to this he served as Country Director for the U.S. CDC Office in China for 4 years and as Editor in Chief of MMWR for 3 ½ years.</p>
Colleen Scott, DrPH, CHES, Lieutenant Commander USPHS	Strategic Information Team, Strategic Information & Workforce Development Branch, Global Immunization Division	<p>Dr. Scott serves as a global technical subject matter expert providing technical assistance for countries conducting immunization information and data quality assessments. She provides technical assistance in the development and implementation of data quality improvement plans for identified target countries. She also serves as a CDC technical</p>

		expert to WHO regional offices for immunization data quality.
Eric Rogier, PhD, MPH	Microbiologist, Malaria Branch, Division of Parasitic Diseases and Malaria	Dr. Rogier serves as a principal investigator in the development of new laboratory tools for the surveillance of malaria and other infectious diseases at a population level. He works with domestic and international public health partners in the deployment and application of these tools. Among many international settings, these tools are currently in use by the ongoing malaria elimination project in Haiti (Malaria Zero), of which Dr. Rogier serves as the CDC focal contact for all laboratory activities.
Andrea Kim, PhD, MPH	Lead, Clinical Surveillance and Epidemiology Team, Epidemiology and Surveillance Branch, Division of Global HIV and Tuberculosis, Center for Global Health	Andrea Kim is the Team Leader for the Clinical Surveillance and Epidemiology Team in the Division of Global HIV and Tuberculosis (DGHT) where she provides technical leadership and oversight on global HIV clinical surveillance activities supported by the US President's Plan for AIDS Relief (PEPFAR). She serves as the Surveillance Lead for a PEPFAR-funded initiative to establish a real-time public health surveillance and response system in 14 PEPFAR-supported countries using a novel rapid test for recent infection to rapidly detect, monitor, characterize, and intervene on recently acquired HIV infection. Andrea began her career at CDC as an Epidemic Intelligence Service Officer (2004-2006) and Surveillance Epidemiologist (2007-2011) in DGHT. From 2011-2015 she was co-located at the Kenya Ministry of Health as a Senior Surveillance Technical Advisor and served as Chief of the Surveillance and Epidemiology Branch at DGHT-Kenya. From 2015-2017 she returned to Atlanta where she provided management support to the International Laboratory Branch in DGHT-Atlanta, as Deputy Branch Chief for Program Oversight and Team Leader for the Laboratory Data Monitoring Team.
Diana Martin,	Research Microbiologist, Parasitic Diseases Branch Division of Parasitic Diseases and Malaria	The laboratory run by Diana Martin develops tools for the surveillance of neglected tropical diseases with global elimination targets, particularly trachoma and yaws. The lab also works with multiple internal and external partners to develop and transfer multiplex bead assay testing for integrated serologic surveillance of parasitic and

		waterborne diseases as well as to monitor vaccination coverage. Diana also serves as the Quality Manager for the Parasitic Diseases Branch laboratories and is the Director of the WHO Collaborating Center for Trachoma on her team.
Dennis Ellenberger	Dennis Ellenberger Associate Chief for Science International Laboratory Branch, Division of Global HIV and TB, Center for Global Health	Dennis Ellenberger is a research microbiologist and global public health professional with 25 years of experience at CDC implementing, leading and evaluating operational scientific research, public health and quality assurance programs. Dennis has two primary responsibilities of serving as ILB's Associate Chief for Science and co-lead for the HIV Viral Load Initiative. As ILB ASC, he leads the coordination, evaluation and technical reviews of all DGHT laboratory –related and ILB scientific research protocols, manuscript, reports, and abstracts. He provides in-country technical assistance for HIV viral load implementation and scale-up in five PEPFAR-supported countries including Angola, Eswatini, Mozambique, South Sudan and Tanzania. His persistent efforts in South Sudan resulted in the implementation of the very first HIV viral load tests. More than 12,000 dried blood spots have now been collected and tested. In FY18, >4000 tests were tested in country at the National Public Health Laboratory.

All,
Following a meeting between Dr. Redfield and David Ross (CEO of Task Force for Global Health), Dr. Redfield asked for a briefing on flu work being done by CDC in collaboration with TFGH. See below re possible times for this.

Haven't looked closely at my schedule but the 19th is difficult. And haven't queried others that might be helpful for this briefing, as I wanted to alert you all first.

Happy to proceed as you direct. Many thanks
Joe

Hi Joe,

There is a slight change.

Please note the updated dates/times available for a 30 minute meeting

12/19 3-4 p.m.

12/21 10:30-11 a.m.

Let me know if you have any questions.

Thanks,
Teresa

Hi Seth and Teresa,

I am actually with a CDC delegation over at AFRICOM (Stuttgart) now. I will discuss tomorrow when we meet with the AFRICOM Surgeon. Setting up a VTC is probably best for that meeting, unless Dr. Redfield wants to make a trip to Germany, which I could help arrange. Additionally along these lines, I think there is benefit in Dr. Redfield meeting with the Joint Staff Surgeon, Admiral (Dr.) Colin Chinn, whose office is in DC at the Pentagon.

I can help arrange a meeting with Mr. McCaffery as well, also in the Pentagon.

Please let me know the possible dates/times Dr. Redfield will be available in DC.

Hi Seth and Teresa,

I am actually with a CDC delegation over at AFRICOM (Stuttgart) now. I will discuss tomorrow when we meet with the AFRICOM Surgeon. Setting up a VTC is probably best for that meeting, unless Dr. Redfield wants to make a trip to Germany, which I could help arrange. Additionally along these lines, I think there is benefit in Dr. Redfield meeting with the Joint Staff Surgeon, Admiral (Dr.) Colin Chinn, whose office is in DC at the Pentagon.

I can help arrange a meeting with Mr. McCaffery as well, also in the Pentagon.

Please let me know the possible dates/times Dr. Redfield will be available in DC.

CDC Staffer Accompanying Dr. Redfield: TBD

CDC Program Contact (if applicable): TBD

CDC Media Contact (if applicable): TBD

2. Event Information:

Event Host: Rollins School of Public Health, Emory University School of Medicine

Purpose of Event: The Centers for AIDS Research (CFAR) program at NIH provides administrative and shared research support to synergistically enhance and coordinate high quality AIDS research projects. CFARs accomplish this through core facilities that provide expertise, resources, and services not otherwise readily obtained through more traditional

funding mechanisms. Main Areas of Focus: to support multidisciplinary research aimed at reducing the burden of HIV both in the US and around the globe.

Agenda (if applicable): TBD – The Symposium occurs from 11/8 – 11/9/18, Thu. – Fri.

Number of Attendees and Composition: TBD

Key Participants (if applicable): Dr. Tony Fauci (NIH)

Bios: TBD

Source Invitation: Yes on the 7/2/18 DL

3. Dr. Redfield's Speech Information or Talking Points (TPs):

Dr. Redfield's Remarks/Presentation/TPs: TBD

Proposed Role and Topic: Present opening plenary remarks, where Dr. Tony Fauci (NIH) will also speak, and that focus on the current status of the HIV epidemic from CDC's perspective, with Dr. Fauci speaking from the NIH perspective (he has already accepted the invitation).

Length of Presentation: TBD

Press: TBD

Teleprompter: TBD

4. Supporting/Logistics Materials:

We have secured a designated parking space for Dr. Redfield at the Emory's [Michael's Street Parking Deck](#). He will need to give the parking attendant his name in order for the gate arm to be lifted. The designated spot will be marked with his name, on a traffic cone. Jenny Anderson or Shelle Bryant can provide a parking voucher.

Subject: Invitation to speak at the National CFAR Symposium

Dear Robert:

Each year the NIH-funded CFARs get together for the Directors meeting. As part of the meeting we have a symposium. This year's meeting is hosted by Emory on November 8-9 with 8th (Thursday) being the day of the symposium. We would be honored if you can join us that day as an invited speaker in the first session scheduled from 8:00 AM – 9:10 AM. For that opening plenary the two speakers would be Tony Fauci and you. The idea is to have that session focus on the current status of the HIV epidemic with Tony speaking from the NIH perspective (he has already accepted the invitation) and you speaking from the CDC perspective.

Please let me know if you are able to join us at your earliest convenience.

Subject: RE: CFAR Symposium

Thank you Shelle,

We just have a few questions right now on his remarks. I've copied Ashley Lansdale who may have additional follow-up questions for you.

- How long will Dr. Redfield have to provide opening plenary remarks?
- Would slides be appropriate for this type of talk?
- Will there be any Q&A from the audience or a moderator?
- Will media be invited to attend?
- Who will be in the audience and how many?

Brad

Hello Dr. del Rio,

I am member of Dr. Redfield's advance team and I am beginning to coordinate his participation in the CFAR Symposium on November 8th. I was given your name as a Point of Contact. If there is someone else that I need to coordinate with please pass me off to that individual. I will follow up with a few questions about logistics, length and content of Dr. Redfield's talk.

Thank you,

Brad

Dear Brad:

Please see my answers below. At present, I do not have a title for Dr. Redfield's talk. Once that is available, please let me know, and will add it to the attached agenda.

- How long will Dr. Redfield have to provide opening plenary remarks? - Dr. Redfield's plenary is scheduled for 25 minutes followed by 5 minutes for Q&A, following a plenary from Dr. Tony Fauci (Director, NIAID). Dr. Redfield's plenary is scheduled from 8:40 – 9:05 AM. The session begins at 8:00 AM, and we hope he can join us for the entirety of the opening plenary. See below for the timeline of the session.

From Bench to Bedside to Our Own Backyard: Celebrating 20 Years of the CFAR at Emory

Opening Plenary Session						
Start	End	Duration	Event	Speaker	Topic/Title	Notes
8:00	9:10	45 minutes				Moderator: Colleen Kelley & Carlos del Rio
8:00	8:10	10 minutes	Welcome	Claire Sterk, Emory		Confirmed
8:10	8:35	25 minutes	Opening Plenary 1	Tony Fauci, NIH		Confirmed
8:35	8:40	5 minutes	Q&A			
8:40	9:05	25 minutes	Opening Plenary 2	Robert Redfield, CDC		Confirmed
9:05	9:10	5 minutes	Q&A			

- Would slides be appropriate for this type of talk? - Yes. Slides are appropriate and will likely be standard for all speakers.
- Will there be any Q&A from the audience or a moderator? - The Q&A will be moderated by Dr. Carlos del Rio and Dr. Colleen Kelley. They will also take questions from the audience.
- Will media be invited to attend? - We plan to invite the Emory Health Sciences Center Communication Office to cover the event. Other than that, we do not anticipate any additional press.
- Who will be in the audience and how many? - We are anticipating 250 participants. Additionally, we will simulcast the event. I have attached a speaker release form for your review.

Best,

Shelle

From Bench to Bedside to Our Own Backyard: Celebrating 20 Years of the CFAR at Emory University

2018 National CFAR Scientific Symposium

Thursday, November 8, 2018, 8:00 am – 5:00 pm

Rollins School of Public Health, Claudia Nance Rollins Building, Rollins Auditorium

AGENDA

7:00-8:00 am

Registration and Breakfast

8:00-8:10 am

Welcome

Claire Sterk, President, Emory University

Eric Hunter, Co-Director for Basic Science, CFAR at Emory University

8:10-9:10 am

Opening Plenary Session

Moderators: *Carlos del Rio*, MD, Co-Director Clinical Science, CFAR at Emory University
Colleen Kelley, MD, Associate Director, Clinical Research Core, CFAR at Emory University

Plenary One: TBD

Anthony S. Fauci, MD, Director, National Institute of Allergy and Infectious Diseases (NIAID)

Plenary Two: TBD

Robert Redfield, MD, Director, Centers for Disease Control and Prevention

9:10-9:20 am

BREAK

9:20-10:40 am

Session One: HIV in the South: Living and Providing Care in the Epicenter

Moderators: *Michael Mugavero*, MD, MHS, CFAR Co-Director Clinical Sciences
Rhonda Conerly Holliday, PhD, MA, Research Assoc Professor, Community Health & Prevention Medicine

Speakers:

HIV Epidemic in the South

Eugene McCray, MD, Director, Division of HIV/AIDS Prevention, CDC

Exploring Medical Systems as Part of the 'Social Context' when Patients Navigate the HIV Treatment Cascade

David Malebranche, MD, MPH, Associate Professor of Medicine, Morehouse School of Medicine

Improving the Care Continuum in Atlanta: Lessons from the Front

Wendy Armstrong, MD, Professor of Medicine, Emory University, Medical Director, Grady Infectious Disease Program

Moderated Discussion, Research Participant Panel

TBN

10:40-10:50 am

BREAK

10:50-12:20 pm

Session Two: The Final Frontiers in HIV Research — Developing an Effective Vaccine & Achieving a Cure

Moderators: *Cynthia Derdeyn*, PhD, Professor of Pathology, Emory University
Nancie M. Archin, PhD, Assistant Professor of Medicine, UNC Medical School

Speakers:

Antibody-based therapeutics: Hit Early, Hit Hard

Nancy L. Haigwood, PhD, Director and Professor Oregon National Primate Research Center, Oregon Health & Science University

Immune-based strategies targeting viral persistence in SIV-infected macaques

Mirko Paiardini, PhD, Associate Professor, Yerkes National Primate Research Center, Department of Pathology and Laboratory Medicine, Emory University School of Medicine

Oral Abstract 1: **Relationship between rebound and latent viruses in a clinical trial of anti-HIV-1 antibody 3BNC117**

Yehuda Cohen, MD, Instructor in Clinical Investigation, *Einstein-Rockefeller-CUNY CFAR*

Oral Abstract 2: **Anti-apoptotic protein BIRC5 maintains survival in HIV-1 infected CD4 T cells**

Hsiao-Hsuan Kuo, PhD, Research Fellow, Ragon Institute of MGH, MIT and Harvard Harvard Medical School, *CFAR at Harvard University*

Oral Abstract 3: **Sequence Entropy-Guided Excision of HIV using Enhanced CRISPR/Cas9 and Polycistronic Multiplexing**

Leonard R. Chavez, PhD, **TBD**, *UCSF-GIVI CFAR*

Moderated Q&A

12:10-1:40 pm

Poster Session featuring Early Stage Investigators, Centers for AIDS Research

1st Floor Bridge Area

Lunch Buffet

Plaza and 1st Floor Claudia Nance Rollins Building

1:40-2:50 pm

Session Three: Tackling Syndemics: Identifying Solutions to the Persistent Crisis of Substance Abuse and HIV

Moderators: *Savita Pahwa*, MD, Director, Miami CFAR, Professor, Microbiology and Immunology (Pediatrics and Medicine)
Debra Houry, MD, MPH, Director, National Center for Injury and Prevention, Centers for Disease Control and Prevention

Speakers:

Medications for Opioid Use Disorder to Improve the HIV Continuum of Care

*Sandra A. Springer, MD, Associate Professor of Medicine Department of Internal Medicine,
Section of Infectious Disease Yale School of Medicine*

HIV risk behaviors in persons who use illicit drugs: the complex role of neuropsychiatric conditions

Christina S. Meade, PhD, Associate Professor of Psychiatry & Behavioral Science, Duke University

Potential for HIV Outbreaks in Rural Kentucky

*Hannah Cooper, ScD, Professor and Vice Chair of Behavioral Science and Health Education,
Rollins School of Public Health, Co-Director, Prevention Science Core, CFAR at Emory University*

Moderated Q&A

2:50-3:00 pm

BREAK

3:00-4:20 pm

Session Four: No Population Left Behind: Getting to 90:90:90 for All

Moderators: *Brian Mustanski, PhD, Director, Institute for Sexual and Gender Minority Health
and Wellbeing, Co-Director, Third Coast CFAR*

*Allison Agwu, MD, MSc, Associate Professor of Adult and Pediatric Infectious
Diseases, Co-Director, Johns Hopkins University CFAR*

Speakers:

Biomedical Prevention of HIV-1 Infection in Women: As Simple as Daily Oral PrEP?

*Jeanne MARRAZZO, MD, MPH, C. Glenn Cobbs Endowed Professor in Infectious Diseases
Director, Division of Infectious Diseases University of Alabama at Birmingham*

TBN

*Chris Beyer, MD, MPH, Co-Director, Johns Hopkins University CFAR, Desmond M. Tutu Professor
of Public Health and Human Rights*

Oral Abstract 1: Ecological Factors and Sexual Health Outcomes in US Black MSM

*Natalie Leblanc, PhD, MPH, BSN, RN, Assistant Professor of HIV Prevention Science, Dean's
Endowed Fellow in Health Disparities, University of Rochester CFAR*

Oral Abstract 2: Low rates of Postpartum Retention in Care and Viral Suppression among HIV-Infected Women in Mississippi

*Aadia Rana, MD, Associate Professor of Medicine, University of Alabama at Birmingham, UAB
CFAR*

Oral Abstract 3: HIV cascade of care outcomes cluster spatially among female sex workers in Iringa, Tanzania

Rebecca Fielding-Miller, TBN, UCSD CFAR

Moderated Q&A

4:20-4:50 pm

Closing Plenary Session

Moderator: *James W. Curran, MD, Co-Director Prevention Science, CFAR at Emory University*

Closing Plenary: TBD

Deborah L. Birx, MD

Ambassador-at-Large, The United States President's Emergency Plan for AIDS Relief

4:50-5:00 pm

Closing Remarks

Carlos del Rio, MD, CFAR Co-Director Clinical Science, CFAR at Emory University

EMORY UNIVERSITY

Subject: 2018 CFAR National Scientific Symposium | November 8, 2018 | LOGISTICS
Attachments: CFAR Scientific Symposium_TimeSchedule_103118.xlsx, Symposium_FINAL Agenda.pdf

Dear Brad and Ashley:

We are delighted that Dr. Redfield has agreed to give an opening plenary at the 2018 National CFAR Scientific Symposium on Thursday, November 8. We have capacity enrollment (over 250) for the event, and expect many others to join us via the life stream link.

Outlined below is logistical information to describe the flow of the symposium itself. Attached are: 1) the final, published symposium agenda; and 2) the final timetable for the day. The Symposium will be held at the Emory Rollins School of Public Health in the Claudia Nance Rollins Building in the Rollins Auditorium (Plaza level).

Symposium Logistics

Drs. Carlos del Rio and Colleen Kelley are moderating the opening plenary session. One of them will introduce Dr. Redfield and moderate the Q&A following your presentation. Dr. Redfield has 25 minutes for his talk. Following both plenary talks, there will be 10 minutes of Q&A from the audience. Please see below for the layout of the session.

From Bench to Bedside to Our Own Backyard: Celebrating 20 Years of the CFAR at Emory

Opening Plenary Session						
Start	End	Duration	Event	Speaker	Topic/Title	Notes
8:00	9:05	45 minutes				Moderators: Colleen Kelley & Carlos del Rio

8:35	9:00	25 minutes	Opening Plenary 2	Robert Redfield, CDC	CDC Global and Domestic Infectious Disease Priorities	
9:00	9:10	10 minutes	Q&A			

Thursday, November 8

Scientific Symposium and Poster Session

The Symposium and Poster Session will occur at the Emory University Rollins School of Public Health (1518 Clifton Road NE, Atlanta, GA 30322). We have secured a designated parking space for Dr. Redfield at the Emory's [Michael's Street Parking Deck](#). He will need to give the parking attendant his name in order for the gate arm to be lifted. The designated spot will be marked with his name, on a traffic cone. Jenny Anderson or Shelle Bryant can provide a parking voucher.

Meals

Should he wish to join us, breakfast will be available at the Symposium venue starting at 7:00 AM through the start of the Symposium. Lunch will be provided on the 1st Floor during the ESI poster session.

If you have any questions, or if we can be of help in any way, please ask. My cell phone number, should you need to reach me is 404/245-9979.

Sincerely,

Shelle

Celebrating 20 Years of the CFAR at Emory University***
Thursday, November 8, 2018, 8:00-5:00

2018 National CFAR Scientific Symposium

Thursday, November 8, 2018, 8:00 am – 5:00 pm

Rollins School of Public Health, Claudia Nance Rollins Building, Rollins Auditorium

AGENDA

7:00-8:00 am **Registration and Breakfast**

8:00-8:10 am **Welcome**

Eric Hunter, PhD, Professor of Pathology, Georgia Research Alliance Eminent Scholar, and Co-Director for Basic Science, Emory CFAR

Claire E. Sterk, PhD, Charles Howard Candler Professor of Public Health and President, Emory University

8:10-9:20 am

Opening Plenary: Current State of HIV Research — The View from NIH & CDC

Moderators: *Carlos del Rio, MD, Professor and Chair, Hubert Department of Global Health, Professor of Medicine, and Co-Director Clinical Science, Emory CFAR*

Colleen Kelley, MD, Associate Professor of Medicine and Associate Director, Clinical Research Core, Emory CFAR

Speakers:

Ending the HIV/AIDS Pandemic: The Critical Role of HIV Prevention Science

Anthony S. Fauci, MD, Director, National Institute of Allergy and Infectious Diseases, National Institutes of Health

CDC Global and Domestic Infectious Disease Priorities

Robert Redfield, MD, Director, Centers for Disease Control and Prevention and Administrator, Agency for Toxic Substances and Disease Registry

Moderated Q&A

9:20-10:40 am

Session One: HIV in the South — Living and Providing Care in the Epicenter

Moderators: *Michael Mugavero, MD, MHSc, Professor of Medicine, Co-Director Clinical Sciences and Director, Clinical Core, UAB CFAR*

Rhonda Conerly Holliday, PhD, MA, Research Associate Professor, Community Health & Prevention Medicine, Morehouse School of Medicine

Speakers:

HIV Epidemic in the South

Eugene McCray, MD, Director, Division of HIV/AIDS Prevention, Centers for Disease Control

Exploring Medical Systems as Part of the 'Social Context' when Patients Navigate the HIV Treatment Cascade

David Malebranche, MD, MPH, Associate Professor of Medicine, Morehouse School of Medicine

Improving the Care Continuum in Atlanta: Lessons from the Front

Wendy Armstrong, MD, Professor of Medicine, Emory University and Medical Director, Grady Infectious Disease Program

Research Participant Panel

Panelists: Cynthia Allen, Mashanda Burton, Bernada Foster, Jon Hoekstra, Brandon Jackson, Jessie Seiler, and Ava Voss

10:40-10:55 am

BREAK

10:55-12:25 pm

Session Two: The Final Frontiers in HIV Research — Developing an Effective Vaccine & Achieving a Cure

Moderators: *Cynthia Derdeyn, PhD, Professor of Pathology, Yerkes National Primate Research Center, Emory University*

Nancie M. Archin, PhD, Assistant Professor of Medicine, UNC Medical School

Speakers:

Antibody-based therapeutics: Hit Early, Hit Hard

Nancy L. Haigwood, PhD, Director and Professor Oregon National Primate Research Center, Oregon Health & Science University

Immune-based strategies targeting viral persistence in SIV-infected macaques

Mirko Paiardini, PhD, Associate Professor, Yerkes National Primate Research Center, Department of Pathology and Laboratory Medicine, Emory University

Oral Abstract 1: Relationship between rebound and latent viruses in a clinical trial of anti-HIV-1 antibody 3BNC117

Yehuda Cohen, MD, Instructor in Clinical Investigation, Einstein-Rockefeller-CUNY CFAR

Oral Abstract 2: Anti-apoptotic protein BIRC5 maintains survival in HIV-1 infected CD4 T cells

Hsiao-Hsuan Kuo, PhD, Research Fellow, Ragon Institute of MGH, MIT and Harvard Harvard Medical School, Harvard CFAR

Oral Abstract 3: Sequence Entropy-Guided Excision of HIV using Enhanced CRISPR/Cas9 and Polycistronic Multiplexing

Leonard R. Chavez, PhD, Staff Scientist, UCSF/GIVI CFAR

Moderated Q&A

12:25-1:40 pm

Poster Session featuring Early Stage Investigators, Centers for AIDS Research

1st Floor Bridge Area

LUNCH

1st Floor Bridge Area

1:40-2:50 pm

Session Three: Tackling Syndemics — Identifying Solutions to the Persistent Crisis of Substance Abuse and HIV

Moderators: *Savita Pahwa*, MD, Professor, Microbiology and Immunology (Pediatrics and Medicine) and Director, Miami CFAR
Debra Houry, MD, MPH, Director, National Center for Injury and Prevention, Centers for Disease Control and Prevention

Speakers:

Medications for Opioid Use Disorder to Improve the HIV Continuum of Care

Sandra A. Springer, MD, Associate Professor of Medicine, Department of Internal Medicine, Section of Infectious Disease, Yale School of Medicine

How the abuse of cocaine (and other stimulants) perpetuates the HIV epidemic in the American South

Christina S. Meade, PhD, Associate Professor of Psychiatry & Behavioral Science, Duke University

Potential for HIV Outbreaks in Rural Kentucky

Hannah Cooper, ScD, Rollins Chair in Substance Use Disorders, Professor and Vice Chair of Behavioral Science and Health Education and Co-Director, Prevention Science Core, Emory CFAR

Moderated Q&A

2:50-3:05 pm

BREAK

3:05-4:25 pm

Session Four: No Population Left Behind: Getting to 90:90:90 for All

Moderators: *Brian Mustanski*, PhD, Director, Institute for Sexual and Gender Minority Health and Wellbeing and Co-Director, Third Coast CFAR
Allison Agwu, MD, ScM, FAAP, FIDSA, Associate Professor of Adult and Pediatric Infectious Disease and Co-Director, Adolescent & Young Adult Scientific Working Group, JHU CFAR

Speakers:

Biomedical Prevention of HIV-1 Infection in Women: As Simple as Daily Oral PrEP?

Jeanne Marrazzo, MD, MPH, C. Glenn Cobbs Endowed Professor in Infectious Diseases, Director, Division of Infectious Diseases University of Alabama at Birmingham, and Co-Director Prevention Sciences, UAB CFAR

Improving the Cascade of Care for Key Populations: MSM and PWID Advances

Chris Beyrer, MD, MPH, Desmond M. Tutu Professor of Public Health and Human Rights Johns Hopkins University and Co-Director, JHU CFAR

Oral Abstract 1: Ecological Factors and Sexual Health Outcomes in US Black MSM

Natalie Leblanc, PhD, MPH, BSN, RN, Assistant Professor of HIV Prevention Science, Dean's Endowed Fellow in Health Disparities, Rochester CFAR

Oral Abstract 2: Low rates of Postpartum Retention in Care and Viral Suppression among HIV-Infected Women in Mississippi

Aadia Rana, MD, Associate Professor of Medicine, UAB CFAR

Oral Abstract 3: HIV cascade of care outcomes cluster spatially among female sex workers in Iringa, Tanzania

Rebecca Fielding-Miller, PhD, MSPH, Assistant Professor of Infectious Disease and Global Public Health, UCSD CFAR

Moderated Q&A

4:25-4:55 pm

Closing Plenary: Current State of HIV Research — The View from PEPFAR

Moderator: *James W. Curran*, MD, James W. Curran Dean and Professor of Epidemiology and Co-Director Prevention Science, Emory CFAR

Speaker:

The View from PEPFAR on the Current State of HIV Research

Deborah L. Birx, MD, Ambassador-at-Large, The United States President's Emergency Plan for AIDS Relief

Hi Aaron. Thanks for your patience with this. If agreeable, we can proceed to have them meet at noon on 11/29, but we may need to keep it closer to 30 minutes given Dr. Redfield's follow on events for the day, and the need to travel back into the District.

If that works, Tracie will get it added to the calendar for us.

Thank you sir!

Scott

Thanks Melissa, and hello Aaron. Thanks for confirming that the meeting in VN cannot happen, and that it might be best to do at AMSUS on 11/29.

Give us a few days to clarify Dr. Redfield's agenda for 11/29, and then my colleague Tracie, will be able to circle back with you next week to let you know what may be possible for them to connect while Dr. Redfield is at AMSUS, either before or after the event.

Thanks all.,

Scott

Hello Aaron,

I work with the Center for Global Health at CDC and am only working on Dr. Redfield's trip to our country offices in Vietnam, Cambodia and Thailand. I am not on his team and therefore cannot speak to his schedule outside of his visit to SE Asia, but am copying in his Special Assistant, Ashley Knotts, and his Scheduler, Tracie Strength, who can help with coordinating at AMSUS.

Thank you.

Mrs. Moore,

Per our contact in Vietnam, we will be waving off of that portion of the trip due to the country not being able to host any visits at this time.

The SG has time to meet with Dr. Redfield at AMSUS on the 27th between 1330 – 1400, the 28th between 1330 – 1400, the 29th between 1430 – 1500. Please let me know if Dr. Redfield has time to meet with the SG during any of these times.

v/r,
Aaron

Hello Aaron,

Dr. Redfield's schedule is pretty tight on 12/10, with many site visits. I have not seen any information with proposed times. Zara Ahmed, copied above, and I are planning his visit. Could you send us both the times you are proposing?

Thanks.

Hello Mrs. Moore,

Yes, I am referring to a meeting between Dr. Redfield and VADM Faison. I am planning on the 10th of December as the two dates I was given to choose from was the 5th in Cambodia or the 10th in Vietnam.

We will be in Vietnam on the 10th and planning on scheduling the meeting during this time frame.

v/r,
Aaron

Greetings LCDR Eckard,

Are you hoping to schedule a meeting between Dr. Redfield and VADM Faison? Dr. Redfield will be in Thailand on 7-December, and I understand that VADM Faison will be there then, too. Dr. Redfield will be Thailand throughout the weekend and could meet with VADM Faison then if available. Dr. Redfield leaves for Ho Chi Minh City, Vietnam on 9-December, and then for Hanoi, Vietnam on 10-December. He could take a meeting with VADM Faison in Hanoi, if easiest.

Please let me know what dates/times work best for VADM Faison and I will connect you with the right people to schedule this.

Thank you.

Melissa A. Ely-Moore, MPH

Thanks so much Sir. This is perfect.

I will work with Mrs. Moore today and tomorrow for our Vietnam portion of the trip to get an office call locked in with Dr. Redfield.

v/r,
Aaron

Subject: [Non-DoD Source] RE: RE: Potential meeting b/w CDC Director and Navy SG

All active links contained in this email were disabled. Please verify the identity of the sender, and confirm the authenticity of all links contained within the message prior to copying and pasting the address to a Web browser.

Aaron,

Please find attached the Bio for Dr. Redfield.

Also as discussed, Dr. Redfield will be giving a Keynote address on Global Health Security at AMSUS, the morning of Nov 29 (invited by Mr. McCaffery); he may be able to be introduced to VADM Faison that morning on the sidelines. Dr. Redfield will also be meeting with CAPT Armstrong on Nov 30th at NMRC, following an event that morning at WRAIR to celebrate World AIDS day.

Background/purpose of meeting with the SG in Vietnam:

Background: Dr. Redfield is a retired Army Medical Corps officer; since becoming Director of the CDC earlier this year, he has made partnership with the DoD a priority for CDC. Specifically, he has initiated an effort to link CDC and DoD on Global Health Security (GHS) efforts. He has met with Mr. McCaffery several times to discuss the GHS partnership, and a joint statement on GHS between CDC and OSD Health Affairs is pending their signature. Dr. Redfield established a high level work group (Flag/O-6) to specifically coordinate DoD partnership. He has articulated a particular interest in linking DoD's overseas labs and CDC's overseas country offices to leverage each other's strengths.

Purpose: The purpose of meeting with the Navy SG is to establish rapport and discuss opportunities to link CDC/Navy's worldwide presence/efforts in research, surveillance, and global health. (Historical note: the CDC has successfully embedded scientists/physicians in Navy overseas labs in the past)

Thank you very much for the dates and I will be in touch once I solidify the SG's dates in each country. I will make every effort I can to have him meet with Dr. Redfield during any of those dates.

v/r,
Aaron

Hi Tracie:

We would like to offer some potential dates for the NIAID Kinyoun Lecture. Will any of these work for Dr. Redfield's schedule?

Tuesday, November 13, 3-4 pm; Tuesday, December 4, 2-3 or 3-4 pm; Thursday, December 13, 3-4 pm; and Wednesday, Dec 5, 2-3 pm.

If none of these options work, please let us know and we can look at additional dates.

Thank you,
Meaghan

Bob:

Great conversation today! I am writing about another matter. The Joseph J. Kinyoun Lecture is the most important honorific annual lecture sponsored by NIAID. The Lectureship was created to bring in leaders in the field to talk on subjects related to NIAID, particularly infectious diseases, immunology,

and global health. **The lecture is given in the Fall and I would like you to be our Fall 2018 Kinyoun Lecturer.** We can be flexible with the exact date to accommodate your schedule matched with the availability of our lecture hall. It would be great if you could speak on the opioid epidemic and its association with HIV, HCV and other infectious diseases. However, we leave the choice of topic totally up your own preference. Please let me know if you would be willing to be our 2018 Kinyoun Lecturer and give me the name and contact information of your scheduler so that my staff can work with him/her to nail down a date and arrange logistics. I look forward to hearing from you.

Sent: 1 Nov 2018 15:48:56 +0000
To: Bartee, Brad Allen (CDC/OD/OCS)
Subject: RE: Travel for Dr. Redfield
Attachments: KinyounFlyer-lettersize-508.pdf

Hi Brad,

Thanks so much for clarifying. That's totally fine...Dr. Fauci def did not want the proposed dinner to inconvenience him or cause any conflict in his schedule; was just for if he was free/it was very doable. Along those lines, and there's no pressure whatsoever here—would Dr. Redfield have time in his schedule to come to campus a little early for an informal lunch with Dr. Fauci and his senior staff members, just in a conference room down from Dr. Fauci's office? Again, if he is tied up, no worries, we just wanted to offer some sort of hospitable token of our appreciation, but only if it works for Dr. R. 😊

A couple high level police guys from the NIH Special Events Division plan to meet Dr. R at the gate of his choosing and escort him to a reserved VIP parking spot right outside the lecture hall. Just let us know when he plans to arrive/which gate he plans to use, and the vehicle info, whenever you have it.

Dr. Fauci's office is located in Building 31, which is very close/just across the street from where the lecture will be held. I think this will be the best location for their meeting from 5-6 pm. Dr. Redfield's car will be parked by the lecture hall, but again, this is probably a 5 min walk and if he is super under the gun in terms of timing I imagine that Dr. Fauci would drive him to his car, since he gets to park right in front of Building 31.

We created the attached 508-compliant lecture flyer, which can be distributed via email freely. Would be great if the CDC-DC office could help spread the word to folks that might be interested. The talk will also be webcast live at www.videocast.nih.gov; but we would like to get a nice in-person turn out as well. If some folks from the CDC-DC office plan to ride over on the metro, I can see what I can do about expediting their entrance onto campus. We'd love to have them, as well as any other local folks that might be interested in coming out. I'm going to reach out to some people and orgs as well. Such an important topic, there should be plenty of interest!

Who is the main POC at the office of communications? There's been a lot of names on all these emails!!!!

Thanks again!
Julie

Subject: RE: Travel for Dr. Redfield

Hi Julie,

We did get a chance to talk to Dr. Redfield yesterday and he just wants to do a 1 on 1 with Dr. Fauci from 5-6pm. I believe they discussed this earlier but not sure if they discussed a venue or not. It probably would be a good idea to reserve a space near the lecture venue. He also said that he needs to be on the road again by 6pm due to another commitment.

I owe you his vehicle information and will get that to you asap. Hopefully by early next week.

Thanks,

Brad

Hi Brad,

Great talking to you; glad to be working with you on this!

FYI, here are the advertising posters that we created. Print versions will be displayed around NIH. I'm looking into getting the designs made into 508-compliant pdfs, so that they can be shared/used to promote the lecture more broadly via email. I'll keep you posted on that, and will also send the webcast info as soon as I have it. Here is a link to the webpage we created on the NIAID site: <https://www.niaid.nih.gov/news-events/opioids-epidemic-our-time> I'm working through a long to-do list but will hopefully add some sort of visual and also the link to the webcast to the page. Will keep you informed!

Hi Julie,

Do you have details of when the dinner would be? We currently have a hold on his calendar from 5-6pm but not sure if this is related to the dinner or not.

I am currently working on getting answers to all your questions. He will likely drive from CDC-Washington to NIH that day and know I owe you his vehicle details. When I get that I will forward to you.

If you have a minute to talk, we can go over some of the other things by phone.

Thanks,
Brad

Subject: RE: Travel for Dr. Redfield
Importance: High

Hi Brad!

Hope all is well. We are looking forward to Dr. Redfield's visit and talk in two weeks!! Hoping you can help with the following:

- As mentioned in his lecture confirmation letter, Dr. Fauci would like to host a dinner in Dr. Redfield's honor on the evening of November 13. Can you confirm Dr. Redfield's availability?
- Do you have a travel itinerary for Dr. Redfield's trip, and if so, could you kindly provide?
- Are there a few people with whom Dr. Redfield would like to meet while on campus on the 13th? I'd need to start working on that immediately.
- Is Dr. Redfield willing/available to meet with any folks that might pop up and request meetings? Sometimes this happens when we send out the staff-wide email announcement. If it does, I can forward requests to you, or respond that he unfortunately does not have time in his schedule (which may truly be the case).
- Does he plan to drive to campus? If so, could you provide me with the make, model, year, and license plate number of the car he will drive, if this is available (if it's a rental, that could be tough...we will have to figure out how to handle that). I need this info to reserve a parking space for him.

Thank you!
Best,
Julie

Subject: Travel for Dr. Redfield

Hi Ashley!

I'm not sure if you are the person to ask...but hopefully you can direct me to the appropriate POC, if needed. I wanted to check in about Dr. Redfield's travel to Bethesda for the talk...usually we coordinate and pay for travel for our Kinyoun lecturers. However, since CDC is a sister agency, the protocol might be a little different. Does CDC need NIH to cover his travel expenses? If so, we will probably try to do some sort of intra agency agreement to reimburse, since we assume it will be far more efficient for your travel liaisons to coordinate actual logistics, versus having you work through the NIH travel agency...which is always a bit of a hassle. Aside from figuring out the reimbursement bit, It would be great if whoever is handling his travel could keep us informed of his itinerary.

Thanks for your help!

Julie

Hi Ashley,

Just wanted to check in on this, as our deadline for the NIH Record article—which is one of our main publicity pieces—is in just over two weeks, and it can take about that long to have the article reviewed/cleared by everyone that needs to see it ☹️ If you don't have a final title, it would be extremely helpful to get a working title or even just a broad sense of what he will talk about...e.g. something involving HIV and/or opioid epidemic?

Thank you and I'm so sorry to push...I'm sure that you are working plenty hard on this and a million other pressing items!!!

Julie

Subject: RE: Introduction; planning for NIH/NIAID Kinyoun Lecture in Bethesda, MD, Nov 13

Hi Ashley!

Thanks so much for your response, and for sending these preliminary materials! Pleased to be working with you on this.

Great questions, thanks for asking. Please see responses:

- How long will Dr. Redfield have to give the remarks? **Approximately 50 or so minutes. The talk is from 3-4 pm...Dr. Fauci delivers an intro which takes no more than 5 minutes, and then there's a brief 5 minute audience Q&A at the tail end, generally 3:55 pm.**
- Will there be a Q&A session? **Yep, see above... It's usually short and informal...sometimes Dr. Fauci asks a question, as well as a few brave people from the audience.**
- Will media be invited to attend/cover? **We don't invite external media and generally media has not been present. We arrange for an NIH photographer, and sometimes there's a brief article after the talk that runs in the internal NIH publication (the NIH Record). We run a short article in the NIH Record preceding the talk as well, as a means of advertising. The materials provided by your office will help one of our writers write that article. We will pass drafts by you for review.**

- Would slides be appropriate for this talk? **Yes, speakers generally use PowerPoint. Usually they bring the slides on a thumb drive, although some of them have used their own laptop (the AV support people help hook it up). I think we had one speaker once that did the whole talk without slides...that was brave/interesting. I think for the most part, audiences appreciate visuals.**
- Can you give me details on the makeup of the audience and how many are expected to attend? **The capacity of Lipsett Amphitheater is 260. There's been a few times we've maxed out that capacity. However, the talk will also be webcast live via the world wide web on the NIH videocast—anyone can watch it (including the media, if someone wanted to pick up on the story—but again, we don't specifically push to media), so some folks end up watching from their desk. We do our best to promote in-person attendance. It's generally mostly an internal audience that attends...NIH researchers, clinicians, administrators and fellows that are interested in the topic. It's generally a mix of super and less science-y folks. There's usually a handful of non-NIH people (including my dad!) who navigate the NIH visitor process to attend in person.**

I hope that helps!!! Please let me know if you need additional information, I'm more than happy to answer any/all questions. I can also help set up meetings between Dr. Redfield and some NIH folks, should he wish to do so. It would be great to get those names sooner rather than later, to work on scheduling. Dr. Fauci also generally likes to have a short 30 or so minute meeting with the speaker.

I'm sure it takes plenty of effort to nail down a talk title and otherwise pull together Dr. Redfield's speeches and presentations! Would be fantastic to get that title, a few informal summary bullets, and pertinent articles, if available, by the end of the week. Once I get these items, we will assign a writer who will draft an article for the NIH Record and a bio that will be included in the printed program that we hand out to audience members. The writer will be in touch with you to have drafts reviewed/approved. I will be working on a design that will be used on advertising posters that will be displayed around campus, and on the program.

Thanks so much, Ashley!!

Best,
Julie

Subject: Introduction; planning for NIH/NIAID Kinyoun Lecture in Bethesda, MD, Nov 13

Dear Tracie, Teresa, and Jeremy,

Hope this note finds you well.

By way of introduction, I work in NIAID's Office of Communications, coordinating lectures on behalf of Dr. Fauci. We are very excited that Dr. Redfield has agreed to deliver our Kinyoun lecture on November 13, 2018 on the NIH campus in Bethesda, MD.

I'm hoping you can supply some items in the next 1-3 weeks that will enable me to post the event to various calendars/otherwise and get the ball rolling on lecture-related publicity and materials:

- Talk title. This is the most pressing item; if we could get it this week, that would be fantastic.
- A few sentences or a short bulleted list outlining what the talk will be about.
- Current CV for Dr Redfield.
- Short biographical sketch, in narrative form.
- If available, 2-3 article reprints/written items by Dr. Redfield that are related to the talk topic.

- High resolution (300 dpi or greater) photograph can be used for an article that will appear in the NIH Record, and also on the lecture program. (less pressing- within the next 4 weeks is fine)
- Names of several people with whom Dr. Redfield would like to meet before and/or after the lecture. (less pressing- next 4-6 weeks)

We will also need to coordinate travel; I will be back in touch in regards to next steps.

Please let me know if there are any questions on your end related to the lecture, logistics, etc.

Thanks so much and I look forward to working with you on this!

Best,
Julie

Subject: NIAID Kinyoun Lecture

Bob:

Great conversation today! I am writing about another matter. The Joseph J. Kinyoun Lecture is the most important honorific annual lecture sponsored by NIAID. The Lectureship was created to bring in leaders in the field to talk on subjects related to NIAID, particularly infectious diseases, immunology, and global health. The lecture is given in the Fall and I would like you to be our Fall 2018 Kinyoun Lecturer. We can be flexible with the exact date to accommodate your schedule matched with the availability of our lecture hall. It would be great if you could speak on the opioid epidemic and its association with HIV, HCV and other infectious diseases. However, we leave the choice of topic totally up your own preference. Please let me know if you would be willing to be our 2018 Kinyoun Lecturer and give me the name and contact information of your scheduler so that my staff

can work with him/her to nail down a date and arrange logistics. I look forward to hearing from you.

Best regards,

Tony

Attachments: Lecture day schedule for Robert Redfield.docx

Hi Brad,

Attached and below, please find an itinerary for the 13th. Please note that NIH Director Dr. Collins will also attend lunch.

Thanks and have a great weekend!
Best,
Julie

Schedule for Robert Redfield, November 13, 2018

Phone numbers:

Dr. Fauci's office- (b)(6)
Special Assistant to the Director Patty Conrad (cell)- (b)(6)
Julie Marquardt, Lecture Coordinator (cell)- (b)(6)
Anstice Brand, Deputy Director, CDC/DC office- (b)(6)
Lt Brown, NIH Police/Special Events Division- (b)(6)

Tuesday, November 13, 2018	
1-1:15 PM	Robert Redfield and Anstice Brown arrive to NIH campus via entrance at 355 & South Drive, where Lt. Brown of the NIH Police/Special Events Division will be waiting; Lt Brown escorts them to reserved parking space in front of Building 31, where Julie Marquardt will be waiting to show them to Dr. Fauci's office on the 7 th floor
1:30 PM	Drs. Redfield and Fauci take conference call with HHS Secretary in Dr. Fauci's office (note: if call is cancelled, lunch starts at 1:30)

1:45-2:30 PM	Lunch with Drs. Fauci, Collins, & NIAID senior staff members, 7 th floor conference room Confirmed lunch attendees: Tony Fauci, NIAID Director Francis Collins, NIH Director Robert Redfield, CDC Director Anstice Brand, Deputy Director, CDC/Washington DC office Hugh Auchincloss, NIAID Principal Deputy Director JJ McGowan, NIAID Deputy Director for Science Management Cliff Lane, NIAID Deputy Director for Clinical Research and Special Projects Carl Dieffenbach, Director, NIAID Division of AIDS (DAIDS)
2:30 PM	Drs Fauci and Redfield walk to Lipsett Amphitheater, Building 10
2:40 PM	Meet with AV people at Lipsett and get set up for talk; time permitting, preliminary photographs
3:00 PM	Dr. Fauci opens the 2018 Kinyoun lecture and introduces Dr. Redfield
3:05-3:55 PM	Dr. Redfield delivers "Opioids: Epidemic of our time and impact on infectious disease"
3:55-4:00 PM	Audience Q&A
4:00 PM	Lecture concludes
~4:00 - 4:30	Additional questions/interactions with audience members
~4:30 -4:45	Julie escorts Dr. Redfield back to Building 31 for 1:1 with Dr. Fauci
~4:45 -5:00	1:1 with Dr. Fauci
5:30 PM	Dr. Redfield leaves campus for next engagement

Subject: RE: Travel for Dr. Redfield

Hi Julie,

I've copied Anstice Brand on this email as she will be accompanying Dr. Redfield to the Lecture on Tuesday. Her cell is (b)(6) if you need to talk to someone the day of the event. I also wanted to make sure that Anstice was added to the lunch.

To answer your question about the 1:1 after the lecture, I think we may just have to play that one by ear. As of now we are still planning for it, but I notice there is an hour between the end of the lecture and what we originally had as there 1:1 time. They may decide to do it earlier. So, thanks in advance for being flexible on this.

If I hear of anything changing regarding their arrival, I will let you know.

Have a good weekend.

Brad

Subject: RE: Travel for Dr. Redfield

Hi Brad! Happy Friday before a 3 day weekend! I will be checking email, in case I am needed or there are any changes to any plans...

Today, I intend to pull together a (hopefully finalized?) itinerary for Dr. R's afternoon on Tuesday. Dr. Fauci's scheduler informed me that thus far, the 1:30 pm conference call is still on, so they can take that call together and have lunch afterwards.

I just wanted to confirm that Dr. R would still like to meet with Dr. Fauci after the talk. Do you know how much time he wants to allocate for that meeting, so I can figure out the best timing and be sure to escort him to that meeting in a timely fashion? I know he needs to leave campus no later than 6 pm. The police are reserving him a metered space in front of Building 31 (where Dr. Fauci's office is), which should make for a quick exit...

Thanks for all of your help...we are super excited for his talk!

Hi Julie, hope you are well this morning –

I just want to pass along Dr. Redfield's vehicle information to you and a couple of other items.

He will arrive in a Silver Volvo S-80, with Maryland Plates – SOM140.

I will recommend to him the entrance at 355 and South Drive, which is the main campus entrance. We are expecting him to arrive no later than 1:15 pm.

Also, Anstice Brand from our CDC Washington Office will be traveling with him. Is there any way she can be included in the lunch with Senior Staff Members? She is our Deputy Director of the CDC Washington Office.

Thanks, and let me know if you have any questions from me.

Brad

Subject: Re: Travel for Dr. Redfield

No worries! The police escorts have just specified that the best entrance to meet at is the one at 355 and South Drive. This is considered the main campus entrance and is where the metro is. The parking space just improved—it's now directly in front of Building 31, the location of the lunch.

I told the escorts that his ETA to the main entrance is around 1:10-1:15.

On Nov 7, 2018, at 2:51 PM, Bartee, Brad Allen (CDC/OD/OCS) <yxa0@cdc.gov> wrote:

Julie,

As soon as I hear back from Dr. Redfield about these items (vehicle info and entry to NIH), I will pass them to you.

Sorry for the delay.

Subject: RE: Travel for Dr. Redfield

Hi Brad,

Along with vehicle info, would you be able to ask Dr. Redfield which campus entrance he plans to arrive at, or if he'd like us to tell him which to use? The police escorts will wait for him there and escort him to parking and then to Building 31. If the conference call is on, he and Dr. Fauci can take it together and lunch will start at 1:45; if it is cancelled, they will do lunch at 1:30. Also wanted to confirm that he will be solo, e.g. not bringing any CDC people with him to lunch? We want to make sure we order enough food.

Dr. R does still want an individual meeting with Dr. Fauci after the lecture, is that correct?

I sent out the lecture announcement yesterday...I have not received any pressing meeting requests (thankfully), but I do suspect there will be some attendees that would like to talk to him and/or ask a few questions following the talk. I also invited the Montgomery County Overdose Response training team. I connected with them after becoming completely enmeshed in the opioid topic while doing my background research to create the advertising posters. I'm working with them to bring Narcan training to NIAID and NIH 😊 You can tell Dr. R that his talk is already making a difference, and he hasn't even delivered it yet!

Thanks!

Subject: RE: Travel for Dr. Redfield

Hi Brad,

Here's the proposed timeline from the front office! Let me know if it seems ok. I responded and said that I'd like to keep Dr. R's schedule semi open from 4 until 4:45 so that folks have a chance to talk to him after the lecture, and also in case a meeting request pops up. I'm hoping Dr. Fauci can be a little flexible on timing for his meeting with Dr. R. (4:30 vs 4:45 vs. 5:00). I will be there to try to keep the timing on track.

1:15 arrival at Bldg 31

1:30 pm – 1:45 pm call with HHS secretary from Fauci office

1:45 pm – 2:30 pm lunch in 7A18

2:40 pm – depart for lecture

3 pm – 4 pm lecture

Then if Dr Redfield still wants to meet with Dr. Fauci – they can meet

4:30 pm – 5 or 5:30 pm if he wants

If the conf call moves they can just have lunch from 1:15 pm – 2:30 pm and have their meeting...

Subject: RE: Travel for Dr. Redfield

Hi Julie,

We are planning to get Dr. Redfield to NIH by 1:15pm that day. Do you think that will allow enough time for lunch with Dr. Fauci and staff members?

The only thing I see that will potentially be a problem is that he has a standing call with the HHS Secretary at 1:30pm that day (I think Dr. Fauci is also on this call also). Sometimes he delegates this but not sure if he will in this case or not.

Let me know if this will work for you all.

Thanks,
Brad

To: Bartee, Brad Allen (CDC/OD/OCS) <yxa0@cdc.gov>
Subject: RE: Travel for Dr. Redfield

Hi Brad,

Thanks so much for clarifying. That's totally fine...Dr. Fauci def did not want the proposed dinner to inconvenience him or cause any conflict in his schedule; was just for if he was free/it was very doable. Along those lines, and there's no pressure whatsoever here—would Dr. Redfield have time in his schedule to come to campus a little early for an informal lunch with Dr. Fauci and his senior staff members, just in a conference room down from Dr. Fauci's office? Again, if he is tied up, no worries, we just wanted to offer some sort of hospitable token of our appreciation, but only if it works for Dr. R. 😊

A couple high level police guys from the NIH Special Events Division plan to meet Dr. R at the gate of his choosing and escort him to a reserved VIP parking spot right outside the lecture hall. Just let us know when he plans to arrive/which gate he plans to use, and the vehicle info, whenever you have it.

Dr. Fauci's office is located in Building 31, which is very close/just across the street from where the lecture will be held. I think this will be the best location for their meeting from 5-6 pm. Dr. Redfield's car will be parked by the lecture hall, but again, this is probably a 5 min walk and if he is super under the gun in terms of timing I imagine that Dr. Fauci would drive him to his car, since he gets to park right in front of Building 31.

We created the attached 508-compliant lecture flyer, which can be distributed via email freely. Would be great if the CDC-DC office could help spread the word to folks that might be interested. The talk will also be webcast live at www.videocast.nih.gov; but we would like to get a nice in-person turn out as well. If some folks from the CDC-DC office plan to ride over on the metro, I can see what I can do about expediting their entrance onto campus. We'd love to have them, as well as any other local folks that might be interested in coming out. I'm going to reach out to some people and orgs as well. Such an important topic, there should be plenty of interest!

Who is the main POC at the office of communications? There's been a lot of names on all these emails!!!!

Thanks again!
Julie

Hi Julie,

We did get a chance to talk to Dr. Redfield yesterday and he just wants to do a 1 on 1 with Dr. Fauci from 5-6pm. I believe they discussed this earlier but not sure if they discussed a venue or not. It probably would be a good idea to reserve a space near the lecture venue. He also said that he needs to be on the road again by 6pm due to another commitment.

I owe you his vehicle information and will get that to you asap. Hopefully by early next week.

Thanks,

Brad

Hi Brad,

Great talking to you; glad to be working with you on this!

FYI, here are the advertising posters that we created. Print versions will be displayed around NIH. I'm looking into getting the designs made into 508-compliant pdfs, so that they can be shared/used to promote the lecture more broadly via email. I'll keep you posted on that, and will also send the webcast info as soon as I have it. Here is a link to the webpage we created on the NIAID site: <https://www.niaid.nih.gov/news-events/opioids-epidemic-our-time> I'm working through a long to-do list but will hopefully add some sort of visual and also the link to the webcast to the page. Will keep you informed!

Importance: High

Hi Brad!

Hope all is well. We are looking forward to Dr. Redfield's visit and talk in two weeks!!
Hoping you can help with the following:

- As mentioned in his lecture confirmation letter, Dr. Fauci would like to host a dinner in Dr. Redfield's honor on the evening of November 13. Can you confirm Dr. Redfield's availability?
- Do you have a travel itinerary for Dr. Redfield's trip, and if so, could you kindly provide?
- Are there a few people with whom Dr. Redfield would like to meet while on campus on the 13th? I'd need to start working on that immediately.
- Is Dr. Redfield willing/available to meet with any folks that might pop up and request meetings? Sometimes this happens when we send out the staff-wide email announcement. If it does, I can forward requests to you, or respond that he unfortunately does not have time in his schedule (which may truly be the case).
- Does he plan to drive to campus? If so, could you provide me with the make, model, year, and license plate number of the car he will drive, if this is available (if it's a rental, that could be tough...we will have to figure out how to handle that). I need this info to reserve a parking space for him.

Thank you!
Best,

Julie

Subject: Travel for Dr. Redfield

Hi Ashley!

I'm not sure if you are the person to ask...but hopefully you can direct me to the appropriate POC, if needed. I wanted to check in about Dr. Redfield's travel to Bethesda for the talk...usually we coordinate and pay for travel for our Kinyoun lecturers. However, since CDC is a sister agency, the protocol might be a little different. Does CDC need NIH to cover his travel expenses? If so, we will probably try to do some sort of intra agency agreement to reimburse, since we assume it will be far more efficient for your travel liaisons to coordinate actual logistics, versus having you work through the NIH travel agency...which is always a bit of a hassle. Aside from figuring out the reimbursement bit, It would be great if whoever is handling his travel could keep us informed of his itinerary.

Thanks for your help!
Julie

Subject: RE: Introduction; planning for NIH/NIAID Kinyoun Lecture in Bethesda, MD, Nov 13

Hi Ashley,

Just wanted to check in on this, as our deadline for the NIH Record article—which is one of our main publicity pieces—is in just over two weeks, and it

can take about that long to have the article reviewed/cleared by everyone that needs to see it ☹️ If you don't have a final title, it would be extremely helpful to get a working title or even just a broad sense of what he will talk about...e.g. something involving HIV and/or opioid epidemic?

Thank you and I'm so sorry to push...I'm sure that you are working plenty hard on this and a million other pressing items!!!

Julie

Julie, thank you so much for this great info!

(b)(6)

(b)(6)

Can you tell me a few other notable speakers you've had in the past for this series and what their titles/descriptions were?

Thanks again!

A

Ashley Lansdale

Subject: RE: Introduction; planning for NIH/NIAID Kinyoun Lecture in Bethesda, MD, Nov 13

Hi Ashley!

Thanks so much for your response, and for sending these preliminary materials! Pleased to be working with you on this.

Great questions, thanks for asking. Please see responses:

- How long will Dr. Redfield have to give the remarks? **Approximately 50 or so minutes. The talk is from 3-4 pm...Dr. Fauci delivers an intro which takes no more than 5 minutes, and then there's a brief 5 minute audience Q&A at the tail end, generally 3:55 pm.**
- Will there be a Q&A session? **Yep, see above... It's usually short and informal...sometimes Dr. Fauci asks a question, as well as a few brave people from the audience.**
- Will media be invited to attend/cover? **We don't invite external media and generally media has not been present. We arrange for an NIH photographer, and sometimes there's a brief article after the talk that runs in the internal NIH publication (the NIH Record). We run a short article in the NIH Record preceding the talk as well, as a means of advertising. The materials provided by your office will help one of our writers write that article. We will pass drafts by you for review.**
- Would slides be appropriate for this talk? **Yes, speakers generally use PowerPoint. Usually they bring the slides on a thumb drive, although some of them have used their own laptop (the AV support people help hook it up). I think we had one speaker once that did the whole talk without slides...that was brave/interesting. I think for the most part, audiences appreciate visuals.**
- Can you give me details on the makeup of the audience and how many are expected to attend? **The capacity of Lipsett Amphitheater is 260. There's been a few times we've maxed out that capacity. However, the talk will also be webcast live via the world wide web on the NIH videocast—anyone can watch it (including the media, if someone wanted to pick up on the story—but again, we don't specifically push to media), so some folks end up watching from their desk. We do our best to promote in-person attendance. It's generally mostly an internal audience that attends...NIH researchers, clinicians, administrators and fellows that are interested in the topic. It's generally a mix of super and less science-y folks. There's usually a handful of non-NIH people (including my dad!) who navigate the NIH visitor process to attend in person.**

I hope that helps!!! Please let me know if you need additional information, I'm more than happy to answer any/all questions. I can also help set up meetings between Dr. Redfield and some NIH folks, should he wish to do so. It would be great to get those names sooner rather than later, to work on scheduling. Dr. Fauci also generally likes to have a short 30 or so minute meeting with the speaker.

I'm sure it takes plenty of effort to nail down a talk title and otherwise pull together Dr. Redfield's speeches and presentations! Would be fantastic to get that title, a few informal summary bullets, and pertinent articles, if available, by the end of the week. Once I get these items, we will assign a writer who will draft an article for the NIH Record and a bio that will be included in the printed program that we hand out to audience members. The writer will be in touch with you to have drafts reviewed/approved. I will be working on a design that will be used on advertising posters that will be displayed around campus, and on the program.

Thanks so much, Ashley!!

Best,
Julie

Hi Julie,

Apologies for the delay, but I want to let you know we are working with Dr. Redfield on his speech title and content and are hoping to have that for you before the end of the week. Meantime, please find his bio and headshot attached. Also, I'm hoping you can answer a few questions for us:

- How long will Dr. Redfield have to give the remarks?
- Will there be a Q&A session?
- Will media be invited to attend/cover?
- Would slides be appropriate for this talk?
- Can you give me details on the makeup of the audience and how many are expected to attend?

Thanks in advance,
Ashley

Subject: Introduction; planning for NIH/NIAID Kinyoun Lecture in Bethesda, MD, Nov 13

Dear Tracie, Teresa, and Jeremy,

Hope this note finds you well.

By way of introduction, I work in NIAID's Office of Communications, coordinating lectures on behalf of Dr. Fauci. We are very excited that Dr. Redfield has agreed to deliver our Kinyoun lecture on November 13, 2018 on the NIH campus in Bethesda, MD.

I'm hoping you can supply some items in the next 1-3 weeks that will enable me to post the event to various calendars/otherwise and get the ball rolling on lecture-related publicity and materials:

- Talk title. This is the most pressing item; if we could get it this week, that would be fantastic.
- A few sentences or a short bulleted list outlining what the talk will be about.
- Current CV for Dr Redfield.
- Short biographical sketch, in narrative form.
- If available, 2-3 article reprints/written items by Dr. Redfield that are related to the talk topic.
- High resolution (300 dpi or greater) photograph can be used for an article that will appear in the NIH Record, and also on the lecture program. (less pressing- within the next 4 weeks is fine)
- Names of several people with whom Dr. Redfield would like to meet before and/or after the lecture. (less pressing- next 4-6 weeks)

We will also need to coordinate travel; I will be back in touch in regards to next steps.

Please let me know if there are any questions on your end related to the lecture, logistics, etc.

Thanks so much and I look forward to working with you on this!

Best,
Julie

Hi Tracie:

We would like to offer some potential dates for the NIAID Kinyoun Lecture. Will any of these work for Dr. Redfield's schedule?

Tuesday, November 13, 3-4 pm; Tuesday, December 4, 2-3 or 3-4 pm; Thursday, December 13, 3-4 pm; and Wednesday, Dec 5, 2-3 pm.

If none of these options work, please let us know and we can look at additional dates.

Thank you,
Meaghan

Subject: NIAID Kinyoun Lecture

Bob:

Great conversation today! I am writing about another matter. The Joseph J. Kinyoun Lecture is the most important honorific annual lecture sponsored by NIAID. The Lectureship was created to bring in leaders in the field to talk on subjects related to NIAID, particularly infectious diseases, immunology, and global health. The lecture is given in the Fall and I would like you to be our Fall 2018 Kinyoun Lecturer. We can be flexible with the exact date to accommodate your schedule matched with the availability of our lecture hall. It would be great if you could speak on the opioid epidemic and its association with HIV, HCV and other infectious diseases. However, we leave the choice of topic totally up your own preference. Please let me know if you would be willing to be our 2018 Kinyoun Lecturer and give me the name and contact information of your scheduler so that my staff can work with him/her to nail down a date and arrange logistics. I look forward to hearing from you.

Best regards,

Tony

Good afternoon,

I am reaching out regarding the below request for an interview with CDC Director, Dr. Redfield. Dr. Redfield has availability on Nov. 6th from 2:00-3:00pm and from 4:00-5:00pm. Please let me know if either of these times will work with your scheduling. We would also like to include Amanda Campbell on this call if at all possible.

Respectfully,

Tracie Strength
Executive Assistant to the Director, Dr Robert Redfield

Subject: Official OASH Invitation

(Sending on Behalf of Valerie Huber)

Dear Dr. Redfield,

The Office of the Assistant Secretary for Health (OASH) is developing an organization-wide strategic plan and I have the privilege of leading this effort, in partnership with AMC Strategies. A critical component of this process includes gathering input from a variety of external partners. Today, I am contacting you to ask if you would agree to a phone interview in order to help us understand the top issues facing OASH from your vantage point.

As an important leader in public health initiatives within the Department of Health and Human Services, we realize that policies and programs that emanate from OASH have a ripple effect across the country and can create an inflection point for improved health and wellness. That is why we are very interested in hearing how you think OASH can be more effective and efficient at making the greatest impact for the largest number of Americans.

You can learn more about the efforts at OASH by visiting our website [here](#).

Individualized phone interviews with a very small group of key external partners will last approximately 60 minutes and take place one of the following days:

- November 6
- November 7
- November 13
- November 14
- November 15

Please email Vivian Stallion (Vivian.Stallion@hhs.gov) and Carla Haddad (CHaddad@hrsa.gov) to confirm your availability to participate in an interview by **noon on Monday, October 29**. While we would especially appreciate your personal participation and unique insight, should you be unavailable, we ask that you please provide a surrogate from your OpDiv to participate on your behalf. We will provide additional details and a confirmed interview date and time after receiving your response.

I very much appreciate your commitment to the public health of our nation and hope you will agree to be part of this individualized listening session. We truly value your insight and look forward to hearing from you soon.

Thank you so much for your consideration.

Best Regards,

Valerie Huber

Senior Policy Advisor to the Assistant Secretary for Health
Office of the Assistant Secretary for Health (OASH)

Hi All,

The OMB meeting has now been confirmed for next Wed, Nov 14th from 5:15-6:00pm.

Scott, is it possible to make this work for Dr. Redfield?

We also need to hold the time on Dr. Redfield's calendar Tuesday morning for the pre-brief.

Thanks so much,

Amanda

Subject: RE: OMB Briefing

All,

My apologies for the change beyond our control, but the meeting is now scheduled for next Wednesday, Nov. 14th from 5:15 – 6:00 PM at EEOB.

The briefing will include Katy Talento (DPC), Joe Grogan (OMB), Tom Reilly (OMB), and Marc Garufi (OMB).

Jen Moughalian (ASFR) and Laura Kemper (IOS) will be accompanying the group.

Please confirm your attendance and we will ensure the WAVES link for entry is distributed.

In addition, please hold next Tuesday, Nov. 13th from 9:00 – 10:00 AM for an internal pre-brief teleconference.

Thank you,

Steven

Introduction and Overview

Who is this document for?

This document is to assist community leaders, local and regional organizers, non-profit groups, law enforcement, public health, and members of the public in understanding and navigating effective strategies to prevent opioid overdose in their communities.

How can readers use this document?

Readers can use this document as a general reference for evidence-based practices that have been successfully implemented in the U.S. and are effective in reducing rates of opioid overdose. This document also provides readers with straightforward explanations of how and why these strategies work, summaries of major research on these topics, and examples of organizations from across the U.S. that have excelled at putting these strategies into practice.

How was this document created?

The selection of evidence-based strategies included in this document began with a systematic search of scientific literature on the prevention of opioid overdose in the context of prescription opioid misuse or use of illicit opioids. To be considered for inclusion in this document, strategies must have been successfully implemented in at least one jurisdiction in the U.S. as evidence for this document was being reviewed (between April and August 2017) AND meet one of the following evidentiary criteria: (1) meta-analyses or systematic reviews have found the strategy to be effective at reducing overdose and/or factors that increase overdose risk; (2) evidence from a scientifically rigorous experimental study, such as a randomized controlled trial, demonstrates the strategy's effectiveness in reducing overdose and/or factors that increase overdose risk; or (3) multiple observational studies from U.S. settings indicate the strategy's ability to reduce overdose or mitigate and reduce factors that increase overdose risk. In order to provide the broadest possible scope of evidence for guiding the

implementation of overdose prevention strategies in the U.S., research that has been conducted in international settings that examines strategies also well studied and proven feasible in U.S. settings are included in this document as well.

Based on these criteria, strategies identified can be considered promising or effective in reducing opioid overdose.

Over the course of several months, researchers, public health professionals, and subject matter experts were consulted to refine the list of strategies considered into a collection of those interventions with the strongest evidence of efficacy AND with demonstrated feasibility in U.S. settings. These contributors, including physicians, epidemiologists, sociologists, medical anthropologists, harm reductionists, and more, offered individual input based on their own research and experiences working at the forefront of the opioid crisis.

This is not an exhaustive list of overdose prevention strategies. Many countries—such as Canada, Portugal, The Netherlands, Germany, Switzerland, Norway, Australia, and Uruguay, just to name a few—have implemented overdose-prevention policies and programs that have never been used in the U.S. Even within the U.S., many local organizers and advocates have developed unique, locally appropriate strategies too numerous to name here.

In sum, the strategies laid out in this document are well known, evidence-based actions that U.S. states and municipalities can take **today** to prevent new overdoses **tomorrow**.

Why evidence-based?

Opioid use disorders and opioid overdose are complex phenomena shaped by numerous social, biological, and psychological factors. Due to this complexity—and the natural complexity of all human beings—fully understanding and accounting for all of these factors in an overdose prevention activity is a significant challenge. Often, ideas that once looked promising fail to pan out as expected.* There are also strategies that at first glance

appeared counter-intuitive or wrong but were ultimately shown to be very effective in preventing fatal overdose. Subjecting overdose prevention interventions to scientific testing and evaluation is the only way to know for sure whether these intuitions are correct.

In acknowledgement of this pressing need, a practice is considered both “locally appropriate” and “evidence-based” if it has been designed in accordance with three key sources of information: (1) high quality scientific research; (2) the professional opinions and experiences of clinical and public health experts; and (3) the preferences, priorities, and values of the individuals who will be targeted or affected by

that practice.¹ By offering this summary of the current “best practices” for overdose prevention, based on a thorough review of existing research and expertise from a diverse array of medical and public health professionals, this document aims to fulfill areas 1 (scientific research) and 2 (expert opinions). Area 3, the preferences and priorities of those affected (in this case, individuals who use opioids or are otherwise at risk of opioid overdose), must be sought anew in each new community context. This combination of evidence, expertise, and community dialog will lay the groundwork for truly effective opioid overdose prevention strategies across the U.S.

* Research shows that some opioid use and overdose prevention interventions have harmful effects on individuals at risk. Some have even been shown to increase the risks of opioid overdose. The causes of these harms often include the sharp reduction of opioid tolerance during periods of high risk for relapse; the inadvertent promotion of riskier drug use practices through inattention to structural risk factors; and the exposure of at-risk individuals to additional trauma. Examples of strategies shown ineffective by research and data include: arrest and incarceration, compulsory treatment, rapid detox without opioid agonist/antagonist medication assistance, inappropriately implemented school-based education (e.g. short sessions focused on knowledge improvement and resistance only, mixing students from different risk groups), and inappropriately implemented drug court systems (e.g. low quality service provision, improper participant selection, lack of program evaluation).

Guiding Principles

Below are four overarching principles, lessons gleaned from previous public health emergencies, such as the HIV/AIDS crisis in the 1980s and 1990s. These principles serve as a guide for the design and implementation of effective overdose prevention strategies.

1. Know your epidemic, know your response

First advanced by UNAIDS as a guiding principle for global HIV prevention and control, the mantra “know your epidemic, know your response” originally spoke to the mismatch between strategy and reality that hindered HIV control efforts in the first years of the epidemic. In a 2008 *Lancet* article, Drs. David Wilson and Daniel Halperin championed the “know your epidemic, know your response” principle with their observation that “there is no single HIV Epidemic, but a multitude of diverse epidemics” that differ according to “who gets infected and how.”²

Similarly, opioid overdose is driven by a multitude of mechanisms and human experiences, and people may follow a variety of paths toward opioid misuse and overdose. The realities faced by people who use drugs may be common across regions or vary within tight social groups.

“Know your epidemic, know your response” reminds us that we must have a clear understanding of the causes and characteristics of local public health problems before we can know how to tackle them. It reminds us that our choices must be driven by evidence and data; that we must employ strategies we know to be effective; and that we must remain vigilant in maintaining a holistic and grounded understanding of who is at risk of fatal overdose, how that risk is constructed, and what can be done to reduce that risk as much as possible.

2. Make collaboration your strategy

Effective solutions to the opioid overdose crisis will only emerge from strong partnerships across governmental, legal, medical, and other community stakeholders. Collaboration between public health and public safety is especially important, as the impact of illicit opioid use and

prescription opioid misuse is great on both of these fronts.

Overdose prevention strategies will only be successful if the role of each player is well designed, reasonable, and clear—and only if those players take on those roles in deliberate coordination with each other. Accomplishing this requires much more than sharing data and intelligence. The implementation of a proven public health approach such as a 911 Good Samaritan Law may be ineffective if law enforcement officers are not included in the planning and design of its implementation or if public safety protocols at the scene of an overdose are not discussed in tandem with the law. Similarly, the successful police take-down of a clinician or facility operating as an illegal “pill mill” may achieve long-term gains at the expense of creating short-term dangers if a public health strategy to support the patients suddenly cut off from this supply of opioids is not put into place ahead of time.

Effectively responding to the opioid overdose crisis requires that all partners be at the table and that we “make collaboration our strategy” by ensuring that all community entities are able to fulfill their necessary roles.

3. Nothing about us without us

The phrase “nothing about us without us”³ reflects the idea that public policies should not be written or put into place (officially or unofficially) without the direction and input of the people who will be affected by that policy. This mantra has been used by persons living with disabilities as they fought for recognition as independent persons who know their needs better than anyone else.⁴ It has been used by numerous at-risk groups in the U.S. to defend their place at the table in the planning of HIV prevention strategies.^{5,6}

In the context of today's opioid overdose epidemic, “nothing about us without us” speaks to the fact that prevention strategies need to take into account the realities, experiences, and perspectives of those at risk of overdose. Those affected by opioid use and overdose risk should be involved in the design, implementation, and evaluation of interventions to assure those efforts are responsive to local realities and can achieve their desired goals.

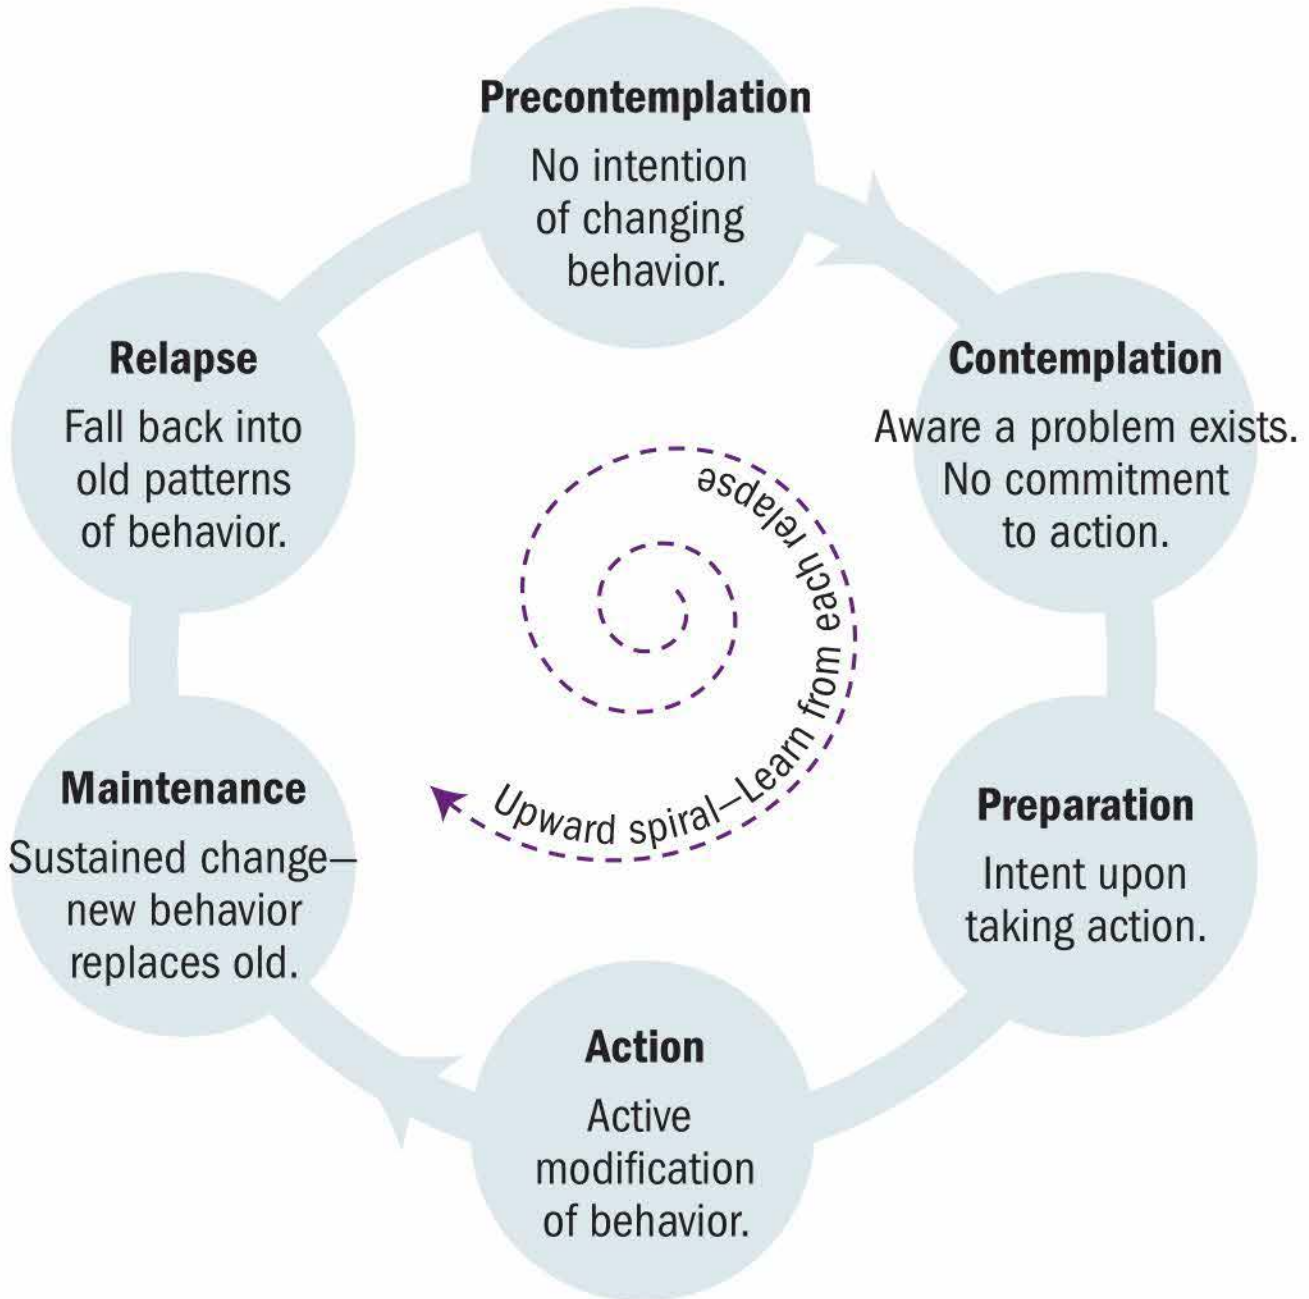

4. Meet people where they are

Meeting people where they are requires understanding their lives and circumstances, what objectives are important to them personally, and what changes they can realistically make to achieve those objectives. For example, abstinence may not be immediately achievable by all who use illicit substances; however, many smaller changes may be feasible and could bring substantial benefit, such as reducing the spread of infectious disease, lowering overdose risk, and improving overall physical or mental health.

The Transtheoretical Model, also called the Stages of Change model,⁷ describes how such behavior change often occurs. The model emphasizes the need to understand the experience of the person we are trying to reach in order to help them. To promote change, interventions must be provided that are appropriate for the stage in the process that people are in.⁸

The guiding principle of “meeting people where they are” means more than showing compassion or tolerance to people in crisis. This principle also asks us to acknowledge that all people we meet are at different stages of behavior change. Furthermore, recognition of these stages helps us set reasonable expectations for that encounter. For example, a person who has experienced an overdose who is precontemplative and has not yet recognized that their drug use is a problem may be unlikely to accept treatment when they are revived, but may benefit from clear, objective information about problems caused by their drug use and steps they can take to mitigate them. Unrealistic expectations cause frustration and disappointment for patients, providers, family, and others touched by the event. Someone who is already preparing for action, however, may be ready for treatment, support, or other positive change. A positive, judgement-free encounter with first responders may provide the impetus and encouragement needed to get started. When we “meet people where they are,” we can better support them in their progress towards healthy behavior change. Recognizing the progress made as a person moves forward through the stages of change can help avoid the frustration that arises from the expectation that they will achieve everything at once.

The Transtheoretical Model of Behavior Change

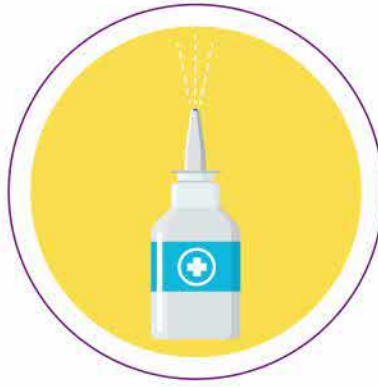

This image is adapted from Prochaska & DiClemente, 1983.

Evidence-Based Strategies

Targeted Naloxone Distribution

Naloxone is an opioid antagonist, that quickly and safely reverses the potentially fatal effects of an opioid overdose. Targeted distribution programs seek to train and equip individuals who are most likely to encounter or witness an overdose—especially people who use drugs and first responders—with naloxone kits, which they can use in an emergency to save a life. There are many different approaches to distributing naloxone to people at high risk of experiencing or witnessing an overdose. Effective approaches include community distribution programs, co-prescription of naloxone to patients with an opioid pain medication or on opioid agonist treatment (a form of MAT), and equipping first responders

Why this strategy works

Naloxone is a drug that carries no risk of abuse and has no effect on individuals who do not already have opioids in their system. It does not generate physical dependency. It produces no neurological or psychological effects or euphoria. It also poses negligible risk of harm if misused. The people who most often witness and respond to an overdose are other persons who use drugs. By equipping these individuals with naloxone and training them to identify and respond to an overdose, the potential delay between the onset of an opioid overdose and the delivery of life-saving care can be reduced from hours to seconds. With powerful opioids, like fentanyl and fentanyl analogs, appearing in the U.S. drug supply, higher doses of naloxone may be needed. Therefore, ready access to naloxone among members of the lay community and first responders is key for saving lives.

Targeted naloxone distribution programs work best when:

- Naloxone is provided at no cost to people at high risk of experiencing or witnessing overdose.³⁶
- Outreach workers, harm reduction staff, and trusted clinicians are properly educated and comfortable distributing naloxone to those using illicit opioids or receiving a high-risk opioid prescription.³⁷
- People who use drugs and first responders are well informed as to the potential effects and actions of naloxone. Comfort with carrying and administering naloxone is crucial.³⁸

TRAILBLAZERS

Naloxone has been carried by hospitals and emergency medical services since it was approved by the FDA in the 1970s.

Large-scale naloxone distribution for people who use drugs was first pioneered by staff at the Chicago Recovery Alliance in 1996.

In 2003, the DOPE Project in San Francisco began distributing naloxone under a standing order from the Medical Director of the local Department of Health—one of the first such standing orders for naloxone in the U.S.

In 2013, Walgreens Pharmacy expanded a pilot naloxone access project in Rhode Island, making the overdose-reversing medication available to any individual on an over-the-counter basis, thus beginning the first such statewide program.

Targeted naloxone distribution—What the research says

- A nation-wide study found that more than 80% of overdose reversals with naloxone in the U.S. were carried out by individuals who also use drugs.³⁹ A similar study carried out in Massachusetts found that nearly 90% of overdose reversals with naloxone were carried out by bystanders who also use drugs.⁴⁰
- An observational study of a naloxone distribution program in British Columbia recorded the distribution of 836 naloxone kits to people who use drugs and 85 reported overdose reversals from among those trained and equipped with naloxone by the program, indicating that at least one in every ten kits distributed had saved a life.⁴¹
- An observational study in Ohio found that increases in the number of law enforcement officers trained and carrying naloxone was associated with a reduction in opioid overdose deaths and an increase rate of survival among opioid overdose victims in the surrounding area.⁴²
- A retrospective review of all program enrollee information collected by the Massachusetts Department of Public Health Overdose Education and Naloxone Distribution Program found that family members of persons at risk of overdose comprised nearly 30% of the program's enrollees and were responsible for 20% of all recorded rescue attempts. Some of those rescues were performed on someone other than the relative these participants were originally concerned about. These findings indicate that naloxone distribution across families and social networks can have life-saving, synergistic effects.⁴³
- An observational study of nearly two thousand individuals who had received an opioid prescription over a two year period found that those individuals who were co-prescribed naloxone along with their opioid analgesic prescription had 47% fewer visits to the emergency department in the 6 months after receiving the prescription and 63% fewer emergency department visits after 1 year.⁴⁴

Medication-Assisted Treatment (MAT) with Opioid Agonist Medications

MAT is a proven pharmacological treatment for opioid use disorder. The backbone of this treatment is regular dosing with FDA approved opioid agonist medications: methadone or buprenorphine.[†] These drugs activate opioid receptors in the brain, preventing painful opioid withdrawal symptoms without causing euphoria, helping people to lead normal lives.

Why this strategy works

The World Health Organization has called MAT “one of the most effective types of pharmacological therapy of opioid dependence.”⁵⁵ Numerous studies have shown that MAT contributes to significant reductions in opioid use, criminal activity, overdose, and other risky behaviors.^{56,57} MAT is more effective when it combines ancillary treatment strategies like counseling and social support with fixed, safe, and predictable doses of medications that interact with opioid receptors, just as other prescription or illicit opioids do.^{58,59} As a result of this pharmacological mechanism, MAT quiets cravings and allows patients receiving it to stabilize their physical dependency. This stability allows MAT patients to achieve healthy social, psychological, and lifestyle changes before taking on the significant physical and mental challenge of tapering or ceasing their use of medication.

MAT works best when:

- Public awareness of MAT as an effective medical intervention is promoted by local leadership. This helps to reduce stigma against MAT that discourages people from seeking this form of care.
- Entry into treatment is voluntary. Compulsory treatment programs through legal and social welfare systems are less effective than voluntary treatment.⁶⁰
- Patients have access to a variety of medication options. All patients are different, and treatment is best when individualized. Some people fare significantly better on buprenorphine than on methadone, and vice versa. Some may need to try several treatment options before discovering what works best.⁶¹
- The challenges of receiving MAT are understood and mitigated. Many individuals face hurdles in receiving approval for MAT from their health insurance provider. Many methadone clinics require patients to attend daily to receive treatment. This can mean long, burdensome commutes at odd hours, which can conflict with professional, familial, or care-giving responsibilities.⁶² Treatment is more successful when these obstacles are not placed in patients’ way.

TRAILBLAZERS

Methadone, which originally was synthesized by German scientists in the 1930s, was first used as a medication for opioid dependency in the 1960s, when heroin-related mortality was the leading cause of death for adults between 15 and 35 years old in New York City.⁶³

Buprenorphine was approved by the FDA for use in MAT in 2002, and the U.S. Substance Use and Mental Health Services Administration (SAMHSA) released guidelines for the clinical management of buprenorphine-based MAT in 2004.⁶⁴

Medication-assisted treatment—What the research says

- A meta-analysis that included eleven different studies of methadone as a medication for opioid use disorder found that methadone was more effective at treating opioid use disorder and reducing illicit opioid use than non-pharmacological treatments.⁵⁶
- A 2014 review of all available evidence on buprenorphine as a treatment for opioid use disorder found it to be effective in retaining patients in care and just as effective as methadone in reducing illicit opioid use among those retained in care.⁵⁷
- A longitudinal study that followed MAT patients for more than four years found both methadone and buprenorphine to be effective long-term treatments for opioid use disorder throughout that follow-up period.⁶⁵
- A recent meta-analysis concluded that participation in pharmacological treatment for opioid use disorder, such as MAT, improves HIV treatment across the entire continuum of care, increasing coverage of antiretroviral treatment by 54%, increasing enrollment into antiretroviral treatment by 87%, increasing antiretroviral treatment adherence by nearly 200%, increasing rates of viral suppression by 45%, and reducing antiretroviral treatment discontinuation by 23%.⁶⁶
- A recent study that followed MAT patients for a year after initiating treatment found that MAT patients experienced a significantly improved quality of life during the course of their treatment.⁶⁷

† Naltrexone (a long-acting drug similar to naloxone) is a third drug that has been approved by the U.S. Food and Drug Administration for use in MAT. Naltrexone, however, is an opioid antagonist, meaning it blocks the action of opioids. A recent meta-analysis of current scientific research on naltrexone has concluded that few people who intend to begin treatment with naltrexone actually follow through and that those who do initiate naltrexone-based MAT often discontinue treatment early.⁵⁴ Scientific evidence about the efficacy of naltrexone as a medication for the treatment of opioid use disorder is very new and has produced mixed results. In contrast, the scientific evidence on the effectiveness of methadone and buprenorphine is robust and has shown consistent effect across several decades.

Academic Detailing

“Detailing” is a structured educational strategy developed by commercial manufacturers of medical and pharmaceutical technologies to market these products to prescribers and pharmacists. “Academic detailing” consists of structured visits to healthcare providers by trained professionals who can provide tailored training and technical assistance, helping healthcare providers use best practices.

Why this strategy works

The purpose of commercial detailing, the sales strategy upon which academic detail is based, is the targeted marketing of pharmaceutical products to healthcare providers who are best positioned to prescribe them, which, depending on state law, includes physicians, physician assistants, nurse practitioners, and pharmacists. Academic detailing takes the most effective practices of this commercial marketing and applies them to the “marketing” of evidence-based practices to healthcare providers and other community stakeholders. In the context of overdose prevention efforts, academic detailing has been used to assist physicians in reducing potentially risky opioid prescribing practices, to prepare pharmacists to effectively distribute naloxone to the public, and many other innovative and community-based initiatives designed to deliver new skills to those individuals poised to make an impact on the rate of overdose in their communities.

Academic detailing works best when:

- Dedicated and trained detailing teams are deployed for all academic detailing activities, as this strengthens the detailing approach and fosters consistency within the project.⁹¹
- The individuals who receive academic detailing possess the means and resources to put their newly gained knowledge to use. For instance, physicians who treat patients receiving opioid medications often benefit from additional staff support, as evidence based opioid prescribing requires additional patient follow-up activities and administrative tasks.⁹²

TRAILBLAZERS

Since 2013, the New York City Department of Health and Mental Hygiene, in collaboration with the U.S. Centers for Disease Control and Prevention (CDC), has actively undertaken two academic detailing campaigns: one to support providers of buprenorphine-based MAT with additional training and assistance, and the other to train and support clinic staff in adopting safe opioid prescribing practices.

The San Francisco Department of Public Health recently sponsored the CIAO (California Intervention for Academic Detailing on Opioids) study, which supported rural counties in developing and implementing academic detailing for primary care providers on safe opioid prescribing, overdose prevention, and buprenorphine-based MAT.

The Veterans Health Administration has made academic detailing a key component of its national Opioid Overdose Education and Naloxone Distribution program.

Academic detailing—What the research says

- A recent review found that commercial detailing is so effective in prompting behavior change among healthcare providers that its effects are overpowering those of traditional academic information sources. One major factor behind this pattern is that researchers who produce and seek to disseminate scientific medical knowledge are rarely trained in effective communication strategies. Academic detailing corrects this disparity by “marketing” new science to healthcare providers in a compelling and efficacious manner.⁹³
- Academic detailing has been used to improve physician practices across a variety of medical spheres, including opioid prescribing,⁹⁴ proper medication dosing for patients with limited renal function,⁹⁵ and the timely screening of pregnant women for high-risk infections.⁹⁶
- In a recent study on the effects of academic detailing among respiratory specialists, those who received detailing significantly improved their clinical management of refractory breathing. Further, more than 80% of those physicians who did not receive detailing lacked confidence in their knowledge of and ability to manage this condition.⁹⁷
- A 2013 overdose prevention intervention carried out on Staten Island used targeted educational sessions with medical providers to reduce rates of inappropriate opioid prescribing and overdose death. The intervention resulted in a 29% decrease in prescription opioid overdoses on Staten Island, even as overdose rates remained unchanged in New York City’s other boroughs.⁹⁸
- Recent efforts to increase the rate of naloxone prescription by general practitioners through academic detailing have shown remarkable results. A study in San Francisco found an eleven-fold increase in the rate of naloxone prescription among physicians who received a half-hour-long academic detailing session.⁹⁹ Further, a large scale academic detailing effort in the Veterans Health Administration was able to reach more than (b)(6) physicians in less than a year.¹⁰⁰ This effort resulted in a three-fold increase in naloxone prescription one year after the intervention and a seven-fold increase two years later, indicating that physicians were enabled to improve their clinical practice independently even after the academic detailing had taken place.¹⁰¹

Eliminating Prior-Authorization Requirements for Medications for Opioid Use Disorder

In this scenario, health insurance providers cover the cost of MAT as a standard benefit, and all requirements that a physician contact the insurance provider for approval prior to writing the prescription (a process called “prior authorization”) are removed. Without these prior authorization requirements, prescriptions for MAT medications to treat opioid use disorder can be written and filled as soon as a physician deems this treatment necessary, free from artificial delays.

Why this strategy works

Prior authorizations may take up to several days to process with insurance providers. This processing time creates an immediate barrier to a patient’s initiation onto treatment. This delay forces patients to leave their provider’s office without receiving potentially life-saving medication, only to return again to receive it several days later. During that time, treatment can be derailed. A patient may lose interest, lose access to their doctor, lose transportation, suffer an injury, or even die from an overdose.

The removal of prior authorization requirements allows a patient to be initiated onto treatment the same day they see their doctor. This immediate initiation reduces the patient’s risk of overdose in the subsequent days and increases the likelihood that they will successfully engage in and remain connected to treatment.

Removing prior authorization requirements works best when:

- Policy makers and healthcare providers work collaboratively with health insurance companies and state Medicaid programs to design and implement these policy changes.⁸¹

TRAILBLAZERS

In 2016, an investigation of barriers to treatment for opioid use disorder in New York prompted Cigna to voluntarily remove all prior authorization requirements for policy holders seeking prescription buprenorphine. Anthem Inc. also removed these requirements a few months later.

In March 2017, Aetna removed all prior authorization requirements for its private insurance plans.

In Rhode Island, the Governor's Overdose Prevention Task Force brought insurance company representatives to the table to help coordinate statewide overdose reduction measures. Following these collaboration efforts, Neighborhood Health Plan of Rhode Island and United Healthcare, the state's two Medicaid managed care providers, removed prior authorization for prescription buprenorphine for all of their policyholders to better support the state's overdose prevention efforts.

Eliminating prior-authorization requirements for medications for opioid use disorder— What the research says

- Between 2004 and 2013, the number of states covering buprenorphine through Medicaid increased, but so did the proportion of states requiring pre-authorization for buprenorphine. As the availability of care has expanded, so have barriers to that care.⁸²
- In 2014, prior authorization for prescription buprenorphine was still required for 35% of Health Maintenance Organizations (HMOs), 36% of Preferred Provider Organizations (PPOs), and more than half of Consumer Driven Products (CDPs).⁸³
- Self-treatment with diverted opioid medications is common among individuals with opioid use disorder who have recently experienced barriers to or delays in starting buprenorphine-based MAT.^{84,85}

Screening for Fentanyl in Routine Clinical Toxicology Testing

The standard panel of substances included in routine clinical drug screens (carried out in hospitals, clinics, treatment centers, etc.) should include screening for fentanyl exposure, particularly in jurisdictions where fentanyl is known to be prevalent in the local illicit drug market.

Why this strategy works

Because it is such a highly potent and fast acting opioid, and because it is often difficult—if not impossible—to identify prior to consumption, the presence of fentanyl in illicit drug supplies changes the landscape of opioid overdose dramatically. Harm reduction, risk reduction, and opioid overdose prevention efforts all need to be informed by an awareness of fentanyl exposure in the populations served in order to continue affording maximum safety and protection to community members who are navigating a fentanyl-contaminated drug supply.

The addition of fentanyl testing in routine clinical toxicology tests allows for early warnings of supply contamination and provides one of the best sources of routine surveillance for fentanyl in the local drug supply. The results of fentanyl screens may also have implications for the clinical management of substance use disorder for fentanyl-exposed individuals and for public health responses to opioid use and overdose.

Fentanyl testing in routine drug screens works best when:

- Adjustments are made to funding streams, standard lab procedures, and electronic medical records (EMR) systems to accommodate and standardize this change in practice.^{86,87}
- Trends in the results of fentanyl screens are shared effectively across public institutions with the capacity to intervene amongst those who intentionally or unintentionally consume fentanyl and reduce the risk of overdose.⁸⁸

TRAILBLAZERS

In 2017, Lifespan, the parent company of the largest hospital network in Rhode Island, instituted a new policy mandating that fentanyl be added to the panel of drugs screened for among patients who are in the emergency department following an overdose. This practice ultimately became part of the state's Standard of Care for the Treatment of Opioid Addiction and Overdose in Emergency Departments and Hospitals.

Some outpatient methadone-based MAT programs have also begun testing for fentanyl in all urine screens, identifying individuals who were struggling in treatment and may not have known they were at risk of fentanyl-related overdose.⁸⁹

Screening for fentanyl in routine clinical toxicology testing—What the research says

- A study conducted in Vancouver, British Columbia, that tested urine samples from 242 people who inject drugs found that 29% of all participants (only 59% of whom reported using heroin) tested positive for fentanyl. Of those who tested positive for fentanyl, nearly 75% did not report using fentanyl in the past three days, indicating that they were not aware they had been exposed. The same study also found that methamphetamine users had 6-times the odds of testing positive for fentanyl, compared to those who did not report using methamphetamine. At the time, this was a counter-intuitive finding, which would have likely not been discovered without adding fentanyl screening to these drug testing procedures.⁸⁸
- A recent study conducted in the Detroit area found that 38% of clients receiving methadone-based MAT tested positive for fentanyl in standard monthly drug screenings at least once between January 2015 and May 2016. Clients who tested positive for cocaine were more likely to test positive for fentanyl as well.⁹⁰
- Data collected from more than 700 medical records at a methadone-based MAT clinic in Rhode Island revealed that approximately one in seven methadone patients tests positive for fentanyl each month, and nearly two-thirds of new patients initiating methadone-based MAT tested positive for fentanyl at intake.⁸⁹ Each of these factors may shape a patient's experience of treatment and individual needs while receiving care.

911 Good Samaritan Laws

The term “911 Good Samaritan Law” refers to local or state legislation, which may provide overdose victims and/or overdose bystanders with limited immunity from drug-related criminal charges and other criminal or judicial consequences that may otherwise result from calling first responders to the scene. The scope of 911 Good Samaritan Laws varies across U.S. states, but each is written with the goal of reducing barriers to calling 911 in the event of an overdose.

Why this strategy works

Frequently, individuals who witness an overdose have been using opioids themselves. Calling 911 for an overdose victim is an inherently risky thing for such bystanders to do. Emergency medical services are often accompanied by the police, and police have the discretion to execute warrants, search the premises, and arrest bystanders for drug-related charges that are coincidental to the overdose emergency at hand. When facing the risk of arrest, detention, prosecution, and potentially prison time, bystanders are forced to weigh their own wellbeing against the wellbeing of the person who is in crisis in front of them.

By providing limited immunity from drug charges arising from evidence found at the scene of an overdose, 911 Good Samaritan Laws defuse this conflict, allowing a bystander to seek emergency care for an overdose victim without putting themselves at risk of arrest.

Good Samaritan Laws are most effective when:

- Immunity is extended to all bystanders on the scene, not only to the individual in crisis and the individual who called 911.⁹
- Bystanders are protected from parole violations and warrant searches in addition to receiving immunity from criminal charges. Any perceived risk to the freedom or safety of the bystander reduces the probability that 911 will be called.^{9,10}
- Police officers and other first responders are well informed as to their liabilities and responsibilities when responding to an overdose as outlined in their state’s 911 Good Samaritan Law and other state and local regulations.
- People who use drugs are well informed about the 911 Good Samaritan law and have reason to trust that those protections will be consistently afforded to them when they call 911.¹¹
- The hospital experiences of people who use drugs are strengthened and improved. Users will not call for emergency care if they don’t want to be transported to the hospital due to previous maltreatment.¹²

TRAILBLAZERS

In 2007, New Mexico became the first state to pass a 911 Good Samaritan Law for overdose prevention—extending immunity from criminal liability for drug possession to victims of an overdose crisis and for those who seek help.

As of May 2018, all but five states have enacted similar legislation.

911 Good Samaritan Laws—What the research says

- A large study of overdose scenarios in Baltimore found that 911 was called during only one in five overdoses witnessed, and that the presence of more than four bystanders statistically decreased the probability that 911 would be called.⁹
- An evaluation of 911 Good Samaritan Law education efforts in New York City found that awareness of this law statistically increased the likelihood that a bystander would call 911 in the event of an overdose. This finding was true for all participants across race, age, and gender.¹¹
- Multiple studies in the U.S. and Canada have observed that bystanders of an overdose are concerned that they will be arrested or have negative police interactions if 911 is called, which effectively deters many bystanders from making the call.^{13,14}
- A large study of opioid using parolees in Alabama found that a number of bystanders (about 30%) will try to find help through means other than calling 911, such as dropping off the overdose victim at a hospital. Though it may be done with good intentions, this response could mean a fatal delay in care for the overdose victim.¹⁵
- Many police officers, when first introduced to the idea of 911 Good Samaritan Laws, experience concern about jurisdictional issues and liability surrounding the carry and administration of naloxone.¹⁶ However, simple trainings and informational tools have been shown to quickly increase police officer familiarity and comfort with overdose response.¹²
- Young opioid users in Rhode Island have poor awareness of the local Good Samaritan law, indicating that targeted awareness raising may be needed for these laws to be effective across the entire community.¹⁷

Naloxone Distribution in Treatment Centers and Criminal Justice Settings

Naloxone distribution programs in criminal justice and treatment facilities (both inpatient and outpatient) target individuals who are about to be released from supervision and/or cease treatment to receive overdose response training and naloxone kits prior to their exit from the program or facility.

Why this strategy works

Individuals with a history of incarceration are, in general, at higher risk of overdose. Periods immediately following release from supervision or treatment, when a person's opioid tolerance is low, are especially dangerous: an individual is more than twenty-five-times more likely to overdose in the first weeks following the cessation of treatment than during treatment,⁴⁵ and release from incarceration, also defined by abrupt reintegration in the context of lowered opioid tolerance, places individuals with opioid dependency at similar risk.⁴⁶ Naloxone distribution programs operated within treatment and correctional settings are an effective way to train and equip this extremely high-risk group—as well as their friends and loved ones—with life-saving naloxone.

Naloxone distribution in treatment centers and criminal justice settings works best when:

- Coverage of these distribution programs is universal, providing all individuals leaving criminal justice settings or treatment with the opportunity to be trained and receive a naloxone kit. This is preferable to opt-in programs that require inmates to request special services to receive naloxone.⁴⁷
- Training is provided in a way that refrains from making negative judgments about drug use and focuses instead on the importance of every person's safety and wellbeing even in the context of drug use.⁴⁸
- Close contacts of the individual (family, partners, and children) are also trained in naloxone administration and overdose response.³⁶
- Prices for naloxone are collectively negotiated and clear funding streams are established to sustain the cost of the naloxone that is needed to provide full coverage to these population. In treatment settings, an individual's insurance can cover the cost of naloxone.⁴⁹

TRAILBLAZERS

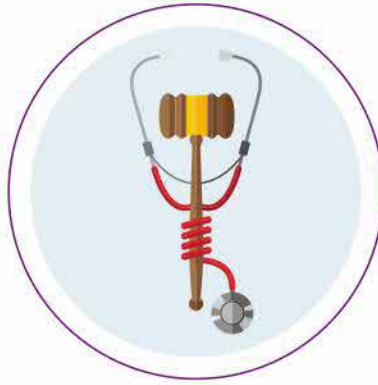

The first pilot programs for overdose prevention for incarcerated individuals took place in jails in Pittsburg and New York City, where naloxone was provided to incarcerated persons upon release or to caregivers visiting the detainees.

Since 2005, Rhode Island's adult prison system has trained inmates on overdose prevention. The prison then began providing naloxone to inmates at release in 2010, a model that other states have since adopted.

Baltimore area jails began distributing naloxone to at-risk individuals in 2016, following a recommendation from Maryland's Heroin and Opioid Emergency Task Force.

Naloxone distribution in treatment centers and criminal justice settings— What the research says

- A nationwide study of more than 10,000 individuals exiting specialized drug treatment settings in the U.S. found that rates of overdose death were twenty-six times higher in the first month following the cessation of treatment compared to the rate of overdose death while individuals were in treatment.⁴⁵
- A similar study of more than 5,000 individuals ceasing outpatient medication-assisted treatment (MAT) for substance use disorder found that overdose death rates were nine times higher than baseline in the first two weeks following treatment cessation, eight times higher in weeks three and four following treatment cessation, and approximately 1.9 times higher in the second month.⁵⁰
- A large meta-analysis of data from several different nations found that individuals released from incarceration experience a three to eight-fold increase in the rate of overdose death in the first two weeks after release compared to weeks three through twelve following release.⁵¹
- A study carried out by the Massachusetts Department of Public Health found that individuals recently released from incarceration in the Commonwealth are 56 times more likely to overdose than members of the general public, indicating urgent need to scale up overdose prevention services for this population both before and after release.⁵²
- Scotland's National Naloxone Programme, which started providing naloxone at release to inmates in 2011, was associated with a 36% reduction in the proportion of opioid-related deaths that occurred within the first four weeks following an individual's release from prison.⁵³

MAT in Criminal Justice Settings and Upon Release

In this intervention, MAT should be made available as a standard of care for incarcerated individuals with opioid use disorder. Those receiving MAT when they enter a criminal justice setting may continue receiving this treatment, and those who are not on treatment may initiate and continue this form of care while incarcerated and then be linked with appropriate care providers to continue MAT upon release.

Why this strategy works

MAT is one of the most effective forms of care available for opioid use disorder. MAT has been shown to lower rates of illicit drug use, lower risk of overdose, lower rates of drug-related crime, and increase engagement with many other essential forms of healthcare.

Providing MAT in jails and prisons not only brings healthcare in correctional facilities up to meet current medical standards for the treatment of this medical disorder, it also improves the likelihood that incarcerated persons will engage in care in the future and lowers the likelihood of relapse, problem opioid use, and risky opioid use after release.

MAT in criminal justice settings works best when:

- MAT is uninterrupted for those who were receiving care prior to incarceration.⁶⁸
- MAT can be initiated in criminal justice settings.⁴⁷
- Individuals have access to both buprenorphine and methadone. This choice is essential, as some individuals fare much better (or worse) on one of these drugs than on the other.⁶¹
- An effective system for referral and linkage to care is in place so that individuals on MAT can receive a “warm handoff” to providers who are able to continue their care upon release.⁶⁹ Otherwise, recently released individuals are forced to choose between enduring painful opioid withdrawal and quickly finding another source of opioids. The quickest and easiest sources of opioids are illicit ones.

TRAILBLAZERS

Rikers Island Correctional Facility, New York City's jail, has been offering MAT with opioid agonist medication to inmates since 1987. Today, the facility provides both methadone and buprenorphine.

Vermont began piloting MAT care (both methadone and buprenorphine) at two of its jails in 2014.

In 2016, Rhode Island became the first state to implement a program offering buprenorphine, methadone, or naltrexone to all incarcerated persons (in jail or in prison) with substance use disorder, initiating many into MAT care for the first time.

MAT in criminal justice settings and upon release—What the research says

- Multiple studies have found that MAT with methadone or buprenorphine in correctional facilities is associated with decreased heroin use, decreased levels of syringe sharing, decreased criminal activity, and a significantly higher probability of engaging with treatment upon release.⁷⁰⁻⁷³
- A study conducted among nearly 300 incarcerated persons in Rhode Island concluded that forced withdrawal from methadone, which is required in correctional facilities where MAT is not available, reduces the likelihood that an individual will engage in care after release.⁷⁴
- A study conducted at Rikers Island found that individuals given buprenorphine-based MAT during a 10–90 day incarceration were more likely than those given methadone-based MAT to continue treatment after release.⁷⁵
- A Baltimore study found that incarcerated individuals who received methadone stayed in treatment for an average of 166 days in the year following their release, whereas those who received only counseling but no MAT engaged in treatment for an average of 23 days following release and were more likely to test positive for opioids at 12 months after release.⁷⁶
- Within one year of initiating its new MAT program in all state adult correctional facilities, the state of Rhode Island observed a 60% decrease in the proportion of recently incarcerated individuals who suffered a fatal overdose. The state also observed a 12% overall decrease in overdose fatalities compared to the previous year, which can be attributed to the deaths prevented by the prison's MAT program.⁷⁷

Initiating Buprenorphine-based MAT in Emergency Departments

Patients receiving care in emergency departments who have untreated opioid use disorder are referred to a provider for long-term buprenorphine-based MAT. This referral is accompanied by initial doses of buprenorphine or a short-term prescription that can be filled at right away. The patient can begin treatment immediately, instead of waiting several days for their appointment with a new provider.

Why this strategy works

Even if a patient in the emergency department is very eager to begin MAT, receiving a referral and possibly waiting several days to begin care greatly decreases the likelihood that this patient will successfully engage in care. Providing an initial dose of buprenorphine in the emergency department eliminates these delays in care, and allows the patient to begin experiencing the benefits of MAT immediately. Subsequent daily doses provided by the hospital (either by prescription or by supervised consumption at the hospital pharmacy) serve as a “bridge,” providing the patient with care on a temporary basis, if necessary, while a referral and “warm hand off” to a physician who can continue to provide MAT is carried out.

Initiating buprenorphine-based MAT in emergency departments works best when:

There is no broadly accepted “best practice” for initiating patients onto buprenorphine-based MAT in an emergency department. This intervention is very new, and researchers are still studying how best to serve patients’ needs and assist them in engaging with care. Patients who are initiated in the emergency department are very likely there because they have experienced an overdose crisis. It can be expected that such an experience may change the meaning of treatment for these patients, and the value of treatment may change in an inconsistent or counter-intuitive way over time.

What we do know, however, is that each instance of engagement in MAT, even if the patient eventually drops out of care, predicts higher success the next time treatment is sought. Furthermore, providing “bridging” doses of MAT medications to individuals seeking treatment greatly improves patient engagement in MAT care during treatment initiation—a key moment for those with opioid use disorder, when maintaining trust and stability is of utmost importance.^{78,79}

TRAILBLAZERS

Yale University Hospital in New Haven, Connecticut, was the first institution to begin initiating MAT in their emergency department in 2015. They found that patients who started MAT in the emergency department were twice as likely to be engaged in treatment 30 days after discharge.

Boston Medical Center operates the Faster Paths to Treatment program in a similar way. The program also initiates patients with opioid use disorder hospitalized for other conditions and people in residential treatment programs in the community who request or would benefit from MAT. Patients are immediately stabilized on buprenorphine or connected to a methadone program and then actively transitioned to a primary care provider or other provider of long-term care. Patient navigators assist patients in connecting with and continuing care.

Initiating buprenorphine-based MAT in emergency departments—What the research says

- A 2010 study conducted in a location with very long wait lists (6 months or more) for MAT provided opioid users who were seeking treatment immediate access to buprenorphine via prescription while they waited for a slot in a formal treatment program. Compared to those who were not offered this medication immediately, these individuals reported significant reductions in illicit opioid use, opioid withdrawal symptoms, and opioid cravings, even before they began wrap-around treatment. The medication adherence rate was 99%, indicating almost no medication diversion.^{78,79}
- Yale University Hospital conducted a randomized controlled trial to test the effect of initiating patients on buprenorphine in the emergency department and then continuing that MAT in primary care. Two months later, those patients who received buprenorphine prior to a referral for MAT were more likely to be engaged in care and had lower rates of illicit opioid use. Six months later, the study's findings were less encouraging, which indicates that patients initiated onto MAT in the emergency department may need additional supports to remain engaged in care.⁸⁰ The hospital now employs patient navigators and counselors to support patients who may be struggling to maintain their treatment.

Syringe Services Programs

Sometimes called “needle exchange” or “syringe exchange,” syringe services programs provide access to clean and sterile equipment used for the preparation and consumption of drugs as well as tools for the prevention and reversal of opioid overdose, such as naloxone training and distribution, fentanyl testing strips, and more. Comprehensive syringe services programs also provide additional social and medical services such as: safe disposal of syringes and needles; testing for HIV and hepatitis C infection and linkage to treatment; education about overdose and safer injection practices; referral and access to drug treatment programs, including medication-assisted treatment (MAT); tools to prevent HIV and other infectious disease, such as condoms, counseling, or vaccinations; and linkage to medical, mental health, and social services.

Why this strategy works

Syringe services programs are a key component of overdose prevention strategies, because they can facilitate access to and uptake of services and interventions for reducing overdose, enhancing health and wellbeing, and improving public health and public safety.

First, some, but not all, people who use drugs experience homelessness, poverty, and other social or financial insecurities that make acquiring clean injection equipment challenging, even in locations where syringes can be purchased without a prescription. The free distribution of clean injection equipment lowers the frequency of syringe sharing and re-use,^{18–20} with major protective impacts on the rates of infectious diseases like HIV and hepatitis C as well as other injection-related infections or soft tissue injury.^{21,22} Individuals who participate in syringe services programs are also more likely to seek treatment for a substance use disorder.²³

Second, syringe services programs provide people who use drugs a non-judgmental environment

in which they are able to build supportive and trusting relationships, talk freely about their needs and concerns, and re-enforce feelings of self-worth, empowerment, and control. Relief from the shame and judgment carried by the stigma associated with drug use gives people the freedom to think objectively about the risks their drug use may pose to themselves and others and to strategize steps they can take to mitigate those risks. For people who are highly socially marginalized and have internalized large amounts of stigma about their drug use, these services can substantially benefit their safety and chances of survival.

Third, if and when someone who uses drugs chooses to seek medical care, naloxone access, or substance abuse treatment, syringe services programs and their staff are able to help their participants connect with and navigate these services, making syringe services programs a key component of overdose prevention efforts on all fronts.

Syringe services programs work best when:

- They provide an adequate supply of sterile syringes. Limiting the number of syringes an individual may receive reduces the effectiveness of the intervention. Programs with one-for-one exchange policies, for example, allow participants only as many syringes as the number of used syringes they return, thus undercutting the program's own effectiveness.²⁴ When no limits are set on the number of syringes distributed, participants are more likely to have clean syringes on hand when they need them, and they can provide syringes to many more people than can attend the program themselves, thus multiplying the program's effectiveness. This also increases participants' incentive to visit the program and interact with staff and counselors.²⁵
- The needs and concerns specific to the local drug using community are addressed and accommodated by the program.²⁶
- Program participants who are seeking treatment for opioid use disorder or for other physical or mental health concerns are offered assistance in accessing appropriate care.^{27,28}

Syringe services programs—What the research says

- Users of syringe service programs are five times more likely to enter drug treatment and 3.5 times more likely to cease injecting compared to those who don't utilize these programs.³⁰
- Syringe services programs are more effective at preventing disease and maximizing service coverage when distribution rules are less restrictive, such as when the program is distribution-based, not exchange-based, and when distribution limits are high.^{24,31}
- A key element to the success of syringe access programs in reducing disease and overdose and in connecting more participants with care is the refocusing of public responses to drug use away from criminal justice approaches, which discourage safer drug use behaviors and requests for help, to public health approaches focused on the underlying drivers of these risks.³² Law enforcement officials can play an important role as partners in this shift by directing people found using illicit drugs to treatment programs rather than arresting and detaining them.
- A recent study found that individuals who use drugs who were recently incarcerated are at significantly higher risk of overdose and are more willing than their non-incarcerated peers to receive training for and administer naloxone when this is offered by a syringe services program, making syringe service programs a particularly important intervention for assisting these high risk individuals.³³
- Some regions have begun implementing syringe access and disposal services at pharmacies and have achieved success in decreasing syringe sharing and reuse.³⁴ However, a study in San Francisco found that more than 65% of active drug users interviewed regularly disposed of syringes at syringe access programs, and almost none disposed of syringes at pharmacies, indicating that pharmacies alone cannot fill the role played by these programs with respect to syringe disposal.³⁵

TRAILBLAZERS

The concept of syringe access was borne from local efforts to prevent hepatitis B in the 1980s in Rotterdam, Holland.

In the 1990s, the U.S. government funded several studies, which demonstrated the effectiveness of syringe services programs, leading then-Secretary of HHS Donna Shalala and NIDA Director Nora Volkow to herald the efficacy of these programs.

By 2014, syringe services programs were operating in nearly 200 U.S. cities.

In 2015, the U.S. government passed a law ending a longstanding ban on Federal funding for syringe services programs, allowing federal funds to be used to support these activities.²⁹

The state of Kentucky became the first southern state to legalize syringe services programs in 2015, opening numerous service locations across the state. These programs offer all participants referrals to drug treatment, case management, HIV and hepatitis C testing and referral to treatment, syringe access, and safe syringe disposal services. In the first six months of operation, these programs served more than 1400 unique individuals and distributed more than 128,000 clean syringes. A similar syringe service program run by the Cabell-Huntington Health Department in West Virginia helped reduce the proportion of their clients sharing syringes from above 25% to below 10% between September 2015 and March 2016.

The People's Harm Reduction Alliance, a community organization that provides syringe services to communities across western Washington and northern Oregon, employs a variety of methods for reaching individuals in need of services including stationary or "brick and mortar" locations and supply delivery on demand by car, by bike, or on foot. Since 2007, the organization has distributed more than 10,000 naloxone kits and has recorded more than 5,000 overdose reversals based on client reports.

Risk Assessment Matrix

		SCALE OF SEVERITY			
			ACCEPTABLE	TOLERABLE	GENERALLY UNACCEPTABLE
SCALE OF LIKELIHOOD	NOT LIKELY	LOW	MEDIUM	MEDIUM	
	POSSIBLE	LOW	MEDIUM	HIGH	

Risk Assessment List

RISK	AREAS AFFECTED (Planning vs. Implementation)	SEVERITY	LIKELIHOOD	RISK IMPACT	RECOMMENDED ACTION(S)
OPE Workgroup webinar scheduling is difficult to coordinate	Planning	Tolerable	Not likely	Medium	Prioritize workgroup members with mandatory attendance
OPE Workgroup unable to reach consensus in recommendations to CDC	Planning	Generally unacceptable	Not likely	Medium	Lack of expert consensus may reflect area with little evidence to guide prescribing; work with workgroup chair to decide upon analysis approach
OPE Workgroup cannot complete report in time for winter NCIPC BSC meeting	Planning	Generally unacceptable	Not likely	Medium	Encourage workgroup chair to further delegate report writing tasks
Knowledge gaps exist in best practice opioid prescribing for certain indications even after OPE Workgroup input	Planning	Acceptable	Possible	Low	Account for gaps in subsequent analysis; workgroup is expected to inform on strategy for this
OPE Workgroup recommendations to CDC prompt a major change in analytic approach for the opioid prescribing estimates project	Planning	Acceptable	Possible	Low	Adjust timeline for completion of analysis and manuscript preparation
Public comment and/or peer review of prescribing estimates manuscript necessitate major revisions	Planning	Acceptable	Possible	Low	Adjust manuscript timeline to account for incorporation of significant feedback
AHRQ scoping reports for acute and/or chronic pain are delayed beyond their anticipated timeline, delaying CDC decision to pursue a full systematic review and possible CDC guideline update	Planning	Tolerable	Possible	Medium	Adjust timeline for consideration of full systematic reviews
AHRQ scoping reports for acute and/or chronic pain do not prompt need for a full systematic review	Planning	Acceptable	Not likely	Low	Strategize about timing of next AHRQ scoping report(s)
If pursued, AHRQ systematic reviews for acute and/or chronic pain are delayed beyond their anticipated timeline, delaying consideration of CDC guideline updating	Planning	Tolerable	Possible	Medium	Adjust timeline for consideration of CDC Guideline update
If completed, AHRQ systematic reviews for acute and/or chronic pain result in significant changes to existing recommendations that might negatively impact current clinical practice	Planning	Tolerable	Not likely	Medium	Strategize about timing of next AHRQ systematic reviews to inform possible Guideline update
Delays in guideline clearance by other opdivs	Planning	Tolerable	Possible	Medium	Adjust timeline for CDC Guideline update
Misinterpretation by stakeholders of the opioid prescribing estimates analysis and its findings/conclusions (e.g. inappropriately considered to be an opioid prescribing guideline)	Implementation	Tolerable	Probable	High	Consistent messaging regarding the purpose and outcomes of this project by CDC, other federal partners engaged in this work, plus HHS
Clinical tools are not well-received by providers in the field	Implementation	Generally unacceptable	Not likely	Medium	Gather stakeholder feedback on areas of needed guidance to inform future tools
Clinical tools do not meet needs for prescribing guidance for certain indications	Implementation	Tolerable	Possible	Medium	Foster further research in areas where gaps may exist
Current trends demonstrating an overall decline in opioid prescribing slow or stop entirely	Implementation	Tolerable	Possible	Medium	Encourage research, both internally and via external stakeholders, of evolving factors affecting opioid prescribing trends
Development of clinician fatigue to additional opioid prescribing guidance	Implementation	Tolerable	Not likely	Medium	Develop novel methods to communicate prescribing guidance to clinicians
Reductions in opioid supply have unanticipated effects on opioid prescribing behaviors independent of patient risk/benefit analysis	Implementation	Tolerable	Not likely	Medium	Encourage research, both internally and via external stakeholders, of evolving factors affecting opioid prescribing trends

SEVERITY

- Acceptable
- Tolerable
- Generally unacceptable

LIKELIHOOD

- Not likely
- Possible
- Probable

IMPACT

- Low
- Medium
- High

Entering an Incident

Users will enter: Overdose incident location Case number (optional) Type of overdose After submission, the user will be able to add additional incidents.

ODMAP Dashboard

The ODMAP Dashboard is a web-based app designed to facilitate real-time surveillance of suspected overdoses. The dashboard provides Level II users the ability to display and filter locations of suspected ODs, entered by Level I ODMAP users, and can be used to identify clusters of suspected ODs and spikes in OD events. The Dashboard component of ODMAP is designed to be used on a laptop or desktop computer, and is not designed to be used on small mobile devices, but will work on devices as small as a phone.

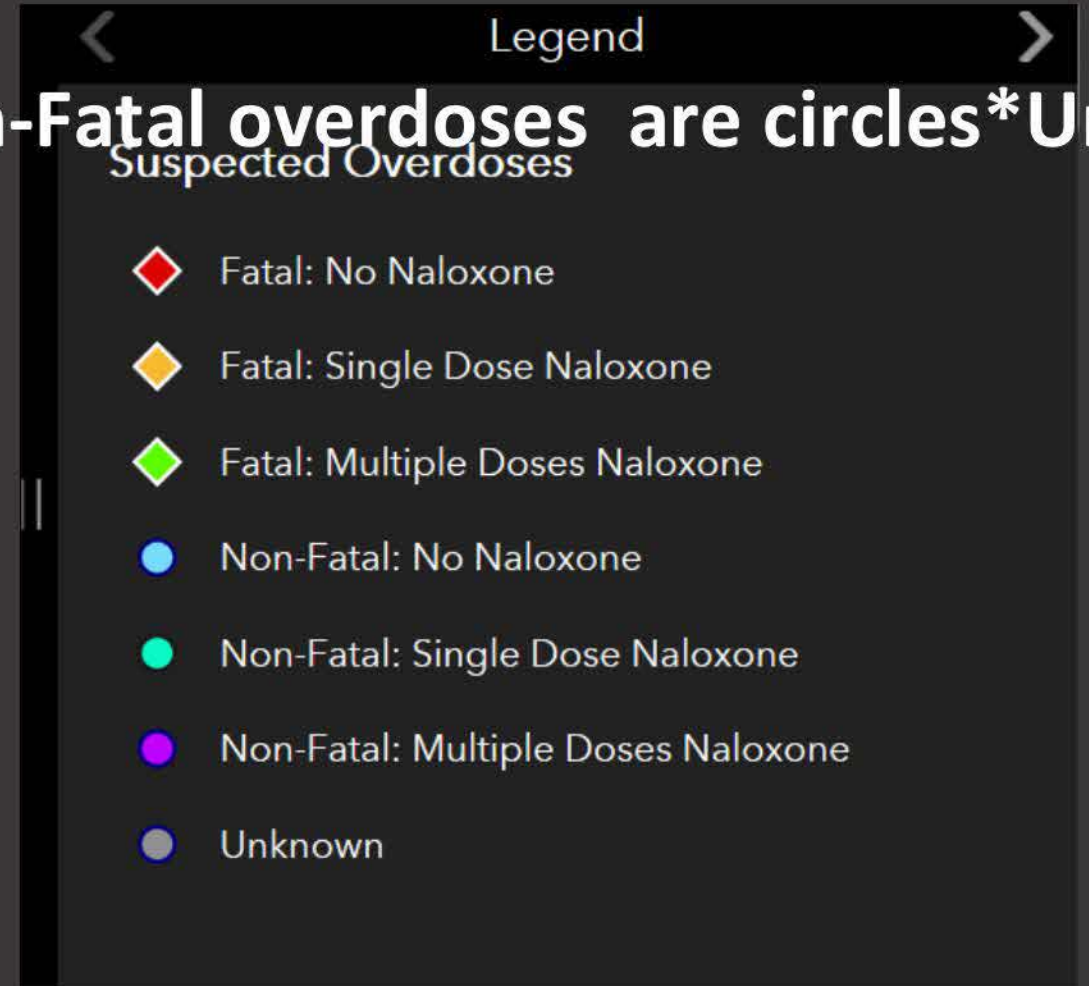

Level II Features

This is the ODMAP Dashboard- Initial view filters for last 24 hours- Use the filter tools for other date & time ranges

Legend Features

- Fatal overdoses are diamonds Non-Fatal overdoses are circles*Unknown

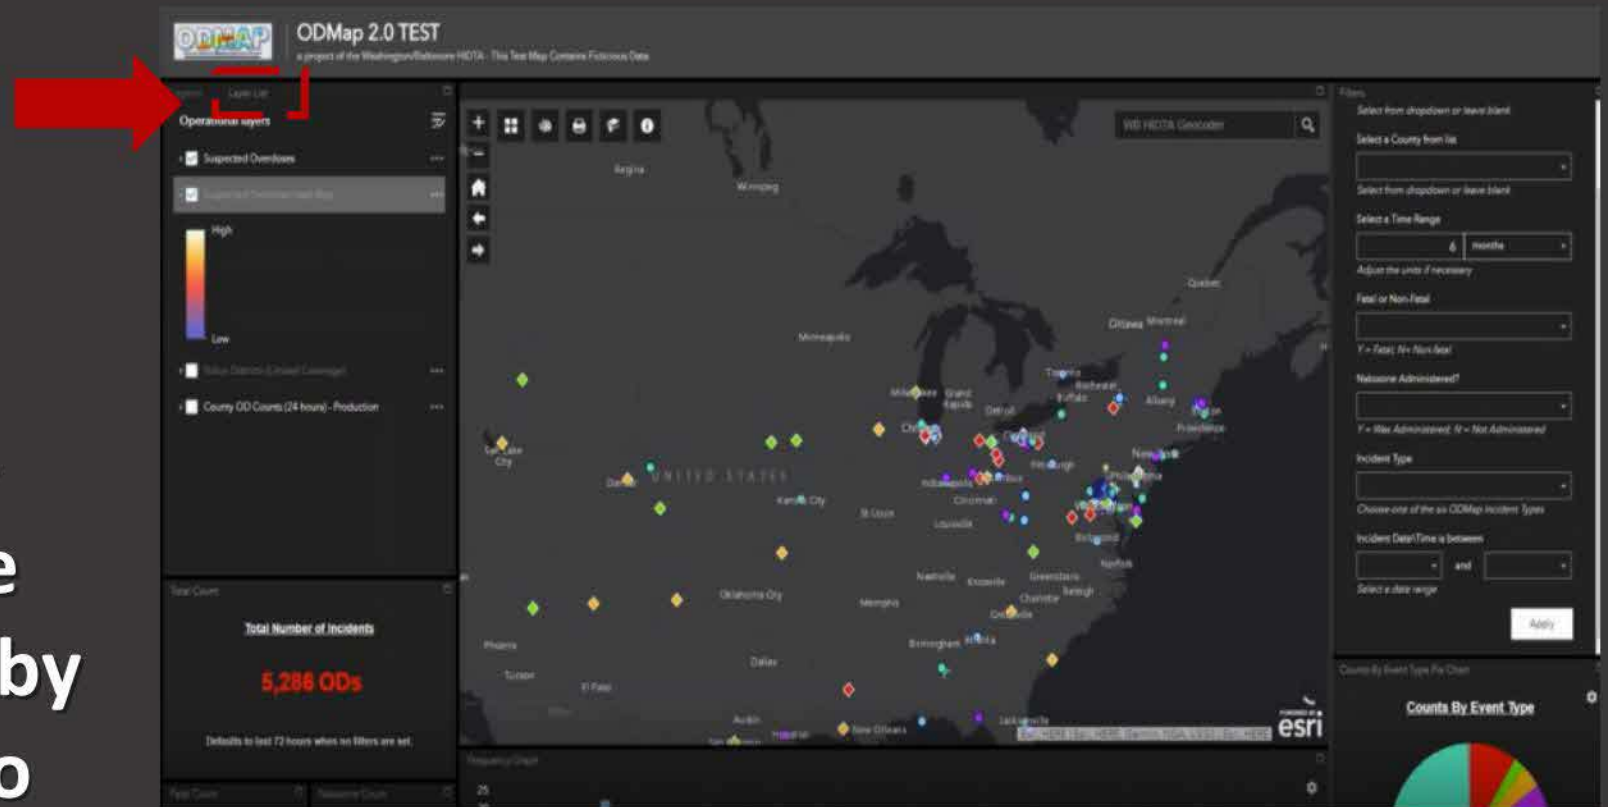

Legend

Suspected Overdoses

- ◆ Fatal: No Naloxone
- ◆ Fatal: Single Dose Naloxone
- ◆ Fatal: Multiple Doses Naloxone
- Non-Fatal: No Naloxone
- Non-Fatal: Single Dose Naloxone
- Non-Fatal: Multiple Doses Naloxone
- Unknown

Layer List

Select the Layer list to view- Suspected Overdoses- Heat Map- Police Districts**Police districts can be added by submitting a request to the HELP DESK.

Information Box

Clicking a dot on the map will open up an information box, seen in the picture below.

The screenshot displays a map interface with a sidebar on the left containing navigation controls: a plus sign for zoom in, a minus sign for zoom out, a home icon, and left and right arrow icons. The map shows the United States with city labels including Vancouver, Seattle, San Francisco, Los Angeles, Denver, and Baltimore, Maryland. A red dashed box highlights an information box titled "ODMAP Suspected Overdoses: Non-Fatal: Single Dose Naloxone". The box contains the following data:

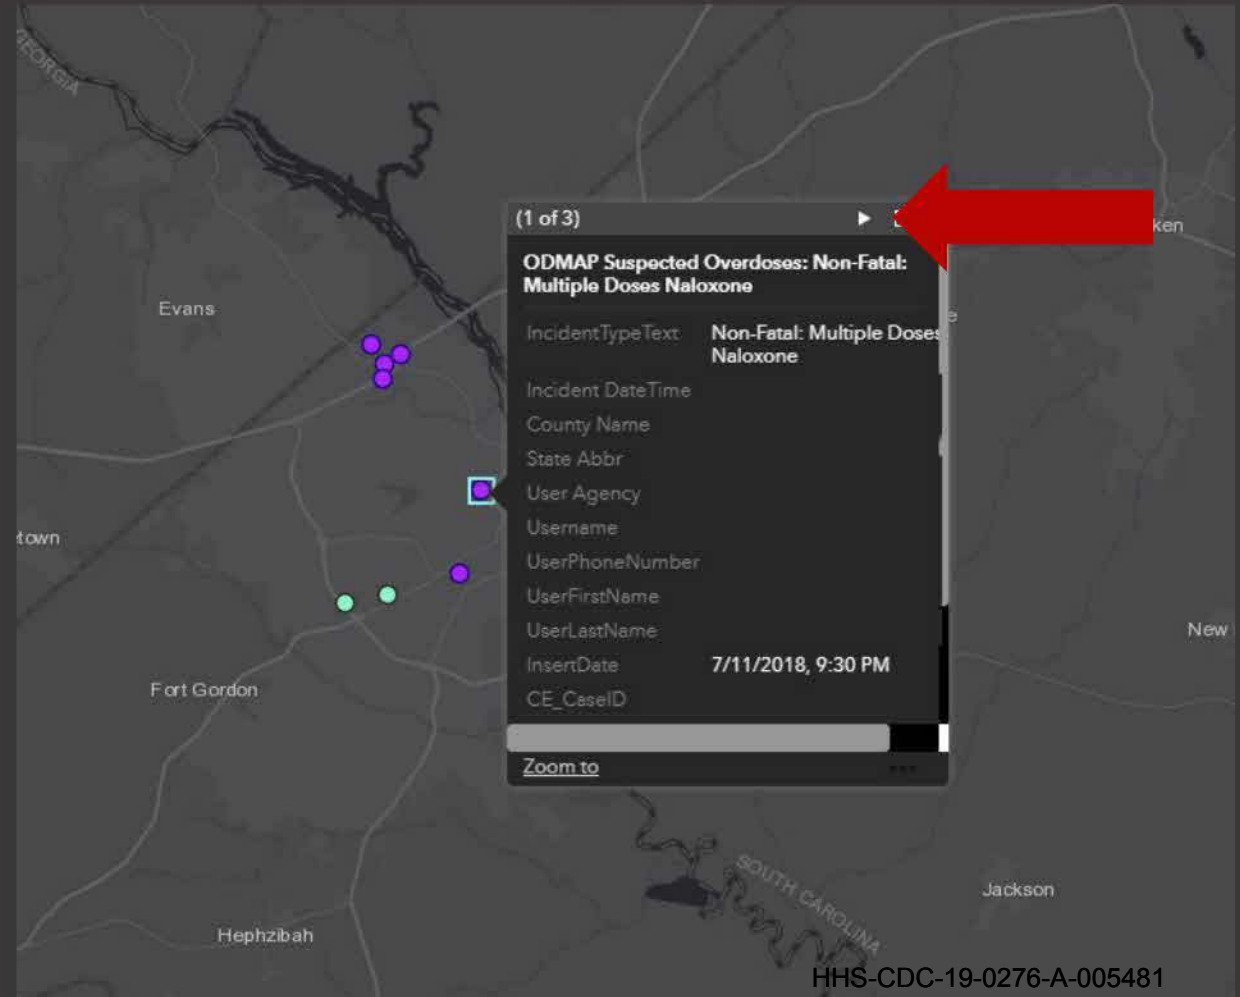

IncidentTypeText	Non-Fatal: Single Dose Naloxone
Incident DateTime	1/31/2018, 11:24 AM
County Name	Prince George's
State Abbr	MD
User Agency	W/B HIDTA
Username	jcibor@wb.hidta.org
UserPhoneNumber	3014891718
UserFirstName	Jack
UserLastName	Cibor
InsertDate	1/31/2018, 11:24 AM
CE_CaseID	
CaseNumber	Xhdj3j

At the bottom of the information box, there is a "Zoom to" button. The map interface also includes a search bar at the top right with the text "Baltimore, Maryland" and a search icon. The bottom of the screen features a scale bar for 600 miles, a "POWERED BY esri" logo, and a footer with the text "Esri, HERE, Garmin, NGA, USGS | Esri, HERE, HHS-CDC-19-0276-A-005480".

Information Box (Cont'd)

Multiple Logged Overdoses at One Address

If there are more than one Overdose logged at one location, click on the point on the map and it will display all of the logged overdoses (ex. 1 of 3, 2 of 3, and 3 of 3). Using the triangle at the top right-hand side will allow the users to scroll to the other overdoses.

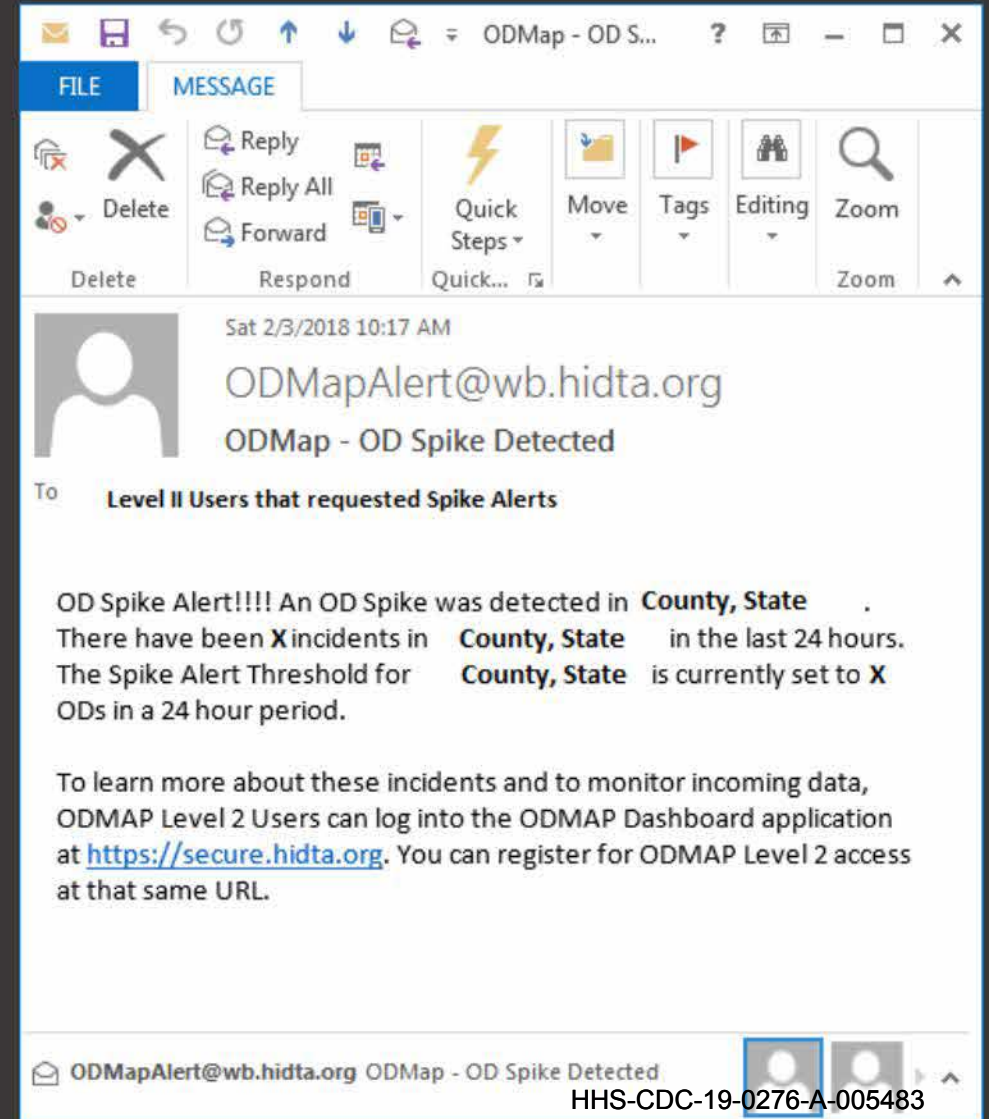

Weekly Reports

- Weekly reports are intended to provide Level II users a breakdown of data submitted to ODMAP. Level II users can receive weekly reports for their county. Level II users can request weekly reports by contacting the Help Desk.

Spike Alert Emails

- Spike alerts are intended to give the public safety and public health community real time alerts to initiate response strategies. Level II users can request spike alert emails by contacting the Help Desk. Level II users can receive spike alerts for their county or surrounding counties. The alerts are only useful in jurisdiction where incidents are reported in near real time. Spike thresholds are set on a per jurisdiction basis, not on a per agency basis.

HHS-CDC-19-0276-A-005483

(b)(5)

Monthly Opioid Meeting w/Dr. Redfield
Bldg. 21, 12th Floor, DCR
10/16/2018

Agenda

1. [Inter-Agency Pain Task Force](#)

2. [10/29 West Virginia Trip](#)

- Dr. Houry and Dr. Jones both attending

3. [Update on ASH Projects & Briefings](#)

- Opioid Prescribing Guidelines
 - Goal: Increase the proportion of opioid prescriptions written according to indication-specific best practices (i.e., benefits usually outweigh risks of opioid prescribing for the indication, and duration and dosage of the prescription are consistent with indication-specific best practices) by 15% by 2021.
- Kratom Poison Center and ESOOS data
 - NCIPC ESOOS: 59 Kratom Deaths from July to December 2017
 - NCEH Poison Center: Steady increase in reported Kratom exposure over past 5 years
- ASH ODmap Briefing provided on 9/18

4. [Evidence Based Opioid Interventions Document](#)

- Released in late September
- Evidence-Based Strategies for Preventing Opioid Overdose: What's Working in the United States
 - Targeted naloxone distribution including treatment and criminal justice settings
 - Medication assisted treatment including initiation in criminal justice settings and emergency departments
 - Academic detailing
 - Fentanyl screening in routine toxicology testing

NCIPC & OD Monthly Opioid Meeting
11/16/2018
Agenda

1. [Adverse Childhood Experiences \(ACEs\)](#)

- ACEs Background
- Strategies for Preventing ACEs and Mitigating Long-Term Impacts
- CDC Efforts to Prevent ACEs
- Integrating ACEs into Opioid Overdose Prevention

2. [Public Safety/Public Health Coordination](#)

- Opioid Response Strategy (HRS)
- Combating Opioid Overdose Through Community-level Intervention Initiatives (COOCLI)
- Bureau of Justice Assistance (BJA) and CDC Collaboration

3. [Innovative Local Opioid Projects](#)

4. [Huntington WV Follow-Up](#)

5. [Other](#)

- Rx Summit

2. Preparedness for caravan

Spencer, Laura (CDC/OCOO/OD)

Subject: Partners in Hope: Strengthening the Role of Faith-based Providers in the Continuum of Care for Addiction Recovery (Staffed by Cristi Schwarcz)
Location: The Heritage Foundation, 214 Massachusetts Ave., NE Washington DC 20002
Start: Wed 11/7/2018 1:00 PM
End: Wed 11/7/2018 2:00 PM
Recurrence: (none)
Meeting Status: Meeting organizer
Organizer: Redfield, Robert R. (CDC/OD)
Required Attendees: Campbell, Amanda (CDC/OD/OCS); Kroop, Seth (CDC/OD/OCS); Knotts, Ashley (CDC/OD/OCS); Green, Hugh (CDC/OD/OCS); Bartee, Brad Allen (CDC/OD/OCS); Byers, Mark E. (CDC/OD/OCS); Gaines-McCollom, Molly (CDC/OD/OADC); Meade, Alexis (CDC/OD/OADC); Schwarcz, Cristi L. (CDC/OD/CDCWO); CDC Media-OD (CDC)
Optional Attendees: Noel, David (CDC/OD/OADC); Lansdale, Ashley (CDC/OD/OADC) (CTR); DeNoon, Daniel (CDC/OD/OADC) (CTR)

1. Contacts:

Logistics Specialist: Mark

Special Assistant: Hugh Green

Event Contact: Heidi Christensen, Public Affairs Specialist, Center for Faith and Opportunity Initiatives/IEA/OS, HHS, O: 202-358-3595, Heidi.Christensen@hhs.gov

CDC Staffer Accompanying Dr. Redfield: TBD

CDC Program Contact: TBD

CDC Media Contact: TBD

2. Event Information:

Event Host: Center for Faith and Opportunity Initiatives/IEA/OS, HHS

Purpose of Event: the gathering is designed to strengthen the bridge between clinic and community-based recovery support services, as well as the participation of faith-based providers in evidenced-based practices for addiction recovery.

Agenda: TBD

Number of Attendees and Composition: 45 people who are focused on treatment and recovery (faith-based)

Key Participants: see attached

Bios: TBD

Source Invitation: Yes on the 10/15/18 DL

3. Dr. Redfield's Speech Information or Talking Points (TPs):

Dr. Redfield's Remarks/Presentation/TPs: TBD

Proposed Role and Topic: Present remarks at the meeting on the value of faith-based providers of partnership and the importance of bridging the clinic to community gap by integrating evidenced-based practices.

Length of Presentation: 1 hour

Press: None

Teleprompter: N/A

Draft Agenda

Partners in Hope: Strengthening the Role of Faith-based Providers in the Continuum of Care for Addiction Recovery

NOV. 7, 2018, 11:30 a.m. – 5:00 p.m. ET

Heritage Foundation, 214 Massachusetts Ave., NE 20002
(11:30 a.m. registration)

NOV. 8, 2018, 8:00 a.m. to 4:30 p.m. ET

U.S. Department of Health and Human Services
200 Independence Ave., SW 20201 Room 800

Goals: Day One- The Heritage Foundation

The Faith Factor and the Continuum of Care

- Explore the unique role capacities and challenges to faith-based providers of comprehensive addiction treatment and recovery support services.
- Identify existing practices and opportunities for bridging the clinic and clinical services to faith-based community recovery support services.

Time	Agenda
11:30 a.m. - 12:30 p.m.	Registration This facility and lunch have been generously provided by The Heritage Foundation*
12:15 p.m. 10 min	Welcome Shannon Royce, Director, Center for Faith and Opportunity Initiatives
25 min	Introductions and Logistics Heidi Christensen- overview of day and introduce facilitators, staff, and note takers.
5 min	<i>Group moves to auditorium</i>
1:00 p.m. 60 min.	Opening Remarks- (Shannon Royce Introduction) Dr. Robert R. Redfield, Director, M.D., Director, Centers for Disease Control and Prevention
2:00 p.m.	Exploring the Faith Factor: John Bartkowski, Professor of Sociology, University of Texas, co-author, <i>The Arc of Faith-based Initiatives-</i> (video remote presentation) <i>Seeding the discussion: Can faith-based organizations be nimble social actors in order to meet the demand of diverse clientele and offer services that strengthen comprehensive care?</i>
2:45 p.m.	Identifying and Strengthening the Faith-Factor Element Questions: In order to strengthen the role of faith-providers in the continuum of care- from clinic to community- for addiction recovery – what do we need to understand about faith-based provision of services?

*The views expressed during this meeting and the resources provided are for informational purposes only and does not constitute an endorsement by The Heritage Foundation, CE Analytics, or HHS.

	What are the challenges you perceive in the integration of clinical services and as it relates to the integrity of your faith-based services?
3:15 p.m.	How We Understand the Faith-Based Component of Our Work. Project 80. Kris McFadden, PA Adult and Teen Challenge <i>Shares their Integrated faith-based and clinical model of care, Project 80.</i>
3:35	Break
3:45 p.m.	Making the Connection: Clinic to Faith-based Recovery Support <i>In advance of this meeting we talked about “a continuum of care for addiction recovery” and the need to expand access to clinical services whether by referral, partnership or integration. This group exercise will raise the up the questions and identify the challenges and opportunities as they arise during different moments of engagement with an individual and their specific circumstances.</i>
10 min	Shannon Royce/Pastor Greg Delaney Debrief: What did we hear today that needs to get pulled in tomorrow and into our work together?

Goals: Day Two - Humphrey Building, U.S. Department of Health and Human Services

Exchanging Expertise between Community and HHS Subject Matter Experts (SMEs)

- Explore best practices in assessment and navigation.
- Gain a better understanding of the WHY and HOW of MAT.
- Address funding mechanisms that include faith-based providers
- Learn about new telemedicine protocols that will increase access to medically assisted therapies.
- Tackle the data challenge and how faith-based providers are demonstrating outcomes.

Time	Agenda
8:00 a.m.	Welcome and review of the day’s agenda. Heidi Christensen <i>Today is a day of learning from one another and from HHS Subject Matter Experts (SMEs). Review of day- answer any questions...</i>
8:15 a.m.	So What, Now What? <i>A group exercise what happened that was relevant yesterday or in conversations or in your own reflections of our time together.</i> <i>What did you notice, what facts or observations stood out?” Then, after all the salient observations have been collected, ask, “SO WHAT? Why is that important? What patterns or conclusions are emerging?</i> <i>NOW WHAT? What actions make sense—what do we want to make sure we address or flag for our learning agenda?</i>
9:00 a.m.	The Opioid Crisis, Trends and Opportunities: What Front-line and Community-based Providers Need to Know ADM Brett Giroir, M.D. Assistant Secretary for Health at the U.S. Department of Health and Human Services

**The views expressed during this meeting and the resources provided are for informational purposes only and does not constitute an endorsement by The Heritage Foundation, CE Analytics, or HHS.*

9:45 a.m.	<p>The Front Line, Health Systems, & Navigation <i>An opportunity to highlight models and what's working to strengthen faith-based participation on the front line, in acute situations and in navigating individuals into treatment or recovery support.</i></p> <ul style="list-style-type: none"> • Emergency Room Navigators/Recovery Coaches- Jeanne Ang: Advocate Aurora Health Chicago • Faith-based ER navigator, NorthStar Community Church, Teresa McBean • Universal SUD Screening & Transitional Clinical Care: Niranjan Karnik/Kristin Hill, Rush University Medical College. • Deployed chaplains: Chaplain Glenn Davis, Wake Forest Baptist Medical Center • Navigators- Recovery Navigate Recovery Gwinnett, Susan and Farley Barge
11:00 5 min	
11:05	<p>MAT at the Intersection of Recovery Housing and recovery support services Art Kleinschmidt, MBA, PhD. Senior Advisor Substance Abuse, Office of the Assistant Secretary /CSAT/SAMHSA</p>
11:30	<p>Why MAT and How? A spotlight on Integrated Faith-based and Clinical Care Models: Community SME's talk about how they came to deliver medication assisted therapies and how they integrate or partner to provide them.</p> <ul style="list-style-type: none"> • April Barnes, The Next Door (TN) • Beau Hill, Salvation Army Harbor Complex, Cleveland • Michele Steeb, Saint John's Program for Real Change
12:30 p.m. Working Lunch	<p><i>Our lunch and refreshments this afternoon has been generously provided by CE Analytics.*</i></p> <p>Brass tacks on How to Increase Access to MAT <i>Working Lunch: Using a worksheet, tables will build a list of the integration or partnership issues that need to be considered in creating access to clinical services.</i></p> <p><i>Task: Creating an Agenda for the HOW</i> <i>Identify at least 10 issues that need be on an agenda that need to be considered for faith-based providers to increase access to medication assisted therapies. (Naming not solving).</i></p>
1:00 p.m.	<p>Learning from the Access to Recovery Program Arne Owens, Principal Deputy Assistant Secretary for Mental Health and Substance Use Celebrity interview with Mike Rogers, Higher Ground Recovery Center (Access to Recovery Site, Missouri)</p>
2:00 p.m.	<p>Telemedicine- Dr. Christopher Jones via Web Ex <i>How new telemedicine protocols is increasing access to MAT</i></p>
2:30 p.m.	<p>How Artificial Intelligence will Transform Addiction Treatment. Ed DeShields, CE Analytics/Global Teen Challenge project and Q & A</p>

*The views expressed during this meeting and the resources provided are for informational purposes only and does not constitute an endorsement by The Heritage Foundation, CE Analytics, or HHS.

3:30 p.m.	Debrief & planning forward
-----------	---------------------------------------

DRAFT

**The views expressed during this meeting and the resources provided are for informational purposes only and does not constitute an endorsement by The Heritage Foundation, CE Analytics, or HHS.*

TO: Robert R. Redfield, Director, M.D., Director, Centers for Disease Control and Prevention

FROM: Shannon O. Royce, Esq., Director, Center for Faith and Opportunity Initiatives, OS/IEA, U.S. Department of Health and Human Services

SUBJECT: Invitation to Provide Remarks at a Meeting to Strengthen the Role of Faith-based Providers in the Continuum of Care for Addiction Recovery

On November 7-8, 2018, the HHS Center for Faith and Opportunity Initiatives will host a two-day meeting, *Partners in Hope: Strengthening the Role of Faith-based Providers in the Continuum of Care for Addiction Recovery*. The gathering is designed to strengthen the bridge between clinic and community-based recovery support services, as well as the participation of faith-based providers in evidenced-based practices for addiction recovery.

We will be grateful for the participation of Dr. Redfield, on the first day of the meeting – **Wed., November 7 at 1:30 p.m. ET, at The Heritage Foundation, 214 Massachusetts Ave., NE 20002** - to welcome the participants and offer brief remarks.

Our request is that Dr. Redfield address the value of faith-based providers of partnership and the importance of bridging the clinic to community gap by integrating evidenced-based practices.

The meeting will take place over two-days:

November 7: 12:00 p.m. to 5:00 p.m., ET
Heritage Foundation, 214 Massachusetts Ave., NE Washington D.C., 20002

November 8: 8:30 a.m. to 4:00 p.m., ET
HHH Building, Room 800, 200 Independence Ave., SW Washington D.C., 20201

We look forward to news of your availability. In the meantime, please do not hesitate to reach out with any thoughts or questions (202) 358-3595, Shannon.Royce@hhs.gov or Heidi.Christensen@hhs.gov.

Hi Tracie,

Can you put a hold on Dr. Redfield's calendar this afternoon for a photo with the PHAP class at 5pm in the GCC Aud B3? This isn't confirmed, but he expressed some interest and if he can do it that would be great. POC: Theofilos, J.T. (CDC/OSTLTS/OD) epd5@cdc.gov

Molly, can you check if a photographer is available? They have a semi-professional photographer here, but thought I'd check.

Thanks,

Hugh

Hi Kate,

Dr. Redfield is available as follows:

12/21	9:00-9:30 a.m.	Prep for Media Interview
	12:30-1:00 p.m.	Media Interview

Also, please confirm the following:

- Who will accompany Dr. Redfield on the call?
- The purpose: Flu Interview with Health Day.

Please advise.

Thanks,
Teresa

Subject: Scheduling Request - Media Interview in December

Hi all,

Dr. Redfield agreed during yesterday's comms meeting to do a phone-based flu interview with HealthDay sometime in December. I know his schedule is jam-packed, but is there a 15-20 minute block that we can hold the week of Dec. 16-21 for this interview? Ideally, we'd also find time earlier that day or week to have a quick prep meeting with him as well.

Please let me know if there are any options.

Thanks,
Kate

Hi Hugh and Brad:

Thanks Brad, for the call this afternoon. I am including you and Hugh on this email to loop-in everyone in preparation for Dr. Redfield's session at 1:00 pm, Thursday, November 8 with the new Year 1 associates.

Attached is an agenda-at-a-glance for the 2018 PHAP Orientation—Phase III, In-Person Training so you have an idea of the event of the week for the associates.

Hugh, I will be waiting for you and Dr. Redfield at the registration desk just outside B-3 to make sure everything is in order for his session.

In the meantime, please let me know if there are any questions or outstanding issues before tomorrow. Otherwise, I look forward to seeing you on Thursday.

J.T.

Subject: RE: Directors Request - 2018 PHAP Orientation

Hi J.T.,

No slides prepared as of now. Should just be brief remarks and Q&A. I think a mic would be good if were in the Auditorium.

Many thanks,

Hugh

Thanks Hugh.

I will be at the PHAP registration table outside B-3 by 12:50 pm to greet Dr. Redfield, walk him up the hall to the stage area from where he can enter the auditorium and stage. I will also have a lavalier microphone for him should he want to walk and talk during his time with the associates.

What about visual materials? Will he have any PowerPoint materials for his session? Let me know and I will make-it-happen.

I really appreciate your help.

Good morning J.T.,

Here is a brief bio you can use for introductions. Please just come up and introduce yourself before the event starts and let him know you'll be opening the session.

Feel free to reach out to me via email or phone if you have any further questions. We're looking forward to the event.

Kind regards,

Hugh

Hi Jeremy:

We are looking forward to having Dr. Redfield join us tomorrow at 1:00 pm in B-3.

Can you share the protocol as to how you suggest I greet Dr. Redfield tomorrow? Is there a brief introductory paragraph that we can use to introduce him, etc.?

I am in B-3 all day today if you want to meet in person. Please let me know.

Thanks,

J.T.

Associate Breakout Sessions:

1. CDC PHAP Supervisor Breakout Sessions
2. CDC SmartCard- Step 1: Processing
3. CDC SmartCard- Step 2: Pick Up
4. Computer Lab Session
5. Professional Picture
6. EOC Experience
7. CDC Museum Experience
8. CDC Library Experience
9. CDC Roybal Campus Experience
10. Work Life Balance Session
11. Ethics Session
12. Professional Networking Fair
13. Meet Your CIO
14. Alumni Panel
15. Scenarios

Plenary Sessions:

1. PHAP Team Challenge

This plenary session is a dynamic, interactive session broken into four (4) different activities, each led by a different facilitator. The physical activities in each activity will provide a platform for participants to identify their personal strengths and areas for improvement. In debriefing, associates will explore personal values and beliefs, and ideas on how to better collaborate, trust, and build teamwork to accomplish a common goal. The value of providing positive feedback will also be discussed.

At the end of this session, associates will be able to:

1. Identify personal strengths and areas for improvement
 2. Explore fundamental personal values and beliefs through engagement with others
 3. Build collaboration, teamwork, and trust
 4. Provide positive feedback in recognizing the accomplishments of others
2. Social and Cultural Inclusion Part I

This session defines conscious and unconscious bias and how to better recognize them. Participants will learn strategies to identify and defeat biases. Social and cultural inclusion and how this might influence work environments will be discussed. Participants will learn to leverage colleagues' differences and experiences to improve team dynamics and innovation.

At the end of this session, associates will be able to:

1. Compare and contrast conscious and unconscious bias
2. Incorporate appropriate strategies for defeating biases
3. Describe how social and cultural inclusion influence our work environments
4. Leverage colleagues' differences and experiences to improve teamwork and innovation

Subject: Dr. Burgess visit to CDC HQ - December 14

Hi Scott-

As mentioned during the call this week, Congressman Burgess would like to visit CDC's HQ **Friday, December 14**. We are still waiting on final logistics details from his office to help inform the agenda. Below is an outline of what we are thinking, and we'll wait to hear back from his office before confirming. In the meantime, may we please place a banner on Dr. Redfield's calendar for that day and a hold from 11.30-12 to meet with Dr. Redfield? Is it also possible to reserve CR 12302 from 11am-5pm? We will have someone from CDCW staffing but not sure who it will be yet. We promise to share more information as it is known. We will also likely need assistance from you logistics team (if someone is free), but we promise to do all of the work that can be done from here! Please let us know if you have preliminary questions, and thanks in advance!

Aimee

Hi Scott-

Attached is the latest agenda. We'd like to confirm 1130-12 on Dr. Redfield's calendar please, and thanks to Tamika for reserving the room!

Nancy Tourk will be staffing the visit. As of now, Dr. Burgess will be traveling alone.

Mark Byers has already reached out to let me know that he'll be the LS for the visit. We'll continue to share details as we have them.

Many thanks!

Aimee

Subject: Directors Request

New request from Request Director form --

Event Overview:

Event Title: 2018 - 2019 Robert Wood Johnson Health Policy Fellows

Name of Organization Hosting Event: National Academy of Medicine

Description of Organization: The Robert Wood Johnson Foundation Health Policy Fellows program is the nation's most prestigious learning experience at the nexus of health, science, and policy in Washington, D.C. Since 1973, this non-partisan fellowship has offered, hands-on policy experience with the most influential congressional and executive offices in the nation's capital to exceptional mid-career health professionals and behavioral and social scientists with an interest in health and health care who:

Possess the skills and commitment to use the fellowship experience to provide leadership in improving health, health care, and health policy at the national, state or local level; Bring a depth of expertise and knowledge about health and health care to the policymaking process; and Can offer an informed perspective on important and complex challenges facing health policymakers.

Over 250 fellows from across the nation have worked hand-in-hand with the best and brightest in federal health policy to gain an insider's perspective of the political process, develop unmatched leadership skills, and build a professional network that lasts a lifetime.

Event Location: Centers for Disease Control and Prevention / Roybal Campus / Building 21

Event date: 10/19/2018

Event start time: 8:30 AM | End Time: 1:00 PM

Director's participation requested start time: 9:00 AM

Director's participation requested end time: 9:30 AM

Contact Person

Contact Person: Monica A. Smith

Contact Office Phone: 404-639-5170

Contact Cell Number: 678-778-8612

Contact Email: bgu1@cdc.gov

Event Details

What is the purpose of this event?: The 2018-19 class of the Robert Wood Johnson Foundation Health Policy Fellows will arrive in DC on September 5, 2018. The meeting will be part of the fellows' three-and-a-half-month orientation, which provides opportunities for the fellows to meet with key health and health policy leaders, and prepares them for congressional or federal placements beginning in January.

The fellows' briefing about the CDC and its role in the federal health policy process is essential for their training.

Proposed role of Director?: speaker

If the Director is unable to attend, would you still be interested in a CDC speaker?: YES

If the Director is unable to attend in-person, would joining by video teleconference be an option?: YES

If the Director is unable to attend in-person or by VTC, would a pre-recorded message be an option?: NO

Presentation Details

Topic of Presentation: The Big Picture; A vision of what we do and who we are

Type of Presentation: Opening Remarks

Presentation Special Notes:

Additional Speakers: Past speakers for this event are as follows; Anne Schuchat, OD; Von Nguyen, OADP; Shannon Hader, CGH; Anstice Brand, CDCW; Richard Wang, NCEH.

Length of Presentation: We are proposing 20 minutes for the director to give a welcome and "big picture" of what CDC's role is in public health and what we do. Following this would be a 10 minute question and answer period from the fellows.

PowerPoint requested: [ppt-available]

Will there be Q&A?: YES

Specific topic/points you would like the Director to address: We would like for the Director to give the fellows a perspective from his/her role as to what CDC's role in public health is defined as, its priorities and general overview as to its budget, staff diversity/backgrounds and its current priorities.

Audience and Key Participants?: Public Health/Medical Professionals

Audience Size?: 10-50

Expected Media Coverage?: NO

Will this event be videotaped?: NO

Additional details?: [Additional-details]

Hi Brad,

Sorry getting back with you late in the day. I am working on 2 meetings that are back to back. Yes water in 12302 would be nice for them as they'll probably be in discussions with program leadership most of the morning.

I am expecting 11 people associated with the RWJF Health Policy Fellows Visit;

- 8 RWJF Health Policy Fellows
- 2 Winston Fellows (they will also join the RWJF Fellows) – I can give you background on them as well. They visited with them last year.
- 1 Chaperone for both groups

More information on the program is available here:

<http://www.healthpolicyfellows.org/>

You can find the bios of the Fellows here:

<http://www.healthpolicyfellows.org/fellows/current-fellows/>

Thanks Monica, sounds good. How many fellows are there?

We can help with water in 12302 if you need, or desire. Just let us know.

Ok great Brad and you're welcome! Yes, I only need the rooms until 1PM as the fellows will need to immediately depart for their flights at Hartsfield Airport. I am going to send their names to the concierge at Bldg 19 next week so they can check in their luggage when they arrive the morning of Oct 19th. I am working with my assigned team lead, Dr. Martin Vincent, on this visit as well, so the agenda is approaching its final shape.

Thank you,
Monica

Thank you Monica,
I do see the reservation in the system so you are all set for both rooms. Thanks for clarifying that for me.
You only need the rooms until 1PM?

Thanks,
Brad

Hi Brad,

I hope you are well! I have reserved space on the 12th floor for Oct 19th in room 12302 and 12101 (for a working lunch with the fellows) under the name OADP RWJF Health Policy Fellows. I worked with Tamika Brown to reserve this a while ago, so I am hoping we still have it. I understand the Director's Suite can move meetings due to priority meetings and updates.

Please advise if you don't see the reservation in place, and by all means, please reserve us a space on the 12th floor.

Thank you,
Monica

Hi Monica,

I noticed on Dr. Redfield's calendar we do not yet have a location for where he needs to be for this event.

Is this in the GCC or somewhere in Building 21?

If I need to reserve space on the 12th floor for Dr. Redfield to meet with the group please let me know.

Thank you,
Brad

EXPERIENCE

University of Michigan, Center for Value-Based Insurance Design

January 2017 – Present | Ann Arbor, MI

Research Assistant

- Analyzed relevant policies and developments related to health insurance benefit design and prepare written materials and briefs related to Medicare Advantage, TRICARE, and other initiatives
- Leveraged website and social media to communicate V-BID principles and their application to current healthcare topics in a succinct, engaging manner to policymakers and industry professionals

Kaiser Permanente

June – August 2017 | Oakland, CA

Senior Consulting Associate, The Permanente Medical Group

- Partnered with clinical leadership and consulting teams to solve problems and adapt the system to strategic initiatives, impacting more than 8,000 physicians and four million patients in the Northern California region
- Analyzed telehealth data and processes for specialty departments at 21 medical centers and identified actionable best practices to inform a regional operational strategy with the goal of increasing use and success of video visits
- Synthesized data, conducted stakeholder interviews, and presented recommendations related to gaps and opportunities for a regional hematology comprehensive care model

International Rescue Committee

August 2015 – July 2016 | Washington, DC

Policy and Advocacy Department Manager

- Provided research, content development, and writing support to the VP and other senior staff, including preparation of briefing memos and presentations on federal policy developments and advocacy priorities
- Executed special projects for the VP of Policy and Advocacy, including improvements to the advocacy strategy development process, resulting in greater efficiency and consistency across departments
- Managed annual budget of more than \$1 million, including strategic planning and development of budget proposals for review by the Leadership Board

Policy and Advocacy Intern

August – December 2013 | Washington, DC

- Analyzed legislation, conducted research, and produced written deliverables related to key advocacy issues
- Conducted benchmarking assessment of peer organizations' mission and vision statements to inform the inclusion of advocacy in five-year organizational strategy

Children's Health Alliance of Wisconsin

AmeriCorps Member

August 2014 – August 2015 | Milwaukee, WI

- Conducted quantitative and qualitative research on Medicaid network adequacy and presented findings to stakeholders, leading to ongoing coordination with state Medicaid director to address gaps
- Managed state government relations projects for the Reach Out and Read early literacy program, including outreach, education, and hosting of public events with state legislators and their staff
- Developed injury prevention program in partnership with public and private sector stakeholders, resulting in the creation and dissemination of a toolkit to more than 50 local businesses

LEADERSHIP & COMMUNITY ENGAGEMENT

EDUCATION

Drexel University Dornsife School of Public Health

Philadelphia, Pennsylvania

- Master of Public Health (MPH) – Health Management and Policy (b)(6)

Allegheny College

Meadville, Pennsylvania

- Bachelor of Science – Biology & Global Health Studies (b)(6)
- Alden Scholar (b)(6) Allegheny College Trustee Scholarship, Alpha Natural Resources Scholarship
- Senior Thesis: *Indirect community repercussions of gun violence: A retrospective cohort study to determine the effect of mass shootings in the United States between 1982 to 2002 on the birth weight of newborns*

PROFESSIONAL EXPERIENCE

Global Vaccine Policy Development Intern | Merck & Co.

Mar 2017 – June 2018

Philadelphia, Pennsylvania

- Develop policy briefs, talking points, and fact sheets to facilitate conversations with policymakers around vaccine legislation
- Track, archive, and analyze pending or passed legislation and trends that facilitate or remove barriers to vaccination access and uptake across the U.S and globally
- Create innovative ways for teams to track and engage with legislation that effects vaccination policy

Public Health Research Intern | Grassroots Research and Advocacy Movement (GRAAM)

June – Aug 2014

Mysore, India

- Created Quality Assurance Proposal for Primary Health Centers for the Karnataka Ministry of Health
- Authored literature review of 24/7 Primary Health Centers and their effectiveness in the surrounding area
- Generated comprehensive checklist for healthcare providers and users to assess quality of treatment and facility

Global Health Department Research Assistant | Allegheny College

May – Aug 2015

Meadville, Pennsylvania

- Conducted community health needs assessments and published reports for two local hospitals
- Ran data analyses for multiple projects; presented analysis and results to hospital board and community partners
- Presented research on an Ebola risk perception survey for undergraduates at summer symposium

International Federation of Medical Students' Association Annual Meeting

Aug 2015

Ohrid, Macedonia

- Selected as a United States delegate by the American Medical Student Association
- Served on Standing Committee of Public Health; co-authored documents to be presented at international conferences
- Attended workshops that were based on Global Health curriculum design and migration of healthcare workers

AWARDS & PROFESSIONAL PRESENTATIONS

- Drexel University Dornsife School of Public Health Outstanding Promise Award (2018)
 - This award recognizes those who have exhibited great promise for regional or national societal impact, and accordingly, for enhancing Drexel's reputation, now and in the future.
- Recipient of the David A. Winston Health Policy Scholarship (2017)
- Devenney G (presenter) Bryson E (presenter), and Dawson B (presenter). *Two Steps Forward, One Step Back: Lessons learned from a multi-year community-based participatory research project lead by a group of undergraduate students*. 2015 American Public Health Association Annual Meeting. Chicago, IL. 2 November 2015.

Director Speeches Meeting October 17, 2018

NIH/NIAID Kinyoun Lecture

Date: November 13, 2018

Location: NIH Campus

Description: Dr. Redfield will give the Joseph J. Kinyoun lecture and be introduced by Tony Fauci. The Joseph J. Kinyoun Lecture is the most important honorific annual lecture sponsored by NIAID. The Lectureship was created to bring in leaders in the field to talk on subjects related to NIAID, particularly infectious diseases, immunology, and global health.

Focus: Opioid epidemic and its association with HIV, HCV and other infectious diseases

Audience: 260 NIH researchers, clinicians, administrators and fellows; broadcast via open webcast accessible to general public

Media: No media expected to attend/cover

Length: 50 minutes + 5 minute Q&A

Format: Slides and TPs

National Centers for AIDS research (CFAR)

Date: November 8, 2018

Location: Emory University

Description: The Centers for AIDS Research (CFAR) program at NIH provides administrative and shared research support to synergistically enhance and coordinate high quality AIDS research projects. CFARs accomplish this through core facilities that provide expertise, resources, and services not otherwise readily obtained through more traditional funding mechanisms.

Event Focus: To support multidisciplinary research aimed at reducing the burden of HIV both in the US and around the globe. Tony Fauci will also present before R3 from the NIH perspective.

Focus: Current status of HIV epidemic from CDC's perspective; global

Audience: 250 participants including the leadership of the 19 CFARs, NIH colleagues, and key community partners. Event will be simulcast.

Media: Emory Health Sciences Center Communication Office will cover event. No additional media.

Length: 25 minutes + 5 minute Q&A

Format: Slides and TPs

Q&A: Moderated by Dr. Carlos del Rio and Dr. Colleen Kelley. Will also take audience questions.

**Presentation attached. 10/3/18 (ls)

Do you want me to schedule an OD session? If so, you'd include your MO and/or Deputy (whichever is more focused on HR-related activities). Thanks

Good afternoon –

Background: In mid-July, Reggie presented the attached PPT to the CDC Management Board. In follow up, many centers have requested an opportunity to have small group discussions.

Request: Please invite Reggie (director, OEEO) and Roger (acting deputy, OEEO) to one of your CoP meetings in the near future to have a more in-depth discussion. I recommend the CIO director bring their deputy director and/or management officer as well.

Thank you in advance,
Sherri

CDC State of the Agency Briefing Equal Employment Opportunity

Reginald R. Mebane Director, Office of Equal Employment
Opportunity (OEEO)

October 5, 2018

FY 2017 OEEOPriorities

- Customer Service Training Communication and Outreach Reporting, Compliance, and Accountability

CDC's FY 2017 Data

How We're Doing: Gender and Race/Ethnicity

- Gender of CDC's workforce
Women: 64%
Men: 36%
- Race/Ethnicity
Hispanic: 3%
Black/African-American: 32%
Asian: 8%
White: 56%
Other (includes two or more races): 1%

How We're Doing: Persons with Disabilities

- Persons with Disabilities EEOC Goal: 12%
Persons with Targeted Disabilities EEOC Goal: 2%

2015	2016	2017
13.4%	13.3%	13.5%

2015	2016	2017
1.84%	1.83%	1.96%

How We're Doing: Persons with Disabilities

- CDC's Areas for Improvement: Relationship building with Disability Interest Group (DIG), Human Resources Office (HRO), and Office of Safety, Security, and Asset Management(OSSAM) Communication to Senior Leadership of low rates & present solutions for hiring, retention and promotion of Persons With Disabilities (PWDs) Barrier analysis to focus on PWDs and Hispanics

Self Reporting a Disability: Form 256

ENTER CODE HERE → <input type="text"/>	
<p>Targeted Disabilities or Serious Health Conditions:</p> <p>02- Developmental Disability, for example, autism spectrum disorder</p> <p>03- Traumatic Brain Injury</p> <p>19- Deaf or serious difficulty hearing, benefiting from, for example, American Sign Language, CART, hearing aids, a cochlear implant and/or other supports</p> <p>20- Blind or serious difficulty seeing even when wearing glasses</p> <p>31- Missing extremities (arm, leg, hand and/or foot)</p> <p>40- Significant mobility impairment, benefiting from the utilization of a wheelchair, scooter, walker, leg brace(s) and/or other supports</p> <p>60- Partial or complete paralysis (any cause)</p> <p>82- Epilepsy or other seizure disorders</p> <p>90- Intellectual disability</p> <p>91- Significant Psychiatric Disorder, for example, bipolar disorder, schizophrenia, PTSD, or major depression</p> <p>92- Dwarfism</p> <p>93- Significant disfigurement, for example, disfigurements caused by burns, wounds, accidents, or congenital disorders</p>	<p>Other Disabilities or Serious Health Conditions:</p> <p>13- Speech impairment</p> <p>41- Spinal abnormalities, for example, spina bifida or scoliosis</p> <p>44- Non-paralytic orthopedic impairments, for example, chronic pain, stiffness, weakness in bones or joints, some loss of ability to use part or parts of the body</p> <p>51- HIV Positive/AIDS</p> <p>52- Morbid obesity</p> <p>59- Nervous system disorder for example, migraine headaches, Parkinson's disease, or multiple sclerosis</p> <p>80- Cardiovascular or heart disease</p> <p>81- Depression, anxiety disorder, or other psychiatric disorder</p> <p>83- Blood diseases, for example, sickle cell anemia, hemophilia</p> <p>84- Diabetes</p> <p>85- Orthopedic impairments or osteo-arthritis</p> <p>86- Pulmonary or respiratory conditions, for example, tuberculosis, asthma, emphysema</p> <p>87- Kidney dysfunction</p> <p>88- Cancer (present or past history)</p> <p>94- Learning disability or attention deficit/hyperactivity disorder (ADD/ADHD)</p> <p>95- Gastrointestinal disorders, for example, Crohn's Disease, irritable bowel syndrome, colitis, celiac disease, dysphexia</p> <p>96- Autoimmune disorder, for example, lupus, fibromyalgia, rheumatoid arthritis</p> <p>97- Liver disease, for example, hepatitis or cirrhosis</p> <p>98- History of alcoholism or history of drug addiction (but not currently using illegal drugs)</p> <p>99- Endocrine disorder, for example, thyroid dysfunction</p>
<p>Other Options:</p> <p>01- I do not wish to identify my disability or serious health condition.</p> <p>05- I do not have a disability or serious health condition.</p> <p>06- I have a disability or serious health condition, but it is not listed on this form.</p>	

A Closer Look: Alternative Dispute Resolution (ADR)

- Resolution rates: 56% of all cases successfully mediated
Resolution rates highest in cases that present directly to ADR, followed by mediations on grievances, then EEO complaints
Significant increase in case complexity across the board

A Closer Look: Reasonable Accommodation

- Main types of requests
Communication Access Real-time Translation (CART) Services and Sign-Language Interpretation (SLI)
Modified Work Schedule
Sit/Stand Workstation
These can be provided without going through RA
Reasonable Accommodation requests continue to increase:

2014	2015	2016	2017
336	381	442	474

A Closer Look: Formal EEO Complaints

- Number of formal complaints filed: Complaints by basis: race, reprisal, sex, age, and disability
Complaints by issue: Assignment of duties and other terms and conditions of employment
Performance evaluation/appraisal
Non-sexual harassment

2014	2015	2016	2017
61	57	53	65

EEO Complaints Focus Areas

Focus Areas

- Resolution Focus Pre-complaint process: EEO Counseling Listen, reflect, connect, and advise Management Involvement Process
Improvement: New SOP & Templates Paperless case management system Training: Hot Topic Requests: Sexual Harassment Needed Requests: Reprisal/Retaliation Executive Order 13839: Executive Order Promoting Accountability and Streamlining Removal Procedures Consistent with Merit System Principles Sec. 5. Ensuring Integrity of Personnel Files

Data Drives Our Activities

Data Drives Our Activities

- Our goal is to use CDC-specific data to focus our efforts and have the greatest impact. Based on what we know, these changes can have a positive impact on our current process:
 - Shorten RA timeline
 - Focus efforts on pre-complaint phase to increase settlements
 - Get higher resolution rates

Data Drives Our Activities (cont.)

- From FY 2014-FY 2017, the top issues have been consistent: RA: sit/stand desks, sign-language interpreter, non-coach travel and modified work schedules EEO: evaluation/appraisal, harassment, and promotion/non-selection Trainings will focus specifically on these areas New materials being developed to help navigate RA Empower managers to know what they can provide for their staff without going through formal RA process Marketing our trainings better to ensure those who need it are aware of the offering

Subject: Senior Leader (And Guest) Holiday Social
Attachments: image001.jpg
Importance: High

We look forward to seeing everyone at the Senior Leader Social on Friday, December 14th! The event will be held at Papi's Cuban & Caribbean Grill at Emory Point. It is recommended that you park in the parking ramps at Emory Point. The buffet will include the following items Cuban and Caribbean items:

- Tostones
- Beef & Chicken Empanadas
- Croquettas
- Ropa Viejo with yellow rice and black beans
- Grilled Chicken with white rice and black beans
- Jerk Chicken with maduros
- Vegetarian options available

**Fountain drinks and gratuity are included in the cost that each of you have already paid for self or self and guest.

The back section of the restaurant has been reserved for our Holiday Social. If you have any questions, please feel free to contact me (Mark Byers).

YOU ARE CORDIALLY INVITED

Subject: RE: World Polio Day Event with Rotary VIP Reception

Hello Mark –

There will not be reserved seating in room 254/55 for the 5 – 5:30 pm VIP reception. It will be an informal space for Dr. Redfield and other CDC leaders to speak with Rotary VIPs. Robert Hall from Rotary will see him walk into the room and introduce folks to Dr. Redfield. Drs. Redd, Messonnier, Martin and Verteheuille will also be in attendance.

For Dr. Redfield's 5:45 pm remarks, there will be a podium with a microphone located by the entrance to Auditorium B where he will speak from. There will be 3 speakers giving remarks. He will go first, followed by Robert Hall (Rotary) and Rebecca Martin. We slated him first since we know he needs to leave by 6 pm. I've copied the latest run of show below. The gap in time between 5:30 and 5:45 will likely be taken up by him finishing conversations and moving from 254/55 to the front of Aud B.

As a side note. The ACIP session will be ending around 5:15 (latest 5:30) that day so Dr. Redfield may see some overlap of people leaving Auditorium B if he is there closer to 5:30. We are coordinating with NCIRD though to make the transition as easy as possible so their folks can get out without disturbing ours.

Please let me know if you have any additional questions.

Suzanne

Hello Gena,

I'm coordinating the logistics for Dr. Redfield and his special assistant, Hugh Green. Will there be reserved seating for them? If so, would you please send me instructions so they can locate that seating area?

Thank you in advance,

Mark

Dear Mr. Simcox:

Thank you for inviting Dr. Robert Redfield to speak at the first ever Health and Human Services Lyme Innovation Roundtable to be held on December 4, in Washington, DC. Dr. Redfield is truly honored by your invitation; however, his fully committed schedule will not permit him to participate at this time.

Ben Beard, PHD, MS, Deputy Division Director, Division of Vector-Borne Diseases, National Center for Emerging and Zoonotic Infectious Diseases, Deputy Director for Infectious Diseases is available to participate on Dr. Redfield's behalf. Please contact Dr. Beard directly at (970) 221-6418 or cbb0@cdc.gov to make arrangements. Dr. Redfield's team will also provide taped remarks for the event.

Please accept our best wishes for a successful session.

Sincerely,

Sandra Cashman, MS
Executive Secretary
Office of the Chief of Staff, CDC

Dr. Redfield,

It was a pleasure meeting with you to discuss the All Hazards Project. Your insights on challenges surrounding Tick Borne diseases made my team realize that we can leverage Tick Borne diseases as a case study for the All Hazards project.

The concerns surrounding appropriate clinical decision support and tests are just as unknown to providers when approaching Tick borne diseases as they are approaching other unfamiliar diseases. By fleshing out a project that applies the All Hazard principles to Tick Borne diseases, we could build out an infrastructure that can be scaled for other future emergency response scenarios. This could have a positive impact for how we approach future emergencies by creating an efficient and successful strategy.

We want to further explore this idea during the *Tick Borne Round Table* on December 4th in the Humphrey Building that we are hosting. The invitation is in the chain below.

Before we go any further and bring this idea up at the Round Table, we want to make sure we have your support. Please let me know if you would like to schedule a follow up to discuss further. We are really excited about this opportunity.

Best,
Ed

Subject: Lyme Innovation Roundtable 12/4 – VIP speaker invite

Dear Dr. Redfield,

Following up on our recent discussions, my office is hosting a Lyme Innovation Roundtable on Tuesday, December 4th, in The Great Hall at HHS Hubert H. Humphrey headquarters in Washington DC.

I am writing to see if you would be able speak at this first-ever HHS Lyme Innovation Roundtable.

Your CDC leadership and vision will be of most interest to this audience of Lyme leaders. As you know, the U.S. is experiencing a Lyme disease pandemic that costs our economy tens of billions and infects over 300,000 Americans every year -- more than HIV/AIDS and breast cancer, combined. Current treatments for this tick-borne bacterial infection fail approximately 10-20% of patients who then become chronically ill. Like other complex health challenges, solutions will require data-driven innovation and collaborations across silos.

The Lyme Innovation Roundtable will be a closed-press, invite-only event in Washington DC with ~80 experts from federal, state, and local government, the private sector, non-profit organizations, and academia to:

1. Identify high-value datasets and evaluate their information, which Federal government and other sectors can release with value for industry, academia, and data-driven solutions to Lyme disease.
2. Strengthen collaborations and scope opportunities for an emerging public-private innovation accelerator—the “LymeX” initiative with HHS CTO, emulating the success and methods of KidneyX: <http://www.kidneyx.org/>.

More details attached. Our office’s lead, Dr. Kristen Honey, is CC:ed, and we’re available to discuss and answer any questions you may have. Thanks in advance for your consideration.

Sincerely,
Ed

P.S.

You may recognize Kristen’s name from our DC meeting and also the [Tick-Borne Disease Working Group](#) (TBDWG) because she is the TBDWG Vice-Chair. **This Lyme Innovation Roundtable is distinct and separate from the TBDWG.** OASH leads the TBDWG FACA Working Group process, whereas HHS CTO/IOS is leading Lyme Innovation efforts to form PPPs and harness non-government resources to tackle tick-borne disease challenges.

Subject: scheduling the video taping tomorrow

Hi Teresa,

We're going to try to schedule Dr. Redfield in the HHS studio tomorrow. I asked Bryon Skinner to give me his contact at the HHS studio. Question: what's the best scheduling process? Would you like me to just put you in contact with the HHS studio contact? Or shall I schedule it with him, cc you? Let me know and I'll take care of anything I need to.

Thanks so much for your help!

Event Overview:

Event Title: National Network of Perinatal Quality Collaboratives Annual Summit

Name of Organization Hosting Event: CDC/ National Institute for Children's Health Quality (NICHQ)

Description of Organization: NICHQ (National Institute for Children's Health Quality) is an independent, nonprofit organization working for more than a decade to improve children's health. We help organizations and professionals who share this mission (typically, healthcare professionals and delivery organizations, foundations, government agencies, and community organizations) make breakthrough improvements so children and families live healthier lives.

Event Location: Atlanta, GA, CDC Clifton Campus, Global Communications Center

Event date: 11/29/2018- 11/30/2018

Event start time: 9:00 AM | End Time: 4:15 PM

Director's participation requested start time: 9:15 AM

Director's participation requested end time: 9:45 AM

Contact Person

Contact Person: Sarah Foster

Contact Office Phone: 770-488-6417

Contact Cell Number: 404-290-0700

Contact Email: sjf4@cdc.gov

Event Details

What is the purpose of this event?: The National Network of Perinatal Quality Collaboratives (NNPQC) Annual Summit will bring together all state perinatal quality collaboratives (PQCs). The NNPQC supports state-based PQCs in making measurable improvements in statewide health care and health outcomes for mothers and babies. Participants at the Summit will include:

- Project leads/representatives involved with the day-to-day coordination PQCs
- High level staff (clinicians, data leads, etc.) who lead the PQCs

- Parent advocates/family representatives
- Representatives from national partner organizations and federal partners

The meeting will address a range of issues relating to the quality improvement of maternal and infant care, including measurement to improve the patient experience of care, improve care outcomes, reduce costs; how to engage, recruit and sustain relationships with extended partners; and the importance of data transparency.

Proposed role of Director?: speaker

If the Director is unable to attend, would you still be interested in a CDC speaker?: YES

If the Director is unable to attend in-person, would joining by video teleconference be an option?: NO

If the Director is unable to attend in-person or by VTC, would a pre-recorded message be an option?: YES

Presentation Details

Topic of Presentation: Welcome/ Importance of Quality Improvement in Maternal and Infant Health

Type of Presentation: Opening Remarks

Presentation Special Notes:

Additional Speakers: CDC's Division of Reproductive Health will be presenting or leading a number of sessions at the event.

Length of Presentation: We would welcome Dr. Redfield's participation in any way that he would be able/ interested.

PowerPoint requested: [ppt-available]

Will there be Q&A?: NO

Specific topic/points you would like the Director to address: CDC's commitment to quality improvement to address the gaps in perinatal care and improve outcomes for moms and babies.

Audience and Key Participants?: Public Health/Medical Professionals

Audience Size?: 101-150

Expected Media Coverage?: NO

Will this event be videotaped?: NO

Additional details?: [Additional-details]

Background on Perinatal Quality Collaboratives

State Perinatal Quality Collaboratives (PQCs) are networks of multidisciplinary teams working to improve maternal and infant health outcomes by advancing evidence-based clinical practices through continuous quality improvement.

- They include key clinical leaders in private, public, and academic health care settings and public health professionals with expertise in evidence-based obstetric and neonatal care and quality improvement science.
- Strategies include provision of quality improvement science support and assistance to clinical teams, use of the collaborative learning model, and rapid feedback of data to member facilities to improve care.
- The ultimate goal of PQCs is to achieve improvements in population-level outcomes in maternal and infant health throughout the state.

CDC has provided support for PQCs since 2011, starting with its initial support of established PQCs in California, New York, and Ohio. This support expanded to include North Carolina, Illinois, Massachusetts and North Carolina in 2014, which led to the development of an online PQC Resource Guide (Developing and Sustaining Perinatal Quality Collaboratives: A Resource Guide for States) and the development of the National Network of Perinatal Quality Collaboratives in 2016.

CDC now funds 13 state PQCs--Colorado, Delaware, Florida, Georgia, Illinois, Louisiana, Massachusetts, Minnesota, Mississippi, New Jersey, New York, Oregon, and Wisconsin. Funding supports developing the capabilities of PQCs to improve the quality of perinatal care in their states, including Quality Improvement initiatives addressing:

- Maternal opioid use/ Neonatal Abstinence Syndrome
- Obstetric hemorrhage
- Maternal hypertension
- Reduction of unnecessary C-section
- Neonatal nosocomial blood stream infection
- Antibiotic stewardship
- Breastmilk in the NICU
- Progesterone for the prevention of preterm birth

CDC also funds the National Network of Perinatal Quality Collaboratives (NNPQC) to support state and regional PQCs nationwide in making measurable improvements in health care and health outcomes for mothers and babies, reaching beyond the CDC funded states.

CDC is committed to improving birth outcomes for moms and babies. This requires public health agencies working together with health care providers, communities, and partners to reduce maternal and infant deaths and improve outcomes for moms and babies in the United States. This joint approach can help address the social, behavioral, and health risk factors that affect birth outcomes and contribute to maternal and infant mortality.

Data on Perinatal Health

Perinatal morbidity and mortality are key indicators of a nation's health status. These measures of our nation's health are influenced by decisions made in health care facilities and by health care providers. As our health systems and health care for women and infants can be improved, there is an expectation that these measures of health will also improve.

Maternal Mortality

- Sadly, about 700 women die during or within one year of the end of pregnancy each year in the United States as a result of pregnancy or delivery complications.
- Further, considerable racial disparities exist, with black women almost 4 times more likely to die from pregnancy-related complications than white women.
- Data from CDC's Pregnancy Mortality Surveillance System (PMSS) show that the pregnancy-related mortality ratio in the United States steadily increased from 7.2 deaths per 100,000 live births in 1987 when the system began to 18.0 deaths per 100,000 live births in 2014.
 - Over time there has been a shift in the leading causes of maternal deaths in the US from traditional causes such as hemorrhage to cardiovascular related conditions.
- However, from CDC's work with Maternal Mortality Review Committees, in collaboration with the CDC-Foundation, the *Report from Nine Maternal Mortality Review Committees*, released in February 2018, it was documented that about 60% of pregnancy-related deaths are preventable. In addition, this report found:
 - Nearly half of all pregnancy-related deaths were caused by hemorrhage, cardiovascular and coronary conditions, cardiomyopathy or infection
 - 38% occurred during pregnancy and 45% of deaths occurred within 42 days of delivery
 - Mental health conditions are a leading cause of death, and also an important contributor – caused 7% of deaths, contributed to 13%
- Bringing together data from Maternal Mortality Reviews with the action of the PQC's is important to address the specific drivers in each state.

Severe Maternal Morbidity

- Severe maternal morbidity (SMM) includes unexpected outcomes of labor and delivery that result in significant short- or long-term consequences to a woman's health.
- SMM affects more than 50,000 women in the United States every year. Based on recent trends, this burden has been steadily increasing.
 - The overall rate of SMM increased almost 200% over the years, from 49.5 in 1993 to 144.0 in 2014.
- Rises in SMM are likely driven by a combination of factors, including increases in maternal age, pre-pregnancy obesity, pre-existing chronic medical conditions, and cesarean delivery.
 - The consequences of the increasing SMM prevalence are wide-ranging and include higher health service use, higher direct medical costs, extended hospitalization stays, and long-term rehabilitation.

Infant Mortality

- Infant mortality is the death of an infant before his or her first birthday. In addition to giving us key information about maternal and infant health, the infant mortality rate is an important marker of the overall health of a society. In 2016, the infant mortality rate in the United States was 5.9 deaths per 1,000 births.
 - In 2016, infant mortality rates by race and ethnicity were as follows:
 - Non-Hispanic black: 11.4
 - American Indian/Alaska Native: 9.4
 - Native Hawaiian or other Pacific Islander: 7.4
 - Hispanic: 5.0
 - Non-Hispanic white: 4.9
 - Asian: 3.6

- Over 23,000 infants die before their first birthday in the U.S. CDC is taking action to better understand and prevent infant deaths relating to preterm birth, sudden infant death syndrome, suffocation, and maternal pregnancy complications.

Infant Health

- Preterm birth is when a baby is born too early, before 37 weeks of pregnancy have been completed. In 2016, preterm birth affected about 1 of every 10 infants born in the United States.
 - Preterm birth rates decreased from 2007 to 2014, and CDC research shows that this decline is due, in part, to declines in the number of births to teens and young mothers.
 - However, the preterm birth rate rose for the second straight year in 2016.
 - Additionally, racial and ethnic differences in preterm birth rates remain. For example, in 2016, the rate of preterm birth among African-American women (14%) was about 50 percent higher than the rate of preterm birth among white women (9%).
- Opioid use disorder can cause many negative health outcomes for mothers and their babies, both during pregnancy and after delivery. Infants born with neonatal abstinence syndrome (NAS) can have breathing and feeding problems, and mothers are at risk of opioid-related overdoses.
 - Four times as many infants were born with NAS in 2014 than in 1999. Similarly, opioid use disorder has gone up more than 4 times among pregnant women.

Subject: Substance Use Disorder Provider Education Invitation

Dear Ms. Smith:

Thank you for inviting Dr. Robert Redfield to record a short video message, in lieu of his attendance, for Shaping Our Appalachian Region's provider education event on substance use disorder on October 23 in Pikeville, Kentucky. He is pleased to accept your invitation.

A representative from Dr. Redfield's Advance Team will be in touch to confirm details and will provide the recorded remarks by October 19.

Thank you again for the invitation.

Sincerely,

Sandra Cashman, MS
Executive Secretary
Office of the Chief of Staff

Lisa,

11/8 is possible for a lunch meeting, but not 11/9. There is still time on 11/9 for a visit, though. Is it possible to get a draft agenda from you on what's planned for this visit so we can get a better idea of the timing involved? Thank you!

Dear Jeremy,

Thanks for giving us many options below. The best dates for us are November 8th and November 9th. I am polling a few individuals who will be part of the discussions and should have an answer for you by end of this week. Of those two days, what times work best for Dr. Redfield? Is he amicable to possibly meeting during lunch?

Lisa,

Here are the dates that work for Dr. Redfield. November 6, 7, 8, 9, 15, 16; December 18, 19, 20, 21. Hopefully a few of those line up for Dr. Ross as well.

I didn't work with Jordan Tappero very often but would see him up on our floor when he was doing something with the Director. I'm sure at least 3 or 4 more will come with Dr. Redfield for this visit, and I'll do my best to get you names once we get the time sorted out. I'll also let you know if the time commitment is works as well. Thanks and we'll see if we can get this lined up. Have a good day!

Hi Jeremy!

Nice to meet you via email, though I think we've talked before? Did you work closely with Dr. Tappero in the past? If so, nice to chat again via email.

Given the hectic schedule for Dr. Redfield, is it best if you can shoot me over some potential dates/times that work with his schedule? Also, are there others that will accompany him? We will work toward pulling together an agenda for the visit, along with those attending from our executive team.

I will tell you, November is a challenge for Dr. Ross. If there are any dates in either November or December that work, just shoot those over to me and we can go from there. I think we should allow 1.5 – 2 hours for his visit, if that is also feasible.

Let me know your thoughts –

Sincerely,

Subject: Dr. Redfield Visit to The Task Force for Global Health

Dear Jeremy,

You will find attached, a proposed "draft" agenda for Dr. Redfield's visit with The Task Force for Global Health. The best day for our group to gather with Dr. Redfield and those he wishes to bring with him, would be Friday, November 9th. Building in travel time (:20 minutes each way) should accommodate him out of the office for a maximum of 3 hours. We appreciate that this may be too ambitious. We can scale back to whatever amount of time Dr. Redfield is able to devote to our visit.

The opportunity of his visit will allow us to provide him an overview of our programmatic work we are doing within the highlighted programs on the agenda.

Please let me know if we can secure Friday, November 9th. I suggested 9:00 am – 11:00 am, but we are flexible on that time.

I look forward to hearing back from you.

Sincerely,

Lisa A. Valente

Hi Jeremy!

Nice to meet you via email, though I think we've talked before? Did you work closely with Dr. Tappero in the past? If so, nice to chat again via email.

Given the hectic schedule for Dr. Redfield, is it best if you can shoot me over some potential dates/times that work with his schedule? Also, are there others that will accompany him? We will work toward pulling together an agenda for the visit, along with those attending from our executive team.

I will tell you, November is a challenge for Dr. Ross. If there are any dates in either November or December that work, just shoot those over to me and we can go from there. I think we should allow 1.5 – 2 hours for his visit, if that is also feasible.

Let me know your thoughts –

Sincerely,

Lisa A. Valente

Executive Administrative Assistant to:

Dr. David A. Ross, President & CEO and

Dr. Patrick O'Carroll, Sector Head, Health Systems Strengthening

The Task Force for Global Health

330 W. Ponce De Leon Avenue

Decatur, GA 30030

Direct dial: 404-687-5635

Subject: Dr. Redfield Visit to The Task Force for Global Health

Dear Ms. Valente,

It's my understanding that Dr. Redfield and Dave Ross recently discussed a visit to the Task Force in Decatur and that we're looking to coordinate a visit before the end of the year. Can I work with you to find a time that would be suitable for all? Thank you and let me know how you'd like to proceed.

Jeremy

Jeremy McCallister

Advance Team

Office of the Chief of Staff

Centers for Disease Control and Prevention (CDC)

Visit by Dr. Robert A. Redfield
Director, Centers for Disease Control and Prevention
Friday, Nov. 9, 2018
9:00 am – 10:30 am

AGENDA

- 9:00-:10 Welcome and tour of Conference Center
- 9:10-:20 Introductions
- 9:20-:55 Discussion of Task Force Overview and CDC Partnerships

Potential topics for discussion:

1. Our Expertise
2. Our Partnerships in Support of CDC's Strategic Priorities
 - a. Improving health security
 - b. Preventing the leading causes of disability, illness, and death in the United States
 - c. Strengthening U.S. public health and healthcare collaboration
3. Partnership for Influenza Vaccine Introduction
4. International Trachoma Initiative – a model for disease elimination
5. Multiplex diagnostics for population-level disease surveillance

Speakers:

Dr. David Ross, President and Chief Executive Officer
Dr. Mark McKinlay, Director, Center for Vaccine Equity
Dr. Paul Emerson, Director, International Trachoma Initiative
Dr. Patrick Lammie, Principal Investigator, Neglected Tropical Diseases Support Center

- 10:00-:25 CDC's Global Portfolio – Future Directions
Speaker: Dr. Redfield
- 10:25-:30 Wrap Up

CDC: Our Valued and Special Partner in Disease Prevention, Elimination, and Eradication

**Dave Ross, ScD
President and Chief Executive Officer
Nov. 9, 2018**

WE SOLVE POPULATION-LEVEL HEALTH PROBLEMS

- **Emory University affiliate based in Decatur**
- **Founded in 1984 by former CDC Director Dr. Bill Foege**
- **Mission**
 - Control, eliminate, and eradicate debilitating diseases
 - Protect the health of populations

WHO WE ARE TODAY

- **140+ staff members in Decatur**
- **Support projects in 157 countries including the United States**
- **Manage 400+ million treatments annually of antibiotic and anti-parasitic medicines**
- **Major funders**
 - Centers for Disease Control and Prevention
 - USAID
 - UK aid
 - Bill & Melinda Gates Foundation
 - Pharmaceutical companies (Pfizer, Merck, Johnson & Johnson, GSK, Novartis, Gilead)

OUR DISEASE FOCUS AREAS

- **Neglected Tropical Diseases**

- Trachoma
- River Blindness
- Lymphatic Filariasis
- Soil-Transmitted Helminths
- Schistosomiasis
- Leprosy

- **Polio**

- **Influenza**

- **Viral Hepatitis**

OUR DISEASE ELIMINATION MODEL

- **Mobilize multi-sector coalitions**
 - Hub for 8 global partnerships focused on disease control, elimination, and eradication
- **Steward drug donations**
 - 400+ million treatments annually
- **Conduct operational research to overcome barriers to disease elimination**

Begin Scan

OUR AREAS OF EXPERTISE

- Partnerships
- Supply chain and logistics
- Training and health workforce development
- Operational research and clinical studies
- Information systems
- Global health ethics

2016 HILTON HUMANITARIAN PRIZE

- 2016 recipient of the Conrad N. Hilton Humanitarian Prize
 - Awarded for our extraordinary contributions to alleviating human suffering
 - World's largest humanitarian award at \$2 million

OUR PARTNERSHIPS WITH CDC

WE SUPPORT CDC'S STRATEGIC PRIORITIES

- **# 1 – Improve Health Security at Home and Around the World**
 - Field epidemiology
 - Information and analytics
 - Pandemic preparedness
 - Health workforce development
 - Childhood mortality
- **# 2 – Prevent the leading causes of illness, disability, and death in the United States**
 - Vaccine registries
 - Viral hepatitis elimination
- **# 3 – Strengthen U.S. public health and healthcare collaboration**
 - Digital Bridge

IMPROVING HEALTH SECURITY AT HOME AND ABROAD

STRENGTHENING FIELD EPIDEMIOLOGY CAPACITY

- **TEPHINET (Training Programs in Epidemiology and Public Health Interventions Network)**
 - **Support 71 FETP programs in more than 100 countries**
 - Quality improvement through accreditation
 - Mobilize FETP graduates for health emergencies (TEPHIConnect)
 - Promote knowledge exchange through scientific conferences and networking
 - Special initiatives – e.g. Zika response in Latin America and the Caribbean
- **Support new roadmap for global FETP enterprise**

BUILDING SKILLED HEALTH WORKFORCE IN EAST AFRICA

- **African Health Workforce Project**

- PEPFAR-supported project in Kenya to build human resource information systems
- Goals:
 - Ensure the quality of healthcare professionals through improved regulation
 - Track different cadres of healthcare professionals
 - Provide data for more efficient management of the health workforce
- System has dramatically increased compliance with licensing and certification requirements.
 - Significant source of additional revenue for the ministry of health that has enabled credentialing to be self-sustaining
 - Data provides a roadmap for Kenya to achieve universal health coverage.
 - Model is now being transmitted to other countries in East Africa.

INFLUENZA PANDEMIC PREPAREDNESS

- **Partnership for Influenza Vaccine Introduction**
 - Led by Dr. Joe Bresee, assigned from CDC
- **Program Goals**
 - Create sustainable, annual, seasonal influenza vaccination programs in low- and middle-income countries
 - Generate and share knowledge from country vaccination experiences with other countries and stakeholders
 - Build the immunization infrastructure, capacity and vaccine delivery systems required for future influenza pandemics and other infectious disease epidemics
- **Impact**
 - Have worked in 19 countries – delivered more than 3 million doses of vaccine – first graduating countries in next 1-3 years

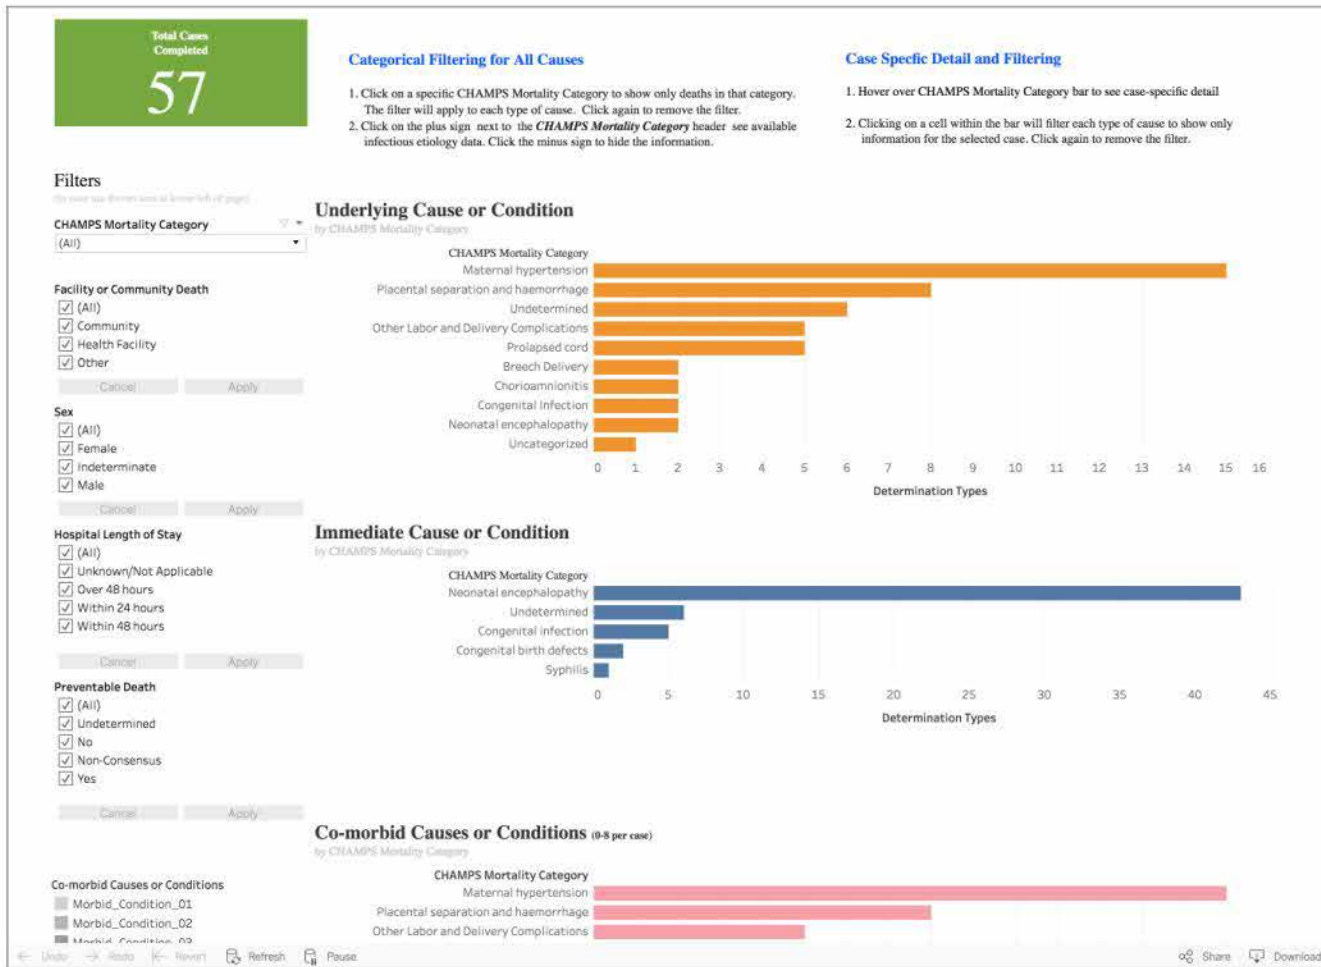

SUPPORTING THE “LAST MILE” OF POLIO ERADICATION

- **Drs. Foege and Hinman made the case for polio eradication in 1988.**
- **We support four Global Polio Eradication Initiative objectives through:**
 - Polio Antivirals Initiative
 - U.S. National Certification Committee (NCC) secretariat
 - Polio outbreak surge response to polio outbreaks
 - Transition management support (completed 2017)
 - IPV introduction and global switch from tOPV to bOPV (completed 2016)

DEVELOPING A SURVEILLANCE SYSTEM TO TRACK CHILDHOOD DEATHS

- **Child Health and Mortality Prevention Surveillance (CHAMPS) program**
 - Focus on understanding the causes of childhood mortality in sub-Saharan Africa and South Asia
 - The Public Health Informatics Institute is building the information system to collect and analyze data about the causes of death.
 - This system will form the backbone of a sophisticated surveillance system for detecting disease outbreaks and other health threats.

CHAMPS DATA VISUALIZATION EXAMPLE – STILLBIRTH CAUSES OF DEATH

PREVENTING THE LEADING CAUSES OF ILLNESS, DISABILITY, AND DEATH IN THE UNITED STATES

DEVELOPING IMMUNIZATION INFORMATION SYSTEMS¹

- **PHI has been a major partner on the Immunization Information System since 1992.**
 - Tracks immunization records of children electronically
 - New Hampshire was last state to adopt IIS in 2018.
 - Next step
 - Enable states to share immunization data with each other

ACCELERATING PROGRESS TOWARD VIRAL HEPATITIS ELIMINATION

- **Launching Program for Viral Hepatitis Elimination in 2019**
 - Dr. John Ward, seconded from CDC, is heading up this initiative
 - WHO is a key partner
- **Building on The Task Force's experience in disease elimination**
 - Linking elimination programs in a community of practice
 - Developing trusted information resources
 - Providing technical assistance to national and subnational programs
 - Studying new technologies and elimination strategies
- **Task Force has engaged industry and non-governmental organizations as initial funders.**

STRENGTHEN U.S. PUBLIC HEALTH AND HEALTHCARE COLLABORATION

IMPROVING INFORMATION EXCHANGE BETWEEN U.S. PUBLIC HEALTH AND HEALTHCARE

- **Digital Bridge**

- Collaboration among U.S. public health, largest healthcare systems, and health IT companies
- Reportable infectious disease cases often go unreported due to barriers in the flow of information.
- We are helping standardize the way electronic information is shared between U.S. public health and health systems.
 - This will improve public health response to disease outbreaks.

INTERNATIONAL TRACHOMA INITIATIVE: A MODEL FOR DISEASE ELIMINATION

INTERNATIONAL TRACHOMA INITIATIVE: A MODEL FOR DISEASE ELIMINATION

- **Trachoma is the leading infectious cause of blindness**
- **Our model consists of three pillars:**
 - Steward Pfizer's donation of antibiotic
 - Trachoma Expert Committee
 - Develop and strengthen partnerships for trachoma elimination
 - Generate and provide access to data and knowledge about trachoma for the global elimination program
 - Prevalence data to inform decision-making by country programs

OPPORTUNITIES FOR INCREASED COLLABORATION

MULTIPLEX DIAGNOSTICS FOR POPULATION SURVEILLANCE

- **Technology promises to revolutionize surveillance of pathogens within and across populations.**
- **Untapped public health potential**
- **We are testing the technology in our NTD programs.**
 - Dr. Patrick Lammie, formerly CDC DPDM, is driving this work in collaboration with colleagues from CDC and other institutions.
- **Emerging interest from donors and public health practitioners**

WHAT ARE THE OPPORTUNITIES?

- **Integration into programmatic platforms**
 - DHS, malaria indicator surveys, vaccine coverage surveys
- **Surveillance research**
 - Gates Foundation funding for Comprehensive Mortality Surveillance for Action (COMSA)
 - Abbvie Foundation funding for CDC-PAHO collaboration
 - TFGH support through BMGF for development of new survey designs and operational research
- **Technology development**
 - Current assay platforms are not conducive to widespread use
 - Growing Gates Foundation interest in assay technology
 - Significant opportunity for CDC

THANK YOU

**THE TASK FORCE FOR
GLOBAL HEALTH**

BUILDINGS

PARKING

VISITOR PARKING

Driving Directions

Heading North on New Hampshire Ave (MD 650) from points south (D.C.), FDA's White Oak Campus is on the right, approximately 2 miles past the Capital Beltway.

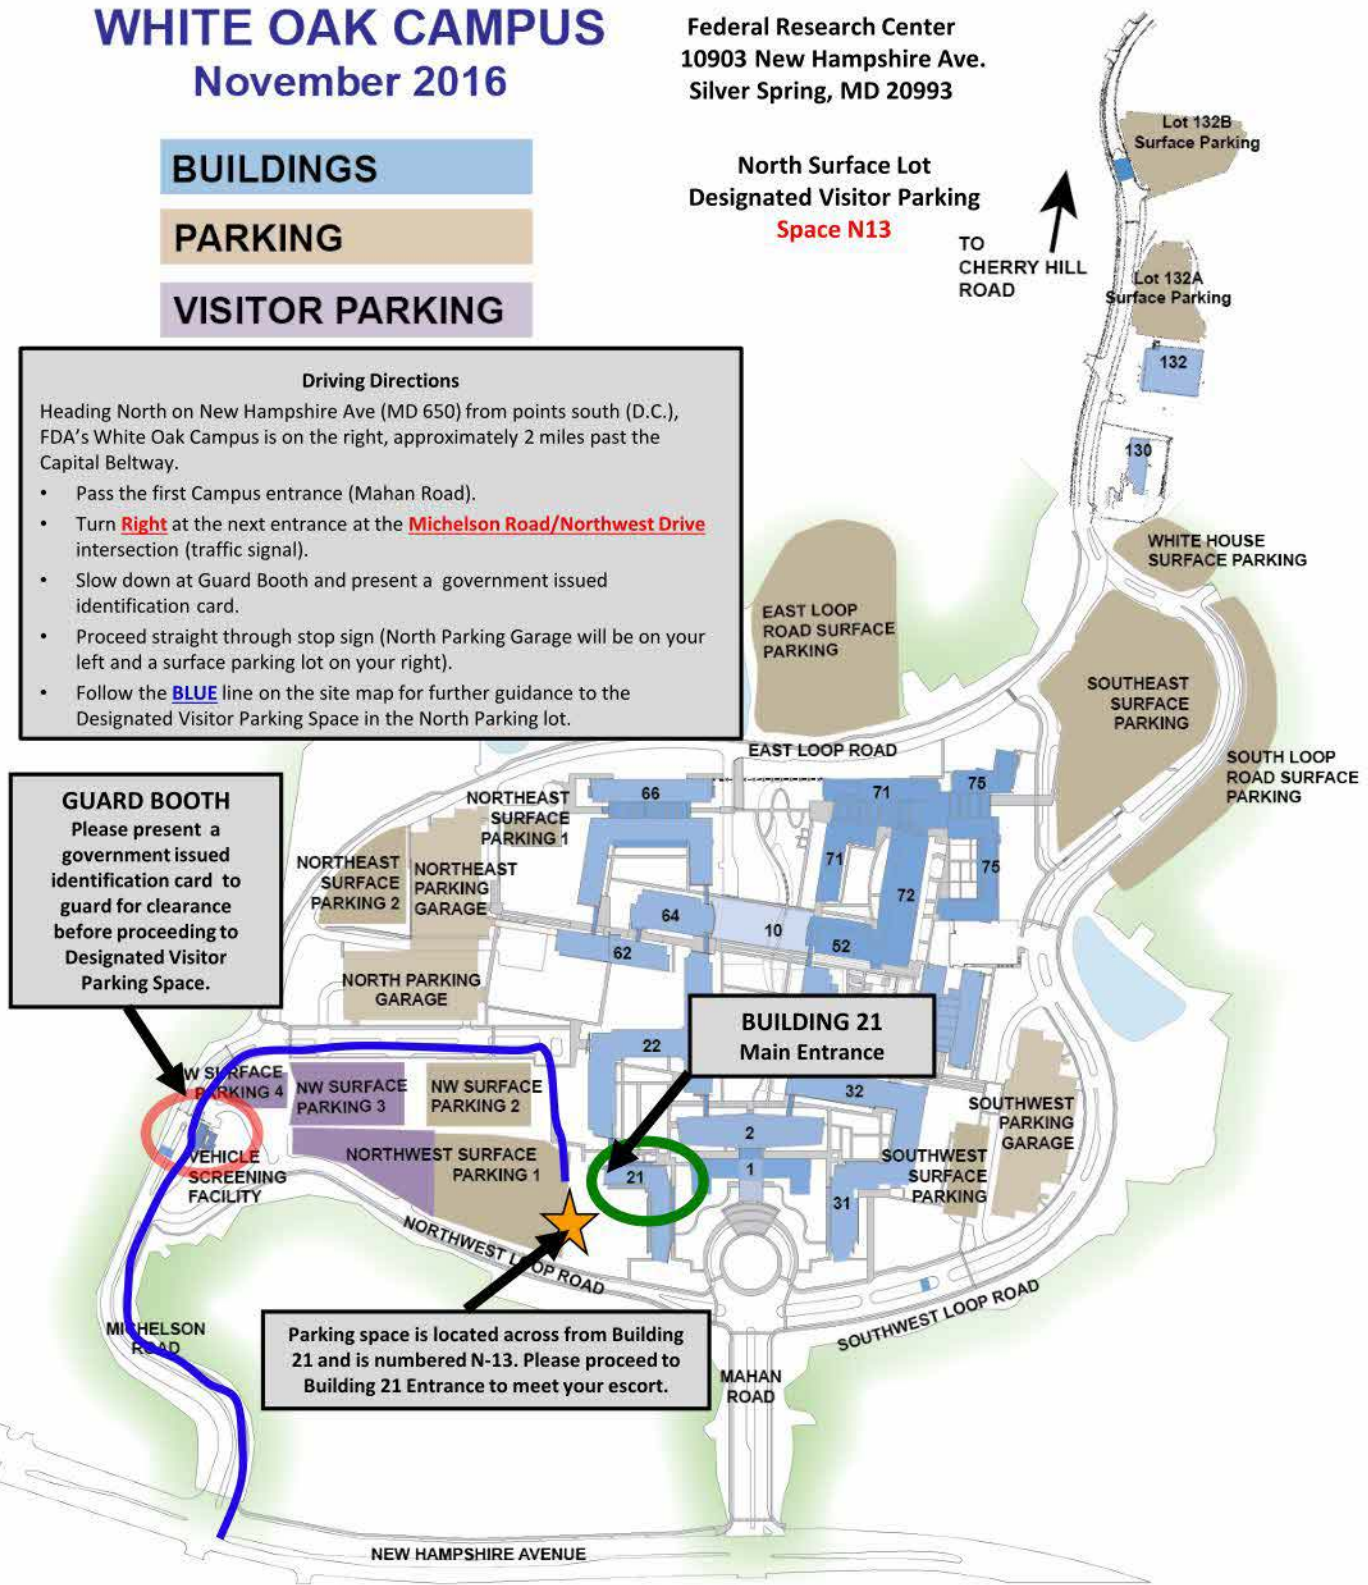

- Pass the first Campus entrance (Mahan Road).
- Turn **Right** at the next entrance at the **Michelson Road/Northwest Drive** intersection (traffic signal).
- Slow down at Guard Booth and present a government issued identification card.
- Proceed straight through stop sign (North Parking Garage will be on your left and a surface parking lot on your right).
- Follow the **BLUE** line on the site map for further guidance to the Designated Visitor Parking Space in the North Parking lot.

North Surface Lot
Designated Visitor Parking
Space N13

TO
CHERRY HILL
ROAD

GUARD BOOTH
Please present a government issued identification card to guard for clearance before proceeding to Designated Visitor Parking Space.

Parking space is located across from Building 21 and is numbered N-13. Please proceed to Building 21 Entrance to meet your escort.

Information for Patients and Visitors to the National Institutes of Health

Street Address:

National Institutes of Health
9000 Rockville Pike
Bethesda, MD 20892

Welcome to the NIH. Please take the time to read this bulletin. It contains important parking and security information you need when visiting the NIH campus.

Patient and Patient Visitor Parking:

Clinical Center — P1 Entrance
Parking Ticket Validation Required
Monday — Friday, 7am - 9pm

Patient & Patient Visitor Parking
Validation:
B1 Lobby at Hospitality Desk

No validation required weeknights
after 9pm, weekends & holidays

Valet Parking Service:
Available at the Clinical Center
Main Entrance

Monday — Friday
7am – 7pm
Ticket validation required

Valet Parking Validation:
North Lobby at Hospitality Desk
7am - 7pm

Unclaimed vehicles after 7pm
will be parked in the front of
the Clinical Center roadway
and keys will be transferred
to the CRC/Bldg.10 Admissions
desk.

**Patient and Patient Visitor
Extended Access Pass:**
You can request an optional,
extended visitor Photo ID and
Campus Access Pass to expedite
your campus and building entry.
Visit the Clinical Center
Admissions Desk or see your
patient care coordinator for these
timesaving services.

General Visitor Parking Information:

Visitors (*other than patients*) parking
at the **Gateway Parking Garage
(MLP-11)** and in designated visitor
parking lot:

Monday — Friday:
6am - 9pm (entrance)
6am - 11pm (exit)
\$2.00 per hour for the first three
hours \$12.00 for the entire day

Metered parking lots:
Monday — Friday, 7am – 7pm
\$2 per hour

The NIH has implemented security
measures to help ensure the safety of
our patients, employees, guests and
facilities. All visitors must enter
through the NIH Gateway Center at
Metro or the West Gateway Visitor
Center. You will be asked to submit to
a vehicle or personal inspection.

Visitors over 15 years of age must
provide a form of government-issued
ID such as a driver's license or
passport. Visitors under 16 years of
age must be accompanied by an
adult.

Vehicle Inspections – All vehicles
and their contents will be inspected
upon entering the campus.
Additionally, all vehicles entering
certain parking areas will be
inspected, regardless of any prior
inspection. Drivers will be required to
present their driver's license and may
be asked to open the trunk and hood.
If you are physically unable to
perform this function, please inform
the inspector and they will assist you.

Vehicle inspection may consist of any
combination of the following:
Detection Dogs Teams (K-9),
Electronic Detection Devices and
Manual Inspection.

After inspection, you will be issued a
vehicle inspection pass. It must be
displayed on your vehicle's
dashboard while you are on campus.
The inspection pass is not a "parking
permit." It only grants your vehicle
access to enter the campus. You can
only park in designated parking
areas. (See campus map)

Personal Inspections – All visitors
should be prepared to submit to a
personal inspection prior to entering
the campus. These inspections may
be conducted with a handheld
monitoring device, a metal detector
and by visible inspection.
Additionally, your personal
belongings may be inspected and
passed through an x-ray machine.

Firearms, explosives, archery
equipment, dangerous weapons,
knives with blades over 2 1/2 inches,
alcoholic beverages and open
containers of alcohol are examples of
prohibited items on the NIH campus.

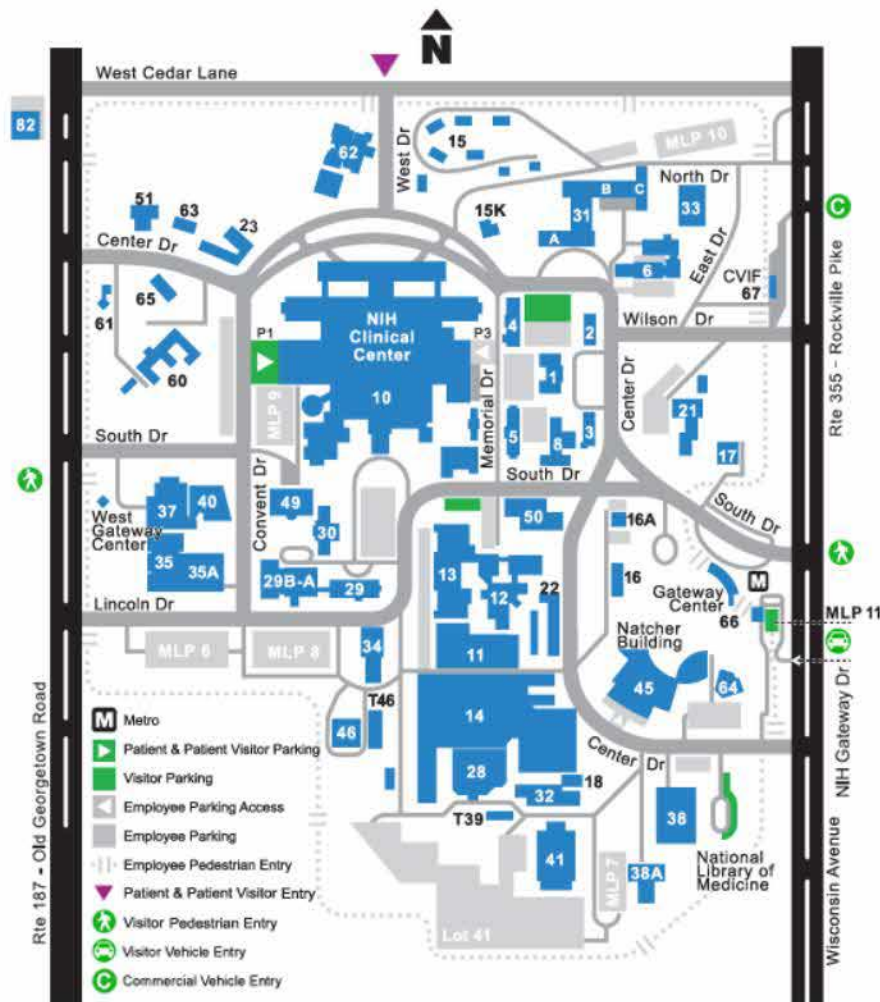

**Visitor passes must be
prominently displayed at all
times while on the NIH campus.**

Subject: Transit to Task Force for Global Health (Sherri to accompany & ride with Ashley and Dr. Redfield)

The Task Force for Global Health is located at 330 W. Ponce de Leon Avenue, Decatur, GA 30030. We are next door to the Café Lilly Restaurant in downtown Decatur. We have a parking deck behind our building. We will arrange to have two parking spaces reserved on our lower level parking deck for both Dr. Redfield and Ms. Berger (unless they are driving together)?

We are still doing some outside construction, however, when exiting our parking deck (walking toward Ponce de Leon Avenue), they will follow the driveway out of our parking deck to our side entrance. Signage on the door, The Task Force for Global Health is visible. Dr. David Ross and Mr. Bill Nichols will be in our reception area to greet them. We have reserved C.R. 109 for the discussions, located on our reception level (ground floor) of our building.

I have arranged to have some light breakfast items available during the meeting as well.

Hello Ken,

We've selected Fresh to Order for the lunch option on November 27th. Would you please secure the lunch reservations for Mr. Hargan, Ms. Kemper and yourself and send them to me in advance? Here's the link to the menu: <http://www.freshtoorder.com/fresh-food-menu/>

Please let me know if you have any questions.

Regarding when and where Dr. Redfield should meet Mr. Hargan to travel to IAD airport, I will watch for your response.

Respectfully,

Mark

Hey Ken, I'm glad to hear that you are all staying at the Emory Conf Center, across the street from CDC. I also wanted to give you a heads up that my colleague Mark Byers is our Protocol Officer for this visit, and he'd like to connect with you (or someone else if appropriate) about lunch on Tuesday, as well as knowing when and where you'd like Dr. Redfield on Monday to join you & the Dep Sec for the ride to IAD. He can also talk with you about our recommendation for getting from CDC to the airport for the return on Tuesday eve.

Seth should also be sending our draft Dep Sec agenda in the next day or two, so let us know if there are any questions once he does.

In the meantime, please let me know if we can help with anything.

Thanks! -Scott

Hi Ken! Your plan sounds perfect, and we'd like to proceed accordingly with travel to IAD and then onward to Atlanta. Please let us know when you'll be booking that flight so that we can do the same. We'll circle back in a week or so with a draft visit agenda. Please let me know if you'll need lodging recommendations in Atlanta.

Much appreciated!

Scott

Hi Ken. Would you be able to let me know which flights the Dep Sec would be taking into and out of Atlanta for the visit on Nov 27th? Dr. Redfield will be in DC the day before and he is considering joining the Dep Sec on his flight to ATL.

Also do you have any time constraints or specific requests as we begin planning the visit agenda?

Thanks!

Scott

Mitchell (CDC/OD)
Subject: Travel to USAID (Reagan Building)

Plan to arrive by 9:00am to get through security

Instructions for Arrival

USAID Headquarters are located in the Ronald Reagan Building (RRB) at 1300 Pennsylvania Avenue, NW, Washington, DC 20004.

The main entrance to the RRB is on 14th Street where you will pass through metal detectors at a first security check. Once you are in the building, go left toward the USAID lobby where you will check in at the security desk with a valid government ID or passport. Please tell the guard you are there to meet with the Admiral Tim (Robert) Ziemer and he/she will call me or Lauren Weber. You will then go through a second security check and I will greet you in the lobby to escort you up to the meeting room.

Please expect 10-15 minutes to go through the security process. If you have any questions, please do not hesitate to contact us at (b)(6)

Best, Justina

Importance: High

Team, Seth and I just spoke to R3. For Monday, he'd like a day-trip. 0830 to DCA and the 7pm return to ATL. Please proceed accordingly and book those flights, Jenn.

Thanks all

Subject: Today and Monday
Importance: High

R3 will have to be in the HHS SCIF today sometime between 1-3pm, for about 30-45 min. Seth is confirming the exact time with OSSAM and will advise. Tracie has held the time.

On Monday, R3 will need to be in DC for a biodefense meeting with the NSC at the WH. We are waiting to see if he'll be in DC on his own dime, or here in ATL over the weekend, so then we can decide if he'll need an outbound flight on Monday morning or not. Later that afternoon around 4:15-5pm, Kyle said there will be another meeting at HHS that he'll need to attend as well. Note the NSC WH meeting location below...

Monday, November 19, 2018 from 1:00pm-2:30pm in EEOB 374 (Large).

We will need to book him on the 7pm return from DCA Monday eve.

More to follow.

Scott

Hi Tracie,

11:00-11:30 works well for the Administrator! Any word on VTC?

Thanks,
Alex

Hi Tracie,

The Administrator is interested in kicking off these series of phone calls with a VTC that includes staff. Is this possible? If so, can you please connect me with the IT person who would be setting up the call, so that I may connect him/her to our IT tech?

Thank you,

Alex

Hi Tracie,

Thank you for your note! Certainly - a reoccurring meeting/call is a great idea.

What are your thoughts on something like the second Friday of every month at 9am? Oddly enough, Fridays tend to be one of our more stable days around here.

We could start on Friday, November 9th if that idea works for Dr. Redfield. Of course, if you have a different suggestion, we are open to it.

Best,

Elyse

Hi Tracie,

I feel more confident having the call after our principals meet at 11am tomorrow but we can plan for this afternoon. I have to leave the office at 3:30 pm today but I am free before then.

Based on your e-mail to Elyse, our call will be planning for Admiral Ziemer and team to come visit Atlanta in the coming weeks. I believe Graham should also be on the call so he can coordinate Alma's schedule as well.

Let me know what time works best.

Regards, Justina

Hi Seth,

Thanks for looping Tracie and Teresa in. To close the loop, there is a VTC scheduled for tomorrow between our Agencies. The scheduling and necessity of an in-person follow up Atlanta meeting will likely be determined after the call tomorrow.

In the meantime, I suggest we identify a date that would work for such a trip to get ahead on tentative logistics while understanding nothing is set in stone until the Principals provide guidance during the VTC.

CDC folks and Morgan, would the 19th or 20th work better for Dr. Redfield and Chief if Staff Steiger's calendars for an Atlanta trip? (Understanding this is hypothetical)

Thank you all,

Graham Higgins

Hi Seth,

Happy to get a meeting time on the books with USAID and CDC leadership after thanksgiving.

I'm looping in Morgan Mitchell-Brintley, who schedules for the Chief of Staff Dr. Bill Steiger, and Lauren Weber, Special Assistant to Admiral Tim Ziemer.

Seth - what days work for Dr. Redfield? We will prioritize Dr. Redfield and Dr. Steiger's calendars initially.

Hi Alma, Graham, and Seth,

This evening I talked to Alma and Seth. We want to go ahead and schedule with you the meeting that Dr. Redfield talked about

with Bill and Tim Ziemer. This would be to talk about how the Ebola outbreak is going, opportunities for us to strengthen collaboration between CDC and USAID if any, and contingency planning if the outbreak spreads. This would be one day in Atlanta after Thanksgiving. Seth is our scheduler, and per Alma, Graham is yours. So if the two of you could talk about a date and then Alma we should work on an agenda. I'm happy to do a first draft of a very brief agenda if you want or you can.

Good morning Aspen,

I hope you are doing well.

Dr. Redfield would like to schedule a 30 minute meeting with Mr. Simcox.

Mr. Simcox is aware of the meeting request and topic for discussion.

Would it be possible to schedule a meeting in Washington on July 9th from 1:00-1:30 p.m.?

Thank you for your consideration.

Best,
Teresa

Subject: CAPT Michael Schmoyer to visit CDC on Dec 17

Hi Teresa,

Good afternoon!

CAPT Schmoyer now plans to come to CDC on December 17 (history below). We will host a meeting of CIO Deputies and MOs to review counterintelligence/insider threat items. Before or after, I believe CAPT Schmoyer would like to brief Dr. Redfield. Nothing has been set and we are happy to arrange the day around Dr. Redfield's calendar.

Please let me know what works best for Dr. Redfield and we will plan accordingly.

Sincerely,
Josh

Hi Tracie,

Thank you very much! Unfortunately Eric will be on a plane on Monday morning. In the following week he is available at 5:15pm on Monday, November 26th, 5pm on Tuesday, November 27th, or any time between 8 and 9am on Thursday, November 29th. Would any of those times work?

Best,
Sira

Hi Tracie,

I'm just circling back to see if we can find a time for this phone call. Is there any chance of fitting it in next week?

Many thanks,

Sira

Dear Francis: Thanks for reaching out.

Dear Bob: Nice to e-meet you. I'd be glad to discuss possibilities by phone. I'll ask my office to work with yours to find a time.

Best,
Eric

On Sat, Nov 3, 2018 at 11:35 AM, Francis Collins

(b)(6) wrote:

Hi Eric,

I just spoke with CDC Director Bob Redfield about possible new ideas to figure out the cause of the troubling seasonable outbreaks of acute flaccid myelitis. While enterovirus D68 has been suggested as the cause, this is far from clear, and there is some indication that the disease may be a post-infectious immune response, attacking anterior horn cells in the spinal cord.

We talked about ways to utilize new technologies to sort this out -- and single cell RNA-seq on mononuclear cells from peripheral blood or CSF seems like a useful approach, and one that hasn't been tried yet.

I suggested that he contact you to see if the Broad could be helpful in this situation. He's cc'd on this message, and his phone is (b)(6)

Thanks for any help and your colleagues might be able to provide.

Best, Francis

Subject: Next Koplan/Redfield Lunch Meeting

Good afternoon Ayanna,

I hope you are doing well.

I am contacting you to schedule the next lunch meeting between Dr. Redfield and Dr. Koplan.

Would Dr. Koplan be available Wed., December 19th from 12-1:00 p.m. to have lunch at CDC?

If this date doesn't work for Dr. Koplan, could you offer a date the week of December 17th?

If not, we may need to look at dates in January 2019. Dr. Redfield has a very busy travel schedule for November and December.

I look forward to hearing from you.

Best,
Teresa

Subject: Email to Dr. Redfield

Hi Tracie,

Governor Leavitt has tried on numerous occasions to get this email (below) to Dr. Redfield. We're not sure what is happening, but wondered if you could help us out. Can you please forward this and also, can we schedule a time for Governor Leavitt to meet with Dr. Redfield?

Thank you so much,
Suzanne

Dr. Redfield,

I am writing to request a meeting with you. Since concluding my service as Secretary of the United States Department of Health and Human Services, much of my time has been devoted to bridging public health and the health care systems—I'm particularly interested in the Social Determinants of Health (SDOH).

In addition to just getting to know you, I would like to discuss what I consider to be an important public health opportunity. The ACA requires nonprofit hospitals every three years to do Community Health Needs Assessments. A lot of energy and resources are required to do these assessments right. I have observed that too often public health interests are not included. Most nonprofit hospitals will be going through this exercise in 2019. If hospitals include public health officials in the development of those assessments it will result in more meaningful execution of community health strategies.

My colleagues and I have been quite heavily involved in helping the National Association of Chronic Disease Directors carry out their important work. I know you are well aware of their work.

With whom should I speak with to align an appointment?

A handwritten signature in black ink that reads "Mike Leavitt". The signature is fluid and cursive, with the first letters of "Mike" and "Leavitt" being significantly larger and more stylized.

Hi Tracie!

Okay! I think we have everything figured out! Let's go with meeting on the morning of October 31. We'd like to begin about 8:00/8:30am and conclude by 11:30am.

Those attending (may add others): Michael Okerlund Leavitt; Mark (Bo) Stephen Nemelka

Please let me know what to plan on for their arrival. We will fine-tune the meeting time agenda as our team coordinates with each other.

Is this all you need for now?

My colleagues and I have been quite heavily involved in helping the National Association of Chronic Disease Directors carry out their important work. I know you are well aware of their work.

With whom should I speak with to align an appointment?

A handwritten signature in black ink that reads "Mike Leavitt". The signature is written in a cursive, flowing style.

Michael O. Leavitt
Leavitt Partners
Founder

Suzanne Severe | Executive Assistant to Michael O. Leavitt & W. Brett Graham | Leavitt Partners, LLC | 801.326.3548 (desk) 801.706.5457 (mobile) | www.leavittpartners.com

Mike Leavitt

Founder

Mike Leavitt is the founder of Leavitt Partners where he helps clients navigate the future as they transition to new and better models of care. In previous roles, Mike served in the Cabinet of President George W. Bush (as Administrator of the Environmental Protection Agency and Secretary of Health and Human Services) and as a three-time elected governor of Utah.

Mike grew up in Cedar City, Utah, where his upbringing was rooted in the values of the American West, with its emphasis on hard work and common sense. He earned a bachelor's degree in business while working in the insurance industry. In 1984, he became chief executive of The Leavitt Group, a family business that is now the nation's second largest, privately held insurance brokerage.

In 1993, Mike was elected governor of Utah. He served three terms (1993-2003). In 2003, he joined the Cabinet of President George W. Bush, serving in two positions: first as administrator of the Environmental Protection Agency (2003-2005) and then as secretary of Health and Human Services (2005-2009). At HHS, he administered a \$750 billion budget — nearly 25 percent of the entire federal budget — and 67,000 employees.

He led the implementation of the Medicare Part D Prescription Drug Program. The task required the design, systematization, and implementation of a plan to provide 43 million seniors with a new prescription drug benefit. By the end of the first year, enrollments exceeded projections, prices were lower than projected, and seniors expressed high levels of satisfaction.

Mike's strategic ability can be seen in his redesign of the nation's system of quality and safety standards for imported goods. In the spring of 2006, President Bush assigned him to lead a government-wide response. Within months, he commended a major strategic shift in U.S. policy on import regulation and trade.

A pattern of innovation runs throughout Mike's career. When he was elected governor, Utah's major freeway system was dangerously inadequate. Taking what some thought was a significant political and financial risk, Mike instigated a design-build system, creating cost and quality incentives between the state and its contractors. The project was finished in half the originally projected time and well under budget.

Mike is, at heart, an entrepreneur. As governor, he organized a group of his colleagues to form Western Governors University. At WGU, degrees are earned based on competency rather than

credit hours. WGU now has more than 60,000 students who reside in each of the 50 states and several foreign countries. Enrollment is growing at 35 percent a year. In November 2008, *TIME* magazine named WGU “the best relatively cheap university you’ve never heard of.”

Collaborator is a word that comes up repeatedly when one examines Mike’s background. His skill led his colleague governors to elect him as chairman of the National Governors Association, the Republican Governors Association and Western Governors’ Association. His book—*Finding Allies, Building Alliances*—was released in September 2013 by Jossey-Bass Publishers and chronicles his expertise and passion for collaboration.

Mike is a seasoned diplomat, leading U.S. delegations to more than 50 countries. He has conducted negotiations on matters related to health, the environment, and trade. At the conclusion of his service, the Chinese government awarded him the China Public Health Award – the first time this award has ever been given to a foreign government official.

Bo Nemelka

Director of Business Development

Bo Nemelka is the director of business development at Leavitt Partners. In this role, Bo develops strategic initiatives and builds relationships to support business growth across the Leavitt Partners enterprise. Bo also specializes in the transition to value-based health care and its impact on public health, specifically chronic disease prevention and management.

Bo has worked at Intermountain Healthcare and the University of Utah Hospitals & Clinics. At both health systems, he worked directly with senior management executing top administrative priorities. Particularly at Intermountain Healthcare, Bo successfully led several innovative business and operations projects, leading to significant cost savings and improved administrative efficiency.

Bo was the student body president at the Yale School of Public Health where he received a graduate degree in Public Health and Health Care Management. Bo received his bachelor’s in

Marketing and Business from the Jon M. Huntsman School of Business at Utah State University. Bo is a published author with Simon & Shuster.

John W. Robitscher, MPH, CEO

Chief Executive Officer

As Chief Executive Officer of the National Association of Chronic Disease Directors, John Robitscher, MPH, provides direction and leadership to achieve NACDD's Mission, strategic plan, and annual operating and fundraising plans; and serves as steward of the Association's funds. Since joining NACDD in 2005, he has led the organization's acquisition of more than \$100 million in funding for hundreds of chronic disease prevention and health promotion programs across all 50 states and U.S. territories.

John has more than 30 years of experience managing nonprofit organizations. Prior to joining NACDD, John served as the Executive Director of the Henry W. Grady Foundation and as a fellow at the Centers for Disease Control and Prevention's National Center for Chronic Disease Prevention and Health Promotion. John also served as the Chief Development Officer for the International Life Sciences Institute's Center for Health Promotion. A former Chronic Disease Director, himself, John was the Director of Rural Health for the Georgia Department of Public Health from 1998-2000.

John holds a Master of Public Health degree from the Rollins School of Public Health at Emory University and a Bachelor of Arts in Political Science from Emory University. He is the current Chair of the Association of State and Territorial Health Officials' Affiliate Council, a board member of the Population Health Alliance, and a national trustee of the Omicron Delta Kappa National Leadership Honor Society. John and his wife Linda live in Atlanta, and his son, Walker, is in college.

Subject: RE: Monthly flu/pandemic briefing?

Good afternoon Denise,

The earliest Dr. Redfield would be available is October 19th.

Please note some options below for scheduling a recurring 30 minute meeting.

- 3rd Fridays of the month starting October 19th from 2-2:30 p.m.
- 1st Tuesdays of the month starting November 6th from 11-11:30 a.m.

Please keep in mind these meetings are subject to be rescheduled.

Please let me know if any of these dates would work.

Thanks,
Teresa

Subject: Monthly flu/pandemic briefing?

Hi Ashley- as follow up to the recently completed series of influenza "special topics" briefings that we provided for Dr Redfield, we would like to propose a monthly briefing to provide updates on seasonal and influenza pandemic. We conducted these briefings for Dr Frieden and Dr Schuchat during their terms as CDC Director, and they were helpful in ensuring that the Director has up to date information on the current season as well as the status of pandemic planning for the agency. Please advise on whether

there is interest from Dr Redfield in having these briefings, I can work with you and colleagues in the OD to schedule.

Thanks,
Denise

Good morning Alison,

Unfortunately Dr. Redfield is not available today. The HHS Deputy Secretary is visiting CDC today.

Would any of the times below work for a call tomorrow for a 15 minute call.

11:15-11:45 a.m.
3:30-4:00 p.m.

Please give Dr. Grigsby our sincere apologies for Dr. Redfield missing the call on yesterday.

He was at the airport and was most likely going through security.

Best,
Teresa

Hi Ashley and Tracie,

Thank you both! Our front office sent a calendar invite for that time on Monday.

Ashley, thank you very much for flagging Dr. Redfield's interest and availability – we've flagged it here as well, and will get back to you on that ASAP. You're correct that PAHO invited Ministers+1 from each country (so for us, the plan is that it would be AMA + Garrett) but we're also talking to PAHO about the possibility of room for a very small additional USG observer group, and will have more soon.

Thank you!
Laura

Hi there!

I think 2:30 might work, but I'm adding Tracie to this chain, as she is the keeper of the calendar.

Also, do you know whether or not we should expect a request for his participation at PAHO on the 29th? It is our understanding that it will be AMA +1, which we expect will be Garrett. However, Dr. Redfield is prepared and happy to participate any portion of that day, if the Secretary thinks it will be useful.

Thanks!

Ashley

Hi Ashley,

Garrett would also like to schedule a brief (15 min) phone call with Dr. Redfield early next week, so that he can connect with him on the moderator role and make sure he has the information that he would need from OGA about the objectives of the session. Garrett's calendar is open from 12:30-3:00 pm on Monday 11/26 – would that time also work for Dr. Redfield's schedule?

Thank you!
Laura

Dear Colleagues,

Thank you for your input into the planning process for this meeting thus far. Attached please find a draft agenda for the meeting as well as concept notes for the first two sessions (we are working on drafting the final concept note this afternoon and will send it as soon as we can). We plan to share these concept notes with all participants before the meeting to help them prepare. These concept notes should also help our moderators prepare for their role in the meeting. We ask for your review of the attached and welcome your edits and additions.

We will also work with each of you to prepare a Moderator's Guide for each session that will include information for your Principal's participation including logistics info, framing remarks, etc. We will look to you to help us include the information you Principal expects in their briefing materials.

If you could send your feedback by **this Wednesday COB** we would really appreciate that.

Very Respectfully,

Subject: Invitation for Dr. Redfield to join a small group NSC meeting Mon, Nov 19

Good morning,

You may already be aware, but we've received notification this morning that NSC is hosting a small group meeting on Monday, Nov 19 1-2:30pm. This is a restricted meeting and Hillary Carter has requested Dr. Redfield attend. Dr. Redfield's attendance requires that HHS reads him onto several items before he can participate. I've notified HHS and will facilitate getting him read onto as needed.

Please keep me informed of Dr. Redfield's plans for attending this meeting, so I can work with HHS to ensure he's read into all necessary items prior to attendance. I am happy to provide additional context – feel free to call, but note that any detailed discussions will require a conversation in our spaces, due to the restrictions involved.

Thank you,
Neely Kilgore

thanks much joel.

have seen most of the facilities in the past so probably not necessary to repeat parts of the tour.

happy to do the global health session as well. bob had mentioned an all hands as part of director's series. not sure if you'd want to do both since you might be encouraging global health staff not to attend the director's series but am happy to do both to spend more time with the global health folks. whatever you think best.

thanks much
mark

<vhi9@cdc.gov> wrote:

Thank you for the prompt response, Dr. Dybul. We'll absolutely keep those broad categories in mind as we pull this together.

In addition, please let us know if you have any interest in touring our emergency operations center or other facilities, including the CDC insectary. For additional awareness, we also organize a seminar series titled, Global Health Matters. We have used this forum to provide our guests with a forum to engage CDC broadly on a particular topic with time for Q&A. We would like to graciously extend you an invitation to speak while visiting. Please let me know, and we will move forward with making those arrangements as well.

Many thanks and have a great evening.

Hello Amanda,

It's very nice to meet you as well. We should be able to finalize dates by early next week at the latest. In the meantime, we will put together a draft agenda for Dr. Dybul's consideration. If there are particular topics of interested beyond or within global health security, we can include those.

More to come!

take care,

Hello all,

Its nice to meet you. For this upcoming trip, Mark is free for either 16-17 or 17-8; whatever works best on your end.

Have you though through details for the trip as far as meeting times, and or dinner? If not please let me know when you do so we can start looking into flight options for Mark.

Thank you,

Amanda

Thanks folks,

Indeed Aud A. is scheduled for Oct and then Aud B. for the holiday season. These projects were to be completed last year but were rescheduled to accommodate the now completed CDC Auditorium Upgrades at Atlanta campuses. These two projects are the overhaul of the GCC Audio Infrastructure in the GCC Auditoriums and the Operations Control Center.

Thanks,
Scott

Subject: RE: Coming to cdc [Dr. Mark Dybul's Visit to CDC]

Hi Dr. Dybul,

Excellent, thank you for the prompt response – I hope you had a great holiday weekend.

I'll be working with Joel Stanojevich to develop the agenda for your visit to CDC. We will plan on scheduling meetings from approximately 9am-2:30pm on Monday, October 15th, leaving you enough time to get to the airport for a 5pm flight on the 15th. Traffic shouldn't be too bad at 2:30pm. We will follow-up shortly with a draft agenda for your visit and a recommendation regarding dinner on Sunday the 14th.

Regarding a hotel, I think you may be referring to the [Emory Conference Center Hotel](#), which is right across the street from CDC and very convenient. We would certainly recommend booking here, but if rooms are unavailable there are some other options near the area that we could recommend as well:

- [Courtyard Atlanta Executive Park/Emory](#)
- [DoubleTree by Hilton Hotel Atlanta North Druid Hills – Emory Area](#)
- [Courtyard Atlanta Decatur Downtown/Emory](#)

Let us know if you have any questions.

Take care,
Sukeshi

Subject: Re: Coming to cdc [Dr. Mark Dybul's Visit to CDC]

Hi Teresa

Yes I can do that coming in sun evening. Am guessing beat not to think about a dinner since people should have the few weekends that have at home at home. But please let us know since I can land at either 5 or 7

I would then plan to take a 5 pm flight so could have meetings at Cdc until around 230/3. If I remember correctly there is a metro close to campus that goes to the airport if traffic is already heavy by then.

Also can you please recommend a hotel near campus? Seem to remember there was a large newish one walking distance but perhaps am confusing that with Emory.

Thanks and happy Labor Day weekend

Mark

hi teresa

the 15th would be great. could get a flight to land 1pm if afternoon town hall/director's series works for that afternoon, have meetings after and following morning to catch a flight back at 140. would that work?

thanks much
mark

Good afternoon Dr. Dybul,

Unfortunately we need to look at alternate dates after October 19th.

There are AV upgrades being made to our auditoriums.

Could you please offer some dates when you would be available after October 19th?

My apology of any inconvenience.

Best,
Teresa

Good morning, Dr. Dybul.

I had not realized that Dr. Redfield had suggested an All Hands. In this case, I don't think there is a need for an additional global health seminar. Thanks again, and we are very excited to have you back for a visit!

Best,
J

thanks much joel.

have seen most of the facilities in the past so probably not necessary to repeat parts of the tour.

happy to do the global health session as well. bob had mentioned an all hands as part of director's series. not sure if you'd want to do both since you might be encouraging global health staff not to attend the director's series but am happy to do both to spend more time with the global health folks. whatever you think best.
thanks much
mark

Thank you for the prompt response, Dr. Dybul. We'll absolutely keep those broad categories in mind as we pull this together.

In addition, please let us know if you have any interest in touring our emergency operations center or other facilities, including the CDC insectary. For additional awareness, we also organize a seminar series titled, Global Health Matters. We have used this forum to provide our guests with a forum to engage CDC broadly on a particular topic with time for Q&A. We would like to graciously extend you an invitation to speak while visiting. Please let me know, and we will move forward with making those arrangements as well.

Many thanks and have a great evening.

Hello all,

Its nice to meet you. For this upcoming trip, Mark is free for either 16-17 or 17-8; whatever works best on your end.

Have you though through details for the trip as far as meeting times, and or dinner? If not please let me know when you do so we can start looking into flight options for Mark.

Thank you,
Amanda

Subject: RE: Aud-A & Aud-B A/V Upgrades

Thanks folks,

Indeed Aud A. is scheduled for Oct and then Aud B. for the holiday season. These projects were to be completed last year but were rescheduled to accommodate the now completed CDC Auditorium Upgrades at Atlanta campuses.

These two projects are the overhaul of the GCC Audio Infrastructure in the GCC Auditoriums and the Operations Control Center.

Thanks,
Scott

Hi Teresa

Yes I can do that coming in sun evening. Am guessing beat not to think about a dinner since people should have the few weekends that have at home at home. But please let us know since I can land at either 5 or 7

I would then plan to take a 5 pm flight so could have meetings at Cdc until around 230/3. If I remember correctly there is a metro close to campus that goes to the airport if traffic is already heavy by then.

Also can you please recommend a hotel near campus? Seem to remember there was a large newish one walking distance but perhaps am confusing that with Emory.

Thanks and happy Labor Day weekend

Mark

thanks much joel.

have seen most of the facilities in the past so probably not necessary to repeat parts of the tour.

happy to do the global health session as well. bob had mentioned an all hands as part of director's series. not sure if you'd want to do both since you might be encouraging global health staff not to attend the director's series but am happy to do both to spend more time with the global health folks. whatever you think best.

thanks much

Attachments: Mark Dybul Visit to CDC Agenda_draftv4.docx

Hi all,

I've added in some more run-of-show specifics for the Director's Speaker Series/Director's Forum event. Please use this version in sharing with Dr. Redfield for input.

thanks,

Mansi

Hi All,

Please see attached for an updated draft agenda based on our discussion today – standing by for feedback after we hear from Dr. Redfield and Dr. Dybul.

Take care,
Sukeshi

Thanks Sukeshi for sending this out.

In addition to the questions below, we'd like you to add/revise these questions as well:

(b)(5)

I plan to meet with KLD to discuss this this afternoon at 3 so I may have some revisions to this after that meeting. Do you mind holding on sending to Mark until after I meet with KLD?

Thanks!

Subject: RE: Mark Dybul Planning Call

Hi All,

As a follow-up to our meeting yesterday, I have attached an updated agenda for Dr. Dybul's visit to CDC on 10/15. It seems if Dr. Dybul participates in both the CDC Senior Leadership Meeting and the HIV Brief & Lab Tour there will not be much time for additional meetings/discussions. However, we do have some options if he participates in one or the other. We've added a couple of comments to identify where there are opportunities for adjustments depending on Dr. Redfield's priorities for the visit, but let us know if you have any questions.

I've also listed some draft questions below for Dr. Dybul when we reach out to him today to touch-base and set up a call for the middle of next week (likely Weds). Mansy and Brad, let me know if we've captured all of the comms/logistics questions that we will need answers to in the short term.

(b)(5)

Thanks and take care,
Sukeshi

Mark Dybul

Visit to the U.S. Centers for Disease Control and Prevention
Atlanta, Georgia
October 15, 2018

Visit Purpose: Dr. Mark Dybul, the new Faculty Co-Director of Georgetown University Medical Center's Center for Global Health and Quality, is the previous Executive Director of the Global Fund to Fight AIDS, Tuberculosis and Malaria and US Global AIDS Coordinator for the President's Emergency Plan for AIDS Relief (PEPFAR). He will be visiting CDC to present at the Director's Speaker Series, meet with CDC, CGH, and other CIO leadership, and discuss CDC's global health activities related to Dr. Dybul's interest in supporting capacity-building for delivery of data-driven quality health care for greater impact.

Visit Objectives:

1. Hear Dr. Dybul's priorities for Georgetown University's Center for Global Health and Quality.
2. Provide Dr. Dybul with a high-level overview of CDC's global health activities.
3. Discuss collaborations around utilization of limited resources to control TB and malaria.

Previous Engagements:

- This is the first engagement between CDC and Dr. Dybul in his new role at Georgetown University.
- Guest speaker at the 14th Annual Jeffrey P. Koplan Global Leadership in Public Health Lecture on December 15, 2016 as the Executive Director of the Global Fund.

U.S. CDC Contacts:
