

To whom it may concern:

Hereby we request to ICE and Homeland Security supervisors that We,

The Immigrants, detained for a very long period of time in the named detention center, request to you for freedom under any condition and supervision terms, parole, bond, bail or GPS tracker which apply in each case.

It is not a surprise for anyone the threat we are living with "*The Coronavirus*" with many death around the world in a very short time due to the easy spread way of this virus, now is a **Pandemic**, and the United States is one of the "*TOP 4*" most infected countries.

We are not criminals, our unique crime was to come to this country looking for asylum, and in this moment our biggest fear; we haven't the sanitizer-hygienic conditions needed if the Virus would get into the center, and we can't affront it because the internal health system does not count with the minimal essential resources. If the situation would be plainly covered, we are every day exposed because ICE and detention officers in and out from the center with only temperature checking, and is known that the Virus is contagious even when no symptoms. We are in rooms with a capacity of 100 people.

The country in going through an extremely difficult and dangerous moment, and unfortunately either the resources nor the hospitals nor people from the health system are enough. Louisiana like New York have become in the "*Epicenter*" of the Pandemic in this country and we know this mortal virus is less than 10 minutes from our current position, and we are afraid because it's about our life what we are talking about, nobody can minimize that, we want to touch your Human Sensibility to find the best answer to our cases and also we want to know about who is the one with such responsibility.

Waiting that our petition would be conceded and favorable answer, we appreciate the attention and send you the best of luck.

Postscript: we sent a copy to ICE and Homeland Security
