## OCEAN HEALTH ACTIVIST & ENVIRONMENTAL ATTORNEY

[www.saveoceanlife.com](http://www.saveoceanlife.com)

Danny Quintana's latest book, *Space & Ocean Exploration: The Alternative to the Military-Industrial Complex*, was written as an economic thesis on the U.S. Defense Budget and became the launching pad for his *Save Ocean Life Global High Seas Marine Preserve Foundation* dedicated to preserving marine life, banning industrial fishing, curbing pollution of the high seas and limiting the effects of climate change on the oceans and their valuable ecosystems.

*“Despite the huge environmental problems facing our tiny planet, I am optimistic. Environmental problems can be solved. With governments, industry and non-profits all working together, we can and will change humanity's path from consumerism and conspicuous consumption to sustainability and co-existence with our Earth Mother. Young people understand environmental problems and are willing to make a difference. Be optimistic — the change begins with you,”*  
 Danny Quintana

DANNY QUINTANA

We propose the creation of a *Global High Seas Marine Preserve* to close off the high seas to commercial fishing. The U.S. Navy working with navies of other countries can enforce wildlife zones in the oceans that will revive the fish stocks. The problem of the collapse of the fish stocks and plastic in the ocean cannot be solved with 10 U.S. aircraft carrier battle groups or by one nation. We need to work together with other nations. Ecosystems do not recognize national boundaries.

### DANNY QUINTANA IS AN EXPERT ON THE FOLLOWING ISSUES:

- OCEAN HEALTH
- INDUSTRIAL FISHING
- GOVT. POLICY
- FISHERIES
- OCEAN POLLUTION
- MARINE LIFE HEALTH
- U.S. DEFENSE BUDGET
- OCEAN ECOSYSTEMS
- ENVIRONMENTAL ACTIVISM
- MARINE RESEARCH
- FOOD SAFETY
