

LAUSD  
Common Core Technology Project  
UTLA iPad survey November 2013  
Total respondents: 255

### **Summary-UTLA survey on LAUSD's Common Core Technology Project (iPad Rollout)**

UTLA conducted the online survey in conjunction with Board of Education member Monica Ratliff. We polled members who teach at the 47 schools that are part of Phase I of the iPad rollout. The survey was available at [www.utla.net](http://www.utla.net) for seven days and closed on October 24 with 255 respondents. Not all 27 questions of the survey were mandatory except for questions one and two.

Of those who responded, 92% are high school teachers of grades 10-12 and 69% use the iPads for English and Math subjects.

About 73% received CCTP training with 37% receiving 16-20 hours or more of training. 63% said they did not receive adequate training from the district. Based on open comments, 45% stated they are dissatisfied with Pearson training and say more professional development (PD) is needed. 25% say that Pearson lesson plans are incomplete and do not align to the Common Core.

50% said the rollout was not organized and smooth, and 60% strongly disagree or disagree that the District provided sufficient information to parents, 58% strongly disagree or disagree teachers received sufficient information and 58% strongly disagree or disagree that classified staff received sufficient iPad information.

Out of 167 respondents, 72% said they have wireless connectivity issues with 60% stating the second highest issue is sign-on/password issue.

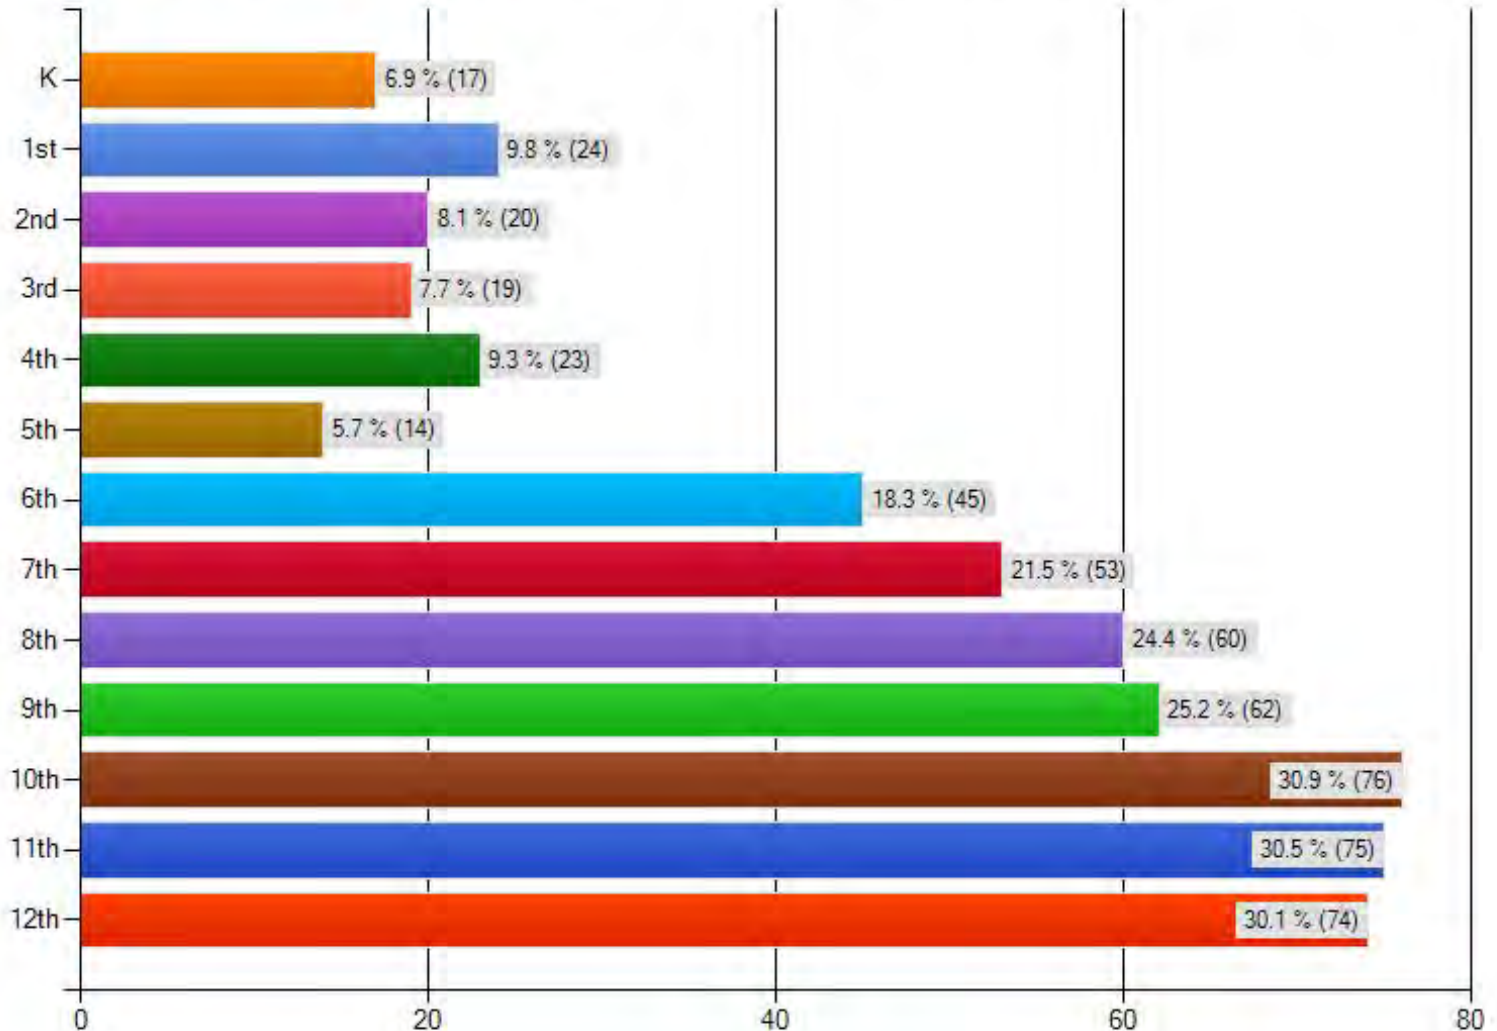

Out of 117 respondents, 76% are using iPads less than 5 hours a week. Of 173 respondents, 36% percent recommend that the iPad program continue. Based on open comments, 22% said they will support the iPad program conditionally if the District works out glitches and incrementally rolls out the remaining phases. Based on open comments, 21% are against the program altogether for reasons that the iPad offers limited writing and storage use and is over-priced. 8% fully support the program highlighting positive results and use in their classrooms.

Finally, Out of 172 respondents, 51% say iPads should not be taken home.
